

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Barclays MultiManager Portfolio 1

Share Class I Acc EUR (ISIN: LU0553827436), (SEDOL: B5M2JP6)

a sub fund of Barclays Portfolios SICAV. This Fund is managed by Barclays Asset Management Limited.

Objectives & Investment Policy

The aim is to achieve an ongoing source of income with potential to increase the value of your investment by investing mainly in funds with exposure to tradable debt (bonds) and, to a lesser degree, in funds with exposure to other asset classes across various markets.

The Fund is actively managed and is known as a “fund of funds” which means that it invests mainly in other investment funds, as opposed to investing directly in shares or tradable debt. These underlying funds are managed by different managers selected and monitored by Barclays.

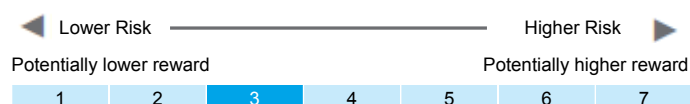

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

Income is not paid out and is rolled up (accumulated) into the value of your investment.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The underlying funds into which the Fund invests may invest in bonds, the return on which depends on the issuer's ability to make its payments. There is a risk that the issuer will fail to do so. Although the underlying funds generally invests in bonds with high ratings, these ratings are subjective and a high rating does not guarantee an issuer's ability to pay.

The underlying funds into which the Fund invest may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

The Fund may use derivatives for various reasons, including to try to reduce the effect of currency fluctuations between the

currency of its assets and the base currency of the Fund, or to reduce the effect of market or interest rate movements (known as hedging). The effectiveness of any hedging strategy is not guaranteed to succeed and may prevent the Fund from benefitting from an increase in value of a particular currency.

Fluctuations in interest rates may affect the value of your investment.

The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. Investments held by other funds may be denominated in a currency other than the currency of the shares in the Fund and/or the currency of your investment. Currency fluctuations may affect the value of your investment. Investment in other funds may also lead to duplication of fees and commissions.

The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of your investment is likely to be adversely affected.

Future legal or regulatory change could have a substantial adverse effect on the Fund and your investment.

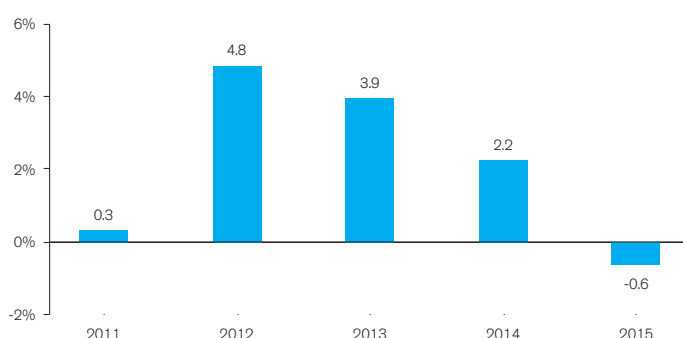

Bonds are interest rate sensitive, meaning that the range and frequency of price movements may be significant due to various factors, including changes in interest rates, the creditworthiness of the issuer and the ease with which similar investments may be bought or sold (liquidity). The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment. More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
