The Fund invests primarily in publicly traded common stock in the healthcare and life science sector (e.g. pharmaceuticals, biotechnology, medical technology, health services).

The investment decisions are discretionary and are based on the investment manager's evaluation of a company's fundamentals, industry trends and market conditions. The Fund will seek to benefit from positive and negative price movements via derivative instruments.

Risk and reward profile

The risk category has been calculated based upon simulation of the Fund's performance using historical data, which may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category (category 1) does not mean that the investment is risk-free.

The Fund is rated 5 due to the nature of its investments which include the following risks:

- Equity risk – the risk that the value of equities and equity-related securities within the Fund may be affected by stock market movements.
- Derivative risk – the Fund may use derivatives for investment purposes. Derivatives are highly sensitive to changes in the value of the asset on which they are based, which may result in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Healthcare sector concentration risk – investment risk is concentrated in healthcare sector companies. This means the Fund is more sensitive to healthcare sector related events.
- Leverage risk – the Fund may operate with additional leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. Leverage makes the Fund more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

The following are additional risks which are not captured in the risk category:

- Counterparty risk – the risk that the other party to a transaction with the Fund may fail to fulfil its contractual obligations and may expose the Fund to financial losses.

Your investment is not guaranteed and its value can go down as well as up. For more information about risk, please see the 'Risk Factors' section of the prospectus, which is available at www.invest.baml.com/funds.
