Institutional Euro Government Liquidity Fund

Institutional Cash Series plc (Core share class)

Investment Objective

The Fund aims to maximise income on your investment consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold in the market (in normal market conditions). It cannot be guaranteed that targets will be met.

Investment Policy

The Fund invests in a broad range of fixed income securities (such as bonds) and high quality short term money market instruments (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks).

Fund Specific Risks:

Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.

Loss of Capital: an automatic share redemption may occur which will reduce the number of shares held by each investor. This share redemption will result in a loss of capital to investors.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Risks:

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The value of investments and the income from them can fall as well as rise and is not guaranteed. You may not get back the amount originally invested.
