EXANE ARCHIMEDES FUND – CLASS A (CODE ISIN: LU0417733242)
A sub-fund of the Exane Funds 1 Luxembourg SICAV
The fund is managed by Exane Asset Management

OBJECTIVE AND INVESTMENT POLICY

Investment objective: Exane Archimedes Fund (hereinafter "Archimedes") seeks to deliver an absolute and regular return decoupled from the financial markets by means of dynamic "long/short equity" investment management.

Investment strategy: Archimedes is managed on a discretionary basis, depending on the Investment Manager's expectations. The investment strategy consists in simultaneously managing a portfolio of long positions on companies considered to be undervalued, and a portfolio of short positions on companies considered to be overvalued. These transactions constitute an arbitrage technique that reduces Archimedes' exposure to market risk or to a specific sectoral risk. The risk generated by one or more exposures to a downturn in share prices should not be viewed in isolation but should be considered in the context of the overall portfolio and similar securities held by the Sub-fund in long positions. The risk associated with a sale of securities in this context is thus not absolute, but should always be considered as a relative risk.

Investment universe: In regional terms, the investment universe is international but focuses predominantly on European stocks. In sectoral terms, the majority of positions are concentrated in telecommunications sector in the broadest sense of the term in particular telecommunications operators and equipment manufacturers; technology sector in the broadest

sense of the term in particular software and information technology services, semiconductors, electronics and the internet; utilities sector in the broadest sense of the term.

Minimum recommended investment term: Archimedes may be unsuitable for investors wishing to withdraw their investment within two years.

Archimedes is an accumulation fund.

Potential leverage: The Investment Manager may use financial contracts to gain synthetic exposure to a company or market. The potential leverage resulting from these financial contracts is limited to 100% of the assets.

Net exposure of the portfolio: The portfolio's net exposure to equity market risk (long positions less short positions) is between -10% and 25%. This limited exposure to equity market risk aims in particular to maintain both low performance volatility and low correlation with equity indices.

Option of redeeming shares subscribed: investors may request the redemption of their shares before 4pm on each Paris stock market trading day.

RISK AND RETURN PROFILE

The synthetic indicator rates Archimedes on a scale of 1 to 7, but the risk category with which Archimedes is associated is not guaranteed and may change over time. The synthetic indicator was produced using past volatility records.

Archimedes has been placed in this category because of its diversified exposure to equity risk.

The lowest risk category does not mean "risk free".

Archimedes does not provide any guarantee of capital invested. Investors may not get back all the money they have invested.

Risks to which the Fund is exposed that have not been adequately taken into account by the indicator and could result in a fall in the net asset value:

Counterparty risk: Archimedes may incur losses through its commitments vis-à-vis a counterparty in connection with its swaps, CFDs, forward contracts, and borrowing and lending of securities in the event of the counterparty's default or its inability to fulfil its contractual obligations.

Credit risk: Archimedes is invested in debt securities issued by first-rate issuers that may nevertheless find themselves in the position of being unable to fulfil their commitments.

Please see the Fund's prospectus for further information about risks.

CHARGES FOR CLASS A

The charges and fees payable are used to cover the Fund's operating expenses, including the cost of marketing and distributing the shares. These charges limit the potential growth of the investments.

One-off charges taken before or after you invest	
Entry charges	Max 5%
Exit charges	None
The percentage indicated above is the maximum that can be taken from your capital before it is invested.	
Charges taken by the Fund over one year	
Ongoing charges	1.57 % TTC
Charges taken by the Fund under specific conditions	
Performance fee	Maximum 20%, including all taxes, of performance exceeding the capitalised Eonia+1% of annual performance with application of a High Water Mark mechanism. Amount of performance fee invoiced for the last financial year: 0.70 %.

Class A EUR is intended for Institutional Investors.

The entry and exit charges indicated above are always maximum figures. In some cases investors will pay less than these amounts. Investors can obtain a statement of the actual amounts of entry and exit charges from their financial advisors.

Please see section IX of the prospectus on and section 12 of the supplement relating to Archimedes for further information about charges and fees and the High Water Mark mechanism applicable to the performance fees.

Ongoing charges do not include performance fees and transaction charges. The rate of the ongoing charges is based on the ongoing charges invoiced for the financial year ended December 2014 and may vary from one year to the next.

PAST PERFORMANCES FOR CLASS A

Past performance is not a reliable guide to future performance. Performance may vary over time.

The Archimedes A Share was launched on 27 September 2006. Charges and fees are included in the performance figures given. The performance shown is calculated in EUR.
