BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the “Company”) was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014, as amended. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment company with variable capital organised under the laws

of Ireland, with segregated liability between sub-funds, individually referred to as the “Fund” and collectively the “Funds”. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”). The Company currently comprises of 44 active Funds as at 31 December 2019 (31 December 2018: 46).

The history of the Funds within the Company as at the date of approval of this report and accounts is as follows:

* Please refer to Note 19 of the financial statements.

A separate pool of assets (a "Portfolio") is maintained for each Fund, each being invested in accordance with the investment objective applicable to the Fund to which the Portfolio relates.

The Funds of the Company are listed on Euronext Dublin.

INVESTMENT OBJECTIVE

The assets of each Fund are invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus.

OTHER RELEVANT INFORMATION

Audited annual reports and financial statements and unaudited semi-annual reports are available to the public at the registered office of the Company or on www.bnymellonim.com. They can also be sent to shareholders at their registered address.

BNY MELLON GLOBAL FUNDS, PLC

DIRECTORS' REPORT

The Directors submit their annual report together with the audited financial statements for the financial year ended 31 December 2019.

PRINCIPAL ACTIVITIES

The investment objective of each of the Funds is outlined in the prospectus and discussed in the Investment Managers' Reports.

DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Directors' Report and financial statements in accordance with the Companies Act 2014, as amended.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the financial statements in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of BNY Mellon Global Funds, plc (the "Company") at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014, as amended. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The Directors confirm that they have complied with the above requirement when preparing the financial statements.

DIRECTORS' COMPLIANCE STATEMENT

The Directors, in accordance with Section 225 (2) of the Companies Act 2014 (the "Act"), acknowledge that they are responsible for securing the Company's compliance with its "Relevant Obligations" as defined in that section and which constitute: (i) certain provisions under the Act, a breach of which is a category 1 or 2 offence; (ii) serious market abuse offences as referred to in Section 1368 of the Act; and (iii) the Irish tax laws referred to in Section 225 of the Act.

It is the policy of the Company to secure compliance with its Relevant Obligations and to foster an environment in the Company which raises awareness of, and promotes a culture of compliance with, those obligations (the "Compliance Policy").

In order to give effect to the Compliance Policy, the Board, with the assistance of the relevant advisers, have identified the Relevant Obligations that they consider apply to the Company.

The Directors confirm that:

- appropriate arrangements and structures (the "Compliance Arrangements") that, in their opinion, are designed to secure material compliance with the Company's Relevant Obligations, have been put in place; and
- a review has been conducted, during the financial year, of the Compliance Arrangements that have been put in place to secure the Company's compliance with its Relevant Obligations.

This Compliance Policy Statement will be subject to periodic review and may be supplemented from time to time. The Compliance Arrangements will be subject to annual review with the aim of establishing that they continue to provide a reasonable assurance of compliance, in all material respects, with the Company's Relevant Obligations.

ACCOUNTING RECORDS

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with FRS 102 and comply with the Companies Act 2014, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations, 2019 (the "Central Bank UCITS Regulations").

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. To this end, BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") has been appointed for the purpose of maintaining adequate accounting records. Accordingly, the accounting records are kept at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4XO, Ireland. The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the depositary for safekeeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch*, which provides trustee, depositary and custody services.

The financial statements of the Company are published on the website of BNY Mellon Investment Management EMEA Limited (www.bnymellonim.com). The Directors are responsible for the maintenance and integrity of the corporate and financial information of the Company included on this website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

* Please refer to Note 19 of the financial statements.

DISTRIBUTIONS

Distributions paid to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs when they are declared to Euronext Dublin, as detailed in the prospectus. Distributions are declared to the extent necessary to enable the Company to pursue a full distribution policy in accordance with the current UK tax legislation.

Details of the distributions paid to redeemable participating shareholders are disclosed in the Statement of Comprehensive Income and distributions declared subsequent to the financial year end to redeemable participating shareholders are disclosed in Note 20 to the financial statements.

REVIEW OF BUSINESS AND FUTURE DEVELOPMENT

The Company is an open-ended investment company with variable capital which has been authorised by the Central Bank under the UCITS Regulations. There was no change in the nature of the Company's business during the financial year.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests.

Details of the risks inherent in investing in the Company are disclosed in Note 16 to the financial statements.

RESULTS

The results for the financial year are set out in the Statement of Comprehensive Income.

EVENTS SINCE THE FINANCIAL YEAR END

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 20 to the financial statements and the below disclosure in respect of COVID 19.

COVID 19

In March 2020, the World Health Organisation declared COVID 19 a pandemic. While the full impact is not yet known, COVID 19 may result in continued market volatility and a period of economic decline globally. It may also have a significant adverse impact on the value of a Sub-Fund's investments and the ability to access markets or implement the Sub-Fund's investment policy in the manner originally contemplated. Government interventions or other limitations or bans introduced by regulatory authorities or exchanges and trading venues as temporary measures in light of significant market volatility may also negatively impact on the ability to implement a Sub-Fund's investment policy. Sub-Funds' access to liquidity could also be impaired in circumstances where the need for liquidity to meet redemption requests may rise significantly. Services required for the operation of the Company may in certain circumstances be interrupted as a result of the pandemic.

The Directors are monitoring developments closely. Given the nature of the outbreak and the on-going developments, there is a high degree of uncertainty and it is not possible at this time to predict the extent and nature of the overall future impact on the Company.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 11 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Companies Act 2014, as amended, at any time during the financial year ended 31 December 2019 and 31 December 2018.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 43(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from BNY Mellon Fund Management (Luxembourg) S.A. and its relevant delegates, the Board of Directors of the Company is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Investment Managers) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Investment Managers through regular updates to the Directors.

Note 11 details related party transactions during the financial year as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33 of FRS 102. Details of fees paid to related parties and certain connected persons are set out in Notes 3 to 7 and 11.

CORPORATE GOVERNANCE STATEMENT

The Company is subject to corporate governance practices imposed by:

- (i) The Memorandum and Articles of Association of the Company;
- (ii) The Companies Act 2014, as amended;
- (iii) The Central Bank UCITS Regulations; and
- (iv) The Euronext Code of Listing Requirements and Procedures.

Copies of all of the above documents are available for inspection at the Company's registered office at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4X0, Ireland.

On 14 December 2011, the Irish Funds Industry Association ("IF") published a corporate governance code ("IF Code") which may be inspected on/obtained from the

IF website (www.irishfunds.ie). It should be noted that the IF Code reflects the existing corporate governance policies imposed on Irish authorised collective investment schemes.

The Directors have reviewed the IF Code and adopted this code on 20 December 2012 following assessment of the measures included in the IF Code as being consistent with its existing corporate governance principles and procedures for the financial year. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and distribution functions to third parties without abrogating the Directors' overall responsibility. The Directors have in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Directors. These delegations of functions and the appointment of regulated third party entities are detailed in the Company's prospectus. In summary, they are:

1. The Company has appointed BNY Mellon Fund Management (Luxembourg) S.A.* as its Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Funds. The Manager is regulated by and under the supervision of the Central Bank;
2. The Manager has delegated the performance of the investment management functions in respect of the Company and of its Funds to the respective Investment Managers as detailed in the prospectus and listed in the directory to these financial statements.

The respective Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Funds which they manage and they are accountable to the Directors for the investment performance of the Funds which they manage. The respective Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to their management of the Funds are identified, monitored and managed at all times and appropriate reporting is made to the Directors on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their operating jurisdiction;

3. The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator, which has responsibility for the day-to-day administration of the Company and the Funds including the calculation of the net asset values. The

Administrator is regulated by and under the supervision of the Central Bank; and

4. BNY Mellon Investment Management EMEA Limited and BNY Mellon Fund Management (Luxembourg) S.A. act as distributors for the Funds of the Company.

In accordance with the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the Depositary for safekeeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch*, which provides trustee, depositary and custody services. The entity is authorised by the European Central Bank and is regulated by and under the supervision of the Central Bank.

The Directors receive reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable it to assess the performance of the delegate service providers and the Depositary (as the case may be).

* Please refer to Note 19 of the financial statements.

FINANCIAL REPORTING PROCESS – DESCRIPTION OF MAIN FEATURES

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Directors have entrusted the administration of the accounting records to the Administrator.

The Directors, through delegation to the Administrator, have procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Directors of the Company and filed with the Central Bank. The annual financial statements are also required to be filed with Euronext Dublin and the Companies Registration Office and be audited by independent auditors who report annually to the Board on their findings.

The Directors have hired an independent external audit firm to audit the financial statements in accordance with the Companies Act 2014, as amended. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting

process and the Administrator's report to the Directors. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

SHAREHOLDER MEETINGS

The convening and conduct of shareholders' meetings are governed by the Memorandum and Articles of Association of the Company and the Companies Act 2014, as amended. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors are required to convene an annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter provided that an annual general meeting is held within nine months of the end of each accounting period for the Company.

In accordance with the Companies Act 2014, as amended, shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Directors to convene a shareholders' meeting. Not less than twenty one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders.

Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. Votes may be cast in person or by proxy. On a show of hands, every shareholder who is present in person or by proxy shall have one vote and every management shareholder shall have one vote in respect of all non-participating shares. On a poll, every shareholder is entitled to one vote in respect of each participating share held by him and every management shareholder is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company or at least five shareholders present or a shareholder or shareholders representing at least one tenth of the shares in issue having the right to vote at such meeting may demand a poll.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company or of the shareholders of a particular fund or class requires an absolute majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company or of the shareholders of a particular fund or share class requires a majority of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Memorandum and Articles of Association.

COMPOSITION AND OPERATION OF BOARD OF DIRECTORS AND COMMITTEES

Unless otherwise determined by an ordinary resolution of the Company in general meeting, the number of Directors may not be less than two nor more than twelve. Currently,

the Board of Directors of the Company is composed of four Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are not by the Companies Act 2014, as amended, or by the Articles of Association of the Company required to be exercised by the Company in general meeting. A Director may, and the company secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors and unless so fixed is two. The key management functions of the Manager are delegated to the designated Directors in accordance with its business plan.

DIVERSITY STATEMENT

In recognition of the importance and value of diversity, the Board adopted a Diversity Policy in September 2019, which was ratified at the board meeting in January 2020. The Diversity Policy recognises the benefits of having individuals with diverse background, experience and viewpoints including individuals who contribute to the heterogeneity of the Board because of, inter alia, their race, age, gender, education or professional backgrounds. The objective of the Diversity Policy is to promote diversity on the Board. The Diversity Policy will be implemented going forward through ensuring that new appointments to the Board should be made on merit, taking account of the specific skills and experience, independence, and knowledge needed to ensure a rounded board and the diversity benefits each candidate would bring to the overall board composition. There have been no new appointments to the Board since the Diversity Policy was adopted.

DIRECTORS

The names of the persons who were Directors at any time during the financial year ended 31 December 2019 are set out below:

David Dillon (Irish)*^
 David Turnbull (New Zealand)^
 Gerald Rehn (American)^
 Greg Brisk (British)
 Jonathan Lubran (British)^
 Michael Meagher (Irish)^

All Directors are non-executive Directors.

* Chairman of the Board of Directors

^ Independent Director

< Please refer to Note 19 of the financial statements.

DIRECTORS AND SECRETARY'S INTERESTS

The Directors (including their families) and the Secretary, Tudor Trust Limited, had no interests in the shares of the Company at any time during the financial year ended 31 December 2019 and 31 December 2018.

David Dillon and Greg Brisk are also Directors of the Manager. David Turnbull, who resigned from the Company on 19 February 2019, subsequently resigned as Director of the Manager on 2 July 2019. Management fees of USD 103,915,807 (31 December 2018: USD 128,736,792) were incurred during the financial year.

David Turnbull (resigned 19 February 2019), Greg Brisk and Gerald Rehn (appointed 1 January 2019) have waived their right to receive a fee for their services as Directors during the financial year ended 31 December 2019 and 31 December 2018.

POLITICAL DONATIONS

There were no political donations made by the Company during the financial year ended 31 December 2019 and 31 December 2018.

DISCLOSURE OF INFORMATION TO THE AUDITORS

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

INDEPENDENT AUDITORS

The Directors appointed Ernst & Young as auditors for the Company, with effect from 2 September 2014.

Ernst & Young have indicated their willingness to remain in office in accordance with Section 383 (2) of the Companies Act 2014.

On behalf of the board

Director – **David Dillon**

Director – **Greg Brisk**

Date: 16 April 2020

BNY MELLON GLOBAL FUNDS, PLC

DEPOSITARY'S REPORT

For the period from 1 January 2019 to 31 December 2019 (the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary", "us" "we", or "our"), has enquired into the conduct of BNY Mellon Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

RESPONSIBILITIES OF THE DEPOSITARY

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

BASIS OF DEPOSITARY OPINION

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

OPINION

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

BNY MELLON GLOBAL FUNDS, PLC

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF BNY MELLON GLOBAL FUNDS PLC

OPINION

We have audited the financial statements of BNY Mellon Global Funds plc ('the Company') for the year ended 31 December 2019, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and Accounting Standards including FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland (Irish Generally Accepted Accounting Practice). In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2019 and of its profit for the year then ended;
- have been properly prepared in accordance with Irish Generally Accepted Accounting Practice; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2019 (the "Central Bank UCITS Regulations").

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance

with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Description	Our response	Key observations communicated to the Board of Directors
<p>We have considered the existence and ownership of financial assets and financial liabilities to be a key audit matter. The net value of these is USD 15,970,593,446 (2018: USD 15,339,775,753).</p> <p>This is one of the key areas our audit is concentrated on because the existence and ownership of investments is a key driver of the net asset value.</p> <p>Please refer to Note 1 – Financial assets and financial liabilities at fair value through profit or loss and Note 16 Fair Value Estimation in the financial statements.</p>	<p>We obtained a listing of all financial assets and liabilities from the Administrator.</p> <p>We tested the existence and ownership of financial assets and financial liabilities at fair value through profit or loss directly with the depositary or counterparties by obtaining independent confirmations as at 30 June 2019.</p> <p>As at 31 December 2019 we performed roll forward procedure for all sub-funds.</p>	<p>Based on the procedures performed, no issues were noted.</p>

Description	Our response	Key observations communicated to the Board of Directors
<p>We have considered valuation of financial assets and financial liabilities at fair value through profit or loss as a key audit matter as it is a key driver of the Company's performance and net asset value.</p> <p>Please refer to Note 1 – Financial assets and financial liabilities at fair value through profit or loss and Note 16 Fair Value Estimation in the financial statements.</p>	<p>We obtained the listing of financial assets and financial liabilities at fair value through profit or loss as at 31 December 2019 from the Administrator.</p> <p>We assessed the reasonableness of the valuation for all financial assets and financial liabilities at fair value through profit or loss, by:</p> <ul style="list-style-type: none"> – Comparing values to quoted prices, broker prices or vendor prices; – Recalculating fair value using industry standard models; or – Assessing the reasonableness of the assumptions and data inputs used by the Directors to value these financial assets and financial liabilities at fair value through profit or loss. 	<p>Based on the procedures performed, no issues were noted.</p>

OUR APPLICATION OF MATERIALITY

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

MATERIALITY

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements.

Materiality provides a basis for determining the nature and extent of our audit procedures. We determined materiality to be 0.50% (2018: 0.50%) of Net Asset Value. We believe that Net Asset Value is an appropriate measurement basis since the users of the financial statements may focus more on this than on earnings. During the course of our audit, we reassessed initial materiality and made no changes to it.

Performance materiality

The application of materiality at the individual account or balance level is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Company's overall control environment, our judgement was that performance materiality was 75% (2018: 75%) of our planning materiality. We have set performance materiality at this percentage due to our knowledge of the entity and industry, our past history with the entity, the effectiveness of its control environment and our assessment of the risks associated with the engagement.

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Directors that we would report to them all uncorrected audit differences in excess of 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit report

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the Company. This enables us to form an opinion on the financial statements. We take into account size, risk profile, the organisation of the Company and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed. All audit work was performed directly by the audit engagement team.

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

RESPECTIVE RESPONSIBILITIES ***Responsibilities of directors for the financial statements***

As explained more fully in the directors' responsibilities statement set on page 6, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The objectives of our audit, in respect to fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are the Companies Act 2014, UCITS Regulations and the Central Bank UCITS Regulations.

We understood how the Company is complying with those frameworks by updating our understanding of the adequate system of internal control in place. We also considered the existence of independent service providers, proper segregation of duties and the regulated environment in which the Company operates, which may reduce opportunities for fraud to take place.

We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by management override of controls.

Based on this understanding we designed our audit procedures to identify non-compliance with such laws

and regulations. Our procedures involved inquiries to those charged with governance into possible instances of non-compliance with laws and regulations, review of board meeting minutes during the year and obtaining representation from the management.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditors' report.

OTHER MATTERS WHICH WE ARE REQUIRED TO ADDRESS

We were appointed by the Directors in 2014 to audit the financial statements for the year ending 31 December 2014 and subsequent financial year. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 6 years.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the Company and we remain independent of the Company in conducting our audit.

Our audit opinion is consistent with the additional report to the Directors.

THE PURPOSE OF OUR AUDIT WORK AND TO WHOM WE OWE OUR RESPONSIBILITIES

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

INVESTMENT MANAGERS' REPORTS[^]

ECONOMIC & MARKET OVERVIEW

INTRODUCTION

Both equity and bond markets rallied strongly over the period. The severe sell-off at the end of 2018 was turned on its head at the beginning of 2019, and markets enjoyed a powerful and sustained recovery in the first quarter of the year. From there, markets continued to slowly appreciate until year-end, enjoying their best returns, in aggregate, since 2009.

Markets were driven by the move from global central banks towards a softer *monetary policy* stance. Policy makers generally abandoned prior plans to tighten monetary conditions and raise interest rates. The US Federal Reserve (Fed) cut interest rates three times from July while the European Central Bank (ECB) cut the bank deposit rate and renewed its monthly bond-purchasing scheme. The Bank of Japan (BoJ) kept its already ultra-low interest rate policy in place while the Bank of England (BoE) began to actively consider rate cuts. The overriding factor behind these moves was the state of the global economy, which deteriorated over the period.

Both Germany and the UK avoided recession but experienced at least one quarter of negative quarterly *gross domestic product (GDP)* growth during the year. China's growth rate fell to levels not seen for almost 30 years. US growth remained resilient, albeit slowing, buoyed by consumer spending and still low unemployment.

The continuing US-China trade dispute was a significant factor behind slowing growth rates and clearly impacted investment plans and sentiment at large. However, by the end of the year, optimism about a trade deal was in the ascendency as a 'phase one' deal appeared to be in place, the first step towards a final settlement.

Brexit was another factor causing market *volatility* and economic disruption, especially in the UK. Boris Johnson's general election victory brought clarification around Brexit and caused a surge in sterling and UK stocks in December.

Bond markets were underpinned by the U-turn from central banks on *monetary policy*, with *yields* in major markets slipping to new annual lows – and in the case of the 10-year German bond *yield*, a new all-time low negative *yield* of under -0.7%.

NORTH AMERICA

The US equity market was one of the best performing developed markets in 2019, with the S&P 500, Dow Jones and Nasdaq indices periodically hitting new all-time highs. The market was driven by positive earnings growth and by the restoration of easy *monetary policy*. However, developments in the trade dispute between China and the

US was another factor in the mood of the market. Despite some anxious moments and disappointments, this seemed to be heading in the right direction by the end of the year, as a 'phase one' agreement was made, and the market rallied accordingly.

The Fed cut interest rates three times down to a range of 1.5%-1.75%. After the last cut, Fed chairman Jerome Powell indicated that interest cuts were over in the immediate future as the Fed needed to take stock of the impact of the cuts.

Annualised *GDP* growth fell from a 3.1% rate in the first quarter of 2019 to 2.1% by the third quarter of 2019. The labour market remained strong with unemployment, new job creation and wage rises all favourable. Unemployment hit a new 50-year low of 3.5% in September. *Inflation* fell to 1.5% in February before recovering to 2.1% in November.

Impeachment proceedings against President Donald Trump on the basis of collusion with a foreign power, in this case the Ukraine, to influence politics in the US, were established by the end of the year by the Democratic party. However, markets were relatively sanguine given the expectation that a Republican majority in the Senate would mean the action would fail.

EUROPE

European markets also performed well over the period driven mainly by more *dovish* soundings from the ECB. The central bank abandoned *quantitative tightening* to reopen the flow of *liquidity*, with the aim of bolstering economic growth and reigniting *inflation*. The ECB cut its deposit rate – the rate commercial banks receive for depositing money with the central bank – and reintroduced its monthly bond-purchasing scheme in November.

The US-driven trade dispute and Brexit informed the backdrop but did not ultimately deter the optimistic stance of investors.

The European economy, in both the *eurozone* and the UK, lost further momentum during the period. Germany narrowly avoided falling into recession as its manufacturing base suffered a material downturn in demand. Other nations such as France and Italy barely grew as the *eurozone* economy remained at risk of enduring deflation. In the UK, *GDP* fell in the second quarter, falling by 0.2% quarter on quarter, the worst showing since 2009, before recovering by 0.4% in the third quarter. The uncertainties around Brexit remained a major headwind for the UK although the successful election of Boris Johnson in December helped to provide a clearer path through the uncertainties, giving him the majority in parliament needed to get his draft deal with the EU through and deliver Brexit.

ECONOMIC & MARKET OVERVIEW cont'd.

The *eurozone* labour market improved gradually during the period although the unemployment rate remained at almost double the rates of those in the US and the UK. *Inflation* weakened off to a three-year low of 0.7% annual growth in October.

ASIA

Asian markets rallied over the period, in aggregate. Taiwan was one of the best performing Asian markets, while Hong Kong lagged as a result of the impact of the pro-democracy demonstrations. Both China and Japan performed well.

Falling interest rates provided a positive backdrop to markets as several major central banks in the region, such as India, Thailand and South Korea, followed the lead provided by the Fed.

Growing optimism around the global trade dispute was another factor that lifted the market. Often this optimism was misplaced as positions on both sides hardened leading to rising tariffs. However, by the end of the period, markets were buoyed by the 'phase one' agreement made between China and the US.

Chinese economic growth continued to slow, with the 2019 third-quarter annualised growth rate of 6.0% being the lowest growth rate for almost 30 years. The Chinese central bank cut the reserve requirement rates of its banks to try to boost lending and economic growth.

In Japan, economic growth recovered into 2019 from 2018. This partially reflected the impact of flooding and an earthquake experienced in 2018 which was not repeated in 2019. The first-quarter annualised GDP growth rate of 2.6% was some way ahead of expectations. However, this growth rate had slowed to 1.8% by the third quarter of 2019. The much-followed Tankan survey (a survey of corporate Japan's outlook on the economy) continued to slow throughout the year, with the December reading of the manufacturing diffusion rate showing zero. *Inflation* remained subdued, however, and a long way below the BoJ's official mid to long-term target of 2.0%, forcing the BoJ to push out its targeted *inflation* rate to 2022. *Monetary policy* remained extremely loose in Japan.

FIXED INCOME

Corporate and *high yield* bond markets performed well over the period. The turnaround in central bank policy caused bond *yields* to fall materially through 2019. Increasing signs of the fragility in global economic growth and muted *inflation* rates across developed nations produced a favourable environment for bond markets.

The US bond market was buoyed by the more *dovish* tone adopted by the Fed from late 2018. The US 10-year government bond *yield* fell from close to 2.8% in January

to below 1.5% in September, before recovering to around 1.8% by year-end. Fed chairman Jerome Powell indicated in the spring that no further interest rate hikes were likely over the year. By the end of the period, the Fed had cut rates three times, taking the Fed fund rate down to a range of 1.5%-1.75%

An inversion in the *yield curve* in the spring, with the *yield* on US 10-year Treasuries falling below that of three-month bonds, caused much comment and fears of an economic slowdown or potentially a recession. This inversion reappeared later in the year.

Other major government bond markets were also strong. The *yield* on UK 10-year *Gilts* fell from approximately 1.3% in January to below 0.5% in September, the lowest-recorded level. Swiss and German government bond *yields* went deep into negative territory. The German 10-year government bond *yield* fell to -0.7% in September, its lowest ever-recorded level.

Japanese government bond *yields* remained at lowly levels as the BoJ retained its ultra-low interest rate policy.

Corporate and *high yield* bonds took their cue from government bonds and also performed well, despite the low level of interest rates and *yields* encouraging a high level of issuance.

CURRENCY AND COMMODITIES

The US dollar was relatively flat against other major currencies over the period. The gains made in the first quarter of the period were reversed in the second quarter, as investors discounted waning domestic growth rates and interest rate cuts from the Fed.

Sterling was *volatile* but was ultimately higher as the uncertainties around Brexit dissipated following Boris Johnson's renegotiated deal with the EU and his success at the general election in December.

The euro rallied against other currencies, in aggregate, to end up stronger over the period. Although economic conditions remained challenging in the *eurozone*, there were some signs of improved economic stability towards the end of the period.

The Japanese yen was largely flat against the US dollar over the period.

The CRB Commodity Index rose over the period. After a rout in oil prices in the final months of 2018, oil prices rallied in 2019. Growing *geopolitical* tensions especially in the Gulf caused oil prices to rise strongly in June. OPEC also agreed further production cuts towards the end of the year.

ECONOMIC & MARKET OVERVIEW cont'd.

The copper price was volatile over the period, rising steeply in the first quarter and plunging in the second quarter, before ending the year higher. Iron ore prices rallied significantly from the turn of the year following the dam disaster in Brazil which forced a severe cutback in production from key supplier Vale, before falling back. Gold benefited from its perceived 'safe-haven' status, fears of weakening economic growth and the halt to *quantitative tightening* from major central banks. The gold price rose sharply in June as economic and *geopolitical* concerns intensified, rising to its highest level in over six years before declining modestly into year-end.

All performance data is from 1 January 2019 to 31 December 2019, total return in local currency terms unless otherwise indicated, sourced from Lipper Hindsight and Bloomberg.

SUBSEQUENT EVENT COMMENTARY ON COVID-19 (AS AT APRIL 2020)

Markets fell sharply in February and March as the spread of the Covid-19 coronavirus began to affect investor sentiment. Initial concerns centred on the disruption to global supply chains as China brought in measures to fight the outbreak – but risk-off sentiment sharpened worldwide as other countries began to enter lockdown. Saudi Arabia's decision to ramp up oil production exacerbated matters, leading to the steepest one-day decline in oil prices since the 1991 Gulf War and the biggest one-day loss on Wall Street since the 2008 financial crisis. Benchmark 10-year US *Treasury yields* tumbled to record lows while *volatility* reached levels not seen since 2008.

The response from policymakers was both coordinated and unprecedented. In the US, the Federal Reserve faced its own 'whatever it takes' moment, rolling out an open-ended *quantitative easing* programme and dramatically reducing interest rates. Congress enacted a record stimulus package, consisting of unemployment insurance, direct financial assistance for those in need and a bail-out fund for affected businesses, states and cities. The Bank of England, the European Central Bank and the Bank of Japan followed suit, bringing in their own mixture of *monetary policy easing* and *fiscal* stimulus measures.

Towards the end of March, as *volatility* receded and markets recovered some of ground lost earlier in the month, investors began to ask the question: has the sell-off reached a floor? Markets stabilised thereafter and even saw some striking one-day gains. Even so, investors remained cautious given the scope for further widespread disruption ahead.

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET**BNY MELLON ABSOLUTE RETURN BOND FUND**

Over the 12-month period under review, the Fund's Euro S share class returned 0.92%, compared with a return of -0.36% for EURIBOR 3 Month (the Cash Benchmark used as a target against which to measure the Fund's performance on a rolling 12 month basis after fees), and 2.64% for the Cash Benchmark +3% per annum (used as a target against which to measure the Fund's performance on a rolling annualised 3 year basis before fees), all in euro terms.

The Fund generated a positive return and outperformed the Cash Benchmark.

Government bond *yields* trended lower as the US Federal Reserve (Fed) cut interest rates three times in succession while aiming to leave them on hold in 2020; the European Central Bank (ECB) restarted its monthly asset purchase programme in November and has postponed future rate hikes until *inflation* nears its 2% target. The US economy remains relatively strong but, given the global trade war, the outlook is more uncertain. In Europe, the key risks remain Brexit and Italy. *Investment grade credit* strengthened, as *spreads* tightened and *volatility* decreased given the instruments' high interest rate sensitivity; *high yield credit* experienced some weakness at times as economic uncertainty grew, but benefited from the overall rally in *risk assets* and investors' renewed hunt for yield. The US dollar remained resilient while emerging market currencies stabilised over the period.

The Fund generated a positive return over the period, due largely to its *credit* strategies as its interest rate strategies detracted. The *credit* positions, in aggregate, strongly supported returns as *investment grade* bonds fared particularly well as *spreads* tightened, supported by positions in *asset-backed securities (ABS)*, and emerging market bonds; *high yield* bonds and loans, in aggregate, also registered a small profit. However, the Fund's interest rate positions, in aggregate, detracted from returns. In particular, *duration* had the most negative impact, especially in June and July as the *short* position in Italian bonds hurt. The Fund's *yield curve* positions also detracted as the US and Italian *yield curves* flattened, whereas the Fund was positioned for an anticipated steepening. However, the country allocation positions had a positive influence on returns, largely due to the Fund's *long* US versus *short* Germany position. Lastly, the Fund's small currency exposures were a slight negative.

The manager adjusted the Fund's positioning across its various strategies. At the end of the year, the Fund had a *long duration* position. The Fund also has a relative value position in 10-year UK *Gilts* (held against 10-year German government bonds) and is positioned for a flattening of the Italian *yield curve*. The Fund still has a US *inflation* trade in place – in anticipation of higher US *inflation*

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd.

BNY MELLON ABSOLUTE RETURN BOND FUND cont'd.
as the economy nears full capacity – via a *long* position in 30-year US *Treasury Inflation-Protected Securities (TIPS)*, held against 30-year US *Treasury futures*. The manager continues to favour ABS and has a *long* position in corporate bonds (being most positive on *investment grade* bonds within the asset class). The Fund also has a *long* position in local currency emerging market bonds and some small currency positions.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON ABSOLUTE RETURN EQUITY FUND

Over the 12-month period under review, the Fund's Sterling R (Acc.) share class returned -2.19% compared with a return of 0.72% for LIBOR GBP 1 Month (The Cash Benchmark used as a target against which to measure the Fund's performance on a rolling 12 month basis after fees) and 6.72% for Cash Benchmark +6% per annum (used as a target against which to measure the Fund's performance on a rolling annualised 5 year basis before fees), all in sterling terms.

A rising tide lifts all boats, as the saying goes, and 2019 was a clear example of *liquidity* lifting wider markets into positive territory. This presented challenges for active investors seeking to generate returns in excess of the market, including the Fund, but it also presented clear opportunities as company valuations, historically anchored to their underlying *fundamentals*, were set adrift.

The Fund's performance for the year was negative. Fund positioning in general proved too cautious, especially in the early part of the year. Although the manager's caution on the worsening outlook for corporate earnings proved largely correct, equities re-rated strongly driven by the boost from yet further *liquidity* provision. Over 2019, the mix of low growth and falling government bond *yields* meant equity markets were led by companies perceived to be high quality, *defensive* and 'bond-like'.

The Fund's focus is idiosyncratic, as opposed to focusing on factor returns, and in that respect 2019 presented an interesting paradox. The dominance of style factor-based flows created extreme valuation dispersion. This presented what the manager believes are very attractive opportunities to *short* 'expensive' stocks, and take *long* positions in 'cheap' stocks, where the manager foresees specific *fundamental* catalysts that the manager anticipates will reprice these stocks towards (the assessment of) fundamental value and where the style factor risk can be carefully *hedged*. In some instances, the Fund is yet to experience the catalyst, but

the manager feels that they offer attractive performance potential in the future.

One example is the *long* position in Liberbank, a mid-sized domestic Spanish bank. The manager expects the company to be permitted to move to advanced risk-weight modelling of its balance sheet, releasing capital which will enable a faster restructuring of the group's cost base and legacy non-performing assets. This should be positive for return on equity, and provide Liberbank with a stronger negotiating position ahead of the first wave of European bank consolidation, which the manager believes is required to restore sector profitability. However, Liberbank's returns in 2019, like those of its peers, have been under pressure from negative interest rates and regulatory pressure to build equity buffers. In addition, technical selling pressure weighed on the share price. In December Liberbank announced steps to address this valuation disconnect by commencing a share buyback. The position has been *hedged* with a mix of banks and sector instruments.

The *short* position in Spanish-regulated gas distribution company Enagas is a good example of the potential to capitalise on stocks eventually re-pricing to *fundamental* news flow. The *defensive* nature of the stock saw it benefit from market performance trends, despite the building risk the manager saw in the form of a regulatory review; this ultimately played out in July. The *hedge* was another bond proxy in the form of a Spanish property stock.

As is also the case in good years, there were a number of mistakes in 2019. In some instances, the original thesis simply proved wrong, in which case the manager exited the position. For example, the Fund was *long* Fresenius Medical, a leading provider of dialysis products and services, judging it to offer a *defensive* and predictable earnings stream. The company tempered expectations at its interim results due to disappointing care co-ordination profitability; the view that the regulatory risk was diminishing proved to be incorrect and the manager closed the position.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND

The Fund was launched on 31 May 2019.

Over the reporting period since its inception, the Fund's Euro U (Acc.) share class returned 1.42%, compared with a return of -0.25% for EURIBOR 1 Month, both in euro terms.

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd.

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND cont'd.

The Fund generated a positive return and outperformed its benchmark.

As the manager constructed the portfolio during the first few months, the portfolio had marginally *long* net exposure to equities and a core of *investment grade* positions. Equity market performance was somewhat mixed, but positive performance in the Fund was generated by a range of positions including Coupa Software (a software-as-a-service (SaaS) provider) and Conmed (a medical products company) which benefited from targeted equity exposure. Sika (an *investment grade* Swiss construction company) and Cembra (an *investment grade* Swiss financial services company) positions benefited from increased sensitivity to share price moves ('gamma') as prices were *volatile*. A robust new issue calendar incrementally contributed positively to returns while exposure to Japan detracted slightly from returns.

In September, equity markets rebounded primarily due to positive US-China trade rhetoric and strong expectations of a Federal Reserve rate cut later in the month. *Volatility* fell and markets rotated aggressively out of US growth stocks and into *cyclical* names, which weighed somewhat on the Fund's returns. This sharp shift in market positioning, combined with building uncertainties around shifting central bank policies and looming trade discussions, led the manager to cut gross exposure and reduce net equity exposure. The Fund was rebalanced to favour better *credit* quality *cyclical* positions and the Japanese positions were exited.

As investor sentiment improved in late October due to progress in US-China trade talks, gross exposure and equity exposure were once again increased. Theme related positions subsequently performed well into year-end and targeted equity exposure also contributed to returns. Broadcom (a semiconductor company) and Proofpoint (a SaaS company) were added and both were strong performers. Lumentum (a new issue and diversified tactical play) was added in December and contributed to positive returns into year-end.

Late in the year, exposure to Japan was reintroduced in the form of *credit* positions which the manager feels will generate profit if share prices move (either higher or lower); the magnitude of the move will be dependent on the strength of the Japanese economic rebound. The Fund's regional exposure ended the year with c.50% in the US, c.33% in Europe, and the remainder in Japan.

Sector exposures within the Fund included technology (namely, software, semiconductors, and cyber security)

which accounted for approximately half of exposure for much of the period. Other sectors included exposures to consumer, healthcare, aerospace/defence, industrial and financial companies.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON DYNAMIC TOTAL RETURN FUND

Over the 12-month period under review, the Fund's USD A (Acc.) share class returned 13.19% in US dollar terms.

The Fund produced a positive return over the past twelve months due to gains from each of the four strategy buckets. Growth assets were the biggest driver of returns during 2019 as the strategy benefited from continued buoyant markets.

The Fund's *long* position in US stocks was the biggest contributor, followed by a *long* position in UK stocks and tactical positioning within the *eurozone* and Japan. A small allocation to *high yield* also benefited growth assets. *Defensive* assets also contributed, with *long* positions in US *Treasuries* and UK *Gilts* performing strongly. While the overall US Treasury position remained *long*, allocations were adjusted dynamically in response to evolving *yield* dynamics and *inflation* expectations.

UK *Gilt* positioning moved from *long* to *short* during the third quarter. The Fund's tactical allocation to cash also boosted returns. A small offset came from the *short* position in Australian government bonds which performed poorly as the Reserve Bank of Australia cut rates in response to subdued *inflation* and labour markets. *Real assets* generated a small positive contribution, despite *inflation* remaining muted. A *long* in gold and positioning in the energy and grains sectors drove the position return. Within diversifying strategies, currency allocations drove the gain, mainly from *short* positions in the euro and Swiss franc. The US dollar rose against most G10 currencies over the year due to stronger US data and higher interest rates. The euro and Swiss franc weakened as economic data and *inflation* remained tepid.

The Fund maintains a moderate pro-risk stance. Flatter *yields curves*, especially in the US, prompted a move out of bonds and into cash during the second and third quarters on 2019. Without the *hedging* characteristics of bonds, and with *macroeconomic* and *geopolitical* uncertainty, the manager reduced the allocation to growth assets. Since then, the US *yield curve* has reverted to a more normal upward slope.

January 2020

BNY MELLON GLOBAL MULTI-ASSET INCOME FUND

Over the 12-month period under review, the Fund's Euro A (Inc.) share class returned 17.67% against a return of 19.07% from the MSCI AC World NR Index/ICE BofAML Global Broad Market EUR hedged Index (60:40), both in euro terms.

The Fund produced a positive return but was behind the benchmark. Bond, and especially equity, markets were buoyed by the decision of global central banks to further ease *monetary policy*.

The Fund's material weighting in equities was beneficial to returns as equities provided the best returns in aggregate of any asset class in 2019. *Alternatives* also performed positively over the period while the Fund's allocation to renewable energy assets contributed strongly. The contribution from bonds lagged as bond markets underperformed most other asset classes over the year.

In terms of activity and within equities, Samsung SDI was purchased owing to the increasingly bright outlook for electric vehicle sales, which could continue to drive demand for Samsung SDI's batteries. The Fund participated in the additional equity raising by Hipgnosis Songs Fund. This investment in music royalty catalogues offers exposure to the significant growth of music streaming via Spotify and Apple Music. A position in Star Entertainment in Australia, owner of The Star casino in Sydney, was made. The company is a major beneficiary of long-term immigration to Australia from Asia, and the growing number of tourists travelling to Australia from Asia. Within alternatives, a position in US Solar and Aquila European Renewables was established.

German semiconductor manufacturer Infineon Technologies was sold after its acquisition of rival Cypress Semiconductor. Aerospace engineer Cobham was sold after its shares surged following a takeover bid by American private-equity firm Advent International. Other sales included Italian infrastructure stock Atlantia and Bluefield Solar.

Investments within the Fund typically have strong thematic support. For instance, the 'Earth matters' theme flags growing investment in 'green technology'. Rising global environmental concerns are driving increased demand for renewable energy. Renewable energy assets are an important part of the Fund, which has holdings in wind, solar and hydro-power operators in the US, UK and Europe.

The manager's investment process continues to involve the search for sustainable income through a focus on the underlying cash flows of the companies and *securities* in which the Fund invests.

January 2020

BNY MELLON GLOBAL OPPORTUNISTIC BOND FUND

The Fund was closed on 7 March 2019.

Over the period from 1 January 2019 until the Fund's closure on 7 March 2019, the Fund's USD C share class returned 2.02%, compared with a return of 0.49% for USD 3 Month LIBOR, both in US dollar terms.

The Fund was closed following a series of redemptions that had left it impractical to continue an unconstrained bond strategy.

Mellon Investments Corporation*
January 2020

BNY MELLON GLOBAL UNCONSTRAINED FUND

Over the 12-month review period, the Fund's USD W (Acc.) share class returned 22.40%, compared with a return of 18.18% for the benchmark, comprising 60% MSCI AC World NR Index and 40% JP Morgan Global GBI Unhedged TR Index, and 13.98% for the Lipper Global – Mixed Asset USD Balanced-Global sector average, all in US dollar terms.

The Fund produced a positive return and was ahead of both the benchmark and the sector average. Bond, and especially equity, markets were buoyed by the decision of global central banks to further ease *monetary policy*.

Stock selection was a key driver of returns in the Fund. By sector, it was notably strong in industrials and financials. Selection in bonds and commodities were also accretive to performance. Aerospace engineer Cobham was a top stock contributor to returns over the period as its shares surged after it received a takeover bid. Applied Materials outperformed on a more optimistic outlook for demand driven by a strong semiconductor cycle and demand for the company's semiconductor production equipment. Citigroup was another key driver of performance as it produced positive earnings results.

On the negative side were holdings in US government bonds as *yields* rose in aggregate from September. Regarding equities, the German property manager Deutsche Wohnen struggled as a result of a proposal of a five-year rental

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd.

BNY MELLON GLOBAL UNCONSTRAINED FUND cont'd.

freeze in Berlin. Japanese automotive company Suzuki Motor also detracted from performance as higher selling costs and slower sales growth in India weighed on the share price. The prospect of a no-deal Brexit was a major drag on shares in AIB Group, which reflected investors' concern about the Irish economy in that scenario. First-half earnings also disappointed.

In terms of activity, positions were taken in Greencoat UK Wind and Greencoat Renewables, which invest in operational wind assets. Mastercard, which operates a global payment network in an industry where the top two companies control over 80% of the market, was purchased. High growth and returns are likely to continue, driven by further penetration of cards into Europe and emerging markets, and the increasing shift from cash to contactless payments. A position was also taken in US-listed Laureate Education, which operates high quality secondary education campuses in the US, Mexico, Peru, Chile and Brazil.

Hotel and restaurant business Whitbread was sold. After a period of strong share price performance following the sale of its Costa Coffee business, the manager felt the group's growth prospects had become less attractive. Aerospace engineer Cobham left the portfolio, following the takeover bid for the company. The position in Irish bank AIB was exited as the stock rallied on news of a Brexit deal. Profits were taken in Lloyds Banking Group and Royal Bank of Scotland following the market's bounce after the Conservative Party's election victory.

Newton Investment Management Limited
January 2020

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

Over the 12-month period under review, the Fund's Euro A share class returned 10.63%, compared with a return of 3.59% for EURIBOR 1 Month + 4% per annum, both in euro terms.

The Fund generated a positive return and was ahead of the benchmark. 2019 marked a strong period for most asset classes, particularly equities, buoyed by easy *monetary policy* from the world's central banks.

The return-seeking core was responsible for much of the positive return over the period. *Alternatives*, corporate bonds, emerging market debt and especially equities were all accretive. In terms of equity contributors, life insurer AIA was a strong performer as were the Fund's information technology holdings such as Microsoft, SAP and Accenture,

boosted by strong results and a *bullish* outlook. Additional participation in equity market upside was generated from positions in S&P 500 Index *call options*, held on a shorter term tactical basis to insulate the *defensively* positioned portfolio from the possibility of further equity market upside.

In terms of detractors, aerospace and defence group, Thales, displayed weakness. The shares fell following disappointing third-quarter financial results. The revenue profile of this industry is notoriously lumpy, and the manager continues to view the company's *fundamentals* favourably, with the demand backdrop being well supported by rising pan-European budget commitments. German real-estate company Deutsche Wohnen was also weaker, affected by the City of Berlin's proposal to instigate a five-year rent cap on residential property.

Stabilising assets and *hedging* also contributed marginally to performance in aggregate. There was a strong contribution from government bonds which benefitted from the tailwinds of easier *monetary policy* and a more accommodative Federal Reserve. The Fund's exposure to gold was also accretive to performance.

Derivative instruments detracted from returns as equity index protection naturally weighed on performance as indices moved higher.

In terms of activity, within equities, a position was established in Mastercard, the payments network, which boasts competitive and well-established business, and strong growth prospects as card penetration and usage increases globally. Other more *cyclical* stocks such as Goldman Sachs and Anglo American were also added. Positions in quality *defensive* stocks including Swiss healthcare company Novartis, the British-Dutch multinational Unilever, and beverages company Diageo, which had all performed strongly, were reduced late in the year. In fixed income, *duration* was reduced, with some profits taken on 10-year and long-dated US *Treasuries* following a sharp fall in *yields*.

While *risk assets* do appear to enjoy favourable momentum, it is right, in the manager's opinion, to remain alert to potential risks on the horizon, as well as continuing to take advantages of opportunities as they present themselves. The manager remains ready to use the flexibility afforded by the Fund's mandate to reshape the portfolio if such action is appropriate.

January 2020

BNY MELLON TARGETED RETURN BOND FUND

Over the 12-month review period, the Fund's USD A (Acc.) share class returned 3.44%, compared with a return of 5.36% for the Lipper Global – Bond Global sector average, both in USD terms.

Developed fixed income markets rose during the year amid easing *monetary policy* out of the US Federal Reserve that included three rate cuts in the second half of 2019, citing trade uncertainty and slowing global growth. On the trade front, the Trump administration came to a 'phase one' trade deal with China in December, expected to be formally agreed and signed in early 2020.

In developed markets, the European Central Bank cut interest rates during the year, in line with market expectations. In December, the UK Conservative Party secured a resounding majority over the Labour Party in the

general election that should ensure that the UK will now leave the EU by 31 January 2020.

Emerging markets rose throughout the year despite ongoing global trade tensions helped in part by a *bullish* commodity market. Commodities rose 9.41% in 2019 as measured by the Thomson Reuters Core Commodity CRB Index. Oil prices, specifically, rallied in the final quarter due to an improvement in the global growth outlook and production restraint promised by major energy producers.

Overall *duration* of the Fund decreased by 0.25 years from December 2018 and stands at 0.50 years as at 31 December 2019 with an average *credit* rating of AA+. The Fund maintains diversification across approximately 70 individual bonds generating a weighted current *yield* of 1.20% (1.60% on a *yield-to-worst* basis), both expressed in US dollar terms.

Mellon Investments Corporation*
January 2020

BNY MELLON U.S. OPPORTUNISTIC ALPHA FUND

The Fund was closed on 27 September 2019.

Over the reporting period until its closure on 27 September 2019, the Fund's USD W share class generated a return of -2.67%, compared with a return of 19.40% for the S&P 500 NR Index and 17.25 for the Lipper Global – US Equity sector average, all in US dollar terms.

Equity markets performed positively overall during the period. In the US, the Federal Reserve (Fed) cut interest rates. In the US, President Donald Trump announced and imposed tariffs on China, which impacted global markets. *Inflation* picked up slightly, but remained below the Fed's 2% goal.

In this environment, the Fund underperformed its benchmark. The Fund's *long* positions helped relative results while the *short* positions detracted overall. In healthcare, the *long* position in SAGE Therapeutics led contributors. The company benefited from positive sentiment from trial results and an approval from the Food and Drug Administration. *Long* road and rail holdings were also a bright spot. In particular, Knight-Swift Transportation responded positively to notable performance in the trucking industry.

On the downside, the position in Green Dot, a major distributor and producer of debit cards, experienced

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET
cont'd.

BNY MELLON U.S. OPPORTUNISTIC ALPHA FUND cont'd. increasing competition, and shares fell as a result. Retail holding GAP was also a key detractor. Earlier positive reception for their plan to spin out the Old Navy division into its own public company dissipated as the company reported weak GAP spring sales trends.

The manager increased the Fund's exposure to *consumer discretionary* and industrials during the period and decreased the weight to financials and healthcare. Several healthcare holdings and positions in several pharmaceuticals names including Mylan were sold, as pressure on drug companies intensified with industry *fundamentals* and negative press. In the financials sector, the manager repositioned within the banking industry, exiting positions that declined as a result of industry-wide *credit* concerns and ongoing thorny trade discussions and added new positions with attractive long-term opportunities.

Mellon Investments Corporation*
January 2020

GLOBAL EQUITY**BNY MELLON GLOBAL EQUITY FUND**

Over the 12-month review period, the Fund's USD A share class returned 24.29%, compared with a return of 26.60% for the MSCI AC World NR Index and 22.66% for the Lipper Global – Equity Global sector average, all in US dollar terms.

The Fund produced a positive return. It was behind the benchmark but ahead of the sector average. Equity markets were supported by the prevailing easy *monetary policy* from global central banks and the prospects of a settlement, towards the end of the period, to the US-China trade feud.

Sector allocation was a mildly positive factor behind returns while stock selection detracted. Stock selection was positive in financials but weaker in *consumer staples*.

In terms of stock detractors, Japanese retailer Seven & I struggled against a difficult domestic backdrop, with concern growing around weakening sales trends. Higher selling costs and slower sales growth in India weighed on Suzuki Motor's results, as did a depreciating rupee. Shares in Cisco Systems weakened as the company's revenue guidance for the second quarter of the *fiscal year* disappointed, as an uncertain *macroeconomic* backdrop constrained enterprise spending.

Microsoft was a top-performing stock, spurred by the technology giant's provision of greater detail on its gaming strategy and positive earnings momentum, with the company beating expectations for quarterly revenue and profit. Shares in plumbing supplier Ferguson were buoyed by solid set of results for the full year as trading profit exceeded consensus expectations. Retailer Dollar General also performed well as it posted strong quarterly results and raised full-year guidance. Same-store-sales growth was strong, while gross margin also exceeded expectations.

In terms of activity, a position in Bayer, a global leader in crop chemicals and seeds, was established. After a dismal 18 months of news flow on growth, margin pressures and litigation costs relating to the herbicide glyphosate, the stock offers an interesting value opportunity with the potential for material upside, in the manager's view. A position in Mastercard was taken owing to it being a beneficiary of the structural shift from cash to digital payments. Boasting a substantial share of global card payments, a long growth trajectory for card volumes is likely given penetration is relatively low in some regions. The manager also purchased Rolls-Royce. The manager believes civil aerospace is an attractive market, with above-*gross domestic product (GDP)* growth rates and high barriers to entry; a heavy investor focus on the disruption caused by technical issues with Rolls-Royce's Trent 1000 engines provided the opportunity to invest.

GLOBAL EQUITY cont'd.**BNY MELLON GLOBAL EQUITY FUND** cont'd.

Newton Investment Management Limited
January 2020

BNY MELLON GLOBAL EQUITY INCOME FUND

Over the 12-month period under review, the Fund's USD A (Inc.) share class returned 23.98%, compared with a return of 27.74% for the FTSE World TR Index and 21.02% for the Lipper Global – Equity Global Income sector average, all in US dollar terms.

The Fund produced a positive return but was behind the benchmark, although ahead of the sector average. Equity markets were supported by the prevailing easy *monetary policy* from global central banks and the prospects of a settlement, towards the end of the period, to the US-China trade feud.

Stock selection was a negative factor behind relative returns, with weakness particularly evident in the technology sector, offsetting strength in *consumer goods* and financials.

UK utility Centrica was a top stock detractor from relative performance. Centrica declined after it cut its dividend and disposed of a range of non-core assets. Shares in Cisco Systems weakened as the company's revenue guidance for the second quarter of the *fiscal year* disappointed, as an uncertain *macroeconomic* backdrop constrained enterprise spending. The Fund's relative performance was also adversely affected by not holding Microsoft and Apple. The Fund cannot hold these stocks as they do not meet its strict *yield* criteria.

Shares in the US chipmaker Qualcomm contributed positively owing to strong earnings results and after the company settled a long-running dispute with Apple which paves the way for Qualcomm chips to be used in future versions of the iPhone. Beauty-products manufacturer Coty, was a material contributor to performance due to strong earnings figures and after JAB, a privately held Luxembourg-based investment firm, successfully took back majority control of Coty. An overweight in Western Union was also beneficial. The market has rerated Western Union in recognition of its ability to produce consistent and stable results against a backdrop of meaningful disruption in its industry.

In terms of activity, a position was taken in Svenska Handelsbanken, the Fund's first bank purchase in a long time. Svenska Handelsbanken aims to have higher profitability than the average of peer banks in the Scandinavian markets in which it operates. A position

was made in Tapestry, which is a US-headquartered luxury fashion firm boasting three major brands: Coach, Kate Spade and Stuart Weitzman. Tapestry has a consistent track record of generating steady free cash flow despite occasionally challenging trading conditions.

Positions in fast-food giant McDonald's, UK drinks giant Diageo and professional publishing company RELX were disposed of, after a period of share price appreciation meant the stocks no longer met the Fund's strict *yield* criteria. UK utility Centrica was sold given its diminished cash flow profile and the weaker outlook for its legacy business.

The disciplines of the Fund's process and strict *yield* criteria, which force the manager to sell stocks when they become too expensive and reinvest in better-value quality opportunities, are, in the manager's view, extremely important.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Newton Investment Management Limited
January 2020

BNY MELLON GLOBAL LEADERS FUND

Over the 12-month period under review, the Fund's USD A (Acc.) share class returned 29.35% compared to 27.67% for the MSCI World NR Index and 22.84% for the Lipper Global – Equity Global sector average, all in US dollar terms.

This was a strong year for global equity markets. Despite the continuation of the US-China trade war, a mid-year growth wobble and the seemingly endless Brexit saga, 2019 delivered handsome returns for most equity investors. Helping support investor sentiment were a remarkably resilient US economy (now well into the longest continuous expansion in its history) and a supportive Federal Reserve. Unsurprisingly, the US equity market led the way among the major indices.

In the Fund, at a sector level, returns came from an overweight position in information technology. While stock selection in this sector was actually a drag on relative returns, the top two holdings in the Fund were sector constituents Taiwan Semiconductor and Mastercard. The former continued to provide evidence that the bottom of the semiconductor cycle had been passed and that demand was on an upward trajectory, driven by smartphones, high-performance computing and 5G telecoms. Mastercard, meanwhile, posted consistently good results throughout the year and continues to make progress with its core business and new initiatives. The *consumer discretionary* sector was also a major positive: Starbucks, LVMH and

GLOBAL EQUITY cont'd.**BNY MELLON GLOBAL LEADERS FUND** cont'd.

Nike all made significant contributions. Luxury-goods group LVMH maintained its impressive sales growth, while Nike's digital transformation gathered steam and sales growth in China continued apace. The Fund's long-term underweight position in financials also performed well, as the sector continues to struggle under the burden of low interest rates, weak economic growth in many parts of the global economy, and tighter regulation.

Europe ex-UK stocks were the largest contributors to relative performance from a regional perspective, with Spanish clothes retailer Inditex, Swiss pharmaceutical Roche and German IT firm SAP all making significant gains over the year.

New holdings in Automatic Data Processing and Microsoft Corporation were bought, and the holding in 3M Company was sold during the period.

Accepting the near inevitability of periods of turbulence, the manager will continue to focus research efforts on finding those companies across the globe that can adapt and innovate irrespective of structural or *cyclical* hurdles.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Walter Scott & Partners Limited
January 2020

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the 12-month period under review, the Fund's USD A share class returned 26.34% against a return of 26.60% from the MSCI AC World NR Index, both in US dollar terms.

Monetary policy stimulus, in tandem with an apparent easing of short-term trade-war tensions between the US and China, bolstered sentiment, enabling global equities to deliver a strong positive return. Stock picking aided relative returns in financials in particular; while an overweight to information technology was also of benefit. On the other hand, stock selection in *consumer discretionary* was a significant curb on relative performance. The portion of the portfolio held in US *Treasuries* detracted against a backdrop of rising equities.

Applied Materials emerged as a top contributor, snapping back from a weak end to 2018, as investors grew increasingly optimistic on the company's revenue outlook. Microsoft's shares also continued on an upward trajectory, testament to the manager's view that the long-term opportunity, as the business moves towards more recurring revenues, remains attractive. Citigroup performed well,

aided by the issuance of several sets of positive results over the course of the year.

Concerns around domestic demand in India continued to weigh on Suzuki Motor. Royal Dutch Shell reported some disappointing results for the second quarter, underwhelming across the board on account of weakness in the wider *macroeconomic* environment. Infineon Technologies declined as investors lost confidence that growth rates in the semiconductor sector would continue in the shorter term.

In terms of activity, Goldman Sachs was introduced to the portfolio. As the market becomes more comfortable with the bank's ability to manage costs in a tough revenue environment, the manager felt the stock could achieve a re-rating. The manager purchased Germany's Bayer, a global leader in crop chemicals and seeds. After a dismal 18 months of news flow, the manager felt the stock represented an interesting value opportunity with the potential for material upside over the coming years. Mastercard, a beneficiary of the shift from cash to digital payments, was purchased. Boasting a substantial share of global card payments, a long growth trajectory for card volumes is likely, given penetration is relatively low in some regions. A position in Rolls-Royce, a leading UK aero-engine maker, was established. The manager felt that a heavy investor focus on the disruption caused by technical issues with Rolls-Royce's Trent 1000 engines had provided an interesting investment opportunity.

Several elements of ABB's original investment case had disappointed versus initial expectations and the manager chose to exit the remainder of the position following a period of strong performance. eBay received a boost in January of 2019 when an activist investor wrote to the company outlining a number of proposals aimed at unlocking shareholder value. It was deemed appropriate to exit the holding following such a strong start to the year. Additionally, Infineon Technologies was removed from the Fund following the announcement of a transformative deal to acquire Cypress Semiconductor. Meanwhile, Deutsche Post was also sold on concerns that it would not be able to withstand any eventual slowdown in the parts of the business that had continued to meet expectations.

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the reporting period, the Fund's Euro A share class returned 30.51%, compared with a return of 30.02% for the

GLOBAL EQUITY cont'd.

BNY MELLON LONG-TERM GLOBAL EQUITY FUND cont'd. MSCI World NR Index and 25.10% for the Lipper Global – Equity Global sector average, all in euro terms.

Twelve months ago, perhaps only the most resolutely optimistic observer would have predicted that 2019 would see global equity markets reward investors with such impressive returns. Despite no shortage of potential *macroeconomic* and political 'banana skins' – Brexit, trade wars and tensions in the Middle East among them – investors chose to focus instead on the resilience of the US economy and the continued largesse of central banks. In many ways it was befitting that a decade in which markets so often defied the naysayers should finish on such a high note.

Healthcare stocks made a significant contribution to returns, with Edwards Lifesciences continuing to be rewarded for its innovative approach to treating aortic stenosis with a minimally-invasive alternative to surgery. Investors welcomed clinical results that showed the superiority of Edwards' Transcatheter Aortic Valve Replacement in low-risk patients. *Consumer discretionary* stocks were another source of good performance. Inditex, the Spanish clothing retailer, continued to post best-in-class results, while the relentless sales growth at French luxury good group LVMH was evidence of the world's seemingly insatiable demand for high-end products.

One stock that did struggle over the period was Jardine Matheson, the Hong Kong-based conglomerate. This was unsurprising given the unprecedented level of social and political disruption the island endured over much of the year. While the company's results were somewhat mixed, investors have expressed concerns about its exposure to Hong Kong's office market, which would suffer in the event of any long-term diminution of the island's international standing.

A new holding in Booking Holdings was added to the Fund during the period. Denso and EssilorLuxottica were complete sales during the period. Having inherited a small position in Alcon, following the spin-out from Novartis, this was sold during the period.

Walter Scott & Partners Limited
January 2020

REGIONAL EQUITY**BNY MELLON ASIA RISING STARS FUND**

Over the 12-month period under review, the Fund's USD A (Acc.) share class returned 12.74%, compared with a return of 13.82% from the MSCI AC Asia Small Cap NR Index and 12.62% from the Lipper Global – Equity Asia Pacific Small & Mid Cap sector average, in US dollar terms.

Markets remained *volatile* through the year driven largely by *macroeconomic* issues but ended the year on a strong note with some of the *geopolitical* concerns receding.

The Fund was weighted Asian Equity ex-Japan 46.3% and Japan Small Cap 52.1%.

The Asian Equity ex-Japan portion of the Fund was nearly fully invested at the end of the period with Hong Kong/China, India and Indonesia being the key country exposures. Some of the key stock themes in the Fund and the corresponding drivers are: telecom stocks in China and Indonesia, which have strong growth in data consumption and an improving competitive environment; gas and energy stocks in China, which are beneficiaries of the strong government push to clean up the environment and the ongoing restructuring of the gas pipeline sector; corporate banks in India, which could benefit from the peaking of the corporate non-performing loan cycle; internet stocks in China and Korea, where the manager believes strong earnings momentum could continue; and healthcare stocks in India and South East Asia, which have secular growth rates due to low penetration levels.

Despite market *volatility*, the manager continues to remain positive on the outlook for small and mid-cap stocks in Asia. Asia is benefiting from continued robust growth rates in countries across the region. Valuations remain attractive and the manager believes investors, both domestic and international, are underinvested in Asia Ex Japan equities.

The Japan Small Cap portion of the Fund performed positively over the review period. Sector selection was the main contributor for the performance.

At the industry level, the main positive contributors to performance were electric appliances and services, where the Fund was overweight, and banks, where the fund had no holdings. The main detractors were insurance and other products where the Fund was overweight and real estate where the Fund had no holding.

At the individual stock level, the main contributors to performance included BayCurrent Consulting, which provides comprehensive consulting services; Sanken Electric, which produces discrete semiconductors and analogue integrated circuits; and Anritsu, a global leader of test and measurement instruments for mobile telecommunication markets. Among the main negative contributors to performance were ItoKuro, which provides

REGIONAL EQUITY cont'd.**BNY MELLON ASIA RISING STARS FUND** cont'd.

information of services of education through its internet portal sites; Vector, a PR and advertising company using simple notification services and the web and a leading provider of press releases; and Open Door, which operates travel comparison sites.

There was one new name during the review period, Insource, which provides corporate training and business related courses. The Fund sold out of Star Micronics, which creates high-performance machine tools. At the end of December 2019, the Japan equity portion of the Fund was overweight electric appliances, services and other products. The manager's sector allocation decisions are mainly the result of bottom up stock picking decisions.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

BNY Mellon Asset Management Japan Limited
January 2020

BNY MELLON ASIAN EQUITY FUND

Over the 12-month review period, the Fund's USD A share class returned 25.10%, compared with a return of 19.48% for the MSCI AC Asia Pacific ex Japan TR Index and 18.97% for the Lipper Global – Equity Asia Pacific ex-Japan sector average, all in US dollar terms.

The Fund produced a positive return and was well ahead of both the benchmark and the sector average return. There was a change of lead portfolio manager at the end of the first half and much of the outperformance came post manager change with some change in emphasis on the stock positioning.

Asian markets were buoyed by the easy *monetary policy* stance of global central banks and, towards the end of the period, by hopes of a trade deal between the US and China.

Stock selection was strong at the regional level, especially in China. At a sector level, it was notably positive in healthcare and *consumer discretionary* although weaker in communication services. Sector allocation was also a positive factor behind returns, with the material overweighting of *consumer discretionary* and information technology aiding performance.

Among the top stock contributors was New Oriental Education & Technology, the Chinese education company, which rose by around 120% in US dollar terms as it demonstrated strong growth in its courses and learning programmes. Applied Materials performed strongly owing to strong demand recovery for its semiconductor products. Accounting software provider Xero also did well, owing to strong

earnings momentum from the global expansion of its accounting software.

Autohome, the Chinese online auto-sales platform, fell sharply on a softer pricing environment, given the weakness of its Chinese car dealer customers. Indian finance company Edelweiss was also weak, as it faced a more challenging environment, with lower growth and potentially higher risk. Battery manufacturer Samsung SDI fell on investor concerns about the impact a fire at a plant owned by the firm could have on the short-term earnings outlook and on the rollback of electric vehicle subsidies in China.

In terms of activity, Indian jeweller, Titan, was purchased given its impressive growth plans in terms of geographic expansion, led by store openings, which could help drive very strong revenue growth. Hong Kong-listed Meituan Dianping, a fast-growing e-commerce company focused on food delivery, was added. It is benefiting from strong demand and is well positioned to increase its service offerings and boost margins as the sector has now consolidated. ASML, a world leader in lithography services for the semiconductor industry, was purchased given the strong demand outlook for its products and its dominant position in the semiconductor supply chain.

Chinese sofa manufacturer Man Wah was sold owing to the persistent uncertainty surrounding trade between China and the US. US-owned casino operator Sands China was sold for similar reasons and due to the slowing Chinese economy's impact on its services. Philippine conglomerate GT Capital was sold owing to the country's general *macroeconomic* weakness.

Newton Investment Management Limited
January 2020

BNY MELLON ASIAN INCOME FUND*

Over the 12-month period under review, the Fund's USD W (Inc.) share class returned 18.05% compared with a return of 19.08% from the FTSE Asia Pacific ex Japan TR Index and 18.75% for the Lipper Global – Equity Asia Pacific ex-Japan sector average, all in US dollar terms.

The Fund produced a positive return but was behind both the benchmark and the sector average return. Global markets were buoyed by the easy *monetary policy* stance of global central banks.

Sector allocation was a negative factor behind relative performance, notably the material overweighting of telecommunications. Stock selection was weak

REGIONAL EQUITY cont'd.**BNY MELLON ASIAN INCOME FUND*** cont'd.

in financials but strong in technology. At the regional level, underweight exposure to China and the overweighting of Singapore weighed on returns.

Retail-focused, real estate investment trust (REIT) Link REIT was a positive contributor in the first half of the year but fell away in the second half of the year. Rising bond yields dampened investors' enthusiasm for REITs. Link REIT also declined on the continued social unrest in Hong Kong. Bangkok Bank was weak, with its latest results below expectations, reflecting the weak Thai economy. The company announced it would acquire Indonesian bank Permata, which put further pressure on the share price. The holding in Insurance Australia Group also detracted owing to a challenging domestic environment.

The Fund's technology stocks produced strong returns. One of the largest contributors on a stock basis was Taiwan Semiconductor, which announced strong and above-consensus results, based on growing demand for semiconductors. Positive earnings led to market upgrades of the stock. Other positive contributors included technology companies ASM Pacific Technology and Samsung Electronics. Shares in New Zealand utility company Meridian Energy also contributed.

In terms of activity, Hong Kong Exchanges and Clearing was purchased. The manager believes the company is well positioned for the development of China's capital markets longer term. A stake was taken in Kasikornbank. This bank's strong capital and balance-sheet provisions could enable it to absorb losses in the event of a downturn and return significant capital in periods of slower growth.

The manager took advantage of a rebound in small-cap stocks to exit the remaining position in Man Wah, the sofa manufacturer, owing to risks including slowing US sales as well as issues related to its domestic China business. Australian telecommunications company Telstra was sold reflecting pressure from competition and the impact of Australia's migration to the national broadband network. The Fund's holding in Link REIT was reduced, as share price gains have resulted in a much lower dividend yield.

In the manager's view, the disciplines of the Fund's process and strict *yield* criteria, which force the manager to sell stocks when they become too expensive and reinvest in better value quality opportunities, are extremely important.

Newton Investment Management Limited
January 2020

BNY MELLON BRAZIL EQUITY FUND

Over the 12-month period under review, the Fund's USD A share class returned 24.85%, compared to a return of 30.71% for the MSCI Brazil 10/40 NR Index and 26.98% for the Lipper Global – Equity Brazil sector average, all in US dollar terms.

At the industry level, stock selection in utilities, the underweight in pulp and paper and stock selection in logistics were the main positive contributors for the Fund's performance in relation to the benchmark. The negative relative performance came from stock selection in *consumer discretionary*, both stock selection and the underweight in capital goods, and the overweight in *consumer discretionary*.

At the stock level, the Fund benefited from the exposures to Copel, Hapvida and B3. Copel shares had a strong year with improved operational results in its electricity distribution unit, and the decrease of interest rates, which helped the utilities sector as a whole. Hapvida shares soared as the company announced several acquisitions during 2019 and started to increase its presence in new regions besides the North and Northeast of the country. B3 shares had a positive year with the increase in activity in capital markets, especially equities and fixed income, currency and commodities.

The negative highlights at the stock level were Embraer, Vale and Pão de Açúcar. Embraer shares suffered with the lack of confidence on the company's future profitability from the defence and executive aviation segment and the low sales coming from its commercial segment. Besides that, the delay to finalise the JV deal with Boeing also hit the stocks. Vale shares underperformed because of the accident in its Brumadinho dam, with a large number of civilian casualties. The company was under pressure from several possible fines and public pressure. Pão de Açúcar stocks underperformed because of governance issues after the company announced the acquisition of the Colombian retail company, Exito, from its controlling shareholder, Casino.

During the year, the manager added new investments to the Fund: CPFL (utilities), Linx (software), Sulamérica (healthcare) and Vivara (retail). Additionally, exposures in Ambev, Azul, Cyrela, Iochpe-Maxion, Santander and Bradespar were closed.

ARX Investimentos Ltda
January 2020

REGIONAL EQUITY cont'd.**BNY MELLON DYNAMIC U.S. EQUITY FUND**

Over the 12-month period under review, the Fund's USD A (Inc.) share class returned 36.08% compared with a return of 33.70% S&P 500 NR Index +3%, both in US dollar terms.

The Fund produced a positive return and outperformed its benchmark during 2019 due to the extended US equity and *long Treasury* bond positions. The Fund's average position in US equities was 110%, which added to gains as the S&P 500 gave its best annual return since 2013. The Bloomberg Barclays Long Treasury Index also made double-digit gains, benefiting the Fund's average position of 17% in *long US Treasury* bonds.

There were two allocation shifts during 2019. Early in January, the target allocation was changed from 120% stocks and 20% bonds to approximately 110% stocks and 20% bonds. The impetus for the change was a marked increase in *volatility* due to growing fears of a sharp slowdown in both US and global growth and ongoing uncertainty around trade tariffs. In addition to *volatility*, lower earnings expectations also factored into the reduced equity allocation as 2019 Institutional Brokers Estimate System earnings growth estimates for the S&P 500 Index declined marginally. This was the first earnings reduction seen in about a year, and though modest, analysts are typically slow to reduce estimates.

The Fund's allocation was changed from 110% stocks and 20% bonds to approximately 110% stocks and 10% bonds during August. The steep rise in bond prices and flattening of the *yield curve* during 2019 prompted the move out of bonds. Decelerating economic momentum, falling *inflation*, and a *dovish* turn from the Federal Reserve drove prices of long-term bonds significantly higher. *Yields* at the front end of the curve, meanwhile, fell less than long-term *yields long Treasuries* were thus less attractive relative to cash, prompting a 10% reduction in the bond allocation.

As of 31 December 2019, the Fund's allocation was 110% stocks and 10% bonds. The manager's valuation methodology indicates that US stocks remain attractive relative to US bonds and cash. The Fund continues to hold an allocation to US *Treasury* bonds for risk mitigation purposes.

Mellon Investments Corporation*
January 2020

BNY MELLON GLOBAL EMERGING MARKETS FUND

Over the 12-month review period, the Fund's USD A share class returned 21.67%, compared with a return of 18.44%

for the MSCI Emerging Markets NR Index and 18.30% for the Lipper Global – Equity Emerging Markets Global sector average, all in US dollar terms.

The Fund produced a positive return and was ahead of both the benchmark and the sector average. Emerging markets were buoyed by the easy *monetary policy* stance of global central banks and, towards the end of the period, by hopes of a trade deal between the US and China.

Stock selection was strong at the regional level, especially in China. At a sector level, it was notably positive in *consumer discretionary* and industrials although weaker in materials. Sector allocation was also a positive factor behind returns, with the material overweighting of *consumer discretionary* aiding performance.

Among the top stock contributors was New Oriental Education & Technology, the Chinese education company, which benefited from the strong growth in its courses and learning programs. Applied Materials performed strongly owing to strong demand for its semiconductor products. Online food-delivery business Delivery Hero rallied strongly on the announcement of a partnership deal with the market leader in Korea.

Brazilian travel company CVC was a major detractor from returns, after its results were affected by unexpected further provisioning related to airline Avianca's bankruptcy. The departure of the chief financial officer did not help the market's reaction to the results. Autohome, the Chinese online auto-sales platform, fell sharply due to management changes, questions over pricing power and sensitivity to the overall *macroeconomic* backdrop. Indian finance company Edelweiss was also weak, as it faced a more challenging environment, with lower growth and potentially higher risk.

In terms of activity, a position in online food-delivery business Delivery Hero was established. The company benefits from its capital-light model and is experiencing strong demand for its services. Within financials, a position in Ping An Insurance, China's leading life insurer, was initiated. The growth opportunity for protection products in China is the largest in the world, and margins are the highest in Asia. ASML, a world leader in lithography services for the semiconductor industry, was purchased given the strong demand outlook for its products and its dominant position in the semiconductor supply chain.

Philippine conglomerate GT Capital was sold owing to the country's general *macroeconomic* weakness. Indian financial Indiabulls Housing Finance, which is battling a tough *liquidity* environment and declining growth, was another sale.

January 2020

BNY MELLON JAPAN ALL CAP EQUITY FUND

The Fund was closed on 15 February 2019.

Over the period from 1 January 2019 until the Fund's closure on 15 February 2019, the Fund's JPY C share class returned 7.10%, compared with a return of 5.58% for the Tokyo Stock Price Index (TOPIX) TR, both in Japanese yen terms.

Both sector selection and stock selection contributed positively to performance. At the industry level, positive contributors to performance were information and communication, where the Fund was overweight, and electric appliances and banks, where the Fund was underweight. Detractors were pharmaceuticals, in which the Fund was underweight, and precision instruments and construction, where the Fund was overweight.

At the individual stock level, positive contributors to performance included Anritsu, a global leader of test and measurement instruments for mobile telecommunication markets; SoftBank Group, a major telecommunication service operator; and Otsuka, which designs and constructs computer information systems and sells computer peripherals.

Detractors were Nichirei, which produces frozen food and provides refrigerated storage services; Penta-Ocean Construction, a leading general contractor operating nationwide and internationally and performing civil engineering works; and pet insurance specialist Anicom Holdings.

There were neither new positions bought nor holdings where the Fund sold out. On 15 February, the Fund held 70 stocks.

On 15 February, the Fund's largest overweight sectors included other products, construction and other financing business. The largest underweight sectors were pharmaceutical, land transportation and retail trade. The Fund's sector allocation decisions were mainly the result of bottom-up stock-picking decisions.

On 15 February, the largest overweight positions in the Fund included Nidec, the world's largest precision motor maker; Aruhi, the largest provider of Flat 35 loans in Japan, a long-term fixed-interest mortgage offered in partnership

with the Japan Housing Finance Agency; and Nifco, which manufactures resinous fasteners and plastic components mainly for automobiles.

BNY Mellon Asset Management Japan Limited
January 2020

BNY MELLON JAPAN REIT ALPHA FUND

The Fund was closed on 15 February 2019.

Over the review period from 1 January 2019 until the Fund's termination on 15 February 2019, the Fund's JPY C (Acc.) share class returned 4.00%, compared with a return of 3.75% for the Tokyo Stock Exchange REIT Index (Dividend Included), both in Japanese yen terms.

The Fund was ahead of the comparative index over the review period. Overall activity was quite limited. The manager started to liquidate the Fund from the beginning of February 2019.

BNY Mellon Asset Management Japan Limited
January 2020

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

Over the 12-month period under review, the Fund's JPY C share class returned 20.32%, compared with 16.99% for the Russell/Nomura Small Cap TR Index and 19.95% for the Lipper Global -Equity Japan Small & Mid Cap sector average, all in Japanese yen terms.

Both stock selection and sector selection contributed positively to the Fund's performance.

At the industry level, the main positive contributors to performance were electric appliances and services, where the Fund was overweight, and banks, where the Fund had no holdings. The main detractors were insurance and other products, where the Fund was overweight, and real estate, where the Fund had no holdings.

At the individual stock level, the main contributors to performance included BayCurrent Consulting, which provides comprehensive consulting services; Sanken Electric, which produces discrete semiconductors and analog integrated circuits; and Atrac, an IT service provider for human resources. Among the main negative contributors to performance were ItoKuro, which provides information of services of education through its internet portal sites; Vector, a PR and advertising company using SNS (simple notification service) and the web and a leading provider of press release; and Open Door, which operates travel comparison sites.

There were two new names during the review period: Premium group, which provides automotive loans and

REGIONAL EQUITY cont'd.**BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND** cont'd.

consumer microlending, and Insource, which provides corporate training and business-related open courses. The manager sold the Fund's holdings in eGuarantee, which offers guarantee services for accounts and note receivables and Star Micronics, which creates high-performance machine tools.

At the end of December 2019, the Fund held 30 stocks, unchanged from the end of December 2018. At the end of year, the Fund was overweight electric appliances, services and other products. Sector allocation decisions are mainly the result of the manager's bottom up stock picking decisions.

The largest overweight positions in the Fund include Sanken Electric; MCJ, a manufacturer of high-end built-to-order personal computers through its subsidiary MouseComputer; and Techmatrix which provides system integration and solution services.

BNY MELLON S&P 500® INDEX TRACKER

Over the 12-month period under review, the Fund's USD A share class returned 29.09%, compared with a return of 30.70% for the S&P 500 NR Index and 27.24% for the Lipper Global – Equity US sector average, all in US dollar terms.

The one-year annualised tracking error for the Fund as at 31 December 2019 was 0.10%. The tracking error is related to withholding tax and the cost associated with managing the daily activity. The anticipated tracking error of the Fund is 0.10%. Meanwhile, the difference in performance between the Fund and S&P 500 Index is related to the market impact of fees and the cost associated with managing daily activity on the former.

The annualised tracking error provided was calculated using gross monthly returns for the period in question. The tracking error being the *standard deviation* of the relative returns that have been annualised (multiplied by the square root of 12).

For further commentary, please refer to the market review at the beginning of this document.

The strategy is positioned to match the performance and overall characteristics of the S&P 500 in a risk-controlled, cost-effective manner utilising a full replication approach.

January 2020

BNY MELLON SMALL CAP EUROLAND FUND

Over the 12-month period under review, the Fund's Euro A share class returned 28.74%, compared with a return of 30.56% for the S&P EuroZone Small Cap TR Index and 26.62% for the Lipper Global – Equity EuroZone Small & Mid Cap sector average, all in euro terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favourable corporate *fundamentals*. In the US, the House of Representatives voted to impeach President Donald Trump. On the trade front, the Trump administration came to a 'phase one' trade deal with China in December, which is expected to be signed by both countries in early 2020. The House also approved the US-Mexico-Canada Agreement (USMCA), replacing NAFTA. Meanwhile, the US Federal Reserve cut interest rates three times in 2019, citing trade uncertainty and slowing global growth. The European Central Bank (ECB) cut interest rates during the year, in line with market expectations. In the UK, Boris Johnson replaced Theresa May as Prime Minister. In December, the Conservative Party secured a resounding majority in the general election. The win assisted Johnson's push for the UK to leave the EU by 31 January 2020. UK *inflation* fell slightly during the year and remained below the Bank of England's target. Similarly, *eurozone* annual *inflation* remained below the ECB's 2% target.

By country, positioning among France and Belgium led contributors to Fund returns while Sweden was the largest relative detractor by a wide margin, followed by Austria. By sector, financials and industrials led contributors while materials and energy detracted most. German communication services names and stock selection among French financials supported relative results. German-based outdoor advertising company Stroer SE & Co rose on quarterly results that beat market expectations. On the downside, Swedish online gambling services group Kindred Group fell after it announced second-quarter results below expectations. Lower revenues, coupled with higher costs, also weighed on earnings.

The manager reduced the Fund's exposure to information technology and materials and increased exposure to real estate and energy. The position in Orion Engineered Carbons was sold due to concerns over a weaker demand environment. The manager sold the position in Hapag-Lloyd and took profits after solid year-to-date performance.

January 2020

BNY MELLON U.S. DYNAMIC VALUE FUND

Over the 12-month period under review, the Fund's USD A share class returned 24.50%, compared with a return of 26.54% for the Russell 1000 Value TR Index and 27.24% for the Lipper Global – Equity US sector average, all in US dollar terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favourable corporate *fundamentals*. In this environment, the Fund outperformed its benchmark.

On a sector basis, financials led relative contributors by a wide margin, followed by energy and utilities. On the downside, healthcare was the largest relative detractor, followed by information technology and materials. In financials, positive stock selection in the banks segments drove positive results. Specifically, shares of Citigroup rose as investors have rewarded the company for better-than-expected earnings as well as significant capital returns.

Relative outperformance in energy was fueled by effective stock selection among oil, gas and consumable fuels names. In utilities, *security* selection in the electric utilities segment contributed positively to relative returns.

Conversely, challenging positioning and selection among healthcare providers and services detracted most from healthcare returns. Challenging stock selection in the software segment weighed on information technology performance. Specifically, Teradata's stock weakened due to declining revenues as the company transitions to subscription based cloud offerings. Positioning and selection among chemicals names hindered relative performance in the materials sector.

Changes to sector weightings were modest. The Fund remains overweight financials and information technology and underweight utilities and *consumer staples*. Financials continue to be the largest absolute weight in the Fund due to attractive valuations and exposure to an improving economy.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Mellon Investments Corporation*
January 2020

BNY MELLON U.S. EQUITY INCOME FUND

Over the 12-month period under review, the Fund's USD C (Inc.) share class returned 27.29%, compared with a return of 30.70% for the S&P 500 NR Index and 22.62% for the Lipper Global – Equity US Income sector average, all in US dollar terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favorable corporate *fundamentals*. In this environment, the Fund underperformed its benchmark.

On a sector basis, financials, *consumer discretionary* and *consumer staples* contributed to relative results while information technology, materials and energy detracted. Outperformance in financials was driven by the Fund's overweight to the banks segment. Specifically, Citigroup's shares rose as investors have rewarded the company for earnings that were above expectations as well as significant capital returns. In *consumer discretionary*, positioning and positive stock selection among multiline retail contributed most to sector results. In *consumer staples*, positive stock selection among food products supported relative returns.

Conversely, information technology was the largest detractor by a wide margin due to a lack of exposure to the technology hardware storage and peripherals segment. Specifically, the lack of exposure to Apple hurt relative results as demand for the iPhone 11 and success with wearables and services buoyed stock prices. Materials lagged due primarily to challenging positioning and stock selection among the chemicals segment. In energy, positioning among oil, gas and consumable fuels weighed on sector performance.

Changes to sector weightings were modest. The Fund remains overweight financials, energy and materials and underweight information technology, *consumer discretionary* and communication services. Financials continue to be the largest weight in the Fund due to attractive valuations and exposure to an improving economy.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

January 2020

BNY MELLON US OPPORTUNITIES FUND

The Fund was closed on 29 August 2019.

Over the period under review until its closure on 29 August 2019, the Fund's USD C share class returned

REGIONAL EQUITY cont'd.**BNY MELLON US OPPORTUNITIES FUND** cont'd.

7.91%, compared with a return of 17.95% for the Russell 3000 TR Index and 16.15% for the Lipper Global – US Equity sector average, all in US dollar terms.

Equity markets performed positively overall during the period. In the US, the Federal Reserve (Fed) cut interest rates in July. In the US, President Donald Trump announced and imposed tariffs on China, which impacted global markets. *Inflation* picked up slightly, but remained below the Fed's 2% goal.

In this environment, the Fund underperformed its benchmark and the sector average. Communications services and healthcare led relative contributors, while information technology and *consumer discretionary* detracted most.

Communication services led relative contributors due to effective stock selection among the media and diversified telecommunication services segments. In particular, Nexstar Media Group experienced significant appreciation during the period. In healthcare, biotechnology holding SAGE Therapeutics benefited relative results as shares rose on positive sentiment from trial results and approval from the Food and Drug Administration.

On the downside, information technology led relative laggards due primarily to positioning among the software segment. Although software holdings contributed on an absolute basis, the Fund trailed the benchmark due to lack of exposure to some high-flying names in the segment. Finally, *consumer discretionary* detracted due to challenging stock selection among hotels, restaurants and leisure. In particular, shares of Royal Caribbean Cruises led relative laggards.

The manager raised exposure to the utilities and industrials sectors during the period and trimmed exposure to information technology and financials. In utilities, the manager initiated a position in NextEra Energy. In financials, the manager repositioned within the banking industry, exiting positions that declined as a result of industry-wide *credit* concerns and ongoing thorny trade discussions and added new positions with attractive long-term opportunities.

Mellon Investments Corporation*
January 2020

SPECIALIST EQUITY**BNY MELLON DIGITAL ASSETS FUND**

The Fund was launched on 19 February 2019.

Over the reporting period since its inception, the Fund's USD W (Acc.) share class generated a return of 11.42% compared with a return of 15.03% for the MSCI AC World NR Index, both in US dollar terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favourable corporate *fundamentals*. In this environment, the Fund underperformed its benchmark.

On a sector basis, the Fund's lack of exposure to oil, gas and consumable fuels contributed most to relative results. Effective stock selection among insurance names also buoyed performance. XPO Logistics performed well on a positive earnings read through from trucking company JB Hunt as well as general improvement in investor sentiment around the US and China reaching an accord in trade deal negotiations.

On the downside, challenging stock selection among IT services names detracted most from returns. Positioning and stock selection among food and staples retailing also detracted from performance. Carrefour lagged as the company faced a number of near-term headwinds that caused the stock to underperform during the year; however, it continues to show signs of promise in reorienting its business to accommodate the consumer base.

Changes to sector weightings were modest. The manager increased the weight to electric utilities and software and decreased weight to multi-utilities. IT services continues to be the largest absolute weight in the portfolio; however, exposure was decreased over the reporting period.

The manager is increasingly optimistic that blockchain technology is ready for broad global adoption. The manager believes that enterprise blockchain is a key pillar in the broader digital transformation now underway and thinks the Fund's investment universe and portfolio are poised to benefit from the aforementioned trends over the next decade.

The manager is encouraged by the growth of the Fund's universe, which now stands at approximately 250 companies that span nearly every major geography and industry across the globe. This has reinforced the manager's belief that this technology has very few boundaries in terms of use cases or applications, both of which have been growing significantly. The manager continues to seek to identify early adopters or enablers of the technology.

January 2020

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND

Over the 12-month period under review, the Fund's USD W (Acc.) share class returned 18.82%, compared with a return of 25.75% for the S&P Global Infrastructure NR Index, both in US dollar terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favourable corporate *fundamentals*. In this environment, the Fund underperformed its benchmark during the period. Utilities contributed positively to relative outperformance, but this was offset by relative underperformance of energy and communication services.

In utilities, effective stock selection drove performance. A standout performer was UK water and wastewater treatment company Pennon Group. The share price increased on a more sanguine Brexit outlook, which resulted in a stronger UK pound along with a broker upgrade during the period.

On the downside, energy detracted most, due primarily to a position in EnLink Midstream. The company underperformed owing to investor concern over the group's ability to cover their targeted cash return to investors. In communication services, Bezeq The Israel Telecommunication Corporation led relative detractors and was ultimately sold over concerns around dividend risk.

Changes to portfolio positioning were modest during the period. Maintaining balanced positioning in the Fund remains a top priority. The Fund remains overweight utilities and continues to have an out-of-benchmark allocation to real estate and communication services. During the year, the manager increased exposure to utilities through new positions in National Grid and regulated German Utility E.ON SE.

Mellon Investments Corporation*
January 2020

BNY MELLON MOBILITY INNOVATION FUND

Over the 12-month period under review, the Fund's USD A (Acc.) share class generated a return of 27.42%, compared with a return of 26.00% for the MSCI AC World Mid Cap NR Index, both in US dollar terms.

Equity markets performed positively overall during 2019 and aligned with strong employment numbers, positive global trade progress and favourable corporate *fundamentals*. In this environment, the Fund outperformed its benchmark during the period.

Positioning among semiconductors and semiconductor equipment led contributors. Shares of MediaTek was a top contributor overall for the second consecutive quarter driven by a positive outlook and revenue guidance, as well as optimism for handset demand and the 2020 5G market. Software holdings also buoyed results. Shares of Splunk and ANSYS in particular were top contributors as shares climbed due to positive sentiment amid a string of solid quarterly earnings reports.

On the downside, auto components holding Nexteer Automotive declined on weak results as margins are being pressured by weakness in China overall and pricing pressure from their original equipment manufacturer (OEM) clients. Automobiles also detracted weighed by NIO Sponsored ADR Class A margin pressure from the typical early stage footprint, low margin but high research and development and a later phasing of design wins.

The manager continued to increase the Fund's software exposure through a new position in Slack Technologies and a new position in Everbridge. Exposure to auto components was reduced through the sale of Compagnie Generale des Etablissements Michelin and Pirelli.

Mellon Investments Corporation*
January 2020

GLOBAL FIXED INCOME

BNY MELLON GLOBAL BOND FUND

Over the 12-month period under review, the Fund's USD A share class returned 6.64%, compared with a return of 6.02% for the JP Morgan Global Government Bond Index (Unhedged) TR Index and 8.22% for the Lipper Global – Bond Global USD sector average, all in US dollar terms.

The Fund produced a positive return and was ahead of its benchmark but behind the sector average return. Bond markets were buoyed by the decision of global central banks to further ease *monetary policy* and by the sluggish state of the global economy.

The Fund's positioning in *long duration* sovereign bonds, such as US *Treasuries* and Australian government bonds, aided performance particularly in the first eight months of the year, as interest rate and *inflation* expectations declined. Exposure to emerging market sovereign bond holdings (such as Mexico, Hungary and Saudi Arabia) also contributed to performance, benefiting from *spread* tightening. *Hedges* against *interest rate risk*, such as 10-year US Treasury *put options* and *short Gilt futures*, detracted from returns at that time.

This helpful environment for bonds began to reverse from September as *yields* rose. Bond markets sold off and the Fund's exposure to certain 'safe-haven' bonds detracted from relative returns. Holdings of US *Treasuries*, Australian, Italian and Spanish government bonds incurred losses.

Meanwhile, local currency emerging market sovereign holdings performed well, supported by subdued *inflation*, accommodative *monetary policy* and a weakening US dollar. Selective risk-currency exposure (the Norwegian krone and the South Korean won, for example) also rallied strongly, aided by easing US-China trade tensions.

In terms of activity, overall *duration* was increased by over a year during the first half of the year. This was from purchases, among others, of New Zealand Local Government 2027 (the year in which the bond matures) bonds and additional US *Treasury Inflation-Protected Securities (TIPS)* exposure following the decline in *inflation* expectations. *Dovish* European Central Bank rhetoric prompted the manager to increase the Fund's euro *duration*, aided by Spanish 2028 and Italian 2024 and 2049 bonds. Meanwhile, the manager increased emerging market sovereign exposure via a combination of US dollar denominated and local currency purchases.

Given the speed and size of the fall in sovereign *yields*, the manager tactically trimmed government bond *duration* in late August, aided by increased US *duration hedges* and the sale of long-dated US *Treasuries*. The Fund's emerging market sovereign and foreign exchange exposure was further increased late in the period, with the purchase of *unhedged* seven-year Malaysia local currency bonds.

Newton Investment Management Limited
January 2020

BNY MELLON GLOBAL CREDIT FUND

Over the 12-month period under review, the Fund's USD W (Acc.) share class returned 12.62%, compared with a return of 11.85% for the Bloomberg Barclays Global Aggregate Credit TR (USD Hedged) Index and 12.31% for the Lipper Global – Bond Global Corporates USD sector average, all in US dollar terms.

The Fund generated a positive return and outperformed both its benchmark and the sector average.

Following their weakness at the end of 2018, global *credit spreads* tightened during the year as *risk assets* in general rallied; this came as concerns about US-China trade war tensions, Brexit and global growth lessened somewhat. *Investment grade credit* strengthened over the period, as *spreads* tightened and *volatility* decreased given the instruments' high interest rate sensitivity; *high yield credit* experienced some weakness at times as economic uncertainty grew, but benefited from the overall rally in *risk assets* and investors' renewed hunt for *yield*. As economic growth slowed, *defaults* picked up (particularly in the US energy sector) but they remained below average historically; moreover, robust capital markets helped companies to refinance at attractive rates.

Government bond *yields* trended lower as the US Federal Reserve cut interest rates three times while indicating they would be kept on hold in 2020; the European Central Bank (ECB) restarted its monthly asset purchases with rates kept constant for now. The US economy remains relatively strong but, given the global trade war, the outlook is more uncertain. In Europe, the key risks remain Brexit and Italy. The US dollar remained resilient while emerging market currencies stabilised over the period.

Both the Fund's *credit* strategy and its *security* selection were positive over the period; the former particularly helped in April, July and December (but detracted in May and August) while the latter helped in January, May and July (but detracted in April and June). The Fund's interest rate and emerging markets exposures were also beneficial though its currency exposure marginally detracted.

Primary market activity remained elevated over the period and the manager participated in several new issues across various sectors such as financials, technology, communications, healthcare, *consumer staples*, industrials, and *consumer discretionary*.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the 12-month period under review, the Fund's USD A share class returned 6.70%, compared with a return of 4.24% for USD LIBOR 1 Month + 2%, both in US dollar terms.

The Fund produced a positive return and was ahead of the benchmark. Bond markets were buoyed by the decision of global central banks to further ease *monetary policy* and by the sluggish state of the global economy.

The largest positive contribution to performance in the first half of the year came from government bonds, reflecting the Fund's bias towards perceived 'safe-haven' assets in a falling *yield* environment. Long-dated German government bonds were a notable positive contributor, aided by weaker economic data from the *eurozone*, while Australian government bonds and US *Treasuries* also boosted performance. The Fund's emerging market sovereign bonds also generated positive returns. With government bond *yields* declining, *hedges* against *interest rate risk* such as 10-year US Treasury *put options* and *short Gilt futures* detracted from returns in the first half of the period.

The Fund's *duration* was lowered later in the period via *put options* and *short futures*, and diversified corporate and emerging market sovereign and currency exposure, offset losses on 'safe-haven' bonds. *Short-duration hedges* on US *Treasuries*, German government bonds and UK *Gilts* produced positive returns, but holdings of US *Treasuries*, Australian, Italian and Spanish government bonds incurred losses later in the period as *yields* rose. Positive returns and *spread* tightening on European *perpetual bonds* (such as Summer BC Holdco and Santander) and other *high yield* exposure more than negated the continued underperformance of US energy-sector names such as Chesapeake and Whiting, where position sizes were reduced.

Local emerging market bond holdings such as Mexico and Hungary benefited from expectations of *monetary policy* easing, as did selective risk currency exposure (the Norwegian krone and the South Korean won, for example).

In terms of activity, overall *duration* in the Fund was initially raised to benefit from the growing expectation of lower interest rates. This was achieved by, among others, the purchase of New Zealand Local Government

and US *Treasury Inflation-Protected Securities (TIPs)*. The mix of this *interest rate risk* was gradually shifted from government bonds towards emerging markets and *credit*.

Fund *duration* was lowered slightly in the second half of the period. The manager switched out of US *TIPs* into straight *Treasuries* based on relative valuations. In the final few months of the year, the manager added to *high yield* holdings and emerging market sovereigns. Meanwhile, the perceived vulnerability of sterling *investment grade credit* to higher underlying government bond *yields* and tight *spreads*, in the context of weak UK economic data, saw the manager reduce exposure by selling NIE Finance, Cadent Finance, Skipton Building Society, and TC ICAP.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Newton Investment Management Limited
January 2020

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the 12-month period under review, the Fund's USD C share class returned 15.30% compared with a return of 14.53% for the ICE Bank of America Merrill Lynch Developed Markets High Yield Constrained TR Index (USD Hedged) and 12.03% for the Lipper Global – Bond Global High Yield USD sector average, all in US dollar terms.

Coming into 2019, high yield spreads widened on fears of a monetary policy misstep as data weakened and central banks remained in quantitative tightening mode. However, in early January, investor sentiment shifted abruptly as the Federal Reserve Chair signalled a more dovish approach to monetary policy and opened the door to a new round of quantitative easing. The European Central Bank followed suit. A move towards an outcome of some of the most contentious geopolitical overhangs buoyed sentiment further. Developed market high yield was a significant recipient of this as spreads tightened 180bps over the course of the year.

New issue volumes picked up in the second half of 2019, outpacing 2018; however, the impact on the technical backdrop was limited as refinancing accounted for more than two-thirds of total supply. Despite the dramatic improvement in sentiment, investors maintained discipline as high quality BB-rated bonds outperformed over the course of the year. The energy sector suffered, underperforming all other sectors in 2019, as investors focused on perceived higher quality, less *cyclical* sectors.

The Fund generated strong returns in 2019 on an absolute basis, and also performed well relative to the underlying market and peers. The Fund's strong performance was predominantly a function of *security* selection by the

GLOBAL FIXED INCOME cont'd.

BNY MELLON GLOBAL HIGH YIELD BOND FUND cont'd. manager. As *spreads* widened in the fourth quarter, the manager focused on assessing the market to identify mispriced assets. This was particularly accretive to Fund performance as a number of the active overweights in the Fund outperformed. From an asset allocation perspective, the Fund benefited from an underweight in energy and overweights in more *defensive* sectors, such as technology, media and telecoms, and packaging. On the other hand, an underweight in retail dragged on performance as a number of stressed bricks and mortar issuers saw strong recoveries, despite increasingly intense competition from online services.

Alcentra NY, LLC
January 2020

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the 12-month period under review, the Fund's USD A (Acc.) share class returned 7.40%, compared with a return of 2.34% for LIBOR USD 3 Month and 11.97% for the Lipper Global – Bond Global High Yield USD sector average, all in US dollar terms.

The Fund generated a positive return and outperformed its benchmark, but underperformed the sector average.

Volatility fell over the period, despite various *geopolitical* risks, as central banks worldwide became more accommodating in their *monetary policy* stance. Concerns about the US-China trade war persisted, although the recent announcement of a 'phase one' trade agreement has been encouraging. Other headwinds included European political uncertainty (particularly in Italy), ongoing Brexit talks, and rising tensions in the Middle East. However, a reasonably supportive – albeit slowing – economic environment and limited supply continued to be positive for the *high yield* asset class. Low government bond *yields* over the period underpinned a persistent search for *yield* by investors, with *investment grade* funds continuing to favour lower-rated *securities*. As economic growth slowed, *defaults* picked up (particularly in the US energy sector) but they remained below average historically; moreover, robust capital markets helped companies to refinance at attractive rates.

The manager invests the majority (over 50%) of assets in a portfolio of *high yielding* bonds that are short-dated (that is bonds that *mature*, or are expected to *mature*, within approximately three years) with no geographical, industry or sector focus. The manager invests in debt and debt-related securities that may be *investment grade* or *sub-investment grade* quality.

During the period, the Fund continued to switch positions and reinvest cash proceeds. Market *liquidity* was good but it was hard to find investments at attractive levels.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND

The Fund was launched on 25 February 2019.

Over the reporting period since the Fund's inception on 25 February 2019, the Fund's Euro W (Acc.) share class has returned 3.46%, compared with a return of 1.44% for the EURIBOR 1 month +2%, both in euro terms.

The Fund produced a positive return and was ahead of the benchmark. Bond markets have been buoyed by the prevailing easy *monetary policy* of global central banks.

In the first half of the year, the Fund benefited from the positioning in *long duration* sovereign bonds such as US *Treasuries* and Australian Commonwealth Government Bonds, which performed well. The Fund's emerging market sovereign bonds also generated positive returns. However, *short duration hedges* (vs. US *Treasuries* and German government bonds) detracted from returns as *yields* fell.

Performance was negatively impacted by a back-up in *yields* during the autumn months as optimism around a trade settlement between the US and China gathered momentum, leading to some investors switching bond holdings into equities. Government bond *duration* was the principal source of negative returns, with long-dated US *Treasuries* (such as those *maturing* in 2028 and 2045, and 2041 *Treasury Inflation-protected securities* (TIPS)) the biggest drag on performance. Australian government bonds also detracted from returns. However, reduced government bond *duration* (aided by US *Treasury put options*) and diversified corporate and emerging market sovereign exposure more than offset losses on 'safe-haven' bonds. *Short-duration hedges* on US *Treasuries*, German government bonds and UK *Gilts* again produced positive returns. Positive returns and *spread* tightening on European *perpetuals bonds* (such as Telefonica and Santander) and a tactical addition to *high yield* (to benefit from stable 'risk' sentiment and attractive *yields*) contributed to performance at the year-end.

In terms of activity, the increasingly *dovish* strategy pursued by the major central banks led the manager

GLOBAL FIXED INCOME cont'd.**BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND** cont'd.

to increase bond *duration*, in the first half of the period, through the purchase of New Zealand local government bonds and an increased exposure to US *TIPs*. *Short* positions in US 5-year *Treasury* and German government bond *futures* were also added to the Fund. Fund *duration* was reduced later in the year, aided by the sale of US *Treasuries* (2029 and 2045) and Australian government bonds (2033) on expectations of stabilising interest rate expectations and reduced 'safe-haven' demand. A retracement in *yields* during the autumn period, and persistently weak economic data, prompted the reintroduction of high-quality interest-rate risk such as Singapore 2046 and Inter-American Development Bank 2028.

High yield credit exposure was increased by adding to existing holdings, but also taking new positions such as Virgin Media, Loxam, Telecom Italia and Summer BC Holdco. Some new positions were added in green *securities* including a Netherlands government green bond, a European Investment Bank climate-awareness bond, and UK wind farm power grid connection asset, Gwynt y Mor OFTO.

Newton Investment Management Limited
January 2020

REGIONAL & SPECIALIST FIXED INCOME**BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND***

On 23 December 2019 the Fund's name changed from BNY Mellon U.S. High Yield Beta Fund to BNY Mellon Efficient U.S. High Yield Beta Fund.

Over the 12-month period under review, the Fund's USD A (Inc.) share class returned 14.38%, compared with a return of 14.32% for the Bloomberg Barclays U.S. Corporate High Yield TR Index and 12.11% for the Lipper Global – Bond USD High Yield sector average, all in US dollar terms.

The Fund produced a positive return as *high yield* bonds had their best year since 2016 and gained in all but one month during 2019. Risk appetite improved considerably and sovereign *yields* tumbled as central banks pivoted toward more accommodative *monetary policy*, led by the Federal Reserve. All economic and quality sectors rose. Among economic sectors, finance companies and banking outperformed the Bloomberg Barclays U.S. High Yield Index while energy was a notable underperformer. Higher-rated bonds slightly outperformed due to their interest rate sensitivity. The *yield* on the 10-year US *Treasury* note fell 77 *basis points* to 1.92%, while the 5-year *yield* was lower by 82 *basis points* to 1.69%. *High yield* outperformed *Treasuries* by 9.34%.

The Fund is positioned to provide diversified exposure to US *high yield* corporate bond *securities* with similar *credit*, *duration*, and *maturity* characteristics as found in the Bloomberg Barclays U.S. Corporate High Yield Index, while seeking to mitigate and minimise *default risk* and transaction costs associated with traditional sample and replication approaches.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Mellon Investments Corporation*
January 2020

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND

Over the 12-month period under review, the Fund's USD A share class returned 15.16%, compared with a return of 13.09% for the JP Morgan Corporate EMBI Broad Diversified TR Index and 11.92% for the Lipper Global – Bond Emerging Markets Global Corporates sector average, all in US dollar terms.

The Fund generated a positive return and outperformed both its benchmark and the sector average.

Emerging market corporate bonds have been supported by numerous central banks in both developing and advanced economies cutting interest rates. While the global economy has been slowing, the local economies still have relatively

REGIONAL & SPECIALIST FIXED INCOME cont'd.**BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND** cont'd.

high growth rates. The rally in the asset class came despite the effects of the US-China trade war, a resilient US dollar, and heightened *geopolitical* uncertainty (particularly in the Middle East).

By region, Latin America, the Middle East & Africa, and Central & Eastern Europe all contributed positively to performance over the period but Asia was a negative. The most positive countries were Brazil, the United Arab Emirates, Ukraine, Mexico, Panama, and Russia while the largest detractors were Argentina, Macau, Hong Kong, Thailand, India, and the Philippines. By sector, the main positive contributors were oil and gas, financials, metals and mining, and industrials while utilities, TMT (technology, media, and telecommunications), sovereigns, and real estate detracted most. *High yield* bonds had the largest positive effect on performance, with *investment grade* instruments also helping.

The Fund's top three preferred countries are Ukraine, Mexico and Brazil, with a significant overweight also in China *high yield* property given the manager's positive *fundamental* and technical outlook for the sector in early 2020. Overall, the Fund is overweight *high yield* and slightly *long duration* given the manager's positive near-term outlook.

After a strong start to the period, the manager became more cautious in the second quarter and reduced the Fund's risk profile. However, as the year progressed, the manager became more positive and added to *high yield* exposure. The manager also selectively participated in the new issue market. The preference for Latin America and Central & Eastern Europe over Asia is retained.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON EMERGING MARKETS DEBT FUND

Over the 12-month period under review, the Fund's USD A share class returned 14.57%, compared with a return of 14.42% for the JP Morgan EMBI Global TR Index and 11.32% for the Lipper Global – Bond Emerging Markets Global HC sector average, all in US dollar terms.

Markets rose overall throughout 2019. In the US, the Federal Reserve (Fed) cut interest rates in July, September and October citing muted domestic *inflationary* pressures. A wave of *monetary policy* easing followed, sweeping the globe central banks reducing interest rates throughout the year. After much rhetoric and instability, the Trump

and Xi administrations came to a 'phase one' trade deal in December, to be signed by both countries in early 2020. While limited in scope, this deal prevents a new round of tariffs scheduled in mid-December and rolls back a portion of the September tariffs. Overall, this agreement reduces uncertainty and could contribute to a mild recovery in global growth in 2020. The House also approved the US-Mexico-Canada Agreement (USMCA), replacing NAFTA. In the UK, Prime Minister Boris Johnson and his Conservative Party secured a resounding majority in the December election. The win assisted Johnson's push for the UK to leave the EU by 31 January 2020. Despite spurts of *volatility* in this environment, risk sentiment was generally positive, leading to emerging market debt moving higher.

High conviction country level allocations were significant contributors to performance throughout the year. Most noteworthy are Lebanon, a large underweight, and Ukraine, a significant overweight. Lebanon's economic picture has been deteriorating to the degree of crisis. As the government faced revenue needs to meet US\$67bn in liabilities (despite US\$28bn in foreign exchange reserves, according to Fitch), the government proposed taxing WhatsApp calls. The people of Lebanon responded in mass protest. Since protests broke out, nearly one in ten companies have bankrupted and domestic banks are on the verge of collapse. In Ukraine, the economic situation is on a much better trajectory. Dollar wages have more than doubled since 2016, debt-to-gross *domestic product* (GDP) has fallen from 80% to just over 50%, and bond *yields* have dropped. The government looked poised to enact positive reforms with a new president and parliamentary majority for the first time in history. Additionally, in December, the *International Monetary Fund* (IMF) agreed to a new three-year US\$5.5bn loan programme with Ukraine.

In terms of *security* selection, the Fund's allocation to corporate bonds performed very well; specifically, energy companies in Brazil and Indonesia, as well as Chinese technology companies. Additionally, these positions often act as a buffer in times of pressure with muted *volatility* compared to larger magnitudes in their sovereign peers.

The most significant drag on performance was Argentina. In August, political experts and investors alike were surprised by primary presidential election (PASO) results. Despite the economic crisis, the conservative incumbent, Mauricio Macri, was widely expected to win the PASO or be closely behind the leftist challenger with little economic plan, Alberto Fernandez. Startling markets, Fernandez emerged in the lead by more than fifteen percentage points prompting a rapid sell off in both bonds and the Argentine peso. The resulting sell off snowballed into further stress by intensifying the recession, creating higher *inflation*, and increasing the foreign currency debt burden. Ultimately, the

REGIONAL & SPECIALIST FIXED INCOME cont'd.

BNY MELLON EMERGING MARKETS DEBT FUND cont'd. government announced capital controls to stabilise the peso and its intention to restructure the nation's debt load. Bond prices have rallied significantly, albeit not enough to offset losses, as the government continues to express high willingness to pay their obligations despite uncertain abilities to pay.

January 2020

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the 12-month period under review, the Fund's USD A share class returned 10.55%, compared with a return of 13.47% for the JP Morgan GBI-EM Global Diversified TR Index and 10.78% for the Lipper Global – Bond Emerging Markets Global LC sector average, all in US dollar terms.

Markets rose overall throughout 2019. In the US, the Federal Reserve (Fed) cut interest rates citing muted domestic *inflationary* pressures. A wave of *monetary policy* easing followed, sweeping the globe with central banks reducing interest rates throughout the year. After much rhetoric and instability, the Trump and Xi administrations came to a 'phase one' trade deal in December, to be signed by both countries in early 2020. While limited in scope, this deal prevents a new round of tariffs scheduled in mid-December and rolls back a portion of the September tariffs. Overall, this agreement reduces uncertainty and could contribute to a mild recovery in global growth in 2020. The House also approved the US-Mexico-Canada Agreement (USMCA), replacing NAFTA. In the UK, Prime Minister Boris Johnson and his Conservative Party secured a resounding majority in the December election. The win assisted Johnson's push for the UK to leave the EU by 31 January 2020. Despite spurts of *volatility* in this environment, risk sentiment was generally positive leading to the asset class marching higher.

Long duration positions in local rates were significant contributors to performance in 2019. With the Fed setting the pace, central banks around the world eased *monetary policy*. Notably the Fund was significantly *long* local Russian rates and local South African rates. In Russia, the Central Bank of Russia (CBR) cut rates five times throughout the year to the lowest rate since the 2014 financial crisis. The CBR signaled there is space remaining for further cuts as the economic slump has led to falling incomes for five years, and an important need to generate growth before the 2021 elections. In South Africa, the South African Reserve Bank cut rates twice in 2019 as *inflation* dropped below the midpoint of the target rate and growth indications

were weak. Conversely, Mexican rates positions detracted from performance. Overall *duration* positioning in Mexico remained neutral.

The most significant drag on performance was Argentina. In August, political experts and investors alike were surprised by primary presidential election (PASO) results. Despite the economic crisis, the conservative incumbent, Mauricio Macri, was widely expected to win the PASO or be closely behind the leftist challenger, Alberto Fernandez. Startling markets, Fernandez with a loose and uncertain economic plan emerged in the lead by more than fifteen percentage points prompting a rapid sell off in both bonds and the Argentine peso. The resulting sell off snowballed into further stress by intensifying the recession, creating higher *inflation*, and increasing the foreign currency debt burden. Ultimately, the government announced capital controls to stabilise the peso and its intention to restructure the nation's debt load. Bond prices have rallied significantly, albeit not enough to offset losses, as the government continues to express high willingness to pay their obligations despite uncertain abilities to pay.

January 2020

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND

Over the 12-month period under review, the Fund's USD C share class returned 13.87%, compared with a return of 13.80% for the benchmark, a composite index comprising 50% JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 25% JP Morgan Emerging Markets Bond Index Global TR Index, 25% JP Morgan Corporate Emerging Markets Bond Index Diversified TR Index, and 10.68% for the Lipper Global – Bond Emerging Markets Global HC sector average, all in US dollar terms.

Markets rose overall throughout 2019. In the US, the Federal Reserve (Fed) cut interest rates in July, September and October citing muted domestic *inflationary* pressures. A wave of *monetary policy* easing followed, sweeping the globe with central banks reducing interest rates throughout the year. After much rhetoric and instability, the Trump and Xi administrations came to a 'phase one' trade deal in December, to be signed by both countries in early 2020. While limited in scope, this deal prevents a new round of tariffs scheduled in mid-December and rolls back a portion of the September tariffs. Overall, this agreement reduces uncertainty and could contribute to a mild recovery in global growth in 2020. The House also

REGIONAL & SPECIALIST FIXED INCOME cont'd.**BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND** cont'd.

approved the US-Mexico-Canada Agreement (USMCA), replacing NAFTA. In the UK, Prime Minister Boris Johnson and his Conservative Party secured a resounding majority in the December election. The win assisted Johnson's push for the UK to leave the EU by 31 January 2020. Despite spurts of *volatility* in this environment, risk sentiment was generally positive leading to the asset class marching higher.

In the local currency portion of the Fund, the *long* local rates positions were significant outperformers. With the Fed setting the pace, central banks around the world eased *monetary policy*. Notably the Fund was significantly *long* local Russian rates. In Russia, the Central Bank of Russia (CBR) cut rates five times throughout the year to the lowest rate since the 2014 financial crisis. The CBR signaled there is space remaining for further cuts as the economic slump has led to falling real incomes for five years, and an important need to generate growth before the 2021 elections.

In the US dollar denominated currency portion of the Fund, high-conviction country level allocations were significant contributors to performance. Most noteworthy is Lebanon, a large underweight, whose economic picture has been deteriorating to the degree of crisis. As the government faced revenue needs to meet US\$67bn in liabilities (despite US\$28bn in foreign exchange reserves, according to Fitch), the government proposed taxing WhatsApp calls. The people of Lebanon responded in mass protest. Since protests broke out, nearly one in ten companies have bankrupted and domestic banks are on the verge of collapse.

In terms of *security* selection, the Fund's allocation to corporate bonds performed very well; specifically, Brazilian and Indonesian energy companies. Additionally, these positions often act as a buffer in times of pressure with muted *volatility* compared to larger magnitudes in their sovereign peers.

The most significant drag on performance was Argentina, mainly from *long* positioning in the peso. *Long* positions in local bonds were *hedged* by a large underweight in US dollar denominated currency debt, which mostly offset each other in performance terms. In August, political experts and investors alike were surprised by primary presidential election (PASO) results. Despite the economic crisis, the conservative incumbent, Mauricio Macri, was widely expected to win the PASO or be closely behind the leftist challenger with little economic plan, Alberto Fernandez. Startling markets, Fernandez emerged in the lead by more than fifteen percentage points prompting a rapid sell off in both bonds and the Argentine peso.

The resulting sell off snowballed into further stress by intensifying the recession, creating higher *inflation*, and increasing the foreign currency debt burden. Ultimately, the government announced capital controls to stabilise the peso and its intention to restructure the nation's debt load.

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

Over the 12-month period under review, the Fund's USD W (Acc.) share class returned 12.22%, compared with a return of 13.90% for the benchmark[†] and 10.68% for the Lipper Global – Bond Emerging Markets Global LC sector average, all in US dollar terms.

The Fund generated a positive return and outperformed the sector average but underperformed its benchmark.

Emerging market bonds have been supported by numerous central banks in both developing and advanced economies cutting interest rates. While the global economy has been slowing, the local economies still have relatively high growth rates. The rally in the asset class came despite the effects of the global trade war, a resilient US dollar, and heightened *geopolitical* uncertainty (particularly in the Middle East). With reduced *volatility*, emerging market bonds have enjoyed increasing inflows, with the low interest rate environment worldwide making such instruments particularly attractive for income investors.

Over the period, US dollar denominated corporate bonds detracted from performance, particularly those in Argentina, Jamaica, and Turkey; however, Brazil, the United Arab Emirates, and Saudi Arabia were positives. Foreign exchange allocations also weighed on returns. The largest negatives were Argentina, Colombia, and Russia but Egypt, Brazil, and Greece helped. Meanwhile, US dollar denominated sovereign debt had a positive effect on returns: Ukraine, Indonesia, and Saudi Arabia were the main positives, while Russia, Mexico, and Peru were the largest detractors. Local currency rates positions were also supportive, particularly those in Chile, Peru, and Mexico but Argentina, Turkey and Malaysia were negatives.

[†] Comprised 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON EUROLAND BOND FUND

Over the 12-month review period, the Fund's Euro A share class returned 5.97%, compared with a return of 5.98% for the Bloomberg Barclays Euro Aggregate Bond TR Index and 5.20% for the Lipper Global – Bond EUR sector average, all in euro terms.

Developed fixed income markets rose during the year amid easing *monetary policy* from the US Federal Reserve that included three rate cuts in the second half of 2019, citing trade uncertainty and slowing global growth. On the trade front, the Trump administration came to a 'phase one' trade deal with China in December, expected to be formally agreed and signed in early 2020.

In developed markets, the European Central Bank cut interest rates during the year, in line with market expectations. In December, the UK Conservative Party secured a resounding majority over the Labour Party in the general election that should ensure that the UK will now leave the EU by 31 January 2020. Emerging markets rose throughout the year despite ongoing global trade tensions helped in part by a *bullish* commodity market. Commodities rose 9.41% in 2019 as measured by the Thomson Reuters Core Commodity CRB Index. Oil prices, specifically, rallied in the final quarter due to an improvement in the global growth outlook and production restraint promised by major energy producers.

Overall *duration* in the Fund stood at 7.5 years as at 31 December 2019, an increase of 0.9 years since the end of 2018. The Bloomberg Barclays Euro Aggregate Bond Index duration was at 7.2 years as at 31 December 2019, itself having extended by c.0.5 years over the year. Specific country *duration* overweight positions include France, Spain, Belgium, New Zealand, Russian and Australia.

Direct emerging market exposure increased in the year reaching 12.3% by the end of December, an overweight of 10.2% vs the index at 2.0%. Local emerging market positioning is concentrated in Russia, South Korea and Malaysia at c.5.0% of the Fund. US dollar and euro denominated emerging market exposure stands at 7.2% of which 0.7% is corporate debt with the balance government and *quasi-government* issuance. The Fund remains diversified across the various regions.

Allocations to *investment grade* corporate bonds reduced from last year with the Fund presently holding 16.7%. At the beginning of the period under review, the Fund had held exposure of 17.5%. The Fund increased its exposure to *high yield* both through direct cash bond holdings and *credit default swaps (CDS)* with a combined equivalent exposure of 4.3% compared to 1.4% at the end of 2018.

The Fund reduced its exposure to *securitised bonds* over the year from c.11.0% to 4.7% leaving it underweight to its comparative index. Exposure is concentrated within *asset-backed securities* and is correspondingly underweight *covered bonds* (2.6% vs 7.6% for the index).

Mellon Investments Corporation*
January 2020

BNY MELLON EUROPEAN CREDIT FUND

Over the 12-month period under review, the Fund's Euro A share class returned 6.07%, compared with a return of 6.29% for the Markit iBoxx Euro Corporates TR Index and 6.13% for the Lipper Global – Bond EUR Corporates sector average, all in euro terms.

The Fund generated a positive return but underperformed both its benchmark and the sector average.

The global trade war continued to weigh on markets, although the US and China have recently reached a 'phase one' agreement. Moreover, the UK general election result lessened short term concerns about a hard Brexit by reducing political uncertainty. Concerns about the Italian debt situation and its effect on wider Europe also lessened. Various central banks have maintained a *dovish* stance to *monetary policy*. The European Central Bank (ECB) restarted its monthly asset purchases in November; interest rates are on hold until *inflation* nears its 2% target. The US Federal Reserve (Fed) has cut rates three times in succession but aims to keep them on hold in 2020. The Bank of England has also remained accommodating. Economic data has continued to support European corporate bonds given sluggish economic growth and subdued underlying *inflation*.

The Fund's *security* selection was consistently strong across a number of sectors over the period. However, its overall *credit* strategy was detrimental, with its *duration* and *yield curve* strategies also slightly detracting.

From a *security* selection perspective, the manager focused on new issues over the period and also reduced exposure to a few names, particularly in the financials sector.

REGIONAL & SPECIALIST FIXED INCOME cont'd.**BNY MELLON EUROPEAN CREDIT FUND** cont'd.

The Fund's main overweights are in *subordinated debt* in insurance, telecoms and tobacco companies, while the manager is underweight in chemicals, food & beverages and capital goods. The Fund has minimal exposure to non-euro (US dollar and sterling) *credit*.

For more detail on financial market events following the reporting period end date, please refer to the economic and market overview section of this report.

Insight Investment Management (Global) Limited
January 2020

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND

Over the 12-month review period, the Fund's USD C (Acc.) share class returned 9.55%, compared with a return of 9.31% for the Bloomberg Barclays US Municipal Bond/Taxable Municipal Bond (50:50) Index, both in US dollar terms.

The Fund seeks to take advantage of relative value opportunities across the US municipal bond market, to provide as high a level of income as is consistent with the preservation of capital. The Fund may hold both taxable and tax-exempt instruments and may take exposure to US state, county or local issuers through revenue pledged bonds and *general obligation* instruments.

The Fund's *duration* was 6.52 years as at 31 December 2019 and had an average *credit* rating of A and holds approximately 155 individual bonds generating a weighted current *yield* of 3.66% (2.78% on a *yield-to-worst* basis), both expressed in US dollar terms.

The Fund invests in issuers across a large number of US states although the economically more important and populous states do feature as home for a significant proportion of the *securities* held in the Fund. Grouped by state, the top five exposures represent 53.7% of the portfolio, comprising bond issuers in New York, California, Illinois, Pennsylvania and Florida. The Fund did not hold any exposure to bonds issued by Puerto Rico.

Current positioning for the Fund exhibits a significant underweight to *general obligation securities* versus its comparative index (5.5% vs 19.0%) with a corresponding overweight to *revenue bonds* (85.0% vs 61.2%). Notable overweight allocations include the hospital and airport sectors where the manager believes the research process can find issuers offering attractive relative value. Tax-exempt *security* exposure was 26.9% and taxable municipal debt standing at 72.5% with the balance in cash.

Since launch in April 2017, the Fund has attracted significant international investor interest and stands at US\$435m assets under management as at 31 December 2019.

GLOSSARY OF FINANCE TERMS

Term	Definition	Term	Definition
Alternatives	An alternative is a financial asset that does not fall into one of the conventional investment categories. Conventional categories include equities, bonds and cash. Alternative investments include private equity or venture capital, hedge funds, managed funds, art and antiques, commodities and derivative contracts. Real estate is also often classified as an alternative.	Covered bonds	Covered bonds are debt securities issued by a financial institution and backed by a separate group of assets. As such, if the financial institution becomes insolvent, the bond is still 'covered'.
Asset-Backed Securities (ABS)	Pools of loans packaged and sold as securities – a process known as “securitisation”. Typically the assets backing these are home mortgages or credit card receivables.	Credit	In this context, it is synonymous with corporate bonds, debt issued by companies.
Basis points (BPS)	Basis point (BPS) refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal to 1/100th of 1%, or 0.01%, or 0.0001.	Credit default swap(s) (CDS)	A credit default swap in a financial contract that allows an investor to “swap” or offset his or her credit risk with that of another investor. For example, if a lender is worried that a borrower is going to default on a loan, the lender could use a CDS to offset or swap that risk. To swap the risk of default, the lender buys a CDS from another investor who agrees to reimburse the lender in the case the borrower defaults.
Bull/bullish	A bull is an investor who is typically optimistic the price of a security or market will rise.	Credit spreads	The difference in yield between two bonds of similar maturity but different credit quality; for example if the 10-year Treasury (US government debt) is trading at a yield of 6% and a 10-year corporate bond is trading at a yield of 8%, the corporate bond is said to offer a 200-basis-point spread over the Treasury. Widening credit spreads indicate growing concern about the ability of borrowers to service their debt. Narrowing credit spreads indicate improving private creditworthiness. See also the definitions of yield and basis points.
Bull market	A market in which the prices of securities are rising, often characterised by investor optimism and confidence in continuing strong returns.	Cyclical	A cyclical stock or industry is one deemed sensitive to the wider economy. As such its revenues are generally higher in periods of economic prosperity and expansion and lower in periods of economic downturn and contraction.
Call option(s)	An option contract giving the owner the right, but not the obligation, to buy a specified amount of an underlying security at a specified price within a specified time period.	Default(s)	Default is the failure to pay interest or principal on a loan or security when due.
Collateralised Mortgage Obligations (CMOs)	A type of security secured or backed by a pool of mortgages on real estate.	Default rates	A statistical measure expressing the percentage of issuers in a given fixed-income asset class that failed to make scheduled interest or principal payments in the prior 12 months. For example, if an asset class had 100 individual issuers and two of them defaulted in the prior 12 months, the default rate would be 2%.
Commercial Mortgage-Backed Securities (CMBS)	A type of security secured or backed by mortgages on commercial properties (not residential real estate).	Defensive	A defensive stock or industry is less sensitive to the wider economy, such that earnings and dividends are generally stable.
Consumer discretionary	Goods and services considered non essential by consumers but desirable if their income is sufficient to purchase them.	Derivative(s)	A financial security with a value that is reliant upon or derived from an underlying asset or group of assets. The derivative itself is a contract between two or more parties based upon the asset or assets. Its price is determined by fluctuations in the underlying asset. The most common underlying assets include stocks, bonds, commodities, currencies, interest rates and market indexes.
Consumer staples	Goods and services that people are unable or unwilling to cut out of their budgets regardless of their financial situation.		
Consumer goods	Products bought for consumption by the average consumer e.g. clothing, food, and jewellery.		
Consumer Price Index (CPI)	An index used to measure inflation, based on the prices in a basket of goods and services, meant to be representative of those we typically spend our money on.		
Convertible bond(s)	A convertible bond is a fixed debt security that yields interest payments, but can be converted into a predetermined number of equity shares. The conversion from the bond to stock can be done at certain times during the bond's life and is usually at the discretion of the bondholder.		
Coupons	The interest paid on a bond by its issuer for the term of the security.		

Term	Definition	Term	Definition
<i>Dove/dovish</i>	A dove is an economic policy advisor who promotes monetary policies that involve low interest rates, based on the belief that low interest rates increase employment. Statements that suggest that inflation has few negative effects are called dovish.	<i>Gilt(s)</i>	Fixed income security issued by the United Kingdom government.
<i>Duration</i>	A measure of the sensitivity of a fixed income security or bond fund to a change in interest rates. The longer a bond's duration, the more sensitive it is to interest rate movements.	<i>Hedge(s)/hedged/hedging</i>	A method of reducing unnecessary or unintended risk.
<i>Eurozone</i>	The economic region that contains all members of the European Union that use the euro as currency.	<i>High yield</i>	Fixed income securities with a low credit rating that is considered to be at higher risk of default than better quality securities but have the potential for higher rewards.
<i>Fiscal policy</i>	Government policy on taxation, spending and borrowing.	<i>International Monetary Fund (IMF)</i>	An organisation working to foster global monetary cooperation, secure financial stability, facilitate international trade, promote high employment and sustainable economic growth, and reduce poverty around the world.
<i>Exchange-Traded Fund (ETF)</i>	A type of investment fund that is traded on a stock exchange, typically tracks a stock index, a commodity, bonds, or a basket of assets.	<i>Inflation/Inflationary</i>	The rate of increase in the cost of living. Inflation is usually quoted as an annual percentage, comparing the average price this month with the same month a year earlier.
<i>Floating rate notes (FRNs)</i>	Fixed income securities whose interest (income) payments are periodically adjusted depending on the change in a reference interest rate.	<i>Interest rate risk</i>	The interest rate risk refers to the chance that investments in bonds will decrease as the result of unexpected interest rate changes, also known as market risk.
<i>Fiscal year</i>	The 12-month period that a company used for accounting purposes and preparing financial statements.	<i>Investment grade</i>	Fixed income securities with a medium or high credit rating that are considered to be at lower risk from default than those issued with lower credit ratings.
<i>Fundamentals (company)</i>	A basic principle, rule, law, or the like, that serves as the groundwork of a system. A company's fundamentals are factors such as its business model, earnings, balance sheet and debt.	<i>Leverage(d)</i>	When referring to a company, leverage is the level of a company's debt in relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.
<i>Fundamentals (economic)</i>	A basic principle, rule, law, or the like, that serves as the groundwork of a system. Economic fundamentals are factors such as inflation, employment and economic growth.	<i>Liquidity</i>	Liquidity describes the degree to which an asset or security can be quickly bought or sold in the market without affecting its price. Market liquidity refers to the extent to which a market, such as a country's stock market, allows assets to be bought and sold at stable prices.
<i>Futures</i>	Futures are financial contracts obligating the buyer to purchase an asset or the seller to sell an asset, such as a physical commodity or a financial instrument, at a predetermined future date and price. Futures contracts detail the quality and quantity of the underlying asset; they are standardised to facilitate trading on futures exchanges.	<i>Long</i>	Refers to ownership of a security held in the expectation that the security will rise in value.
<i>Geopolitics/Geopolitical</i>	Geographic influences on power relationships in international relations.	<i>Macroeconomic</i>	The performance and behaviour of an economy, including factors such as economic output, unemployment, inflation and investment.
<i>Gross Domestic Product (GDP)</i>	Gross domestic product is a monetary measure of the market value of all goods and services produced in a given period of time.	<i>Maturity/maturities</i>	The length of time until the initial investment amount of a fixed income security is due to be repaid to the holder of the security.
<i>General obligation securities</i>	Municipal securities that are secured by the tax receipts of the issuing government body. Often in the event of default, general obligation bonds have a superior claim on a municipal's assets or tax receipts over other debt securities.	<i>Monetary policy</i>	A central bank's regulation of money in circulation and interest rates.
		<i>Option(s)</i>	Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.

Term	Definition	Term	Definition
<i>Perpetual bonds</i>	Perpetual bonds, are bonds with no maturity date. Although perpetual bonds are not redeemable, they pay a steady stream of interest with no redemption date.	<i>Standard deviation</i>	A statistical measure of dispersion of a set of data from its mean.
<i>Put option(s)</i>	An option contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a specified price within a specified time period.	<i>Sub-investment grade</i>	Fixed income securities issued with a low rating. They are considered to be at higher risk of default.
<i>Quantitative easing</i>	A monetary policy whereby a central bank buys predetermined amounts of government bonds or other financial assets in order to stimulate the economy and increase liquidity.	<i>Subordinated debt</i>	A loan or security that ranks below other loans or securities with regard to claims on assets or earnings.
<i>Quasi-government</i>	A type of corporation in the private sector that is backed by a branch of government. Most quasi-public corporations begin as government agencies and then become separate entities.	<i>Total return</i>	The term for the gain or loss derived from an investment over a particular period. Total return includes income (in the form of interest or dividend payments) and capital gains.
<i>Real assets</i>	Real assets are tangible physical assets (e.g. a property or land). Real assets include precious metals, commodities, infrastructure, real estate, agricultural land, machinery and oil.	<i>Treasury/Treasuries</i>	U.S. government debt security with a maturity of more than 10 years. Treasury bonds make interest payments semi-annually.
<i>Revenue bonds</i>	Municipal bonds that finance income-producing projects and are secured by a specified revenue source. Typically, revenue bonds can be issued by any government agency or fund that is managed in the manner of a business, such as entities having both operating revenues and expenses.	<i>Treasury Inflation-Protected Securities (TIPS)</i>	U.S government debt securities where the value of the loan and the interest payments are adjusted in line with inflation, as reflected in the Consumer Price Index, over the life of the security.
<i>Risk asset(s)</i>	A risk asset is any asset that carries a degree of risk. Risk asset generally refers to assets that have a significant degree of price volatility, such as equities, commodities, high yield bonds and currencies.	<i>Unhedged</i>	A position not balanced by a compensating contract or transaction.
<i>'Safe haven'</i>	Refers to assets that investors perceive to be relatively safe from suffering a loss in times of market turmoil.	<i>Volatile/volatility</i>	Large and/or frequent moves up or down in the price or value of an investment or market.
<i>Security/Securities</i>	A tradable financial asset such as a share in a company or a fixed income security also known as a bond.	<i>Yield(s)</i>	The interest received from a bond or the dividends received from a share. It is usually expressed as a percentage based on the investment's costs, its current market value or its face value.
<i>Securitised bonds</i>	Securitisation is the financial practice of pooling various types of contractual debt such as residential mortgages, commercial mortgages, auto loans or credit card debt obligations and selling their related cash flows to third party investors as securities.	<i>Yield curve</i>	A yield curve is a line that plots the interest rates, at a set point in time, of bonds having equal credit quality but differing maturity dates.
<i>Short</i>	A way for a fund manager to express his or her view that the market or a security might fall in value.	<i>Yield-to-worst</i>	The lowest potential yield that can be received on a bond without the issuer defaulting. This metric is used to evaluate the worst-case scenario for yield to help investors manage risks and ensure that specific income requirements will still be met even in the worst scenarios.
<i>Spread(s)</i>	The difference between the yield of a corporate bond, and a government bond with the same maturity. Yield refers to the income received from an investment and is expressed as a percentage of the investment's current market value.

BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

STATEMENT OF COMPLIANCE

The financial statements for the financial year ended 31 December 2019 have been prepared in accordance with Financial Reporting Standard (“FRS”) 102: “The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland” (“FRS 102”) and Irish statute comprising the Companies Act 2014, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations, 2019 (the “Central Bank UCITS Regulations”).

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Companies Act 2014, as amended, so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company’s business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 “Statement of Cash Flows” of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company’s accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within “Financial assets and liabilities at fair value through profit or loss – Fair value estimation”. The Funds based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION – FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company’s financial statements are measured using the currency of the primary economic environment in which each Fund operates (the “functional currency”). The functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors’ base and conditions. The financial statements are presented in US dollar, which is the Company’s presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial year end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within “net gains/losses on financial assets/liabilities at fair value through profit or loss”.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FOREIGN CURRENCY TRANSLATION – FUNCTIONAL AND PRESENTATION CURRENCY cont'd.

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial year end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading. The Company does not classify any derivatives as hedges in a hedging relationship.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the “financial assets or financial liabilities at fair value through profit or loss” category are presented in the Statement of Comprehensive Income within “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the financial year in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the “financial assets or financial liabilities at fair value through profit or loss” category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial year end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 “Financial Instruments: Recognition and Measurement” as adopted for use in the European Union. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION cont'd.

last market price for a security, close of market or close of the foreign exchange, but before the Funds' valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant Investment Manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant Investment Manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by The Bank of New York Mellon SA/NV, Dublin Branch* (the "Depositary"), in consultation with the relevant Investment Manager with a view to establishing the probable realisation value for such assets.
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant Investment Manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign currency contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Schedule of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION cont'd.

- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Fund Management (Luxembourg) S.A* (the “Manager”) or any other parties.
- (l) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.
- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share from independent pricing sources.
- (n) Certain Funds may enter into “TBA” (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds’ other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes (“P-Notes”) that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient than the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund’s investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the “lender”) that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan and only upon receipt of payments by the lender from the borrower.

* Please refer to Note 19 of the financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

RECEIVABLES

Receivables include income receivable, receivable for investments sold, rebate receivable from the manager, margins on derivatives contracts, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

CROSS INVESTMENT

As at 31 December 2019 and 31 December 2018, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund invest in other Funds of the Company. These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as “margins on derivatives contracts” and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as “cash collateral received from broker”. The obligation to return the cash collateral is identified in the Statement of Financial Position as “cash collateral payable to broker”. Cash collateral received is restricted and does not form part of the Funds’ cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Schedule of Investments, as indicated by a “*” tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within “dividend income” when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as “dividend expense”, which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Certain Funds accrue for capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the understanding of the change in tax regulations and rates on Irish investors. The capital gains tax expense and the amounts payable at the financial year end are reflected in the “withholding taxes on dividends and other investment income” and “tax payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depository. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does not accept cash as collateral but does not engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial year end are contained in Note 14 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as “finance costs” in the Statement of Comprehensive Income when they are declared to Euronext Dublin, as detailed in the prospectus.

For non-distributing share classes, all income earned and realised net capital gains after the deduction of expenses will be accumulated and reflected in the net asset value per share.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

Effective 31 May 2019, the 38,092 subscriber shares at EUR 1.00 each, all issued as fully paid, which were previously held by BNY Mellon Global Management Limited and nominees of same, were transferred to BNY Mellon Fund Management (Luxembourg) S.A. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

Share Class	Rate	Share Class	Rate
Class A	0.40% – 2.00%	Class K	0.30% – 1.40%
Class B	0.75% – 1.50%	Class L	0.16%
Class C	0.30% – 1.00%	Class R	0.60% – 2.75%
Class D	0.50% – 1.00%	Class S	0.20% – 2.00%
Class E	0.10% – 1.50%	Class T	0.20% – 2.00%
Class F	0.10% – 0.45%	Class U	0.20% – 1.75%
Class G	0.30% – 1.00%	Class W	0.20% – 1.00%
Class H	0.40% – 2.00%	Class X	None
Class I	0.30% – 1.00%	Class Y	None
Class J	1.25% – 1.50%	Class Z	0.35% – 0.65%

Management fees accrued to the Manager and the amounts due at the financial year end are included in the “Management Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the “Performance Fee”) in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

Fund	Benchmark	Rate
BNY Mellon Absolute Return Bond Fund	3 month EURIBOR / USD LIBOR / GBP LIBOR / CHF LIBOR	Class D, R, S and T – 10.00%
BNY Mellon Absolute Return Equity Fund	1 month EURIBOR / USD LIBOR / GBP LIBOR / CHF LIBOR	Class D, R, S, T and U – 15.00%
BNY Mellon Absolute Return Global Convertible Fund*	1 month EURIBOR / GBP LIBOR / USD LIBOR / CHF LIBOR / JPY LIBOR	Class F, R, U and X – 15.00%
BNY Mellon Dynamic U.S. Equity Fund	S&P 500 Net Total Return Index in USD terms	Class U – 10.00%
BNY Mellon Long-Term Global Equity Fund	MSCI World Daily (with net dividends reinvested) in Euro/USD terms	Class S – 15.00%

*The Fund launched during the financial year.

Performance fees accrued to the Manager and the amounts due at the financial year end are included in the “Performance Fee” and “Performance Fees Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the “Administrator”) out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial year end are included in the “Operating Expenses” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial year end are included in the “Depositary Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. REBATE FROM MANAGER

In order to maintain the Total Expense Ratios (“TER”) of particular Funds at a competitive level with regard to the comparable funds in the market place, BNY Mellon Investment Management EMEA Limited and BNY Mellon Fund Management (Luxembourg) S.A. (the “Distributors”) undertook to pay, via the Manager, a sum equivalent to the percentage amount, if any, the TER of the following Funds exceeds an agreed TER limit, effectively structured as an Annual Management Charge (“AMC”) plus a cap arrangement:

Fund	Agreed TER Limit
BNY Mellon Asia Rising Stars Fund (capped from launch date of 10 January 2017)	TER limit of AMC plus 50 basis points
BNY Mellon Asian Income Fund (capped from 1 December 2016)	TER limit of AMC plus 9 basis points
BNY Mellon Dynamic Total Return Fund	TER limit of AMC plus 22 basis points ¹
BNY Mellon Digital Assets Fund (capped from launch date of 19 February 2019)	TER limit of AMC plus 13 basis points
BNY Mellon Dynamic U.S. Equity Fund (capped from launch date of 3 November 2017)	TER limit of AMC plus 10 basis points ²
BNY Mellon Efficient U.S. High Yield Beta Fund* (capped from launch date of 26 September 2017)	TER limit of AMC plus 9.5 basis points ⁹
BNY Mellon Emerging Markets Debt Total Return Fund (capped from launch date of 11 December 2017)	TER limit of AMC plus 17 basis points ³
BNY Mellon Global Credit Fund⁴	
BNY Mellon Global Emerging Markets Fund	TER limit of AMC plus 30 basis points
BNY Mellon Global Infrastructure Income Fund (capped from launch date of 13 August 2018)	TER limit of AMC plus 13 basis points
BNY Mellon Global Leaders Fund	TER limit of AMC plus 15 basis points
BNY Mellon Global Multi-Asset Income Fund (capped from launch date of 10 July 2018)	TER limit of AMC plus 12 basis points
BNY Mellon Global Opportunistic Bond Fund (capped until closure date of 7 March 2019)	TER limit of AMC plus 20 basis points ⁵
BNY Mellon Global Short-Dated High Yield Bond Fund	TER limit of AMC plus 6 basis points ⁶
BNY Mellon Global Unconstrained Fund (capped from launch date of 6 December 2017)	TER limit of AMC plus 15 basis points ⁷
BNY Mellon Japan All Cap Equity Fund (capped until closure date of 15 February 2019)	TER limit of AMC plus 17 basis points
BNY Mellon Japan Small Cap Equity Focus Fund	TER limit of AMC plus 17 basis points
BNY Mellon Mobility Innovation Fund (capped from launch date of 1 August 2018)	TER limit of AMC plus 13 basis points
BNY Mellon Sustainable Global Dynamic Bond Fund (capped from launch date of 25 February 2019)	TER limit of AMC plus 13 basis points ⁸
BNY Mellon U.S. Equity Income Fund (capped from launch date of 17 January 2017)	TER limit of AMC plus 15 basis points
BNY Mellon U.S. Municipal Infrastructure Debt Fund (capped from launch date of 19 April 2017)	TER limit of AMC plus 15 basis points
BNY Mellon U.S. Opportunistic Alpha Fund (capped until closure date of 27 September 2019)	TER limit of AMC plus 13 basis points ¹⁰
BNY Mellon US Opportunities Fund (capped until closure date of 29 August 2019)	TER limit of AMC plus 16 basis points

¹ With exception for USD X (Acc) and USD X (Inc) share classes subject to TER limit of AMC plus 17 basis points.

² With exception for USD X (Acc) closed share class subject to TER limit of AMC plus 6 basis points.

³ With exception for USD X (Acc) share class subject to TER limit of AMC plus 13 basis points.

⁴ CAD X (Acc) (Hedged) and Sterling X (Acc) (Hedge) share classes subject to TER limit of 10 basis points and USD X (Acc) share class subject to TER limit of AMC plus 7 basis points.

⁵ With exception for USD X share class subject to TER limit of AMC plus 15 basis points.

⁶ Applicable to Sterling Y (Acc) (Hedged) and USD Y (Acc) share classes.

⁷ Applicable to CAD X (Acc) (Hedged) share class.

⁸ With exception of EUR U (Acc) share class subject to TER limit of AMC plus 5 basis points.

⁹ With exception for USD L (Acc), EUR L (Acc) (Hedged), Sterling L (Inc) (Hedged) and USD X (Acc) share classes subject to TER limit of AMC plus 5.8 basis points.

¹⁰ Applicable to USD A (Acc), EUR A (Acc), USD C (Acc), USD G (Acc) and USD W (Acc) share classes.

* Please refer to Note 19 of the financial statements.

The amount rebated to the Company during the financial year ended 31 December 2019 was USD 725,515 (31 December 2018: USD 377,689).

7. OPERATING EXPENSES

The operating expenses in the Statement of Comprehensive Income comprise of the following:

Expense	31 December 2019 USD	31 December 2018 USD
Administration fee	8,753,935	9,407,295
Audit fee	472,465	448,378
Directors' fee	87,447	132,743
Other expenses	4,679,358	3,903,889
Total operating expenses	13,993,205	13,892,305

An additional USD 8,395 were paid by the Manager to the Directors who served on the working financial reporting group or audit committee during the year.

Fees and expenses paid/payable to the statutory auditors, Ernst & Young, in respect of the financial year are as follows:

	31 December 2019 USD	31 December 2018 USD
Statutory audit of financial statements	472,465	448,378
Taxation services	–	–
Total	472,465	448,378

8. TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and include the bid ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Transaction costs incurred for the purchases and sales of equities and financial derivative instruments are included in the “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the Statement of Comprehensive Income and are detailed in the table below. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

9. CASH AND CASH EQUIVALENTS

Cash held by the Company is deposited with The Bank of New York Mellon SA/NV, Dublin Branch* and held by counterparties (Bank of America Merrill Lynch, Barclays Bank PLC, BNP Paribas, Canadian Imperial Bank of Commerce, Citigroup Global Markets Limited, Credit Suisse AG, Goldman Sachs, HSBC Bank plc, JPMorgan Chase Bank, Lloyds Bank Plc, Morgan Stanley, Royal Bank of Canada, Royal Bank of Scotland, State Street Bank, Toronto Dominion Bank and UBS AG) in respect of collateral and margin requirements. Cash balances include cash invested into short-term investment vehicles daily.

Cash account arrangements have been put in place in respect of the Funds as a consequence of the introduction of the new requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48(i)) Investor Money Regulations 2015 for Fund Service Providers (“Investor Money Regulations”).

These cash accounts, held with the Global Sub-Custodian for collection of subscriptions and payment of redemptions and distributions for the Funds, are deemed assets of the Funds. The balances on these cash accounts as at 31 December 2019 and 31 December 2018 are deemed immaterial in respect of the relevant Fund to which they are due, with exception of cash balances held as at 31 December 2018 in respect of BNY Mellon Global Dynamic Fund, which have been adjusted in “cash and cash equivalents” in the Statement of Financial Position as at 31 December 2018.

* Please refer to Note 19 of the financial statements.

10. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Certain Funds accrue for Brazilian and Indian capital gains tax on net realised and unrealised gains on investments. As at 31 December 2019, a capital gains tax payable of USD 5,339,693 for BNY Mellon Brazil Equity Fund (31 December 2018: USD 3,505,699) has been recorded in the Statement of Financial Position; an assessment for capital gains tax recoverable of USD 44,734 for BNY Mellon Global Emerging Markets Fund (31 December 2018: USD 45,735) has been recorded and incorporated within “Other receivables” in the Statement of Financial Position.

11. RELATED PARTIES

In the opinion of the Directors, the Manager, and the Investment Managers, Mellon Investments Corporation*, Newton Investment Management Limited, Walter Scott & Partners Limited, ARX Investimentos Ltda, CenterSquare Investment Management, Inc., Insight Investment Management (Global) Limited, Alcentra NY, LLC, BNY Mellon Asset Management Japan Limited, Insight North America LLC, Maybank Asset Management Singapore Pte. LTD and Alcentra Limited, and the Distributors are considered as related parties of the Company.

The Manager pays out of the fee received by it, the fees of the Investment Managers and the Distributors at an annual rate agreed between the parties. Fees paid in respect of all other material related party transactions during the financial year are fully disclosed in the Statement of Comprehensive Income and in Note 3 Management and Performance Fees, Note 4 Administration Fees, Note 5 Depositary Fees, Note 6 Rebate from Manager and Note 7 Operating Expenses of the financial statements.

The Directors are related parties of the Company. David Turnbull resigned from the Company on 19 February 2019. Greg Brisk and David Dillon were Directors of BNY Mellon Global Management Limited (“BNY MGM”), the former Manager of the Company*. David Turnbull resigned from BNY MGM on 12 February 2019.

The following Directors of the Company also serve as Directors to BNY Mellon Fund Management (Luxembourg) S.A. (the Manager):

- Greg Brisk
- David Dillon (appointed 7 March 2019)
- David Turnbull (resigned 2 July 2019)
- Gerald Rehn (appointed 2 July 2019)

* Please refer to Note 19 of the financial statements.

11. RELATED PARTIES cont'd.

David Turnbull, Greg Brisk and Gerald Rehn (appointed 1 January 2019) are also Directors of BNY Mellon Investment Management EMEA Limited. David Turnbull resigned on 30 May 2019.

David Turnbull, Greg Brisk and Gerald Rehn have waived their right to receive a fee for their services as Directors. Directors' fees incurred during the financial year are disclosed in Note 7 of the financial statements.

Greg Brisk is also a Director of the following Investment Managers for the Funds:

- Alcentra NY, LLC;
- Newton Investment Management Limited;
- Insight Investment Management (Global) Limited;
- Mellon Investments Corporation*;
- CenterSquare Investment Management, Inc.; and
- Insight North America LLC

* Please refer to Note 19 of the financial statements.

Greg Brisk is also a Director of BNY Mellon Investment Management Seed Capital Limited, a related entity of the Company, and a trustee of Mellon Retirement Benefits Plan, a pension scheme for BNY Mellon staff. These entities held a material beneficial interest in the share classes of the Funds listed overleaf as at 31 December 2019 and 31 December 2018:

Investor Name	Fund	Base Currency	31 December 2019	31 December 2018

* Please refer to Note 19 of the financial statements.

With effect from 1 March 2017, Greg Brisk was appointed to the Board of Directors of Insight Global Funds II plc and Insight Liquidity Funds plc in which some Funds of the Company have invested in, as detailed in the table above.

BNY Mellon Asian Income Fund (the “Feeder Fund”) was established as a feeder fund which invested in Newton Asian Income Fund (the “Master Fund”), a sub-fund of BNY Mellon Investment Funds and managed by Newton Investment Management Limited. The Feeder Fund invested in the X share class of the Master Fund which does not charge an annual management fee. The annual and semi-annual financial statements of the Master Fund are published on the website of BNY Mellon Investment Management EMEA Limited (www.bnymellonim.com). As detailed in the Note 19, BNY Mellon Asian Income Fund, converted to a stand-alone fund, effective 28 August 2019.

During the financial year, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London were counterparties to forward foreign currency contracts open at the financial year end as disclosed in appendices to the Schedule of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,092 of the Company’s subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial year ended 31 December 2019 or financial year ended 31 December 2018.

12. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial year, Mellon Investments Corporation* and ARX Investimentos Ltda (the “Investment Managers”) have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Managers do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Managers consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

* Please refer to Note 19 of the financial statements.

13. EXCHANGE RATES

The financial statements are prepared in US dollar. The following exchange rates have been used to translate assets and liabilities in other currencies to US dollar:

Currency	31 December 2019	31 December 2018
Argentinian peso	59.8718	37.6600

Uruguayan Peso	37.4250	32.4150

In respect of the aggregation of the Funds' financial statements, the following exchange rates against the US dollar were used in the preparation of the accounts:

	31 December 2019		31 December 2018	
	Closing Rate	Average Rate	Closing Rate	Average Rate
Euro	0.8915	0.8934	0.8728	0.8475
Japanese yen	108.6550	109.0156	109.6050	110.4382
Sterling	0.7549	0.7835	0.7846	0.7501

14. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments (“FDIs”) for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Schedule of Investments. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depository. The securities lending income is currently split between the Company and The Bank of New York Mellon, London Branch in the proportion 80%:20%.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial year ended 31 December 2019, as detailed in the table below:

Fund	Base Currency	Gross Earnings	Direct Costs (Paid to The Bank of New York Mellon SA/NA (20%)	Net Earnings to Company (80%)*

15. NET ASSET VALUE

The net asset value of each class of redeemable participating share is determined by dividing the value of the net assets of the share class by the total number of redeemable participating shares in issue at the financial year end.

The published net asset value of each class of redeemable participating share is as follows:

Fund	Share Class	Currency	31 December 2019	31 December 2018	31 December 2017
BNY Mellon Absolute Return Bond Fund					
Total net assets		EUR	397,342,232	998,363,169	1,482,534,034

^ This share class was launched or closed during the financial year.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute^[1] or Relative^[2]). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

^[1] This is defined as the VaR of the Fund capped as a percentage of NAV.

^[2] This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investments of the Funds are subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Funds and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Schedule of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Board of Directors.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

The following table demonstrates by way of example the likely increase in net asset value as a result of a 5% upwards movement in the Funds' related market index (a 5% decrease would have similar negative results). Please note the table does not include the bond Funds as their main exposure is to interest rate risk, as detailed below. Detail of market sensitivity for these Funds is provided in the subsequent commentary. In the interests of providing consistent comparisons across the Funds, the table assumes a movement of 5%. It should be noted future market conditions could vary significantly and the table is meant for illustrative purposes only.

As at 31 December 2019 and 31 December 2018, for the Funds listed in the table overleaf, should market value have increased or decreased by 5% with all other variables remaining constant, the increase or decrease in net assets attributable to redeemable participating shareholders for the financial year is shown.

[^] As the Fund is in existence for less than three years, a statistically significant beta is not available. Hence, for market price risk sensitivity disclosure, a notional beta of 1 is applied in the effective calculation for these Funds.

For the bond Funds, the likelihood of a decrease in net asset value as a consequence of a downward movement in market prices is defined as follows.

As at 31 December 2019 and 31 December 2018, for bond Funds utilising the Investment Managers' VaR risk model (VaR is based on probability), one would not expect the Fund to lose more than the following percentage as listed in the table below (Regulatory limit) in any one week or day, i.e. 1 week in a hundred weeks or 1 day in a hundred days. The table below also shows the VaR of each Fund as at 31 December 2019 and 31 December 2018 calculated at the 99th percentile confidence level over the holding period listed below.

Fund	Confidence Level	VaR Type	Holding Period	Regulatory Limit 2019	VaR 2019	Holding Period 2018	Regulatory Limit 2018	VaR 2018

^ The figure is for the period from 1 January 2019 to date of closure date.

VaR is the risk measurement methodology used to assess the Funds' leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Funds (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and the market price information represents a hypothetical outcome and is not intended to be predictive.

The minimum, average and maximum utilisation of the Regulatory limits calculated during the financial year ended 31 December 2019 are as follows:

Fund	Minimum utilisation	Average utilisation	Maximum utilisation
BNY Mellon Absolute Return Bond Fund	17.60%	38.70%	71.60%
BNY Mellon Absolute Return Equity Fund	6.00%	9.50%	14.10%

Leverage is calculated as the sum of the notionals of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

The average level of leverage employed during the financial year ended 31 December 2019 and 31 December 2018 is as follows:

Fund	Average Level of Leverage 2019	Average Level of Leverage 2018
BNY Mellon Absolute Return Bond Fund	531.22%	568.74%
BNY Mellon Absolute Return Equity Fund	118.21%	130.22%

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

The table below summarises the Company's exposure to interest rate risk as at 31 December 2019. It includes the Company's assets and liabilities at fair value, categorised by the earlier of contractual repricing or maturity dates:

BNY Mellon Absolute Return Bond Fund	Less than 1 year EUR	1-6 years EUR	Over 6 years EUR	Non interest bearing EUR	Total 2019 EUR
Assets					
Financial assets at fair value through profit or loss	57,459,778	113,515,542	192,696,901	20,298,010	383,970,231

* Please refer to Note 19 of the financial statements.

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

INTEREST RATE RISK cont'd.

The table below demonstrates the impacts of 25 basis points (“bps”) increase in the market interest rates in the key markets the listed Funds were invested.

As at 31 December 2019 and 31 December 2018, should interest rates have increased by 25 bps with all other variables remaining constant, the instantaneous shift in the Funds’ total return is listed (25 bps decrease would have similar but opposite results in the Funds’ total return).

Fund	Functional currency	Funds Total Return (%)	Funds Total Return (%)
		– Instantaneous Shift 2019	– Instantaneous Shift 2018
BNY Mellon Efficient U.S. High Yield Bond Fund*	USD	0.763	0.988
BNY Mellon Emerging Markets Corporate Debt Fund	USD	1.350	1.150
BNY Mellon Emerging Markets Debt Total Return Fund	USD	1.650	0.864
BNY Mellon Global Bond Fund	USD	2.038	1.785
BNY Mellon Global Dynamic Bond Fund	USD	0.678	0.793
BNY Mellon Global Real Return Fund (EUR)	EUR	0.550	1.035
BNY Mellon Global Real Return Fund (GBP)	GBP	0.777	1.274
BNY Mellon Global Real Return Fund (USD)	USD	0.642	1.092
BNY Mellon Global Short-Dated High Yield Bond Fund	USD	1.253	0.390
BNY Mellon Global Unconstrained Fund	USD	0.583	0.404
BNY Mellon Sustainable Global Dynamic Bond Fund*	USD	0.720	N/A

* Please refer to Note 19 of the financial statements.

It should be noted that the future market conditions could vary significantly and the table is meant for illustrative purposes only.

For those Funds which use VaR, the interest rate risk sensitivity analysis has been incorporated into the calculation of market price risk.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company’s currency position on a daily basis and may act to manage the Company’s currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

The following tables set out the Company’s material exposures to foreign currency risk as at 31 December 2019:

Fund	Currency	Net Exposure 31 December 2019	Monetary assets	Monetary liabilities	Non-monetary assets	Hedging
BNY Mellon Absolute Return Bond Fund						
		EUR	EUR	EUR	EUR	EUR

The following table demonstrates the impact on net assets attributable to redeemable participating shareholders of a movement in local currencies against the Funds' functional currency by way of illustration. In the interests of providing consistent comparisons across the Funds, the table assumes a 5% upward movement in the value of the local currencies (a negative 5% would have similar negative results).

As at 31 December 2019 and 31 December 2018, had the exchange rate between the local currencies held by the Fund and its functional currency increased or decreased by 5% with all other variables held constant, the increase or decrease, respectively, in net assets attributable to redeemable participating shareholders is listed in the table below.

For those Funds which use VaR, the currency risk sensitivity analysis has been incorporated into the calculation of market price risk.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary, The Bank of New York Mellon SA/NV, Dublin Branch*, on a quarterly basis in order to mitigate risk. Its long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2018: AA-) as at the end of the financial year.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

The permanent risk function of the Company oversees this process as well as performing independent checks.

The long-term senior debt and long-term deposit rating by Standard & Poor's of the counterparties whom the Funds transacted with as at 31 December 2019 are listed in the table below (rating for 31 December 2018 is the same except where stated):

Counterparty	Rating	Counterparty	Rating
Bank of America Merrill Lynch	A-	J.P. Morgan AG	A+
Bank of Montreal	A+	Lloyds Bank Plc	A+
Bank of New York Mellon Corporation	A	Morgan Stanley & Co. LLC	A+

Goldman Sachs & Co.	BBB+ (31 December 2018: A+)	Toronto Dominion Bank	AA-
HSBC Bank plc	AA-	UBS AG	A-
ING Bank NV	A+		

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily before the designated dealing time for the Funds. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintains a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

The table below details the cash sweep balances as at 31 December 2019 and 31 December 2018:

Fund	Base Currency	31 December 2019	31 December 2018

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

The maximum exposure for the Funds as a seller of protection is detailed below:

Fund	Base Currency	31 December 2019 Maximum Exposure	31 December 2018 Maximum Exposure
BNY Mellon Absolute Return Bond Fund	EUR	185,057,903	379,650,469
BNY Mellon Efficient U.S. High Yield Beta Fund*	USD	14,850,000	2,500,000

BNY Mellon Global Opportunistic Bond Fund*	USD	N/A	260,000
BNY Mellon Targeted Return Bond Fund	USD	-	800,000

* Please refer to Note 19 of the financial statements.

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by each Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

As at 31 December 2019, non-cash collateral received in respect of financial derivative transactions is as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Emerging Markets Debt Local Currency Fund	J.P. Morgan Chase Bank	USD	149,523
BNY Mellon Euroland Bond Fund	Goldman Sachs	EUR	536,123

As at 31 December 2018, non-cash collateral received in respect of financial derivative transactions was as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Emerging Markets Debt Local Currency Fund	J.P. Morgan Chase Bank	USD	2,318,272
BNY Mellon Euroland Bond Fund	Goldman Sachs	EUR	381,921

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 14 of the financial statements.

A number of Funds have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depository and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depository shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

LIQUIDITY RISK cont'd.

All financial liabilities are realisable within three months except those noted in the table below.

The table below summarises the financial liabilities for the Funds with derivative exposures, into relevant maturity groupings based on the remaining period as at 31 December 2019 to the contractual maturity date. The tables have been prepared based on the undiscounted gross cash outflows relating to its financial liabilities:

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

The number of investors that held more than 10% of the net assets at trading valuation of the Funds at the end of the financial year are as follows:

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the current financial year and prior financial year.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial year. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and subscriptions.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

FAIR VALUE ESTIMATION

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities which are priced at costs or fair valued using single broken quote. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

The following table provides an analysis of financial instruments that are measured at fair value as at 31 December 2019:

Fund Classification	Level 1	Level 2	Level 3	Total 31 December 2019

BNY Mellon Targeted Return Bond Fund

Particulars	Bonds USD	Total USD
Opening balance	523,678	523,678
Purchases	175,000	175,000
Sales	(156,310)	(156,310)
Transfers into Level 3	155,899	155,899
Transfers out of Level 3	(523,678)	(523,678)
Net gains/(losses) recognised in other net changes in fair value on financial assets and financial liabilities at fair value through profit or loss		
Realised gains	3,084	3,084
Unrealised losses	(2,673)	(2,673)
Closing balance	175,000	175,000

Transfers are deemed to occur at the beginning of the financial year.

The transfer from Level 2 to Level 3 relates to bond positions whose issuers experienced reductions in trading activity and was inactive (i.e. stale) as at the financial year end. These securities are priced at cost or fair valued using single broker quote and resulted in the reclassification to Level 3.

17. COMMITMENTS AND CONTINGENCIES

There are no commitments or contingencies as at 31 December 2019 or 31 December 2018.

18. SEGREGATED LIABILITY

The Company avails of the segregated liability provisions of Section 1405 (1) of the Companies Act 2014. As such, under Irish Law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the Funds.

19. SIGNIFICANT EVENTS

Gerald Rehn was appointed as a Director of the Company, effective 1 January 2019.

BNY Mellon Asset Management North America Corporation was renamed Mellon Investments Corporation, effective 2 January 2019.

Jonathan Lubran resigned as a Director of the Company, effective 31 January 2019.

BNY Mellon Japan All Cap Equity Fund and BNY Mellon Japan REIT Alpha Fund were closed on 15 February 2019.

BNY Mellon Digital Assets Fund was launched on 19 February 2019.

David Turnbull resigned as a Director of the Company, effective 19 February 2019.

19. SIGNIFICANT EVENTS cont'd.

BNY Mellon Sustainable Global Dynamic Bond Fund was launched on 25 February 2019.

The Manager of the Company changed from BNY Mellon Global Management Limited ("BNY MGM") to BNY Mellon Fund Management (Luxembourg) S.A. ("BNY MFM Lux") on 1 March 2019.

BNY Mellon Global Opportunistic Bond Fund was closed on 7 March 2019.

On 1 April 2019, the performance fee benchmark of BNY Mellon Absolute Return Bond Fund was changed from EURIBOR on a 365-day calculation basis to a 360-day calculation basis.

BNY Mellon Absolute Return Global Convertible Fund was launched on 31 May 2019.

On 13 August 2019, an Extraordinary General Meeting was held to convert BNY Mellon Asian Income Fund from a feeder fund to a directly invested fund and base currency was changed to U.S. Dollar from Sterling, effective 28 August 2019.

On 23 July 2019, shareholders were notified of the settlement period of BNY Mellon Brazil Equity Fund changed from T+3 to T+2, effective 29 August 2019.

BNY Mellon US Opportunities Fund was closed on 29 August 2019.

The Depositary, BNY Mellon Trust Company (Ireland) Limited, merged into the Global Sub-Custodian, The Bank of New York Mellon SA/NV, effective 1 December 2019, and was renamed The Bank of New York Mellon SA/NV, Dublin Branch. The new entity provides trustee, depositary and custody services to the Company. It is authorised by the European Central Bank and regulated by and under the supervision of the Central Bank.

BNY Mellon U.S. High Yield Beta Fund was renamed BNY Mellon Efficient U.S. High Yield Beta Fund, effective 23 December 2019.

DISCLOSURE UPDATES FOR COMPLIANCE WITH THE REVISED UT CODE

Certain updates were made to the Prospectus on 17 December 2019 by way of the Second Addendum in order to reflect the updates to the Securities and Futures Commission of Hong Kong's Code on Unit Trusts and Mutual Funds (the "UT Code") which came into effect on 1 January 2019 with a 12-month transition period for compliance for funds previously authorised by the SFC (including the Sub-Funds authorised in Hong Kong). The Product Key Facts Statements of the Sub-Funds authorised in Hong Kong are also updated to reflect the same.

The key changes to the relevant section of the Prospectus include enhanced disclosure on (i) fair value adjustment to the valuation of an asset with consultation of the Depositary, (ii) transactions with Connected Persons (as defined under the UT Code) and (iii) handling of unclaimed proceeds upon winding up of the Company or a repurchase of all the Shares of a Sub-Fund. The disclosure relating to the net derivative exposure was added in the Product Key Facts Statement of each Sub-Fund authorised in Hong Kong.

For the avoidance of doubt, these changes of disclosures for compliance with the revised UT Code will not result in (i) any change of the investment objective and policies of the Sub-Funds authorised in Hong Kong; (ii) any material changes to the Sub-Funds authorised in Hong Kong; (iii) any material change or increase in the overall risk profile of the Sub-Funds authorised in Hong Kong; and (iv) any material adverse impact on the rights or interests of the Shareholders of the Sub-Funds authorised in Hong Kong.

Other than as disclosed above, there were no other significant events affecting the Company during the financial year end.

BNY Mellon Efficient Global IG Corporate Beta Fund was launched on 10 March 2020.

NOTE ON COVID-19

The global outbreak of COVID-19 in the first quarter of 2020 has had a significant negative impact on the global financial markets. Market volatility has increased significantly and may continue for some time. The extent of the impact to the financial performance of the Sub-Funds' investments and the Sub-Funds will depend on future developments, including (i) the duration and spread of the outbreak, (ii) Government interventions or other limitations or bans introduced by regulatory authorities or exchanges and trading venues, (iii) the effects on the global financial markets, and (iv) the effects on the economy overall.

Other than disclosed above, there were no other significant events affecting the Company since the financial year end.

21. NON-MATERIAL POLICY CHANGES

On 28 August 2019, the following non-material policy changes occurred:

- an update to the investment policies to allow up to 10% of their Net Asset Value to be invested in securities in People's Republic of China that are traded on the China interbank bond market. APPENDIX 1

UCITS V REMUNERATION POLICY (unaudited)

In accordance with the UCITS V Directive, the Irish implementing Regulations and the ESMA UCITS Remuneration Guidelines (the “UCITS Remuneration Code”), the Company is required to disclose details of the remuneration paid by the Manager to its staff for the financial year.

In line with the requirements of Directive 2009/65/EC, as amended by Directive 2014/91/EU (the “UCITS Directive”), the Manager is subject to the rules on remuneration set out in Article 14(b) of the UCITS Directive. These rules require managers of UCITS to have remuneration policies, procedures and practices that:

- are consistent with and promote sound and effective risk management;
- do not encourage excessive risk-taking inconsistent with the risk profiles or governing documentation of the UCITS; and
- do not impair compliance with the Manager’s duty to act in the best interests of the UCITS.

The Manager applies its remuneration policy and practices in a manner that is proportionate to its size and that of the UCITS it manages, its internal organisation and the nature, scope and complexity of its activities. The Manager also applies this principle of proportionality to the appointment of any third-party that makes investment decisions on behalf of the UCITS under a formal delegation arrangement and which may affect the risk profile of the relevant sub-funds.

In broad terms, the Manager’s business model is designed such that it does not promote excessive risk-taking. In accordance with the requirements under the UCITS Directive, the Manager takes appropriate steps to identify individuals providing services to the Manager whose professional activities may have a material impact on the risk profile of the Manager and the UCITS that it manages, known as “Identified Staff”, including:

- statutory directors;
- senior management and others within the same remuneration bracket of senior management;
- the heads of the control functions; and
- other risk takers including all staff members whose professional activities – either individually or collectively, as members of a group – can have a material influence on the risk profiles of the Manager or of a UCITS it manages.

The executive directors do not receive any compensation directly from the Manager. The independent non-executive directors receive remuneration for their services from the Manager which comprises a fixed fee and no variable compensation component.

The operations and activities of the Manager and the UCITS for which it acts as manager are largely performed by employees of other companies within the BNY Mellon Group and the compensation of these individuals is determined by senior management of the relevant business line in accordance with the BNY Mellon policies, principles and practices at global and regional level. In such cases where services arrangements or formal delegation of portfolio management are in place, the Manager seeks to ensure that remuneration arrangements in respect of Identified Staff are considered to be equally effective as those to which the Manager is directly subject, including the principles of proportionality. Furthermore, the risk framework operated by the Manager in respect of delegated portfolio management arrangements is designed to ensure that individuals performing activities within such third-parties do not have capacity to have a material impact on the risk profile of the UCITS.

The BNY Mellon compensation philosophy and principles are based on offering an overall remuneration that supports its core values of: Client Focus, Integrity, Teamwork and Excellence. Performance is rewarded both at the individual and corporate level and determined on the basis of financial and non-financial factors. This is intended to align the interests of employees and shareholders and/or clients by incentivising actions that contribute to superior financial performance and long-term value and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary and

excessive risks. BNY Mellon's overall compensation structure is balanced between short-term and long-term incentives and a combination of cash and equity compensation. This is intended to discourage employees from taking excessive risks that may adversely affect the long-term performance of companies within the BNY Mellon Group and impact a substantial proportion of their own compensation.

BNY Mellon operates remuneration committees at a global, regional and enterprise level with responsibilities relating to the oversight of employee compensation and benefit policies and programmes. The Manager does not operate an individual remuneration committee.

Remuneration for identified staff in respect of the year ended 31 December 2019:

	USD
Total remuneration for the financial year (excludes VAT)	448,698
Of which fixed remuneration	275,139
Of which variable remuneration	173,559

APPENDIX 2

SECURITIES FINANCING TRANSACTIONS REGULATION DISCLOSURES (“SFTR”) (unaudited)

SECURITIES LENDING TRANSACTIONS

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch (the “Agent Lender”) effective 27 November 2015.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund’s net asset value as at 31 December 2019:

Fund	Currency	Aggregate value of securities on loan	% of Total lendable assets	% of Net asset value

* Please refer to Note 19 of the financial statements.

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender’s books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

SECURITIES LENDING TRANSACTIONS cont'd.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 31 December 2019:
