

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec Global Strategic Managed Fund

A sub-fund of Investec Global Strategy Fund
Managed by Investec Asset Management Luxembourg S.A.

Class F Accumulation shares hedged in euros
ISIN: LU0430080308

Objectives and investment policy

The Fund aims to provide income and grow the value of your investment over the long term.

The Fund invests around the world in a mix of different assets including: bonds (contracts to repay borrowed money which typically pay interest at fixed times); money market instruments (tradable securities where money can be invested for short periods); company shares; convertible securities (bonds which can typically be turned into company shares); derivatives (financial contracts whose value is linked to the price of an underlying asset); and other funds.

The bonds and money market instruments are issued by governments, institutions or companies.

Normally no more than 75% of the Fund is exposed, directly or indirectly, to the shares of companies.

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

The Investment Manager uses a currency hedging strategy (an investment technique which aims to protect the value of an investment against currency movements) that aims to ensure returns for investors in this euro share class will be aligned with those of investors in the currency that the Fund's investments are valued in, in this Fund's case US dollars.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because the mix of assets it invests in tends to fluctuate more widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives is not intended to increase the overall level of risk in the Fund. However, the use of derivatives may still lead to large changes in the value of the Fund and includes the potential for large financial loss.

Developing market: Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Investment trust: The prices of investment trust shares may trade at a higher or lower value than their underlying holdings may imply. This may create greater risk of financial loss.

Multi-asset investment: The Fund is subject to possible financial losses in multiple markets and may underperform more focused funds.

Third party operational: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix 1 of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2015. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in euro.

The Fund was launched on 6 February 1995 and this share class on 19 June 2009.

Practical information
