JPM Global Merger Arbitrage A (acc) - USD

a Share Class of JPMorgan Funds – Global Merger Arbitrage Fund
a Sub-Fund of JPMorgan Funds LU0599212403

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to provide a return in excess of its cash benchmark by taking advantage of the "deal risk premium" factored into the price of companies which are, or may become, involved in merger activity, takeovers, tender offers and other corporate activities anywhere in the world, using financial derivative instruments where appropriate.

Investment Policy: The Sub-Fund will primarily invest in, either directly or through the use of financial derivative instruments, a portfolio of equity securities of companies (including smaller capitalisation companies) that are, or are likely to become, subject to merger activity, takeovers, tender offers or other corporate activities. Issuers of these securities may be located in any country, including emerging markets.

The Sub-Fund may hold short positions (through the use of financial derivative instruments) in the acquiring companies where the merger is a stock deal, or use equity futures to hedge its market exposure.

The Sub-Fund will typically hold gross long positions of 100% of its net assets and gross short positions (achieved through the use of financial derivative instruments) of 50% of its net assets. The Sub-Fund will not exceed gross long positions of 150% and gross short positions of 150%. The net market exposure of long and short positions will vary depending on market conditions but will normally not exceed 130% of the Sub-Fund's assets.

The Sub-Fund will invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging.

The Sub-Fund is opportunistic and it may invest up to 100% of its assets in cash and cash equivalents until suitable investment opportunities can be identified.

USD is the reference currency of the Sub-Fund but assets may be denominated in other currencies, including emerging market currencies, and currency exposure may be hedged.

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is ICE 1 Month USD LIBOR.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund will be managed without reference to its benchmark.

Distribution Policy: This Share Class will not pay dividends.

Risk and Reward Profile

Lower risk **Higher risk**

Potentially lower reward Potentially higher reward

1	2	**3**	4	5	6	7

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 3 because its Net Asset Value has shown low to medium fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- At times it may not be possible to achieve the investment objective of the Sub-Fund due to the lack of opportunities on mergers or other corporate activities.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- Emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.
- The Sub-Fund may be concentrated in a limited number of securities, industry sectors and/or countries and as a result, may be more volatile than more broadly diversified funds.
- The Sub-Fund may invest in securities of smaller companies which may be less liquid, more volatile and tend to carry greater financial risk than securities of larger companies.
- The strategy may be impacted by changes in regulations or accounting rules pertaining to merger activity.
- There is no guarantee that individual mergers or corporate action will complete or that stock prices will move as expected.
- The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The Management Company is required to disclose in Appendix III of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.
- Short selling may be subject to changes in regulations and losses from short positions may be unlimited.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
