

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

JABCAP (LUX)

JABCAP (LUX) - Global Balanced Share Class: P EUR (ISIN: LU0533244447)

a sub fund of JABCAP (LUX). JABCAP (LUX) is managed by Carne Global Fund Managers (Luxembourg) S.A.

Objectives & Investment Policy

The aim of the sub-fund (the Fund) is to increase the value of your investment over the long term by investing in shares listed on global stock markets, financial instruments whose value is linked to shares (equity-linked instruments), debt instruments which can easily be converted into cash (money market instruments), tradable debt (bonds issued by government, other public bodies and companies around the world) and foreign exchange instruments.

The Fund is managed on a discretionary basis and seeks to identify investment opportunities on a global basis.

The Fund will vary the level of its investment in different asset types in response to changing market conditions and opportunities. In exceptional market conditions, the Fund may invest all of its assets in money market instruments.

The Fund may also invest through a variety of financial contracts that derive their values from those of other investment instruments or indices (derivatives). Derivatives may be used for both investment purposes as well as to offset potential

losses that may be incurred by other investments (hedging). Different types of derivatives may be used in order to gain an exposure to different asset types or sectors. The Fund may also invest up to 10 per cent of its total assets in other funds (underlying funds). The Fund has no geographical constraints and may invest globally including in emerging markets which may involve greater risk.

The Fund's total financial commitments may exceed its total value due to its use of derivatives (leveraged exposure) and this may increase fluctuation in the price of the Fund's shares (volatility). In attempting to preserve its value, the Fund will continuously adjust its investments, which may lead to high transaction costs. These costs are paid from the assets of the Fund, in addition to the charges set out below.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

No income will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will enter into various derivatives with another party. There is a risk that the other party will fail to make its payments which may result in loss to the Fund. In addition, the use of derivatives causes share prices to fluctuate which may also result in loss to the Fund.

The Fund may invest in bonds, the value of which depends on the issuer being able to make its payments obligations. There is a risk that the issuer will default which will result in losses for the Fund. Although the Fund generally invests in bonds with high ratings, this does not guarantee an issuer's ability to pay.

The Fund may invest in shares in an initial public offer (IPO) which may involve high transaction costs. The prices of IPO shares may also fluctuate considerably which may result in loss to the Fund.

Bonds are interest rate sensitive, meaning that the price of bonds are affected by changes in interest rates, and the ease with which similar investments may be bought or sold (liquidity).

Stock markets can be volatile, meaning that the prices of shares held by the Fund can change quickly and substantially.

In certain circumstances, there may be a delay in processing the sale or purchase of the Fund's investments and there may be uncertainty about the ownership of the Fund's investments. In certain circumstances the custodian may not be liable to the Fund for the acts and omissions of itself or of those to whom it delegates custody of the Fund's investments.

A short sale involves the sale of a share that the seller does not own in the hope of purchasing the same share at a later date at a lower price. The Fund uses derivatives which produce the same economic effect as a short sale. The Fund may hold positions that will rise as the market value falls, and fall as the market value rises. Taking short positions can involve greater risk than investments based on a long position.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		<p>The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.</p> <p>The ongoing charges figure is based on expenses for the year ending December 2018. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.</p> <p>An anti dilution levy of up to 2% may be applied at the discretion of the directors.</p> <p>More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.</p>
Entry charge	None	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		
Charges taken from the Fund over a year		
Ongoing charges	3.11%	
Charges taken from the Fund under certain specific conditions		
Performance fee		
20% of any increase in the value of the class of shares above the highest value of that class achieved at the end of the previous calculation period, calculated twice yearly. In the last financial year the performance fee was 0.00% of the net asset value of the share class. Please see the "Performance Fee Calculation" section of the Prospectus for more details.		

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The ongoing charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2010 and the share class was launched in 2010.

Past performance has been calculated in EUR.
