Objectives and Investment Policy

Objective

FINLABO SIM S.p.A. manages the portfolio of this Fund.

We aim to provide you with positive returns in euros over time, whatever prevailing market and economic conditions are. A positive return may not be achieved at all times.

Investment Policy

We invest at least 51% of the assets in shares of European companies that are dealt in on an official stock exchange or organized market. We have no geographical nor currency constraint.

We take investment decisions on the basis of a numerical analysis of companies' key figures, profit estimates and price movements. This analysis allows us to control risks and identify promising investment opportunities.

We aim to protect the value of your investment against the risk of adverse movements in stock markets by using financial contracts dealt in on markets.

This Fund is actively managed meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to any benchmark.

The reference index mentioned under "Performance Fee" in the below section "Charges" is only used for the calculation of the performance fee.

Essential features of the fund:

You can buy and sell shares of this class every bank business day in Luxembourg, through designated financial intermediaries.

This share class does not distribute any income to you.

Your first investment must amount to more than 10,000.00 euros.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

In accordance with article 8 of EU Regulation 2019/2088, the Sub-Fund promotes environmental or social characteristics, as further described in the Prospectus.

Risk and reward profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in stock markets, under normal market conditions.

The following other risks can be significant to the Fund:

- Investment positions may be relatively focused on one particular economic sector or country;

- The shares and financial contracts in which we invest can be easily sold in normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
