### Investment Objective

The Fund seeks to protect capital and generate attractive returns which exceed those available from similar duration Benchmark Government Bonds.

### Fund Description

The Fund targets a diverse portfolio, primarily in high yield (sub investment grade) bonds with short maturities or short duration-to-worst. These bonds are mainly issued in US Dollars or by North American companies.

There is no guarantee that targets will be met. Please see the Key Fund Risks on page 3.

\*\*All data over 12 months is annualised. NET performance is net of all Fund Manager and Administrative Charges as well as of all expenses. Net performance does not reflect the deduction of individual subscription fees which can be up to 1%. The average subscription fee levied by Muzinich during the Fund's history was 0%.

## Key Fund Risks

**Credit Risk:** Risk that issuers of bonds held in the Fund may default on their obligations or have their credit rating downgraded, possibly resulting in a temporary or permanent decrease in the value of those bonds. Most bonds in this Fund are rated below investment grade.

**Liquidity Risk:** Risk that the Fund may face difficulties in purchasing or selling its assets, although it endeavors to invest in liquid securities.

**Interest Rate Risk:** Risk that fixed-rate bonds held in the Fund may fall in price with an increase in the prevailing level of interest rates in the economy. This risk usually decreases for bonds of lower rating and shorter duration-to-worst.

**Currency Risk:** Risk that the Fund may invest in multiple currencies or may have investors subscribe in multiple currencies which may fluctuate in value relative to each other. Additionally, the risk that this unit class may be exposed to currencies other than the one in which the unit class is denominated. Although the Manager endeavors to protect the Fund against currency risk, such hedging, achieved through derivative instruments (see "Derivative Risk" below), is at the Manager's discretion and it may not be possible or practical to protect the Fund or individual unit classes against all currency risk.

**Derivative Risk:** Risk that the Fund may use derivative instruments to protect against perceived risks as described under the other headings in this section. Derivative instruments may rise or fall in price or may be subject to risk of non-payment or non-delivery by a counterparty. There is no guarantee that derivatives will provide the anticipated protection.

**Operational Risk:** Risk that operational processes, including those relating to the safekeeping of assets, may fail, resulting in losses.

Additional information about these and other risks may be found in the prospectus and supplement for the Fund, both of which are available at [www.muzinich.com](http://www.muzinich.com).

## Glossary of Terms

**Bond** - A loan, usually taken out by a government or company, which normally pays a fixed rate of interest over a given time period, at the end of which the loan is repaid.

**Country code** - AT Austria/BE Belgium/FR France/DE Germany/IE Ireland/IT Italy/LX Luxembourg/NL Netherlands/PE Peru/PT Portugal/ES Spain/CH Switzerland/UK United Kingdom.

**Coupon** - The interest paid by the government or company that has raised a loan by selling bonds.

**Credit** - The borrowing capacity of an individual, company or government. More narrowly, the term is often used as a synonym for corporate bonds.

**Credit rating** - An independent assessment of a borrower's ability to repay its debts. A high rating indicates that the credit rating agency considers the issuer to be at low risk of default; likewise, a low rating indicates high risk of default. (Standard & Poors, Fitch and Moody's are the three most prominent credit rating agencies.)

**Credit spread** - The difference in the yield between a corporate bond and a government bond of the same maturity.

**Duration** - A measure of the sensitivity of a bond or bond fund to changes in interest rates. The longer a bond or bond fund's duration, the more sensitive it is to interest rate movements.

**Duration to worst** - Denotes how sensitive a bond is to changes in the general interest rate environment with shorter durations denoting less sensitivity. It is calculated assuming a bond will be repaid at the date most advantageous to the issuer even if that occurs before the bond's stated maturity date.

**High yield bonds** - Bonds with a low credit rating from a recognised credit rating agency. They are considered to be at higher risk of default than better quality, ie, higher-rated bonds, but have the potential for higher rewards.

**Index** - An index represents a particular market or a portion of it, serving as a performance indicator for that market.

**Maturity** - The date at which a loan or bond is contracted to be repaid (also known as redemption).

**NAV** - Net Asset Value per Unit.

**OCF (Ongoing Charges Figure)** - It is a measure of the total cost of a fund to the investor. Total costs may include various fees (purchase, redemption, auditing) and other expenses. The OCF is calculated by dividing the total annual cost by the fund's total assets averaged over that year, and is denoted as a percentage.

**Sharpe Ratio** - A measurement of a fund's risk/return. The higher a fund's Sharpe ratio, the better its risk-adjusted performance has been.

**Total return** - The term for the gain or loss derived from an investment over a particular period. Total return includes income (in the form of interest or dividend payments) and capital gains.

**Volatility** - The degree to which a given security, fund, or index rapidly change. It is calculated as the degree of deviation from the norm for that type of investment over a given time period. The higher the volatility, the riskier the security tends to be.

**Yield to Worst** - The lowest potential yield that an investor can expect to receive from a bond. Yield to Worst may be the same as the yield to maturity but it will never be higher.

## Disclaimer

Past performance is not a guide to future performance. The value of investments and the income from them may fall as well as rise and is not guaranteed and investors may not get back the full amount invested. Where references are made to portfolio guidelines or features, these may be subject to change over time and prevailing market conditions. Any research in this document has been obtained and may have been acted on by Muzinich for its own purpose. The results of such research are being made available for information purposes and no assurances are made as to their accuracy. Opinions and statements of financial market trends that are based on market conditions constitute our judgment and this judgment may prove to be wrong. The views and opinions expressed should not be construed as an offer to buy or sell or invitation to engage in any investment activity, they are for information purposes only. The prices of fixed income securities fluctuate in response to perceptions of the issuer's creditworthiness and also tend to vary inversely with market interest rates. The value of such securities is likely to decline in times of rising interest rates. Conversely, when rates fall, the value of these investments is likely to rise. Typically, the longer the time to maturity the greater are such variations. A Fund investing in fixed income securities will be subject to credit risk (i.e. the risk that an issuer of securities will be unable or unwilling to pay principal and interest when due, or that the value of a security will suffer because investors believe the issuer is less able or willing to pay).

Please note that investment is subject to documentation, including but not limited to the Prospectus and Key Investor Information Document (KIID) which contain a comprehensive disclosure of applicable risks. Investors in the UK should also access the Muzinich Supplemental Information Document ("SID"). Each of these documents is available in English at [www.muzinich.com](http://www.muzinich.com), together with the Fund's annual and semi-annual reports. KIIDs are available by share class in each language required in the countries in which the share classes are registered. A complete listing of these KIIDs and the KIIDs themselves are also available at [www.muzinich.com](http://www.muzinich.com). Investors should confer with their independent financial, legal or tax advisors. Issued in Europe by Muzinich & Co. Ltd, which is authorised and regulated by the Financial Conduct Authority. Registered in England and Wales No. 3852444. Registered address: 8 Hanover Street, London W1S 1YQ.
