"A Class Accumulation Preferred Securities Fund" (the Fund), a unit class of a sub-fund of Principal Global Investors Funds (the Trust) (ISIN: IE0032590923)

This Fund is managed by Principal Global Investors (Ireland) Limited (the Manager), part of The Principal Financial Group of companies

Objectives and Investment Policy

Investment Objective

The overall objective of the Fund is to provide a return consisting of income consistent with capital preservation.

Investment Policy

The Fund seeks to achieve its overall objective by investing primarily in a portfolio of US dollar denominated preferred securities and debt securities. At the time of the Fund's investment, the majority of these securities will be rated as investment grade quality or better. The Fund's investments will be offered on markets listed worldwide, although it is anticipated that the majority will be issued by US issuers.

The Fund seeks to add value primarily through security selection, including credit analysis. Its investment process involves in depth proprietary research, and strategic and disciplined portfolio construction.

The Fund's investment universe will include real estate investment trusts (REITs). A REIT is established as a trust or partnership structure which uses pooled capital of many investors to purchase and manage income property and/or mortgage loans. They are granted special tax exemptions,

not being taxed at the company level but they must distribute at least 90% of their taxable income to investors.

The Fund may also hold ancillary liquid assets such as bank deposits. However, no more than 1/3 of the net assets of the Fund may be held in aggregate in ancillary liquid assets or non-preferred or debt securities or instruments.

You may buy or sell units on demand on each Dealing Day being a Business Day subject to the terms set out in the section entitled "Dealing Day of the Fund's supplement (which together with the prospectus constitutes the Prospectus).

The Fund will be managed without particular reference to a particular benchmark. The sub-investment adviser may make discretionary choices when deciding which investments should be held by the Fund subject to the Fund's objective and investment policy and restrictions.

Please see the section entitled Investment Objective, Policies, Strategy and Profile of a typical investor of the Prospectus where full details are disclosed.

Risk and Reward Profile

The Synthetic Risk and Rewards Indicator (SRRI) identified by the above risk category shows where the Fund ranks in terms of potential risk and return. It is not a measure of the risk of capital loss but is based on the volatility of the returns (past performances). The lowest category does not mean a risk free investment.

If the Fund does not have a track record, the SRRI has been calculated based on studies of how such investments have performed in the past and investors should note that historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The following are risks materially relevant that are not captured by the SRRI:

- there are specific risks associated with the use of derivative instruments, including counterparty, position, liquidity, settlement, correlation and legal risk
- the market value of debt securities is affected by changes in prevailing interest rates and the Fund may be exposed to credit risk by investing in debt securities.
- the ability to trade REITs in the secondary market can be more limited than other stocks.

Further information may be found in the section of the Prospectus entitled Risk Factors.
