

Objective & Strategy

MirAlt Europe is a diversified fund of hedge funds. The fund provides investors with exposure to mainly European equity strategies coupled with reduced volatility, and offers monthly liquidity. The fund's assets are invested with approximately 15 to 25 managers selected for their talent, experience, track record, integrity and the complementarity of their investment styles and assets. The fund's objective is to produce superior risk-adjusted long term capital appreciation with meaningful participation in up-markets, as well as enhanced capital protection in down-markets.

Investment Manager

Mirabaud is internationally recognized as one of the pioneers in the alternative investment fund industry with over thirty years of experience. Through the co-management of one of the largest multi-manager funds in Europe, as well as its advisory function in several other funds of funds, Mirabaud has extensive experience in European and international manager selection.

Risk Information

The fund will invest in hedge funds that may implement leveraged, illiquid and/or complex strategies and therefore be exposed to higher operational risks and sharp valuation changes. Hedge funds are subject to market, interest rate, credit, default, volatility and currency risks that won't be hedged. The fund liquidity will be affected by the liquidity of the underlying funds, this may cause delays when facing large redemptions if the underlying scheme don't redeem the required assets in due time. A concentrated portfolio could limit the underlying investment manager diversification and may result in higher volatility. The underlying funds targeted may invest in emerging markets or lower rated debt instruments that may be more volatile well established markets or higher rated instruments. The fund may invest beyond its primary universe which may result in additional risks. Currency forwards will be used to reduce the currency risk generated by investments in share-classes or instruments that are not denominated in the fund base currency. The effectiveness of that hedging process will be subject to counterparty and operational risk. Cash placed in time deposits or money market funds are exposed to their issuer default risk.
