

FLORENCE BARJOU

Portfolio Manager
Lyxor Planet Fund

“Benefit from changes in the economic cycle and market conditions with a highly diversified fund that dynamically allocates across asset classes.”

A FLEXIBLE MULTI-ASSET ALLOCATION STRATEGY

Lyxor Planet Fund invests across a universe of seven asset classes to capture the best return opportunities throughout the economic cycle. It allocates to: equities (developed & emerging), bonds (sovereign, corporate and inflation), commodities and money market instruments. Investment decisions leverage Lyxor's fundamental research to identify both structural return drivers and short-term valuation anomalies.

DYNAMIC ALLOCATION THROUGH ETFs

The fund continually adjusts allocation to seize opportunities or mitigate risks. The principles of portfolio construction are optimum diversification, minimal correlation and exhaustive risk analyses. Lyxor's ETF expertise ensures that exposure to underlying asset classes is gained only through ETFs that are transparent and liquid. Consequently, the fund is cost-efficient, liquid and transparent.

EXPERIENCED TEAM, SPECIALIST INFRASTRUCTURE

Lyxor Planet benefits from the expertise of Lyxor's Multi-Asset Management team, which is known for its competence in global tactical asset allocation. The fund gains from the experience of Florence Barjou, the portfolio manager and head of strategy who has been at Lyxor since 2006, as well as from the input of cross-asset and quantitative research teams.

GLOSSARY

Annualized Return – a rate of return for a given period that is less than one year, but that is computed as if the rate were for a full year. The formula is as follows assuming that M is the total number of months of returns which are being measured within the Program: $(1 + \text{Cumulative Returns})^{(12/M)} - 1$.

Annualized Volatility – the square root of 12 multiplied by the Standard Deviation.

Sharpe Ratio – this is a formula used to measure risk-adjusted performance. This is calculated by subtracting the risk-free rate (in this case, 3M T-bill) from the rate of return for the Program and dividing the result by the Standard Deviation.

INDICES

Indices are unmanaged and do not include fees, expenses or other transaction costs associated with the portfolio. Any comparison of performance with an index is subject to material limitations. References to an index do not imply that the portfolio is intended to achieve returns or volatility or results similar to such index.

Euribor – Euribor (Euro Interbank Offered Rate) is a daily reference rate, based on the averaged interest rates at which Eurozone banks offer to lend unsecured funds to other banks in the euro wholesale money market.

IMPORTANT INFORMATION FOR INVESTORS

Regarding the benchmark index mentioned in this document: Parties entering into transactions (such as a derivative or financing transaction) or investing in financial instruments that use a benchmark index are exposed to the risk that: (1) such benchmark index may be subject to methodological or other changes which could affect the value of the relevant transaction; or (2) (i) may become not compliant with applicable laws and regulations (such as the European Benchmark Regulation), (ii) may cease to be published, or (iii) the supervisor or administrator of any such benchmark may make a statement that the relevant benchmark is no longer representative, and as a consequence the relevant benchmark may be replaced by another benchmark which may have an adverse and material impact on the economics of the relevant transactions. You should conduct your own independent investigation and analysis of the potential consequences of any relevant risks such as those mentioned above, particularly in light of the ongoing industry initiatives related to the development of alternative reference rates and the update of the relevant market standard documentation.
