

JOHCM Japan Fund

Fund overview

- Objective: to generate long-term capital growth through active management of a portfolio of Japanese equities
- Experienced Japan investors Scott McGlashan and Ruth Nash employ a stock-picking approach to identify undervalued companies with strong balance sheets
- They focus in particular on small and mid-cap areas of the market that are often under-researched by sell-side analysts and overlooked by investors

Past performance is no guarantee of future performance.

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. The Fund's investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile. Hedging transactions are designed to reduce, as much as possible, the currency risk for investors. However, there is no guarantee that the hedging will be totally successful and no hedging strategy can eliminate currency risk entirely. Information on how JOHCM handles personal data which it receives can be found in the JOHCM Privacy Statement on our website: www.johcm.com.
