Brown Advisory US Equity Growth Fund Euro Class A Acc H

ISIN: IE00B2NN6563

Brown Advisory US Equity Growth Fund ("the Fund") is an actively managed sub-fund of Brown Advisory Funds plc ("the Company").

Objectives and Investment Policy

Objectives

The Fund aims to achieve capital growth.

Investment Policy

The Fund will be primarily invested in US equities. The Fund invests in medium and large-sized companies listed or traded on US markets and exchanges, generally whose total market values are above USD 2 billion and that have demonstrated an above-average rate of earnings growth over the last few years with prospects for above-average, sustainable growth in the future. The Fund may also invest in US Rule 144A Securities, American Depositary Receipts, US treasury bills, fixed and/or floating rate US government securities and other ancillary liquid assets.

This class utilises forward foreign exchange contracts (an obligation to purchase or sell a foreign currency at a specific date and exchange rate) to hedge currency risk between the share class currency and the US dollar.

Benchmark

The Fund uses the Russell 1000 Growth index as a Comparator Benchmark to compare performance. The Fund is actively managed and is not constrained by any benchmark.

Dealing Frequency

Investors may redeem shares on demand on any day (except Saturday or Sunday) on which the New York Stock Exchange is open.

Distribution Policy

The Fund does not intend to distribute income on your shares. The price of your shares shall rise by the net income earned per share.

For full investment policy details please refer to the Fund Supplement's Investment Objective and Policies section.

Risk and Reward Profile

The risk and reward indicator

This indicator is based on historical data and may not be a reliable indication for the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean your investment is risk free. The Fund's investments are subject to normal market fluctuations and other risks inherent in equities.
- The Fund is in category 5 as it mostly invests in equities, which typically experience higher levels of price fluctuation than other types of instruments.
- For a more detailed explanation of these and other risk factors, please refer to the section entitled Risk Factors in the prospectus and supplement.

Other particular risks:

Operational Risk: the Fund's operations depend on third parties, including the Fund's Administrator and Custodian, and the Fund may suffer disruption or loss in the event of their failure.

Equities Risk: equity investments are subject to greater fluctuation in market value than other asset classes as a result of such factors as a company's business performance, investor perceptions, stock market trends and several economic conditions. This may cause the Fund's share price to fluctuate.

Geographic Concentration Risk: the Fund's assets are concentrated in the United States market which may lead to greater price fluctuations than if it were invested in securities of a broader geographic base.

Liquidity Risk: the Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund.

Currency hedging risk: The hedging strategy of this class aims to remove the exposure to currency movement between the USD and the EUR. The hedging strategy may not completely eliminate this exposure and there can be no guarantee that the hedging strategy will be successful.

Counterparty Risk: this class invests in forward foreign exchange contracts for the purposes of hedging exchange rate fluctuations. The other party to such contracts may fail to meet its obligations or become bankrupt which may expose the class to a financial loss.
