GlobalAccess Emerging Market Equity Fund Share Class M Acc EUR (Hedged) (ISIN: IE00B5N8PX30), (SEDOL: B5N8PX3)

a sub-fund of Barclays Multi-Manager Fund plc. The Fund is managed by Carne Global Fund Managers (Ireland) Limited ("The Manager").

Objectives and Investment Policy

The aim is to increase the value of your investment over the long-term by investing primarily in companies based in emerging market countries.

The Fund is actively managed and invests in shares and convertible securities (tradable debt which can be converted into shares) issued by companies, across a range of industries, based in and traded on stock exchanges in emerging market countries.

The investment manager has discretion to select the companies it chooses to invest in but does take into consideration the universe of companies represented by the MSCI Emerging Markets Index (Net Return).

While the Index may inform the selection of potential investments, the overall Fund investments, as well as the performance of the Fund, can differ significantly from the Index.

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Income is not paid out and is rolled up (accumulated) into the value of your investment.

You may buy and sell your investment on each business day.

Risk and Reward Profile

This indicator is based on simulated historical data which may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is rated Category 6 due to the nature of the investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

The following risks are materially relevant to the Fund:

The Fund may use derivatives in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives causes share prices to fluctuate which may in turn result in loss to the Fund.

The assets in which the Fund invests may be denominated in currencies other than the Fund's base currency. Changes in currency exchange rates can therefore affect the value of your investment.

Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between their denominated currency

and the base currency of the Fund. This may not completely eliminate currency risk and therefore any residual risk may affect the performance of your shares.

The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of your investment is likely to be adversely affected.

Future legal or regulatory change could have a substantial adverse effect on the Fund and your investment.

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment.

Stock markets can be volatile, meaning that the prices of shares held by the Fund can change quickly and substantially.

The Fund may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

Further information is provided in the "Risk Factors" section of the Prospectus.
