Important Information. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualised average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C and X shares, the performance of which may vary. Performance shown reflects the management fee.

Sources for performance data: Calamos Advisors LLC, RBC Investor Services Ireland Limited ("RBC") and Mellon Analytical Solutions, LLC.

The Fund is offered solely to non-U.S. investors under the terms and conditions of the fund's current prospectus. The prospectus contains important information about the Fund and should be read carefully before investing. A copy of the full prospectus and Key Investor Information Document (KIID) for the Fund may be obtained by visiting www.calamos.com/global, or by contacting the local Paying Agent listed by jurisdiction at www.calamos.com/global, or through the fund's Transfer Agent, RBC Investor Services Ireland Limited.

The MSCI ACWI Growth is a free float-adjusted market capitalisation weighted index that is designed to measure the growth equity market performance of developed and emerging markets. The MSCI World Index is a market capitalisation weighted index representative of the market structure of developed market countries in North America, Europe, and the Asia/Pacific region.

Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Debt/capital ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital.

PEG ratio is a stock's price/earnings ratio divided by estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth. **Price/earnings ratio** is the current stock price over trailing 12-month earnings per share. **ROIC (return on invested capital)** measures how effectively a company uses the money invested in its operations, calculated as a company's net income minus any dividends divided by the company's total capital. The higher the ratio, the better the portfolio's risk-adjusted return is.
