hereafter the "Fund", a sub-fund of GAM Star Fund p.l.c.
Ord Acc - USD (the "Share Class") **ISIN: IE00B58TJ395**
Manager: GAM Fund Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the Fund is to achieve capital appreciation.
- The Fund seeks to achieve this objective by investing either directly or indirectly via collective investment schemes (primarily UCITS schemes) and financial derivatives (e.g. index options) to gain exposure on a worldwide basis to a number of asset classes.
- The Fund may gain exposure to one or more of the following asset classes: financial indices, exchange traded funds, exchange traded commodities, property, Fixed Income Securities (no more than 10% of the net assets in below investment grade), equities (e.g. shares) and equity related securities (e.g. convertible securities), cash, cash equivalents, Money Market Instruments and closed-ended funds.
- Macro considerations will be used in determining the allocation of investments in order to achieve the Fund's investment objective.
- The Fund may invest in other Funds of the Company and in other collective investment schemes which are managed by the co-investment manager or its affiliates.
- The Fund is considered to be actively managed in reference to Lipper Global Mixed Asset EUR Flex - Global / 3 Month LIBOR (the "Benchmarks") by virtue of the fact that it uses the Benchmarks in the appropriate currency for performance comparison purposes. However, the Benchmarks are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The co-investment manager has discretion in managing the investments of the Fund.
- The Fund may use a number of simple derivative instruments for investment purposes and/or efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. Although the use of derivatives may give rise to an additional exposure any such additional exposure will not exceed the Fund's Net Asset Value.
- The Fund may also use the following techniques and instruments for efficient portfolio management purposes; Repurchase and Reverse Repurchase Agreements, Stocklending Agreements, Sub-underwriting Agreements and Participation Notes.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk — **Higher risk**

Lower reward potential — **Higher reward potential**

1	2	3	**4**	5	6	7

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Liquidity Risk (Fund of Funds):** investments in other funds are subject to the liquidity of those underlying funds. If underlying funds suspend or defer payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.
- **Credit Risk / Debt Securities:** bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.
- **Operational Risk / Third Parties:** investments in other funds have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.
- **Counterparty / Derivatives Risk:** if a counterparty to a financial derivative contract were to default, the value of the contract, the cost to replace it and any cash or securities held by the counterparty to facilitate it, may be lost.
- **Credit Risk / Non-Investment Grade:** non-investment grade securities, which will generally pay higher yields than more highly rated securities, will be subject to greater market and credit risk, affecting the performance of the Fund.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.
- **Equity:** investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.
