Objectives and Investment Policy

The Sub-Fund is actively managed. The Stoxx ex-UK Small Return TR ND index is used for performance comparison as well as internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments. Securities targeted by the Sub-Fund can be similar to those of the index to an extent that varies overtime but their weighting is expected to materially differ. The performance of the Sub-Fund may deviate materially from that of the index. The Sub-Fund invests mainly in equity securities issued by small and mid cap companies, incorporated or exercising a prominent part of their business activity in countries whose currency is the EUR. Hence it excludes UK investments.In selecting the individual stocks, the Investment Manager is guided by its own fundamental analysis of companies. Company visits and top management assessments are critical to the Investment Manager, that firmly believes in companies with a strong competitive position (product or market leaders) and consistent growth. The Investment Manager is authorized to use financial derivative instruments for hedging purposes or for EPM but not as part of the investment strategy. The Sub-Fund is a product which promotes environmental or social characteristics or a combination of those characteristics for the purposes of article 8 of the Sustainable Finance Disclosure Regulation. The Investment Manager adopts a multifaceted approach to the way it analyses the sustainable profile of the Sub-Fund's investments (including sustainability focused screening & scoring, exclusions, restrictions and qualitative and quantitative reviews).

What does it mean?

This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Category

The Sub-Fund invests in a diversified portfolio of shares with at least 60% of its portfolio invested in equity securities issued by small and mid cap companies (as considered in their respective home markets), incorporated or exercising a prominent part of their business activity in countries whose currency is the EUR.

Are there any other particular risks?

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:
- Liquidity risk: Where a significant level of investment is made in financial instruments that may under certain circumstances have a relatively low level of liquidity, there is a material risk that the fund will not be able to transact at advantageous times or prices. This could reduce the fund's returns.
- Operational risk and risks related to asset safekeeping: In specific circumstances, there may be a material risk of loss resulting from human error, inadequate or failed internal systems, processes or controls, or from external events.
- Concentration risk: To the extent that the fund's investments are concentrated in a particular country, market, industry, sector or asset class, the fund may be susceptible to loss due to adverse occurrences affecting that country, market, industry, sector or asset class.

For more details about risk, see appendix B "Risk Factors" of the prospectus.
