a Share Class of JPMorgan Funds – Global Credit Bond Fund
a Sub-Fund of JPMorgan Funds

ISIN LU0469576366

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to achieve a return in excess of global corporate bond markets by investing primarily in global corporate debt securities. These securities will be either investment grade, or a combination of investment grade and below investment grade, with active asset allocation between these security types. Financial derivative instruments will be used where appropriate.

Investment Policy: The Sub-Fund may invest up to 100% of its assets (excluding cash and cash equivalents) in global investment grade corporate debt securities and up to 67% of its assets (excluding cash and cash equivalents) in global below investment grade corporate debt securities. The active asset allocation between investment grade and below investment grade securities will be at the discretion of the Investment Manager. Issuers of these securities may be located in any country, including emerging markets.

The Sub-Fund may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

The Sub-Fund may hold up to a maximum of 10% of its assets in Contingent Convertible Securities.

The Sub-Fund may invest in assets denominated in any currency. However a substantial part of the assets of the Sub-Fund is expected to be denominated in, or hedged into, USD.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (EUR).

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is 67% Barclays Global Aggregate Corporate Index (Total Return Gross) Hedged to EUR / 33% BofA Merrill Lynch US High Yield Master II Constrained Index (Total Return Gross) Hedged to EUR.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will not pay dividends.

Recommendation: The Sub-Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and Reward Profile

Lower risk ← → **Higher risk**

Potentially lower reward — Potentially higher reward

1	2	**3**	4	5	6	7

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 3 because its Net Asset Value has shown low to medium fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for emerging market and below investment grade debt securities.
- In addition, emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.
- Contingent Convertible Securities are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuing company). This may be as a result of the security converting to equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- The value of financial derivative instruments can be volatile and may result in losses in excess of the amount invested by the Sub-Fund.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
