The percentage of the sub-fund's portfolio invested in the various instruments varies according to the valuation of the various classes of assets and market circumstances. However, the sub-fund invests at least 25% of its net assets in shares.
In order to achieve its objective, the sub-fund may invest a maximum of 10% of its net assets in open-ended investment funds.

## Risk and reward profile

**What does this synthetic indicator mean?**

- The shares of class BI are classified in category 4 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

**Which materially relevant risks are not adequately captured by the synthetic indicator?**

- The investment in shares bears an issuer risk insofar as the issuing company might go bankrupt. This may result in significant or even total losses of the value of the investments in these instruments.
- The investment in emerging markets exposes the sub-fund to risks related to political, regulatory, financial or fiscal instabilities or uncertainties that may negatively affect the value of the investments or even question the ownership title of the sub-fund.
- The investment in debt instruments bears a credit risk insofar as the issuer may refuse or be in a position where it is not able to reimburse all or part of the interests or even of the principal due on the debt instruments. This may result in significant or even total losses of the value of the investments in these debt instruments.
- The use of financial derivative instruments that are not listed on a stock exchange or traded on another regulated market ("over-the-counter instruments") bears a counterparty risk in the sense that the sub-fund's counterparty for such instruments may find itself in a position where it is not able to honor all or part of their obligations towards the sub-fund.
- Share index futures will be used for reducing the risks of the share markets, but will not as such eliminate them.
- Other risk factors, that an investor shall take into account with regards to his own situation and specific current and future circumstances, may exist.

**How can I get more information about the risks of the sub-fund?**

Additional information concerning the risks of investment in the sub-fund are indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the websites www.blfunds.com and www.bli.lu.
