

Robeco High Yield Bonds DH USD

Robeco High Yield Bonds is an actively managed fund that invests in high yield corporate bonds. The selection of these bonds is mainly based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund invests in corporate bonds with a sub-investment grade rating, issued primarily by issuers from developed markets (Europe/US). The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield. Performance drivers are the top-down beta positioning as well as bottom-up issuer selection.

Performance

Indexed value (until 31-08-2024) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 1.34%.

In August, the high yield bond index posted a total return of 1.39%. The main contributor to this result was spread returns, but the underlying government yields also contributed positively. The portfolio underperformed versus the benchmark by 5 bps. With issuer selection adding 4 basis points of positive performance, beta positioning was the main driver of negative performance (-9 bps). On a risk-adjusted basis, we benefited from euro-denominated bonds outperforming USD, thanks to our overweight in EUR bonds. Excess returns were positive across the rating spectrum, including CCCs where we hold an underweight, which dragged our performance. Underweight in the communications and consumer non-cyclical sectors contributed positively, whereas overweights in capital goods and basic industry names made a negative contribution. Avoiding the troubled telco Altice USA (CSC Holdings) contributed positively to our performance, whereas Level-3 bonds, where we hold an active underweight, recovered partly, which costed us a few basis points over the period.

Market development

During the month of August, the US high yield market tightened by 9 bps, ending this period at 315 bps. Yield-to-worst, however, contracted by 28bps, settling at 7.03%. Leading up to the much awaited economic symposium held in Jackson Hole, the month of August was particularly eventful. At the start of the month, markets went into a tailspin, as the US unemployment rate rose to 4.3%. This weakening of the labor market caused recession fears to increase. Additionally, the Bank of Japan's rate hike further contributed to the sharp sell-off, as investors were unwinding the yen carry trade. On the inflation front, however, the PCE Index settled at 2.5%, bringing additional confidence in a first rate cut by the Fed in the September seating. These expectations have been supported by Powell's speech, as he indicated that the time has come for policy to adjust. Several members of the ECB would be of the same view, as inflation is progressing in the right direction in the Eurozone. New issuance in the US high yield market was low in August, totaling USD 18.1 bln worth of bonds, whereas USD 2.3 bln of bonds were involved in defaults or distressed exchanges.

Expectation of fund manager

Economic data in the US has continued to paint a picture of a resilient economy. A 'goldilocks' scenario of softer growth, cooling inflation and the prospect of imminent rate cuts remains the broad market consensus. But the tails on either side of this base case cannot be dismissed entirely. In considering the downside (or hard-landing) scenario, we see increasing evidence that consumers are feeling the pinch from higher rates. On the other hand, sticky inflation clearly complicates matters for the Fed. If the market truly begins to consider that rate cuts may be even further out, or even contemplate further hikes, we would again consider this an unfriendly scenario for risk assets. In the high yield market, we see that companies feel the need to reduce debt. This is positive for investors in high yield issuers that have the ability to do that in a creditor-friendly way. However, at the lower end of the spectrum we find companies that can only reduce debt by restructuring their capital structure in a creditor-unfriendly way. In this environment, it is important to firmly hold on to our quality tilt and accept a beta below one.

Top 10 largest positions

Our top ten holdings consist mostly of BB-rated large caps in the communications, automotive and packaging sectors. In communications, we are slightly overweight in the large US operator Charter. In automotive, we have large overweight positions in Forvia (formerly called Faurecia) and ZF Industries. Other top holdings are in US supermarket operator Albertsons, and in the packaging sector with Crown Holdings and iron ore miner Fortescue.

Sector allocation

Overweights are in less cyclical sectors like paper, chemicals and packaging, as well as in financials, which is an off-benchmark position. Underweights are in sectors that are exposed to consumer discretionary spending like retail, leisure and gaming. We also have underweights in tech and telecommunications.

Sector allocation		Deviation index	
Capital Goods	15.2%	3.8%	
Consumer Non Cyclical	13.5%	0.0%	
Consumer Cyclical	13.4%	-10.3%

Other	3.2%	-1.5%	
Cash and other instruments	7.8%	7.8%	

Currency denomination allocation

All currency risks are hedged to the currency of the share class. The currency denomination allocation shows the currency distribution of the portfolio before hedging.

Currency denomination allocation		Deviation index	
U.S. Dollar	54.3%	-23.1%	
Euro	34.2%	14.2%	
Pound Sterling	3.8%	1.2%	

Duration allocation

Robeco High Yield Bonds does not pursue an active duration policy. HY bonds tend to have a limited effective sensitivity to underlying moves in government bond yields. In our 0-duration share classes, the underlying rate risk is hedged to 0 to 6-month duration.

Duration allocation		Deviation index	
U.S. Dollar	2.3	0.0	
Euro	0.6	0.0	
Pound Sterling	0.1	0.0	

Rating allocation

Most exposure is in Ba and B issuers. The fund has a large underweight in the categories Caa and below. We have an allocation to BBBs, mainly consisting of former rising stars that still trade at attractive spread levels, as well as positions lower in the capital structure of European banks.

Rating allocation		Deviation index	
BAA	9.7%	9.7%	
BA	58.5%	5.3%	
B	19.3%	-16.0%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds, and engagement. The fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile. Furthermore, the fund invests at least 2% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement.

The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on Bloomberg US Corporate High Yield + Pan Euro HY ex Financials 2.5% Issuer Cap.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2024 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Source: Robeco. Data derived from internal processes.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight	Index weight
Green Bonds	4.27%	3.02%
Social Bonds	0.00%	0.00%
Sustainability Bonds	0.00%	0.20%
Sustainability-Linked Bonds	1.60%	2.01%

Engagement

Robeco distinguishes between three types of engagement.

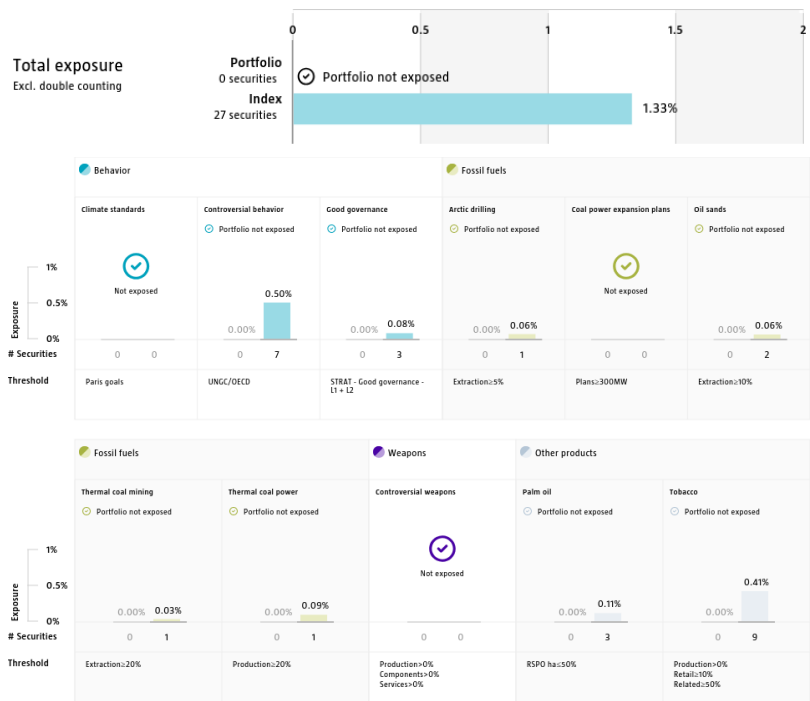

Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	5.54%	27	81
Environmental	2.31%	13	41
Social	0.97%	4	16
Governance	0.28%	1	1
Sustainable Development Goals	0.95%	5	14
Voting Related	1.72%	6	6
Enhanced	0.53%	1	3

Source: Robeco. Data derived from internal processes.

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Source: We use several data sources such as Sustainalytics, RSPO (Roundtable on Sustainable Palm Oil), World Bank, Freedom House, Fund for Peace and International Sanctions; further policy document available [Exclusion Policy](#)

Investment policy

Robeco High Yield Bonds is an actively managed fund that invests in high yield corporate bonds. The selection of these bonds is mainly based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund invests in corporate bonds with a sub-investment grade rating, issued primarily by issuers from developed markets (Europe/US). The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield. Performance drivers are the top-down beta positioning as well as bottom-up issuer selection.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on currencies and issuers) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Fund manager's CV

Sander Bus is CIO and Portfolio Manager High Yield Bonds in the Credit team. He has been dedicated to High Yield at Robeco since 1998. Previously, Sander worked for two years as a Fixed Income Analyst at Rabobank where he started his career in the industry in 1996. He holds a Master's in Financial Economics from Erasmus University Rotterdam and he is a CFA® charterholder. Roeland Moraal is Portfolio Manager High Yield in the Credit team. Before assuming this role, he was Portfolio Manager in the Robeco Duration team and worked as an Analyst with the Institute for Research and Investment Services. Roeland started his career in the industry in 1997. He holds a Master's in Applied Mathematics from the University of Twente and a Master's in Law from Erasmus University Rotterdam. Christiaan Lever is Portfolio Manager High Yield and Emerging Credits in the Credit team. Before assuming this role in 2016, he was Financial Risk Manager at Robeco, focusing on market risk, counterparty risk and liquidity risk within fixed Income markets. Christiaan has been active in the industry since 2010. He holds a Master's in Quantitative Finance and in Econometrics from Erasmus University Rotterdam. Daniel de Koning is Portfolio Manager High Yield in the Credit team. Prior to joining Robeco in 2020, he was Portfolio Manager High Yield at NN Investment Partners. Daniel started his career in 2011 at APG Asset Management, where he held roles of Credit Analyst and Portfolio Manager High Yield. He holds a Master's in Business Economics from the University of Amsterdam and he is a CFA® and CAIA® charterholder.

Team info

The Robeco High Yield fund is managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts. The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by three dedicated quantitative researchers and four fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.
