## Summary of Investment Objective:

The fund's goal is to achieve growth of the fund's value in the long term.

The fund will invest in shares of companies from a defined list of Asia Pacific countries excluding Japan.

**The value of investments and the income from them may go down as well as up and you may not get back the amount you originally invested.**

**Fund inception date:** 25.02.2004

**Performance inception date:** 25.02.2004

## Reference Benchmark:

MSCI AC Asia Pacific ex Japan Index (Net Dividends) (USD) Since 13 May 2015

## Morningstar Category peer group:

Asia-Pacific ex-Japan Equity

**ISIN** IE0034204895

**SEDOL** 3420489

## Portfolio statistics

Total net assets	19,29m USD
Month end Net Asset Value (NAV)	229,57 USD
Number of holdings	77
Percentage of top ten holdings	26,87
Weighted average market cap	73.327,57m USD

## Charges

Minimum initial investment	1,000 USD
Entry charge	5.00%
Exit charge	None
Ongoing charge	1.83%
Performance fee	None

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID/KIID before making any final investment decisions. **Past performance does not predict future returns.**

**Investment risks**

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

**The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:**

**Investment in company shares:** The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

**Geographical focus:** This fund invests primarily in Asia, which means that it is more sensitive to local economic, market, political or regulatory events in Asia, and will be more affected by these events than other funds that invest in a broader range of regions.

**Emerging markets investment:** The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

**Investment in smaller company shares:** The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

**Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

**Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

A temporary negative cash position may be due to (1) unsettled trade activity (2) permitted purposes, such as borrowing or derivatives use, if allowed by the prospectus.

**Definitions**

**Sharpe ratio:** A risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance. **Treynor ratio:** Measure of risk adjusted portfolio performance where Beta acts as a proxy for the level of risk associated with a given portfolio. **Tracking error:** Dispersal of differences between the returns obtained by the Fund and the benchmark variation. **Information ratio:** The ratio of annualized expected residual return to residual risk. **Risk adjusted alpha:** Measures the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** Measures the sensitivity of the fund to the movements of its benchmark. **R-Squared:** Measures the strength of the linear relationship between the fund and its benchmark. RSquared at 1.00 implies perfect linear relationship and zero implies no relationship exists. **M-Squared:** A measure of portfolio risk, the Modigliani ratio serves to adjust for the risk that a given portfolio takes in excess of the risk-free rate. **Standard deviation:** Measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

**Important information**

**OUTSIDE OF THE UNITED KINGDOM, IRELAND, LUXEMBOURG, CYPRUS, GREECE AND SWITZERLAND, THIS FACTSHEET IS FOR USE BY PROFESSIONAL OR QUALIFIED INVESTORS ONLY.**

This is a sub-fund of Franklin Templeton Global Funds plc ("FTGF plc"), FTGF is an open-ended investment company with variable capital, organised as an undertaking for collective investment in transferable securities ("UCITS").
