# AXA World Funds - Euro Inflation Bonds

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Euro Inflation Bonds I REDEX Capitalisation EUR (ISIN : LU0503838491)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The Sub-Fund's investment objective is to seek performance by investing mainly in inflation-linked bonds in Euros, over a medium term period.

### Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the Euro inflation-linked bond market. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- positioning on the inflation-linked yield curve (the inflation-linked yield curve illustrates the relationship between the investment term and the inflation linked bond yield)
- management of duration for inflation linked-bonds (duration measures in numbers of years the portfolio's sensitivity to interest rate variations)
- positioning according to inflation expectations
- geographical allocation

The Sub-Fund invests:

- at least two thirds of its total assets in inflation-linked bonds and other related debt securities issued by governments, corporations or public institutions of the Eurozone and denominated in Euro
- up to one third of its total assets in non inflation-linked debt securities and in money market instrument

This Sub-Fund will invest at least 90% of its net assets in investment grade debt securities.

Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager, securities will be sold within 6 months. If two different ratings of rating agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered.

The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on a internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

The Sub-Fund applies AXA IM Environmental, Social and Governance (ESG) Standards available on [www.axa-im.com/en/responsible-investing](http://www.axa-im.com/en/responsible-investing).

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially

by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Sub-Fund targets a sensitivity between 5 and 15. If interest rates increase by 1%, the Net Asset Value of the Sub-Fund may decrease by 5% up to 15%.

The Redex Share Class aims at mitigating the effect of real interest rate variations by using listed derivatives whilst retaining exposure to the Investment Policy described above and introducing exposure to anticipated inflation. As a consequence, the sensitivity of the Redex Share Class may deviate from the one of the Sub-Fund mentioned above.

### Income

For Capitalisation share classes (Cap), the dividend is reinvested.

### Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

### Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

### Additional Risks

Counterparty Risk: Risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Operational Risk: Risk that operational processes, including those related to the safekeeping of assets may fail, resulting in losses.

Credit Risk: Risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Impact of any techniques such as derivatives: Certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.
