The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

The value of shares in the fund and income received from it can go down as well as up, and investors may not get back the full amount invested. All performance data shown is in the currency stated, include reinvested dividends and are net of management fees. Sales charges and other commissions, taxes and other relevant costs paid by the investor are not included in the calculations. The fund offers other share classes subject to different fees and expenses, which will affect their performance.

References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy (USD), while share class returns are shown in the reference currency of share class (EUR). As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.

Fund Measures

Average Credit Quality	BBB+
Average Duration	4.06 Years
Average Weighted Maturity	5.46 Years
Yield to Maturity	6.44%
Standard Deviation (5 Yrs)	7.06%

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Interest Rate Derivatives sector consists of Treasury, interest rate and other derivatives that are primarily used for duration management. Average Credit Quality figures are intended to estimate the portfolio's exposure to issuer credit risk, including any hedged or increased exposure through credit derivatives held in the portfolio (or their underlying reference assets). Any credit derivatives are assigned the ratings of their underlying reference assets. Average Duration, Average Weighted Maturity and Yield to Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund invests mainly in debt securities of any quality from issuers of both developed and emerging countries. Such securities have historically been subject to price movements, generally due to interest rates, foreign exchange rates or movements in the bond market. As a result, the performance of the Fund can fluctuate moderately over time. The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital. Other significant risks include: credit risk, derivatives instruments risk, emerging markets risk, liquidity risk, securitisation risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Important Information

© 2023 Franklin Templeton. All rights reserved. Issued by Franklin Templeton International Services, S.à r.l. Franklin Templeton Investment Funds (the "Fund") is a Luxembourg registered SICAV. Source for data and information provided by Franklin Templeton, as of the date of this document, unless otherwise noted. This document does not constitute legal or tax advice nor investment advice or an offer for shares of the Fund. Subscriptions to shares of the Fund can only be made on the basis of the current prospectus and where available, the relevant Key Information Document, accompanied by the latest available audited annual report and semi-annual report accessible on our website at www.franklintempleton.com.es or which can be obtained, free of charge, from Franklin Templeton Investment Management Limited, Spanish Branch. No shares of the Fund may be directly or indirectly offered or sold to residents of the United States of America. Shares of the Fund are not available for distribution in all jurisdictions and prospective investors should confirm availability with their local Franklin Templeton representative before making any plans to invest. An investment in the Fund entails risks, which are described in the Fund's prospectus and where available, in the relevant Key Information Document. Special risks may be associated with a Fund's investment in certain types of securities, asset classes, sectors, markets, currencies or countries and in the Fund's possible use of derivatives. These risks are more fully described in the Fund's prospectus and where available, in the relevant Key Information Document and should be read closely before investing. Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change. Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only.

Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.
