## JPM Euro Short Duration Bond D (acc) - EUR a Share Class of JPMorgan Funds – Euro Short Duration Bond Fund a Sub-Fund of JPMorgan Funds

LU0430494533

The management company is JPMorgan Asset Management (Europe) S.à r.l.

### Objectives and Investment Policy

**Investment Objective:** The Sub-Fund aims to achieve a return in excess of EUR-denominated short duration bond markets by investing in investment grade EUR-denominated short-term debt securities, using financial derivative instruments where appropriate.

**Investment Policy:** At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested, either directly or through the use of financial derivative instruments, in investment grade EUR-denominated short-term debt securities. Issuers of these securities may be located in any country, including emerging markets.

The weighted average duration of the Sub-Fund's investments will generally not exceed three years and the remaining duration of each investment will generally not exceed five years at the time of purchase.

Due to the possible downgrading in the credit rating of certain securities the Sub-Fund may from time to time have exposure to below investment grade debt securities.

The Sub-Fund may invest a significant portion of its assets in asset-backed securities, mortgage-backed securities and

covered bonds with a less significant exposure to other structured products.

The Sub-Fund may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

**Redemption and Dealing:** Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

**Management Discretion:** The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

**Benchmark:** The benchmark of the Share Class is Bloomberg Barclays Euro Aggregate 1-3 Year Index (Total Return Gross).

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

**Distribution Policy:** This Share Class will not pay dividends.

---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 2 because its Net Asset Value has shown low fluctuations historically.

#### Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for emerging market and below investment grade debt securities.

- In addition, emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.
- Asset-backed and mortgage-backed securities may be highly illiquid, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying asset are not met.
- The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The Management Company is required to disclose in Appendix III of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
