FUND FACTSHEET

JUPITER MERIAN NORTH AMERICAN EQUITY FUND (IRL)

I CLASS | USD | ACCUMULATION

AS AT 30 JUNE 2022

EQUITIES **FIXED INCOME** **ALTERNATIVES**

FUND OBJECTIVE

The objective of the Fund is to seek to achieve long term capital growth through the active management of a diversified portfolio invested primarily in North American stock markets. It is not proposed to concentrate investments in any one industry or sector. In seeking to achieve its investment objective, the fund aims to deliver a return, net of fees, greater than that of the MSCI North America Index with net dividends re-invested over rolling 3 year periods.

SYSTEMATIC EQUITIES TEAM

Headed by Amadeo Alentorn, and including Ian Heslop, James Murray, Matus Mrazik, Tarun Inani, Yuangao Liu and Sean Storey.

Performance (SINCE INCEPTION)

Past performance is not a guide to future performance. The benchmark is a point of reference against which the performance of the Fund may be measured. The Fund is managed having regard to the benchmark; however the Fund does not track the benchmark. Source: Factset. © Morningstar. All Rights Reserved. I USD Accumulation terms. All information as at 30/06/2022 unless otherwise stated. The benchmark is a representation of the markets in which the Fund primarily invests. Although a large proportion of the Fund's investments may be components of the Index, the Fund has the ability to deviate significantly from the Index.

RISK AND REWARD PROFILE

Typically lower rewards
Lower Risk

Typically higher rewards
Higher Risk

1	2	3	4	5	**6**	7

Synthetic Risk Reward Indicator (SRRI):
The SRRI is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The lowest category does not mean 'no risk'. Please see the KIID for further information.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
REITs risk - REITs are investment vehicles that invest in real estate, which are subject to risks associated with direct property ownership.
Geographic concentration risk - a fall in the US and Canadian markets may have a significant impact on the value of the Fund because it primarily invests in these markets.
Company shares (i.e. equities) risk - the value of Company shares (i.e. equities) and similar investments may go down as well as up in response to the performance of individual companies and can be affected by daily stock market movements and general market conditions. Other influential factors include political, economic news, company earnings and significant corporate events.
Currency risk - the Fund can be exposed to different currencies. The value of your shares may rise and fall as a result of exchange rate movements.
Derivative risk - the Fund uses derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.
For a more detailed explanation of risks, please refer to the **"Risk Factors"** section of the prospectus.

OTHER INFORMATION

Past performance is not a guide to future performance and may not be repeated. Investment involves risk. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, an investor is not certain to make a profit on an investment and may lose money. Exchange rate changes may cause the value of overseas investments to rise or fall.

- The net asset value of the Fund may have high volatility due to the nature of the asset class invested.

Your attention is drawn to the stated investment policy which is set out in the Fund's prospectus.

In Spain, Jupiter Asset Management Series plc is registered with the Comisión Nacional del Mercado de Valores under number 301. Jupiter Investment Management Limited is registered under number 2479. The prospectus, KIID and the latest economic reports can be obtained at no cost from registered distributors as per the list available on the CNMV web page. In the Republic of Finland, this communication is not intended to constitute a public offer or an advertisement of securities. In Italy, this material is for the exclusive use of "professional clients or professional investors" (as defined in Legislative Decree no 58/1998 by reference to Annex 3 of CONSOB Regulation no. 20307 of 2018) and its dissemination to retail investors/clients is prohibited. In Luxembourg, this information does not constitute, under any circumstances, an offer or an invitation to purchase or sell shares in Luxembourg and does not and is not intended to constitute an offer of shares in the Grand Duchy of Luxembourg. It does not constitute legal, accounting, or tax advice. Jupiter uses all reasonable skill and care in compiling the information in this communication which is accurate only on the date of this communication. You should not rely upon the information in this communication in making investment decisions. Nothing in this communication constitutes advice or personal recommendation. An investor should read the Key Investor Information Document(s) ("KIID") before investing in the Fund. The Prospectus and KIID are available in English and other languages required by the local applicable law free of charge online at www.jupiteram.com. A summary of investor rights in English can be found in the Document Library at www.jupiteram.com. The Management Company may terminate marketing arrangements. The Morningstar Analyst RatingTM is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five-pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark over the long term on a risk adjusted basis. They consider quantitative and qualitative factors in their research. For actively managed strategies, people and process each receive a 45% weighting in their analysis, while parent receives a 10% weighting. For passive strategies, process receives an 80% weighting, while people and parent each receive a 10% weighting. For both active and passive strategies, performance has no explicit weight as it is incorporated into the analysis of people and process; price at the share-class level (where applicable) is directly subtracted from anexpected gross alpha estimate derived from the analysis of the other pillars. The impact of the weighted pillar scores for people, process and parent on the final Analyst Rating is further modified by a measure of the dispersion of historical alphas among relevant peers. For certain peer groups where standard benchmarking is not applicable, primarily peer groups of funds using alternative investment strategies, the modification by alpha dispersion is not used. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. For active funds, a Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's expectation that an active fund will be able to deliver positive alpha net of fees relative to the standard benchmark index assigned to the Morningstar category. The level of the rating relates to the level of expected positive net alpha relative to Morningstar category peers for active funds. For certain peer groups where standard benchmarking is not applicable, primarily peer groups of funds using alternative investment strategies, a Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's expectation that a fund will deliver a weighted pillar score above a predetermined threshold within its peer group. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to **https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx. The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause the Manager Research Group's expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.** © 2022 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Ongoing Charges Figure (OCF) is based on fees and expenses over the 12 months prior to the most recent KIID (for Ireland domiciled funds) or annual report and accounts (for Luxembourg domiciled funds). It includes the Annual Management Charge and aggregate operating fees chargeable to the Fund, which are used to pay running costs including marketing and distribution. The OCF excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). An initial charge may apply when purchasing a fund. Overall, these charges reduce the potential growth and return on your investment. They may increase or decrease as a result of currency and exchange rate fluctuations. The charges shown represents the maximum charges and in some cases you may pay less. You can find out your actual charges from your financial adviser or distributor. You can learn more about charges in the Fund's Prospectus/Scheme Particulars.

PRI Principles for Responsible Investment

JUPITER ASSET MANAGEMENT

Jupiter Factsheet – Glossary

Absolute return : the total return of an asset, portfolio or fund over a given period of time OR an investment approach that attempts to achieve a return which is not benchmarked against an index

Ask / Bid price : the lowest price a seller is willing to sell a security for / the highest price a buyer is willing to pay for a security

Bond : a debt instrument ('I Owe You') issued by a company (corporate bond), government (sovereign/government bond) or other institution in order to raise money. In most cases, bonds pay a fixed interest rate (coupon) over a fixed period of time and will be repaid on a particular date. **See Coupon**

CFROI : means cash flow return on investment

Convertibles : securities (e.g. bonds or preference shares) that can be exchanged at some point in the future for a specified number of shares at a specified price of the company issuing the securities. **See Bond.**

Coupon : denotes the interest in % paid on a bond See Bond.

Credit rating : an assessment of a borrower's credit worthiness, i.e. the likelihood of the borrower to repay its debts.

Delta/Weighted Average Delta : delta measures the change in value of a derivative from a change in the price of the underlying asset. It is sometimes referred to as the "hedge ratio." **Weighted Average Delta** refers to the overall delta of a collection of derivatives based on the delta of each individual derivative and their respective "weight" or size in the collection as a whole. **See Derivative.**

Derivative : a financial instrument that derives its value from its underlying assets. Common underlying assets include stocks, bonds, commodities, currencies, interest rates and market indices. Futures contracts, forward contracts, options and swaps are the most common types of derivatives. Derivatives can be purchased 'on margin', i.e. at a fraction of the value of the underlying asset. Thus, they are 'leveraged' instruments where the risk of loss can be greater than the initial outlay. Derivatives can be used like insurance contracts (i.e. to hedge market risk) or for investment purposes. **See Hedge, Leverage.**

Distribution Yield : the total interest paid by a fund divided by the fund's value.

Duration/Modified Duration : Duration estimates the sensitivity of a bond or bond fund to changes in interest rates. It is measured in years. The longer a bond's duration, the more sensitive it is to interest rate movements. Modified duration estimates the effect that a 1% change in interest rates will have on the price of a bond or bond fund.

Economic Gross : the gross exposure adjusted to account for investments with mutually exclusive outcomes, for example a short position hedge on a share that is also held as a long position. **See Gross exposure, Long/short position, Hedge.**

Effective Duration : estimates the sensitivity of a bond's price to changes in benchmark interest rates. Effective duration is required for the measurement of interest rate risk for complex types of bonds. **See Bond.**

Engagement : means dialogue with management teams and boards, including nonexecutive directors. Engagement enables us to assess and influence how businesses are managed.

Equity : a share representing an ownership interest in a company. Equity market means stock market.

Exchange Traded Fund (ETF) : a fund vehicle that is traded like a stock on a stock exchange. It is used to track and mimic the performance of a specific market index.

Exposure : Describes the level of risk to a particular asset, asset type, sector, market or government. Also, the directional market exposure of a (absolute return) fund. **See Absolute Return, Gross/Net exposure.**

Fixed interest/income : denotes debt instruments (securities) that pay a fixed interest rate (e.g. bond, commercial paper). Also, a universal term for bond or debt investing. **See Bond**

Floating rate note (FRN) : a bond with a variable interest rate. The interest rate is variable as it is tied to a benchmark such as LIBOR (London Interbank Offered Rate). **See Bond.**

Futures : an exchange traded contract between two parties to buy or sell a commodity or a financial instrument at a pre-determined price at a future date. **See Bond Future, Derivative.**

Gearing : measures a company's borrowings (debt) as a proportion of assets. **See Leverage.**

Gross exposure : the percentage value of the long positions plus the percentage value of the short positions. **See Net exposure.**

Hedge : an investment designed to reduce the risk of adverse price movements in an asset by taking an offsetting position. Derivatives are usually used as hedging tools. **See Derivative.**

High Water Mark : the highest level that a fund's net asset value (NAV) has reached at the end of any 12-month accounting period. **See Net Asset Value.**

Hurdle Rate : the minimum level of return required before a fund can charge a performance fee. **See Performance fee.**

Leverage : the use of financial instruments (e.g. debt) to increase the potential return of an investment. **See Notional value.**

Liquidity : measures how easily an asset or security can be converted into cash.

Long/short position : a long position is buying a security with the expectation that it will deliver a positive return if its value goes up and a negative return if its value falls. Conversely, a short position involves selling a borrowed security with the expectation of buying it back at a lower price to make a profit. However, if the security goes up in value, a short position will make a loss.

Maturity : refers to a finite time period at the end of which a security/debt instrument is due to be repaid. **See Bond.**

Money market : markets in which short-term (less than one year) debt instruments are traded. Money market instruments are typically cash deposits and commercial papers.

Net asset value : in relation to a fund, the market value of its assets less its liabilities. The market value is usually determined by the price at which an investor can redeem shares.

Net exposure : the percentage value of the long positions less the percentage value of the short positions. **See Gross Exposure, Long/short Position**

Non-rated bonds : bonds that are not rated. **See Bond.**

Notional value : commonly used in relation to a derivative, denotes the theoretical value of its underlying asset. **See Derivative**

Open-ended Investment Company (OEIC) : a fund vehicle, which can issue a limitless number of shares whose value are directly linked to the value of its underlying investments. OEICs normally list a single price based on the NAV. **See Net Asset Value**

Performance fee : a fee paid to an asset manager for generating positive returns above a hurdle rate.

Preferred bonds : have greater seniority when a bond issuer repays its debts. In the event that the issuer cannot repay all its debt, the holders of preferred bonds will be further forward in the queue for repayment than holders of other ('nonpreferred') bonds.

Risk and Reward Profile : The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest rank does not mean 'no risk'. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund.

Share : a unit of ownership interest in a company or financial asset. **See Equity.**

SICAV : Société d'Investissement à Capital Variable. A type of open-ended fund widely used in Europe.

Spread : the difference between the bid and the ask price of a single security. It can also refer to the difference in price between two securities. See Ask/Bid price. Total return: the capital gain or loss plus any income generated by an investment over a given period.

Stewardship : our responsibility to understand and manage investment risks we take on behalf of our clients. We consider material Environmental, Social and Governance ('ESG') information in the same way as we consider other types of investment analysis. These three factors enable us to evaluate how companies interact with the Environment (such as climate change), Society (human rights) and Governance (management). Stewardship entails a responsibility to monitor and engage with the companies in which we invest.

Sustainability : by appropriately considering ESG risks and engaging with companies, we strive to generate long term, sustainable returns for our clients.

Unit Trust : A fund vehicle which can issue a limitless number of units whose value are directly linked to the value of its underlying investments. Jupiter Unit Trusts are single priced, which means they have one price for buying and selling.

Value at Risk (VaR) : value at Risk, a mathematical way of measuring the maximum expected loss of an investment over a period of time.

Volatility : measures how much the price of a security moves up or down over a period of time. A stock that experiences big price swings has high volatility, while one which moves up or down in smaller increments has low volatility.

Yield to Maturity : Yield to maturity (YTM) measures the annual return an investor can anticipate for holding a particular bond until it matures. When considering an entire bond portfolio, an average yield is used based on the weightings of individual bonds within that portfolio.

Yield : the rate of interest or income on an investment, usually expressed as a percentage
