Fidelity Funds - Global Strategic Bond Fund

a sub-fund of Fidelity Funds

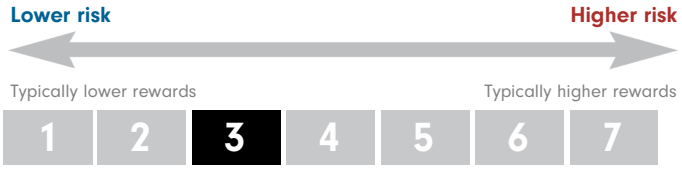

A-ACC-SEK (hedged) (ISIN: LU0594300765)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

- Aims to maximise return through capital growth and income.
- At least 70% invested in a broad range of bonds of issuers globally. Has an active asset allocation approach, which may include investment into high yield and emerging markets bonds. Investments will not be required to meet minimum rating standards.
- Has the freedom to invest outside the fund's principal geographies, market sectors, industries or asset classes.
- Can invest in bonds issued by governments, companies and other bodies.
- Can use derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the fund's risk profile.
- The fund has discretion in its choices of investments within its objectives and policies.
- Currency hedging is used to substantially reduce the risk of losses from unfavourable exchange rate movements on holdings in currencies that differ from the dealing currency. Hedging also has the effect of limiting the potential for currency gains to be made.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- This fund may not be appropriate for investors who plan to sell their shares in the fund within 5 years. Investment in the fund should be regarded as a long-term investment.

Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging may be used to minimise the effect of this but may not always be successful.
- The use of financial derivative instruments may result in increased gains or losses within the fund.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
