

Key Investor Information

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

SANTANDER ACTIVE PORTFOLIO 1
a sub-fund of SANTANDER SICAV

Class
AE

ISIN
LU0493712920

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The objective of the Sub-Fund (denominated in USD) is to build a diversified portfolio of world-wide securities.

Investment policy: The Sub-Fund invests, directly or indirectly through third party undertakings for collective investment, in transferable securities, in fixed income securities and equities of European and North American public or private issuers quoted or traded on European and North American official stock exchanges or regulated markets, but not excluding minority investments in other OECD and emerging countries.

This Sub-Fund's investments in equities will normally be 10% of this Sub-Fund's net assets.

In case of adverse market conditions this Sub-Fund might temporarily be invested in cash and money market instruments or even have a net negative exposure to equities through financial derivative instruments of up to a maximum of 10% of its net assets.

This Sub-Fund's exposure to equities will not exceed 50% of this Sub-Fund's net assets.

This Sub-Fund may combine direct investment in securities or investment through financial derivative instruments. Other investments may also include structured securities (up to 10% of the Sub-Fund's net assets), convertible bonds, warrants or derivative instruments.

The Sub-Fund may use derivatives with a view to reduce the risk of investment positions or for efficient portfolio management or as a part of the investment strategy.

The Investment Manager will, in any case, invest in UCITS and eligible UCIs managed by first-rate fund management companies with a wide experience in the markets and a high degree of solvency, considering the volume of assets under management. The choice of underlying UCITS and UCIs will also take into account the management quality of the investment manager, the past returns achieved by the underlying fund, the risk/return ratio and the volume of assets of the underlying fund.

The Sub-Fund is actively managed in reference to the USD 1 Week GC Government Repo (46,4%); ICE BofA Global Broad Market Index (43,6%); MSCI World Free Gross Total Return USD Index (10%) (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to allocate to different assets based on an analysis of the market conditions, economy prospects and valuations. As such, the Investment Manager will deviate from the Benchmark asset allocation and invest in other allowed assets that might not be part of it.

Net asset value calculation frequency: Daily, any full Business day.

Subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg on any Dealing Day (whereas a "Dealing Day" is any full Business Day preceding a Valuation Day) before 16:00 Luxembourg time (the "cut off time"), will be processed on that Dealing Day, using the net asset value per Share determined on the next Valuation Day for the relevant Class.

This is an accumulation share class in EUR.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 2 years.

Risk and Reward Profile

Less reward, less risk

High reward, high risk

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of 4 means this fund typically has a medium level of volatility, meaning there is a degree of uncertainty over the size of changes in the fund's value over time. This could result in the value of the fund changing over a short period of time in either direction.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Interest Rate Risk: Arise in interest rates can generally be expected to depress the value of the fund's fixed income investments.

Emerging Markets Risk: The fund is permitted to hold some exposure to Emerging Markets, which can at times carry a higher degree of risk compared to similar securities in more developed markets due to political and economic events.

Credit Risk: It refers to the likelihood of the fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

Liquidity Risk: There is the possibility that the fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the fund and may be unable to raise cash to

meet redemption requests.

Operational Risk: The risk of failures or delays in the system, processes and controls of the fund or those of its service providers that could lead to fund losses.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.

Charges

The fees are used to cover the operating costs for the Sub-Fund, including marketing and distribution costs. These fees reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.92%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown above are the maximum that may be charged. In some cases, you might pay less. You can obtain the actual charges directly from your financial adviser or distributor. The entry charges are deducted before your capital is invested.

The ongoing charge percentage indicated is based on the fees from the previous financial period, ended on 31 December 2019. This figure can vary from one financial period to another.

You can obtain more information about these charges, in the «fees and expenses» section of the prospectus.

Past performance

Past performance of Sub-Fund is not necessarily indicative of future performance.

The calculation of the past performance includes all fees and commissions which accrues on fund level.

This class was created in 2010.

The past performance has been calculated in EUR.

Practical information

Depositary: J.P. Morgan Bank Luxembourg S.A.
