Key Information Document (KID)

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Edmond de Rothschild Credit Very Short Term

Manufacturer of the PRIIP (Packaged Retail Investment and Insurance-based Product): Edmond de Rothschild Asset Management (France), part of the Edmond de Rothschild Group. Registered office: 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France

C units – ISIN: FR0010027623

Website of PRIIP manufacturer: www.edmond-de-rothschild.com

For further information, call +33 (0) 140 172 525.

The Autorité des marchés financiers (AMF) is responsible for supervising Edmond de Rothschild Asset Management (France) in relation to this Key Information Document. Edmond de Rothschild Asset Management (France) is approved in France under the number GP 04000015 and regulated by the Autorité des Marchés Financiers (AMF).

Date of production of the Key Information Document (KID): 21.06.2023

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product?

Type

The Product is a French Mutual Fund (FCP), a UCITS governed by European Directive 2009/65/EC.

Term

The term of the Product is 99 years.

Objectives

By investing in interest-rate and money markets, the management objective is, after management fees have been deducted, to obtain a performance higher than the compounded €STR over the recommended investment horizon. In the event of very low or even negative interest rates on the money market, the yield generated by the Product would not be sufficient to cover the costs of management and the Product's net asset value could fall structurally.

Benchmark index: Compounded €STR

Investment policy: Up to 100% of the Product's net assets will be invested in money market instruments denominated in euro or in other currencies. Securities denominated in foreign currencies are fully hedged against currency risk. The Product will restrict its investments to financial instruments maturing in two years or less, provided that the rate is adjustable within a maximum period of 397 days. Furthermore, the weighted average maturity (WAM) of the portfolio will be six months or less. The weighted average life (WAL) of the portfolio up to the maturity date of the securities will be 12 months or less. The eligible instruments will have a rating of at least "Investment Grade" (securities whose long-term rating is greater than or equal to BBB- or whose short-term rating is greater than or equal to A-3, as assigned by Standard & Poor's or an equivalent agency, or a rating deemed equivalent by the Management Company). However, it should be noted that securities that have not been rated by a rating agency but have been rated investment grade by the Management Company will be limited to 15% of the net assets. Eligible instruments undergo an independent in-house credit-quality analysis governed by an in-house credit-quality evaluation procedure as set out in Regulation (EU) 2017/1131. By way of derogation, the limit of 5% of the Product's assets per entity may be increased to 100% of its assets when the fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union, as set out in European Regulation (EU) 2017/1131 of the European Parliament and the Council of 14 June 2017. The Product may commit up to 100% of its net assets for forward financial instruments for hedging purposes. The Product may commit up to 100% of its net assets for temporary purchases and sales of securities involving eligible financial securities or money market instruments for repurchase agreements, and up to 10% of its net assets for reverse repurchase agreements.

Allocation of income: Accumulation

Allocation of net realised gains: Accumulation

Intended Retail Investors

All investors. The Product is primarily intended for investors seeking to invest their liquid assets over short periods, provided they are willing to accept the risk of capital loss.

This Product may not benefit, either directly or indirectly, any American natural or legal person, US citizen or US Person.

Practical information

Custodian: CACEIS Bank

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the transfer agent before 12.30 p.m. on the day preceding the net asset value calculation day.

The Product prospectus, its latest annual report and any subsequent interim reports (in French and English where applicable) are available free of charge upon written request to Edmond de Rothschild Asset Management (France), 47 rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: 00 33 1 40 17 25 25, email: contact-am-fr@edr.com.

The price of the units and, where applicable, information about the Product's other unit classes, its net asset value, its performance scenarios and its past performance, can be found online at www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

← Lower Risk Higher Risk →

The summary risk indicator assumes you keep the Product until the end of the recommended holding period (6 months). The actual risk can vary significantly if you decide to exit before maturity, and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 1 out of 7, which is the lowest risk class. In other words, the potential losses on the Product's future performance are in the very low range and, if market conditions were to deteriorate, it is highly unlikely that our ability to pay you will be affected.

Furthermore, you will be exposed to the following risks (not taken into account in the summary risk indicator), namely:

Credit risk: risk that the issuer of the bond or money market securities is unable to fulfil its obligations, or that its credit rating is downgraded. It may also be the result of an issuer defaulting on repayment at maturity.

Derivative risk: the use of derivatives may cause a greater drop in the value of the net assets than that of the markets in which they are invested.

Counterparty risk: this is the risk that a market participant will default, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

This Product does not include any protection from future market performance, so you could lose some or all of your investment.

Be aware of currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which it is marketed, the final return will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all of the costs in connection with the Product itself, but may not include the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The favourable, unfavourable and moderate scenarios that are shown correspond to the best, worst and median performance historically observed.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

Recommended holding period: 3 to 6 months Example Investment: With an investment of EUR 10,000		If you exit after 6 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	EUR 9,950
	Average return each year	-1.8%
Unfavourable	What you might get back after costs	EUR 9,940
	Average return each year	-2.3%
Moderate	What you might get back after costs	EUR 9,960
	Average return each year	-1.8%
Favourable	What you might get back after costs	EUR 9,990
	Average return each year	-0.4%

This table shows how much you could get back over the recommended holding period of 6 months, under different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario: This type of scenario occurred for an investment made between October 2019 and April 2020.

Moderate scenario: This type of scenario occurred for an investment made between February 2019 and August 2019.

Favourable scenario: This type of scenario occurred for an investment made between August 2022 and February 2023.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Fund is a co-ownership of financial instruments and deposits, and is distinct from the portfolio management company. Should the latter become insolvent, the Product's assets held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs a financial loss is mitigated owing to the legally required separation of the custodian's assets from those of the Product.

The investment in the Product is not itself hedged or guaranteed by a national compensation mechanism. The resale of the units, the capital and the income of the Product are not guaranteed by the manufacturer.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how all the costs affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, the Product performs as shown in the moderate scenario.
- EUR 10,000 are invested.

Investment EUR 10,000	If you exit after 6 months
Total costs	EUR 50
Impact on return (RIY) per year*	2.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 0.40% before costs and -1.78% after costs.

We may share the costs with the person selling you the Product to cover the services they provide to you. If that is the case, they will inform you of the amount.

Composition of costs

Based on an investment of EUR 10,000 and an annual cost if you exit after 6 months.

One-off costs upon entry or exit		If you exit after 6 months
Entry costs	Up to 0.40% of the amount you pay when you invest in the Product.	EUR 40
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Conversion costs	We do not charge conversion fees for this Product.	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.30% of the value of your investment per year. This figure is based on actual costs incurred in the previous year.	EUR 30
Transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 9
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this Product.	EUR 0

The table above shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

The charges shown here do not include any additional charges that might be applied by your distributor, advisor or that could be related to a possible envelope in which the Product may be placed. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the charges of this contract.

This table also shows the meaning of the different cost categories.

How long should I hold the Product and can I take money out early?

Recommended holding period: 3 to 6 months

However, you can redeem your units, without penalty, at any time during this period, or keep your investment for a longer period.

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12.30 p.m. on the day that the net asset value is calculated for the day in question.

How can I complain?

If you wish to file a complaint about the Product, the Product manufacturer or the person who provides advice about or distributes the Product, with a view to having a right recognised or a loss remedied, please send us a written request describing the problem and the details giving rise to the complaint, by post or email, to:
Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75008 Paris, France.
Email: contact-am-fr@edr.com
Website: www.edmond-de-rothschild.com.

Other relevant information

Performance scenarios: The latest performance scenarios, which are updated monthly, can be found on the website, <https://funds.edram.com/>.
Past performance: Past performances for the last 10 years can be found at <https://funds.edram.com/>.

When this Product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about the contract in question, such as the costs associated with the contract – which are not included in the costs mentioned in this document –, the person to contact in the event of a claim, and the procedures to follow if the insurance company fails, are provided in the contract's key information document, which must be given to you by your insurer or broker, or any other insurance intermediary, in compliance with their legal obligation.

Depending on your tax system, any capital gains and income resulting from the ownership of units of the Product may be subject to tax. We advise you to discuss this with the marketer of the Product, or your tax advisor.

Other Product-related information documents are available in French and can be obtained free of charge on request from the management company, Edmond de Rothschild Asset Management (France), registered office: 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France - Website: www.edmond-de-rothschild.com. Telephone: +33 140 172 525; contact-am-fr@edr.com.

This Key Information Document (KID) is updated at least once a year.

2. CHANGES AFFECTING THE UCI

1. The prospectus was updated on 01/01/2023:

- Addition of a section entitled "Decimalisation (splitting)";
- Addition of paragraph on the trailer fees paid by portfolio management companies to various parties involved;
- Addition of a specific reference to ratios in the Investment Rules;
- Update of the exclusion policy: addition of the exclusion of activities related to non-conventional fossil fuels;
- With the expiration of Grant Thornton Audit's mandate on 31 December 2022, KPMG Audit was appointed as the new auditor of the UCI for six (6) accounting periods.

2. Transition to the PRIIP KID on 22/02/2023;

3. The prospectus was updated on 21/06/2023:

- Increase in operational expenses included in the prospectus, and recalculation of data in PRIIPS KIDs;
- Addition of a reference to taxonomy, as the fund is classified under Article 6 of the SFDR.

Background:

The year 2023 was marked by a slowdown in the Eurozone economy. While the negative consequence of the war in Ukraine – disruptions in supplies, increase in energy prices, etc. – had less of an impact on the activity, the latter was nevertheless affected by the low levels of confidence exhibited by both households and businesses, widespread declines in competitiveness, aggravated geopolitical tensions (particularly since October 2023), and more restrictive financing conditions, further to the tightening of the European Central Bank's monetary policy.

Against this backdrop, annualised growth in the Eurozone in the third quarter was non-existent (0.0%), while annual growth in Germany was negative (-0.3%).

The reduction in energy prices, coupled with an improvement in supply conditions and the ECB's proactive and restrictive monetary policy, led to a significant slowdown in inflation. Accordingly, the consumer price index, which stood at 10.6% in the Eurozone in October 2022, plunged spectacularly to 2.4% in November 2023. The wave of uncertainty fuelled by the markedly heightened tensions in the Middle East – risk of the Israeli-Palestinian conflict spreading; Iran, the Red Sea – and the Far East – China, Taiwan; Korean Peninsula –, and a resistant job market driving salaries upward are now cause for concern for the ECB when it comes to formulating its monetary policy.

Central banks:

After the spectacular increases in its rates in 2022, which saw its deposit facility rate jump from -0.50% to 2% in four increments in one semester, the European Central Bank continued to implement its restrictive monetary policy with a further 6 rate increases, with the result that, by September 2023, the deposit facility rate stood at 4%. The tightening of lending conditions was a move undertaken to combat the worrying level of inflation, and also to prevent the ECB from being outdistanced by the U.S. Federal Reserve, which had been pursuing an extremely proactive policy at the same time.

While that strategy had the effect of bringing inflation back down to more acceptable levels, i.e. closer to the official target of 2%, but still above it, it also had a negative impact on growth.

Hence, the intense debate among the members of the Central Bank's Board of Governors in the last quarter. On the one hand, the "hawks" felt that the Central Bank should not lower its guard, and that even if the cycle of rate increases had come to an end, the bank should continue to implement a restrictive policy since, in the fight to control inflation, the last few "miles" are the hardest. On the other hand, the "doves" began to consider easing the bank's monetary policy, since all of the effects of the rate increases had not yet percolated through to the real economy and, as such, the downward trend in prices should slow down. In their view, continuing to pursue too tight a policy would cause too much of a slowdown in the economy.

Markets:

In the first three quarters of the year, the trend in interest rates mirrored the ECB's rate increases. Accordingly, the one-month OIS rate increased, more or less linearly, from 1.90% at the beginning of the year, to 3.90% at the end of September. The one-year swap rate followed the same trend, but more unevenly, especially in the month of March. Indeed, the difficulties experienced by U.S. regional banks – most notably Silicon Valley Bank – put a temporary damper on Central Banks' rate-increase projections. The one-year swap rate, which stood at 3.08% at the beginning of the year, jumped to 3.78% on 8 March, then dropped suddenly to 3.01% on 17 March. Central bankers' determined attitudes had a calming effect on markets, with the result that, by the end of September, the one-year swap rate had risen again to stand at 3.92%.

In the last quarter of 2023, it seems that the financial markets were more of the view held by the "doves" than that held by the "hawks". As such, the financial markets began forecasting aggressive rate cuts on both sides of the Atlantic, as of March/April, resulting in an inversion in the rate curve. By the end of December 2023, the one-month OIS rate had reached 3.90%, whereas the one-year swap rate had fallen to 3.21%. The ECB promptly declared its unease with this relative easing of lending conditions caused by the market-driven cuts in long-term rates. It recalled, on several occasions, that the conditions that would cause it to cut its rates had not yet been met. Nevertheless, markets still continued to forecast rate cuts as of the second quarter of 2024. Short-term credit spreads remained relatively stable throughout the year, with €STR flat for one-month tenors, €STF + 7bps for 3-month tenors, and €STR + 30bps for 12-month tenors for highly rated bank issuers. Longer-term credit spread performed very well (except during the episode involving U.S. banks in March), as evidenced by the trend in the generic 5-year Itraxx index, which fell from 90 to 58 during the year.

Management:

The Edmond de Rothschild Credit Very Short Term fund's assets under management continued to exhibit significant progress: whereas the portfolio began 2023 with €650m in assets under management, it gained more than one billion euros in subscriptions over the following twelve months, bringing the assets under management to €1,683m.

While continuing to take a very cautious approach, we reduced the portfolio's cash holdings in August, from 10-13% to 7.5-10%.

In the first 9 months of the year, we prioritised hedging interest rate risk across all of our fixed-rate investments, which allowed the fund's performance to "mirror" the ECB's rate increases. WAM was maintained at between 3 and 7 days. In the last two months of the year, as we did not forecast any changes in the ECB's rates in the near future, we stopped hedging fixed-rate investments maturing before the end of April 2024 against interest-rate risk. On the other hand, for investments with longer maturities, we maintained our hedging strategy, firstly to limit volatility, and secondly, to avoid being affected by negative mark-to-market impacts if markets changed their projections regarding ECB rate cuts.

Except for the month of March, our exposure to credit risk increased during the year, up from 70 at the end of 2022 to 105 at the end of 2023. Nevertheless, we remain highly selective in choosing the issuers to include in the portfolio.

Over the year, USD-denominated BH units (hedged) posted a performance of +5.09%, while the benchmark index posted +5.06%.

Over the year, EUR-denominated C units posted a performance of 3.23%, while the benchmark index posted 3.23%.

Over the year, EUR-denominated D units posted a performance of 3.23%, while the benchmark index posted 3.23%.

Over the year, EUR-denominated R units posted a performance of 3.27%, while the benchmark index posted 3.23%.

Past performance is not an indication of future performance.

SECURITIES FINANCING TRANSACTION REGULATION (“SFTR”)

During the financial year, the fund did not enter into any transactions subject to EU Regulation 2015/2365 on the transparency of securities financing transactions and re-use (“SFTR Regulation”).

METHOD FOR CALCULATING TOTAL RISK (AMF INSTRUCTION No. 2011-15 – ARTICLE 16)

The UCITS uses the commitment method to calculate the total risk associated with financial contracts.

INFORMATION ON TRANSACTIONS INVOLVING SECURITIES IN WHICH THE GROUP HAS A PARTICULAR INTEREST

This information is available in the annual financial statements in the section: "GROUP FINANCIAL INSTRUMENTS HELD IN THE PORTFOLIO".

BEST SELECTION AND BEST EXECUTION POLICY

Edmond de Rothschild Asset Management (France) has developed a Best Selection/Best Execution Policy for intermediaries and counterparties. The purpose of this policy is to select, according to various predetermined criteria, the brokers and intermediaries whose execution policy will achieve the best possible results when executing orders.

This document is available on the Edmond de Rothschild Asset Management (France) website, in the Statutory Information section: www.edmond-de-rothschild.com.

SELECTION AND EVALUATION POLICY FOR SERVICE PROVIDERS SUPPLYING INVESTMENT DECISION SUPPORT SERVICES

Edmond de Rothschild Asset Management (France) has implemented a policy for selecting and evaluating entities that provides it with investment decision support services, taking into account the criteria relating in particular to the quality of the financial analysis produced. This document is available on the Edmond de Rothschild Asset Management (France) website, in the Statutory Information section: www.edmond-de-rothschild.com.

REPORT ON INTERMEDIATION FEES

In accordance with Article 319-18 of the AMF General Regulation, the Management Company has drawn up a “Report on Intermediation Fees”. This document is available on the Edmond de Rothschild Asset Management (France) website, in the Statutory Information section: www.edmond-de-rothschild.com.

COMMUNICATION OF ENVIRONMENTAL, SOCIAL AND GOVERNANCE QUALITY (ESG) CRITERIA

Information about the ESG criteria can be found at www.edram.fr.

TAXONOMY REGULATION AND SFDR

Article 6

Transparency of the environmental objectives of financial products (Articles 5 and 6 of the Taxonomy Regulation – criteria 1 and 2):

UCIs classified as SFDR Article 6 funds (products referred to in provision 9b):

The Investment Manager does not take into account the negative impact of investment decisions on the sustainability factors of this product, as the investments underlying this financial product do not take into account the criteria of the European Union with regard to sustainable economic activities in terms of environmental impact.

CARBON FOOTPRINT

The carbon footprint of the funds managed by Edmond de Rothschild Asset Management (France) is mentioned in the monthly fund report, which can be found at www.edmond-de-rothschild.com under the “Fund Center” tab.

REMUNERATION POLICY AND PRACTICES APPLICABLE TO MANAGER’S PERSONNEL

Edmond de Rothschild Asset Management (France) has a remuneration policy that complies with the provisions of European Directive 2009/65/EC (“UCITS V Directive”) and Article 321-125 of the AMF General Regulation, which apply to UCITS.

The Edmond de Rothschild Asset Management (France) Remuneration Policy has been adopted by its Supervisory Board on the recommendation of the Remuneration Committee. It applies to all employees of Edmond de Rothschild Asset Management (France).

The Remuneration Policy promotes the sound and effective management of risk and does not encourage risk-taking that would be inconsistent with the risk profiles of the UCITS that it manages. The Management Company has implemented adequate measures to prevent any conflict of interest.

The aim of the Remuneration Policy is to provide a reasonable and appropriate remuneration framework, including a fixed basic salary and a variable portion determined on the basis of quantitative and qualitative criteria, in accordance with applicable regulations. This variable portion is the result of a process that takes into account the entity’s economic results, the value created over time for the clients of Edmond de Rothschild Asset Management (France) and the individual performance of each employee, as well as their adherence to the rules and regulations governing risk management and compliance.

For all employees of the Management Company considered to have a material impact on the risk profile of the UCITS (“MRT” or material risk-takers) and annually identified as such through a process involving the Human Resources, Risk and Compliance teams, the Remuneration Policy specifies that part of their variable remuneration (which must remain in reasonable proportion to their fixed remuneration) be deferred over three years.

This deferral, for employees exceeding a minimum threshold (gross variable remuneration of less than EUR 200,000), varies from a minimum of 40% to 60% depending on the variable level. Furthermore, a portion of the variable remuneration for these employees will be indexed to the change in value of a mixed basket of financial instruments that is representative of the AIFs and UCITS managed by the Management Company and its affiliates. For MRT employees, the deferred variable remuneration will therefore comprise at least 50% of cash indexed to the basket of instruments and, at most, 50% of other deferred elements (Group Long-Term Incentive Plan or, as applicable, deferred cash).

The Remuneration Policy has taken sustainability risk into account since 1 January 2021. Sustainability risk means an environmental, social or governance event or condition that, if it occurs, could cause a material negative impact on the value of an investment and could potentially harm the primary interests of clients.

General criteria

Managers evaluate each employee based on their overall performance, combination of achievements and demonstrated behaviour.

This evaluation is carried out annually through a physical interview and a computer-based evaluation tool, ensuring traceability of the evaluations. This tool has two main sections, one assessing achievement of the objectives set for the employee, the other assessing compliance with the values of the Edmond de Rothschild Group.

Based on these evaluations, the managers of each team formulate proposals for variable remuneration, taking into account the following criteria:

- performance of the Group (France);
- performance of the Asset Management business line;
- team performance;
- individual performance;
- risk and compliance criteria.

Edmond de Rothschild Asset Management (France) is aware of the importance of aligning individual professional objectives with those of the Edmond de Rothschild Group as a whole.

Consequently, Edmond de Rothschild Asset Management (France) emphasises ethics and compliance in the culture that it promotes to its employees. Edmond de Rothschild Asset Management (France) neither endorses nor encourages employees who take inappropriate risks in order to maximise the potential variable component of their remuneration.

In addition, as part of the process for taking sustainability risks into account, as provided for in the Disclosure Regulation, Edmond de Rothschild Asset Management (France) sets ESG objectives for employees who qualify as Identified Personnel, in particular among the management team, the investment team and business development and support staff. These objectives are for the most part qualitative objectives that are set during the individual appraisal interview.

Category-based criteria

Specifically, in addition to the risk and compliance objective common to all employees, the following categories of employees have specific criteria for evaluating their performance:

For portfolio managers, the variable component paid takes into account:

- investment performance (relative performance compared to a benchmark index and to the competitive scope, observed over one year, two years and three years);
- risk and compliance criteria, including adherence to the portfolio investment rules and their risk limits, and adherence to market rules;
- vigilance regarding anti-money laundering in the investment process.

For employees in the sales teams, the variable component takes into account:

- achievement of commercial objectives (net inflows, income levels generated by these inflows, interaction with clients and prospective clients, updating of "KYC" data);
- criteria relating to clients (satisfaction, complaints, fair treatment, suitability of products and instruments sold etc.);
- risk and compliance criteria including adherence to marketing rules, the duties of the Board, regulatory vigilance ensuring investor protection and anti-money laundering measures;
- quantitative objectives are established in such a way as to discourage employees from selling one specific product over another, and to ensure that the clients' interests remain paramount. Edmond de Rothschild Asset Management (France) does not pay any sales commission to its employees, nor does it have any compensation mechanism to encourage its employees to sell one specific product over another, to ensure that the clients' interests remain paramount.

For employees in support functions, the variable component takes into account:

- performance of these support functions;
- achievement of their own specific objectives;
- the risk and compliance criteria.

Total amount of remuneration:

The total amount of remuneration is the total remuneration paid to all of the manager's personnel, with 193 beneficiaries (i.e. 193 employees in service as at 31/12/2022).

This total amount for the financial year 2022-2023 was EUR 31,149,249*, including a fixed component of EUR 18,752,499, a variable component of EUR 12,396,750 and a profit share in capital gains of EUR 0.

*Total annualised fixed pay as at 31/12/2022 for the population eligible for the 2022/2023 pay review and total of the variable amounts proposed for the 2022 pay review.

Aggregate amount of remuneration:

In accordance with Article 33 of AMF Instruction 2011-19 and the provisions of European Directive 2009/65/EC as amended by European Directive 2014/91/EU, the aggregate amount of remuneration, broken down between senior executives and staff members of the Management Company whose activities have a material impact on the risk profile of the UCITS, for the 2022-2023 financial year, corresponds to:

- Senior executives: EUR 2,555,000
- Staff members: EUR 18,367,407

The Edmond de Rothschild Asset Management (France) Remuneration Policy is reviewed annually by the Remuneration Committee. Implementation of the Edmond de Rothschild Asset Management (France) Remuneration Policy has been audited both in-house and externally. This audit concerned the remuneration paid in March 2022 in respect of the year 2021 and was carried out in June-July 2022 by a third-party service provider under the supervision of the General Inspectorate of Edmond de Rothschild (France) and resulted in two recommendations.

**French Mutual Fund
EDMOND DE ROTHSCHILD CREDIT VERY SHORT TERM**

47 rue du Faubourg Saint-Honoré – 75008 Paris

Statutory auditor's report on the annual financial statements

Financial year ended 29 December 2023

To the unitholders,

Opinion

In performing the assignment entrusted to us by the management company, we have audited the annual financial statements of the undertaking for collective investment, EDMOND DE ROTHSCHILD CREDIT VERY SHORT TERM, established in the form of a mutual fund (FCP), for the year ended 29 December 2023, as attached to this report.

We certify that the annual financial statements are, in conformity with French accounting rules and principles, accurate and consistent, and give a true and fair view of the financial performance of the previous financial year as well as the financial position and assets of the UCI at the end of this financial year.

Basis of opinion

Audit terms of reference

We conducted our audit in accordance with the professional auditing standards applicable in France. We believe that the evidence gathered is sufficient and appropriate to justify our opinion.

Our responsibilities pursuant to these standards are set out in the "Statutory Auditor's responsibilities relating to the audit of the annual financial statements" section of this report.

Independence

We conducted our audit in accordance with the rules of independence set out in the French Commercial Code and the Statutory Auditors' Code of Ethics, for the period from 31 December 2022 to the date of issue of our report.

KPMG S.A., a French audit and accounting firm, registered with the Paris Association of Chartered Accountants under no. 14-30080101 and member of the Regional Association of Statutory Auditors of Versailles and Centre.
A French company and member of the KPMG network of independent firms affiliated with KPMG International Limited, an entity incorporated under English law as a private company limited by guarantee.

French limited liability company (*société anonyme*) governed by a Board of Directors
Registered office:
Tour EQHO
2 avenue Gambetta
CS 60055
92066 Paris La Défense Cedex
Share capital: 5,497,100 €
Nanterre Trade and Companies Register no. 775 726 417

Justification of assessments

In accordance with the provisions of Articles L.821-53 and R.821-180 of the French Commercial Code relating to the justification of our assessments, we hereby inform you that the most significant assessments we performed were based on our professional judgment, with a focus on the appropriateness of the accounting principles applied – in particular where the financial instruments held in the portfolio are concerned – and on the overall presentation of the financial statements, and particularly their compliance with Chart of Accounts for open-ended undertakings for collective investment.

These matters were addressed as part of our audit of the annual financial statements as a whole, and therefore contributed to the opinion we formed as expressed above. We do not express an opinion on items in these annual financial statements taken individually.

Verification of the management report drawn up by the management company

We have also performed specific verifications as required by law, in accordance with professional auditing standards in France.

We have no observations to make concerning the accuracy and consistency with the annual financial statements of the information provided in the management report prepared by the Management Company.

The Management Company's responsibilities relating to the annual financial statements

It is the management company's responsibility to prepare annual financial statements that give a true and fair view, in accordance with French accounting rules and principles, and to implement the internal controls it deems necessary for the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

When preparing the annual financial statements, it is the Management Company's responsibility to assess the ability of the undertaking for collective investment to continue as a going concern, to present in these financial statements, where applicable, the necessary information relating to its viability as a going concern, and to apply the going concern accounting policy unless the undertaking for collective investment is to be wound up or to cease trading.

The annual financial statements were drawn up by the Management Company.

Statutory auditor's responsibilities regarding the audit of the annual financial statements

It is our responsibility to draft a report on the annual financial statements. Our objective is to obtain reasonable assurance that the annual financial statements, taken as a whole, are free of material misstatement. Reasonable assurance corresponds to a high level of assurance, but does not guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements may stem from fraud or errors and are considered material whenever they may be reasonably expected, considered individually or cumulatively, to influence the economic decisions that users of the financial statements take based thereon.

As provided for in Article L.821-55 of the French Commercial Code, our task is to certify the financial statements, and not to guarantee the viability or quality of the management of your undertaking for collective investment.

As part of an audit carried out in accordance with the professional standards applicable in France, the statutory auditor exercises their professional judgement throughout this audit. In addition:

- they identify and assess the risks that the annual financial statements may contain material misstatements, whether due to fraud or error, define and implement the audit procedures intended to counter these risks, and collect any elements they consider sufficient and appropriate on which to base their opinion. The risk of not detecting a material misstatement arising from fraud is greater than that of a material misstatement resulting from an error, since fraud may involve collusion, forgery, deliberate omissions, misrepresentation or the circumvention of internal control processes;
- they become acquainted with the internal control relevant to the audit in order to define appropriate audit procedures in the circumstances and not to express an opinion on the effectiveness of the internal control;
- they assess the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management Company, as well as the information provided in their regard in the annual financial statements;
- they assess the appropriateness of the application by the Management Company of the going concern accounting policy and, based on the evidence gathered, whether or not significant uncertainty exists relating to events or circumstances that may affect the Mutual Fund's ability to continue as a going concern. This assessment is based on the information gathered up to the date of their report. However, readers are reminded that subsequent circumstances or events could jeopardise the continuity of operations. If they conclude that significant uncertainty exists, they draw the attention of the readers of their report to the information provided in the annual financial statements about this uncertainty or, if this information is not provided or is not relevant, they issue a certification with reserve or a refusal to certify;
- they assess the overall presentation of the annual financial statements and assess whether the annual financial statements reflect the underlying transactions and events so as to provide a true and fair view thereof.

1. ACCOUNTING METHODS AND RULES

The annual financial statements are presented in the form provided for by ANC Regulation 2014-01, as amended.

General accounting principles apply:

- a true and fair view, comparability and operational continuity,
- lawfulness and fairness,
- prudence,
- consistency in methods from one financial year to the next.

The recognition method selected for recording the income from fixed-income securities is the accrued interest method.

Purchases and sales of securities are recorded exclusive of fees.

The reference currency of the portfolio is the euro.

The duration of the financial year is 12 months.

Asset valuation rules

Financial instruments are recorded in the financial statements according to the historical costs method and on the balance sheet at their current value as determined by the last known market value or, where no market exists, by any external means or by the use of financial models.

Differences between the current values used to calculate the net asset value and the historical costs of transferable securities when first included in the portfolio are recorded in "valuation differentials" accounts.

Securities that are not in the portfolio currency are valued in accordance with the principle set out below and then converted into the portfolio currency at the exchange rate on the valuation date.

Deposits:

Deposits with a residual maturity of three months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or equivalent market:

For the purpose of calculating the net asset value, equities and other securities traded on a regulated or equivalent market are valued on the basis of the day's closing market price.

Bonds and equivalent securities are valued at the closing price supplied by various financial service providers. Interest accrued on bonds and other equivalent securities is calculated up to the net asset value calculation date.

Equities, bonds and other securities not traded on a regulated or equivalent market:

Securities that are not traded on a regulated market are valued by the Management Company using methods based on market value and yield, taking into account the prices used for recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and equivalent securities that are not traded in large volumes are valued using an actuarial method based on a reference rate, defined below, which is increased, where applicable, by a differential representative of the intrinsic characteristics of the issuer:

- Negotiable debt securities with a maturity of one year or less: Euro Interbank Offered Rate (Euribor);
- Negotiable debt securities with a maturity exceeding one year: Rates for French treasury bills (BTAN) or bonds (OAT) with similar maturity dates for the longest maturities.

Negotiable debt securities with a residual maturity of three months or less may be valued using the straight-line method.

French treasury bills are valued at the market rate, as published daily by the Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Temporary securities transactions:

Securities received under repurchase agreements are recorded as assets under the "Receivables relating to securities received under repurchase agreements" section at the contracted amount, plus any accrued interest.

Securities assigned under repurchase agreements are recorded at their current value in the long portfolio. Payables relating to securities assigned under repurchase agreements are entered in the short portfolio at the contracted amount, plus any accrued interest payable.

Loaned securities are valued at their current value and are recorded as assets at their current value, plus accrued interest receivable, under the "Receivables relating to loaned securities" section.

Borrowed securities are recorded as assets under the "Borrowed securities" section at the contracted amount, and as liabilities under the "Payables relating to borrowed securities" section at the contracted amount, plus any accrued interest payable.

Forward financial instruments:**Forward financial instruments traded on a regulated or equivalent market:**

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or equivalent market:**Swaps:**

Interest rate and/or currency swaps are valued at their market value according to the price calculated by discounting future interest payments at the prevailing interest rate and/or the currency market exchange rate. This price is adjusted to take into account the risk associated with the issuer.

Index swaps are valued on an actuarial basis using a benchmark rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated in the manner established by the Management Company.

Off-balance sheet commitments:

Futures contracts are recorded as off-balance sheet commitments at their market value at the price used in the portfolio.

Options transactions are converted into the underlying equivalent.

Swap commitments are recorded at their nominal value or, where there is no nominal value, at an equivalent amount.

Management fees

Operating and management fees cover all fees relating to the UCI, e.g. fees for financial management, administration, accounting, custody, distribution, audit etc.

These fees are recorded in the income statement for the UCI.

Management fees do not include transaction fees. For more information about the fees charged to the UCI, please see the prospectus.

They are recorded pro rata temporis each time the net asset value is calculated.

The total amount of these fees adheres to the maximum net asset fee rate indicated in the prospectus or Fund rules:

FR0010672055 – Edmond de Rothschild Credit Very Short Term D unit: Maximum fee rate of 0.25% including tax.

FR0010027623 – Edmond de Rothschild Credit Very Short Term C unit: Maximum fee rate of 0.25% including tax.

FR0011031392 – Edmond de Rothschild Credit Very Short Term R unit: Maximum fee rate of 0.20% including tax.

FR0013250578 – Edmond de Rothschild Credit Very Short Term BH unit: Maximum fee rate of 0.30% including tax.

Allocation of distributable income

Definition of distributable income

Distributable income comprises:

Profit/loss:

Net income plus any balance carried forward and increased or decreased by the balance of the income adjustment account.

The net income for the financial year is equal to the amount of interest, arrears, dividends, premiums and lots, remuneration and all revenues generated by the securities held in the portfolio of the Fund, plus income generated by temporary cash holdings, less management fees and borrowing costs.

Gains and losses:

Realised gains (net of fees), minus realised losses (net of fees), recorded during the financial year, plus any net gains of the same type recorded during previous financial years that have not been distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

Methods for allocating distributable income:

<i>Unit(s)</i>	<i>Allocation of net income</i>	<i>Allocation of net realised gains or losses</i>
Edmond de Rothschild Credit Very Short Term BH unit	Accumulation	Accumulation
Edmond de Rothschild Credit Very Short Term C unit	Accumulation	Accumulation
Edmond de Rothschild Credit Very Short Term D unit	Distribution	Accumulation, and/or Distribution, and/or carried forward at the discretion of the Management Company
Edmond de Rothschild Credit Very Short Term R unit	Accumulation and/or Distribution at the discretion of the Management Company	Accumulation, and/or Distribution, and/or carried forward at the discretion of the Management Company

7. APPENDIX(ICES)

EDMOND DE ROTHSCHILD

Key Information Document (KID)

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Edmond de Rothschild Credit Very Short Term

Manufacturer of the PRIIP (Packaged Retail Investment and Insurance-based Product): Edmond de Rothschild Asset Management (France), part of the Edmond de Rothschild Group.

Registered office: 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France

R unit – ISIN code: FR0011031392

Website of PRIIP manufacturer: www.edmond-de-rothschild.com

For further information, call +33 (0) 140 172 525.

The Autorité des marchés financiers (AMF) is responsible for supervising Edmond de Rothschild Asset Management (France) in relation to this Key Information Document. Edmond de Rothschild Asset Management (France) is approved in France under the number GP 04000015 and regulated by the Autorité des Marchés Financiers (AMF).

Date of production of the Key Information Document (KID): 21.06.2023

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product?

Type

The Product is a French Mutual Fund (FCP), a UCITS governed by European Directive 2009/65/EC.

Term

The term of the Product is 99 years.

Objectives

By investing in interest-rate and money markets, the management objective is, after management fees have been deducted, to obtain a performance higher than the compounded €STR over the recommended investment horizon. In the event of very low or even negative interest rates on the money market, the yield generated by the Product would not be sufficient to cover the costs of management and the Product's net asset value could fall structurally.

Benchmark index: Compounded €STR

Investment policy: Up to 100% of the Product's net assets will be invested in money market instruments denominated in euro or in other currencies. Securities denominated in foreign currencies are fully hedged against currency risk. The Product will restrict its investments to financial instruments maturing in two years or less, provided that the rate is adjustable within a maximum period of 397 days. Furthermore, the weighted average maturity (WAM) of the portfolio will be six months or less. The weighted average life (WAL) of the portfolio up to the maturity date of the securities will be 12 months or less. The eligible instruments will have a rating of at least "Investment Grade" (securities whose long-term rating is greater than or equal to BBB- or whose short-term rating is greater than or equal to A-3, as assigned by Standard & Poor's or an equivalent agency, or a rating deemed equivalent by the Management Company). However, it should be noted that securities that have not been rated by a rating agency but have been rated investment grade by the Management Company will be limited to 15% of the net assets. Eligible instruments undergo an independent in-house credit-quality analysis governed by an in-house credit-quality evaluation procedure as set out in Regulation (EU) 2017/1131. By way of derogation, the limit of 5% of the Product's assets per entity may be increased to 100% of its assets when the fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union, as set out in European Regulation (EU) 2017/1131 of the European Parliament and the Council of 14 June 2017. The Product may commit up to 100% of its net assets for forward financial instruments for hedging purposes. The Product may commit up to 100% of its net assets for temporary purchases and sales of securities involving eligible financial securities or money market instruments for repurchase agreements, and up to 10% of its net assets for reverse repurchase agreements.

Allocation of income: Accumulation and/or distribution

Allocation of net realised gains: Accumulation and/or Distribution and/or Carried forward

Intended Retail Investors

Primarily reserved for entities of the EDMOND DE ROTHSCHILD Group.

The Product is primarily intended for investors seeking to invest their liquid assets over short periods, provided they are willing to accept the risk of capital loss.

This Product may not benefit, either directly or indirectly, any American natural or legal person, US citizen or US Person.

Practical information

Custodian: CACEIS Bank

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the transfer agent before 12.30 p.m. on the day preceding the net asset value calculation day.

The Product prospectus, its latest annual report and any subsequent interim reports (in French and English where applicable) are available free of charge upon written request to Edmond de Rothschild Asset Management (France), 47 rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: +33 (0) 140 172 525, email: contact-am-fr@edr.com.

The price of the units and, where applicable, information about the Product's other unit classes, its net asset value, its performance scenarios and its past performance, can be found online at www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

← Lower Risk Higher Risk →

The summary risk indicator assumes you keep the Product until the end of the recommended holding period (6 months). The actual risk can vary significantly if you decide to exit before maturity, and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 1 out of 7, which is the lowest risk class. In other words, the potential losses on the Product's future performance are in the very low range and, if market conditions were to deteriorate, it is highly unlikely that our ability to pay you will be affected.

Furthermore, you will be exposed to the following risks (not taken into account in the summary risk indicator), namely:

Credit risk: risk that the issuer of the bond or money market securities is unable to fulfil its obligations, or that its credit rating is downgraded. It may also be the result of an issuer defaulting on repayment at maturity.

Derivative risk: the use of derivatives may cause a greater drop in the value of the net assets than that of the markets in which they are invested.

Counterparty risk: this is the risk that a market participant will default, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

This Product does not include any protection from future market performance, so you could lose some or all of your investment.

Be aware of currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which it is marketed, the final return will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all of the costs in connection with the Product itself, but may not include the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The favourable, unfavourable and moderate scenarios that are shown correspond to the best, worst and median performance historically observed.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

Recommended holding period: 3 to 6 months Example Investment: With an investment of EUR 10,000		If you exit after 6 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	EUR 9,950
	Average return each year	-1.8%
Unfavourable	What you might get back after costs	EUR 9,940
	Average return each year	-2.3%
Moderate	What you might get back after costs	EUR 9,960
	Average return each year	-1.8%
Favourable	What you might get back after costs	EUR 9,990
	Average return each year	-0.3%

This table shows how much you could get back over the recommended holding period of 6 months, under different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario: This type of scenario occurred for an investment made between October 2019 and April 2020.

Moderate scenario: This type of scenario occurred for an investment made between January 2017 and July 2017.

Favourable scenario: This type of scenario occurred for an investment made between August 2022 and February 2023.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Fund is a co-ownership of financial instruments and deposits, and is distinct from the portfolio management company. Should the latter become insolvent, the Product's assets held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs a financial loss is mitigated owing to the legally required separation of the custodian's assets from those of the Product.

The investment in the Product is not itself hedged or guaranteed by a national compensation mechanism. The resale of the units, the capital and the income of the Product are not guaranteed by the manufacturer.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how all the costs affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, the Product performs as shown in the moderate scenario.
- EUR 10,000 are invested.

Investment EUR 10,000	If you exit after 6 months
Total costs	EUR 50
Impact on return (RIY) per year*	1.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 0.35% before costs and -1.76% after costs.

We may share the costs with the person selling you the Product to cover the services they provide to you. If that is the case, they will inform you of the amount.

Composition of costs

Based on an investment of EUR 10,000 and an annual cost if you exit after 6 months.

One-off costs upon entry or exit		If you exit after 6 months
Entry costs	Up to 0.40% of the amount you pay when you invest in the Product.	EUR 40
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Conversion costs	We do not charge conversion fees for this Product.	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.25% of the value of your investment per year. This figure is based on actual costs incurred in the previous year.	EUR 25
Transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 9
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this Product.	EUR 0

The table above shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

The charges shown here do not include any additional charges that might be applied by your distributor, advisor or that could be related to a possible envelope in which the Product may be placed. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the charges of this contract.

This table also shows the meaning of the different cost categories.

How long should I hold the Product and can I take money out early?

Recommended holding period: 3 to 6 months

However, you can redeem your units, without penalty, at any time during this period, or keep your investment for a longer period.

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12.30 p.m. on the day that the net asset value is calculated for the day in question.

How can I complain?

If you wish to file a complaint about the Product, the Product manufacturer or the person who provides advice about or distributes the Product, with a view to having a right recognised or a loss remedied, please send us a written request describing the problem and the details giving rise to the complaint, by post or email, to:
Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75008 Paris, France.
Email: contact-am-fr@edr.com
Website: www.edmond-de-rothschild.com.

EDMOND DE ROTHSCHILD

Key Information Document (KID)

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Edmond de Rothschild Credit Very Short Term

Manufacturer of the PRIIP (Packaged Retail Investment and Insurance-based Product): Edmond de Rothschild Asset Management (France), part of the Edmond de Rothschild Group.

Registered office: 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France

BH Unit – ISIN: FR0013250578

Website of PRIIP manufacturer: www.edmond-de-rothschild.com

For further information, call +33 (0) 140 172 525.

The Autorité des marchés financiers (AMF) is responsible for supervising Edmond de Rothschild Asset Management (France) in relation to this Key Information Document. Edmond de Rothschild Asset Management (France) is approved in France under the number GP 04000015 and regulated by the Autorité des Marchés Financiers (AMF).

Date of production of the Key Information Document (KID): 21.06.2023

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product?

Type

The Product is a French Mutual Fund (FCP), a UCITS governed by European Directive 2009/65/EC.

Term

The term of the Product is 99 years.

Objectives

By investing in interest-rate and money markets, the management objective is, after management fees have been deducted, to outperform the capitalised Fed Funds, an index representing the US monetary rate, over the recommended investment horizon. In the event of very low or even negative interest rates on the money market, the yield generated by the Product would not be sufficient to cover the costs of management and the Product's net asset value could fall structurally.

Benchmark index: Capitalised Fed Funds

Investment policy: Up to 100% of the Product's net assets will be invested in money market instruments denominated in euro or in other currencies. Securities denominated in foreign currencies are fully hedged against currency risk. The Product will restrict its investments to financial instruments maturing in two years or less, provided that the rate is adjustable within a maximum period of 397 days. Furthermore, the weighted average maturity (WAM) of the portfolio will be six months or less. The weighted average life (WAL) of the portfolio up to the maturity date of the securities will be 12 months or less. The eligible instruments will have a rating of at least "Investment Grade" (securities whose long-term rating is greater than or equal to BBB- or whose short-term rating is greater than or equal to A-3, as assigned by Standard & Poor's or an equivalent agency, or a rating deemed equivalent by the Management Company). However, it should be noted that securities that have not been rated by a rating agency but have been rated investment grade by the Management Company will be limited to 15% of the net assets. Eligible instruments undergo an independent in-house credit-quality analysis governed by an in-house credit-quality evaluation procedure as set out in Regulation (EU) 2017/1131. By way of derogation, the limit of 5% of the Product's assets per entity may be increased to 100% of its assets when the fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union, as set out in European Regulation (EU) 2017/1131 of the European Parliament and the Council of 14 June 2017. The Product may commit up to 100% of its net assets for forward financial instruments for hedging purposes. The Product may commit up to 100% of its net assets for temporary purchases and sales of securities involving eligible financial securities or money market instruments for repurchase agreements, and up to 10% of its net assets for reverse repurchase agreements. BH units are systematically and fully hedged against US dollar/EUR exchange risk via forward currency contracts, swaps or even currency options.

Allocation of income: Accumulation

Allocation of net realised gains: Accumulation

Intended Retail Investors

All investors. The Product is primarily intended for investors seeking to invest their liquid assets over short periods, provided they are willing to accept the risk of capital loss. This Product may not benefit, either directly or indirectly, any American natural or legal person, US citizen or US Person.

Practical information

Custodian: CACEIS Bank

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the transfer agent before 12.30 p.m. on the day preceding the net asset value calculation day.

The Product prospectus, its latest annual report and any subsequent interim reports (in French and English where applicable) are available free of charge upon written request to Edmond de Rothschild Asset Management (France), 47 rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: 00 33 1 40 17 25 25, email: contact-am-fr@edr.com.

The price of the units and, where applicable, information about the Product's other unit classes, its net asset value, its performance scenarios and its past performance, can be found online at www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

←----->
Lower Risk Higher Risk

The summary risk indicator assumes you keep the Product until the end of the recommended holding period (6 months). The actual risk can vary significantly if you decide to exit before maturity, and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 1 out of 7, which is the lowest risk class. In other words, the potential losses on the Product's future performance are in the very low range and, if market conditions were to deteriorate, it is highly unlikely that our ability to pay you will be affected.

Furthermore, you will be exposed to the following risks (not taken into account in the summary risk indicator), namely:

Credit risk: risk that the issuer of the bond or money market securities is unable to fulfil its obligations, or that its credit rating is downgraded. It may also be the result of an issuer defaulting on repayment at maturity.

Derivative risk: the use of derivatives may cause a greater drop in the value of the net assets than that of the markets in which they are invested.

Counterparty risk: this is the risk that a market participant will default, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

This Product does not include any protection from future market performance, so you could lose some or all of your investment.

Be aware of currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which it is marketed, the final return will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all of the costs in connection with the Product itself, but may not include the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The favourable, unfavourable and moderate scenarios that are shown correspond to the best, worst and median performance historically observed.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment USD 10,000

Recommended holding period: 3 to 6 months Example Investment: With an investment of EUR 10,000		If you exit after 6 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	USD 9,890
	Average return each year	-4.4%
Unfavourable	What you might get back after costs	USD 9,930
	Average return each year	-2.8%
Moderate	What you might get back after costs	USD 9,960
	Average return each year	-1.5%
Favourable	What you might get back after costs	USD 10,050
	Average return each year	2.2%

This table shows how much you could get back over the recommended holding period of 6 months, under different scenarios, assuming you invest USD 10,000.

Unfavourable scenario: This type of scenario occurred for an investment made between May 2021 and November 2021.

Moderate scenario: This type of scenario occurred for an investment made between September 2021 and March 2022.

Favourable scenario: This type of scenario occurred for an investment made between August 2022 and February 2023.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Fund is a co-ownership of financial instruments and deposits, and is distinct from the portfolio management company. Should the latter become insolvent, the Product's assets held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs a financial loss is mitigated owing to the legally required separation of the custodian's assets from those of the Product.

The investment in the Product is not itself hedged or guaranteed by a national compensation mechanism. The resale of the units, the capital and the income of the Product are not guaranteed by the manufacturer.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how all the costs affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, the Product performs as shown in the moderate scenario.
- USD 10,000 are invested.

Investment USD 10,000	If you exit after 6 months
Total costs	USD 50
Impact on return (RIY) per year*	2.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 0.49% before costs and -1.55% after costs.

We may share the costs with the person selling you the Product to cover the services they provide to you. If that is the case, they will inform you of the amount.

Composition of costs

Based on an investment of USD 10,000 and an annual cost if you exit after 1 year.

One-off costs upon entry or exit		If you exit after 6 months
Entry costs	Up to 0.40% of the amount you pay when you invest in the Product.	USD 40
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	USD 0
Conversion costs	We do not charge conversion fees for this Product.	USD 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.35% of the value of your investment per year. This figure is based on actual costs incurred in the previous year.	USD 35
Transaction costs	0.14% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	USD 14
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this Product.	USD 0

The table above shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

The charges shown here do not include any additional charges that might be applied by your distributor, advisor or that could be related to a possible envelope in which the Product may be placed. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the charges of this contract.

This table also shows the meaning of the different cost categories.

How long should I hold the Product and can I take money out early?

Recommended holding period: 3 to 6 months

However, you can redeem your units, without penalty, at any time during this period, or keep your investment for a longer period.

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12.30 p.m. on the day that the net asset value is calculated for the day in question.

How can I complain?

If you wish to file a complaint about the Product, the Product manufacturer or the person who provides advice about or distributes the Product, with a view to having a right recognised or a loss remedied, please send us a written request describing the problem and the details giving rise to the complaint, by post or email, to:
Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75008 Paris, France.
Email: contact-am-fr@edr.com

What are the risks and what could I get in return?

Risk Indicator

←----->
Lower Risk Higher Risk

The summary risk indicator assumes you keep the Product until the end of the recommended holding period (6 months). The actual risk can vary significantly if you decide to exit before maturity, and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 1 out of 7, which is the lowest risk class. In other words, the potential losses on the Product's future performance are in the very low range and, if market conditions were to deteriorate, it is highly unlikely that our ability to pay you will be affected.

Furthermore, you will be exposed to the following risks (not taken into account in the summary risk indicator), namely:

Credit risk: risk that the issuer of the bond or money market securities is unable to fulfil its obligations, or that its credit rating is downgraded. It may also be the result of an issuer defaulting on repayment at maturity.

Derivative risk: the use of derivatives may cause a greater drop in the value of the net assets than that of the markets in which they are invested.

Counterparty risk: this is the risk that a market participant will default, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

This Product does not include any protection from future market performance, so you could lose some or all of your investment.

Be aware of currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which it is marketed, the final return will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all of the costs in connection with the Product itself, but may not include the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The favourable, unfavourable and moderate scenarios that are shown correspond to the best, worst and median performance historically observed.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

Recommended holding period: 3 to 6 months Example Investment: With an investment of EUR 10,000		If you exit after 6 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	EUR 9,950
	Average return each year	-1.8%
Unfavourable	What you might get back after costs	EUR 9,940
	Average return each year	-2.3%
Moderate	What you might get back after costs	EUR 9,960
	Average return each year	-1.8%
Favourable	What you might get back after costs	EUR 9,990
	Average return each year	-0.4%

This table shows how much you could get back over the recommended holding period of 6 months, under different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario: This type of scenario occurred for an investment made between October 2019 and April 2020.

Moderate scenario: This type of scenario occurred for an investment made between February 2019 and August 2019.

Favourable scenario: This type of scenario occurred for an investment made between August 2022 and February 2023.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Fund is a co-ownership of financial instruments and deposits, and is distinct from the portfolio management company. Should the latter become insolvent, the Product's assets held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs a financial loss is mitigated owing to the legally required separation of the custodian's assets from those of the Product.

The investment in the Product is not itself hedged or guaranteed by a national compensation mechanism. The resale of the units, the capital and the income of the Product are not guaranteed by the manufacturer.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how all the costs affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, the Product performs as shown in the moderate scenario.
- EUR 10,000 are invested.

Investment EUR 10,000	If you exit after 6 months
Total costs	EUR 50
Impact on return (RIY) per year*	2.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is projected to be 0.40% before costs and -1.78% after costs.

We may share the costs with the person selling you the Product to cover the services they provide to you. If that is the case, they will inform you of the amount.

Composition of costs

Based on an investment of EUR 10,000 and an annual cost if you exit after 6 months.

One-off costs upon entry or exit		If you exit after 6 months
Entry costs	Up to 0.40% of the amount you pay when you invest in the Product.	EUR 40
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Conversion costs	We do not charge conversion fees for this Product.	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.30% of the value of your investment per year. This figure is based on actual costs incurred in the previous year.	EUR 30
Transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 9
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this Product.	EUR 0

The table above shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

The charges shown here do not include any additional charges that might be applied by your distributor, advisor or that could be related to a possible envelope in which the Product may be placed. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the charges of this contract.

This table also shows the meaning of the different cost categories.

How long should I hold the Product and can I take money out early?

Recommended holding period: 3 to 6 months

However, you can redeem your units, without penalty, at any time during this period, or keep your investment for a longer period.

You can request the redemption of your units on any day of the week, except on public holidays and on the days on which French markets are closed (as per the official Euronext Paris S.A. calendar), for orders received by the clearing house before 12.30 p.m. on the day that the net asset value is calculated for the day in question.

How can I complain?

If you wish to file a complaint about the Product, the Product manufacturer or the person who provides advice about or distributes the Product, with a view to having a right recognised or a loss remedied, please send us a written request describing the problem and the details giving rise to the complaint, by post or email, to:
Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75008 Paris, France.
Email: contact-am-fr@edr.com
Website: www.edmond-de-rothschild.com.

French Law on Climate and Energy (LEC)

ART 29

Data on Article 29 will be published on www.edmond-de-rothschild.com as of 30 June 2024.

French Mutual Fund

Edmond de Rothschild Credit Very Short Term

Report on Article 29 of the French Law on Energy and Climate (LEC)

as at 29 December 2023

Management company: Edmond de Rothschild Asset Management (France)

Financial management delegated to: Amundi Asset Management

Custodian: CACEIS Bank

Statutory auditor: Grant Thornton Audit

Fund's report on Article 29 of the LEC

This document sets forth the information that funds exceeding 500 million euros in (net) assets are expected to provide in compliance with Article 29 of the LEC.

The decree implementing Article 29 of the French Law on Energy and Climate – which was enacted on 8 November 2019 and which clarifies and strengthens the non-financial disclosure requirements for market players – was published in the official gazette of the French Republic (*Journal Officiel*) on 27 May 2021.

On the closing date of the financial year, the fund's strategy had made no provision for achieving the alignment of its managed assets with the long-term objectives set out in Articles 2 and 4 of the Paris Agreement – which seek to limit the increase in global average temperatures to well below 2°C compared to pre-industrial levels – or with the long-term biodiversity-related objectives set out in the Convention on Biological Diversity adopted on 5 June 1992. However, in the report, Amundi referred to several continuous improvement plans, in particular for identifying opportunities for improvement and for providing information on corrective actions and strategic and operational changes that have been implemented.

This document satisfies the non-financial disclosure requirements applicable to market players, as set forth in Article 29 of the French Law on Energy and Climate of 8 November 2019, also known as the "LEC".

The document presents:

1. The portfolio's climate strategy, especially when the portfolio has adopted a strategy for achieving alignment with the temperature goals set out in the Paris Agreement;
2. The portfolio's strategy for achieving alignment with the long-term biodiversity-related objectives;
3. The processes for taking into account environmental, social, and governance-quality criteria in the management of risks.

Further information can be found in Amundi's Responsible Investment Policy statement, as well as in our climate report, which are published on our website at <https://legroupe.amundi.com/documentation-esg>.

1. Strategy for achieving alignment with the international global-warming limitation objectives set forth in the Paris Agreement

The portfolio's strategy makes no provision for achieving the alignment of its managed assets with the long-term global-warming limitation objectives set forth in Articles 2 and 4 of the Paris Agreement.

Exclusion policy

Policy on the exclusion of thermal coal

Coal combustion is the biggest single contributor to climate change attributable to human activity. In 2016, Amundi introduced a sector policy on thermal coal, triggering the exclusion of certain companies and issuers. Every year since then, Amundi has progressively toughened the rules and thresholds set out in its policy on thermal coal.

Amundi excludes:

- Mining companies, and public-utilities and transport-infrastructure companies involved in authorised coal-development projects, as defined in the list of "coal developers" drawn up by the Crédit Agricole Group,
- Companies whose coal-related projects are in the early stages of development – including when such projects have only been announced or proposed, or have been pre-authorised – are monitored annually. All companies whose revenue from the extraction of thermal coal and thermal coal-fired power generation exceeds 50% of their total revenue, without analysis;
- All coal-fired power generation and coal-extraction companies whose revenue from coal is between 20% and 50% of total revenue and whose transition away from coal is deemed unsatisfactory (Amundi conducts analyses to assess the quality of their phase-out plan).
- Companies earning more than 20% of their turnover from the extraction of thermal coal;
- Companies extracting 70 Mt or more of thermal coal annually, with no intention of reducing their volumes.

Phasing out coal is paramount to achieving the decarbonisation of our economies. As such, Amundi has committed to phasing out thermal coal from its investments in OECD countries by 2030, and in other countries by 2040. This strategy is consistent with the United Nations Sustainable Development Goals (SDGs) and the terms of the 2015 Paris Agreement, and is based on the Crédit Agricole Scientific Committee's research and recommendations, which take into account the scenarios described by the International Energy Agency (IEA), the Climate Analytics Report, and the Science Based Targets.

Scope of the exclusion policy

The policy applies to all companies, but mainly affects mining, public-utilities and transport-infrastructure companies. The policy applies to all actively management strategies and to all passively managed ESG strategies for which Amundi has complete discretion for the following Amundi Group entities: Amundi Asset Management, BFT IM, CPR AM and SGG.

Using our role as investors to encourage issuers to phase out coal

Amundi engages with companies that are exposed to thermal coal. We request that they publish a thermal-coal phase-out policy that is consistent with Amundi's 2030-2040 phase-out timeline.

We request this of companies:

- (i) that are excluded from Amundi's active investment universe, in line with our policy;
- (ii) whose thermal coal policies are such that Amundi considers them to be lagging behind.

Amundi enforces its policy by voting against discharging the Board of Directors or Management of their duties, or against the re-election of the Chair of the Board of Directors and certain Directors.

Policy on the exclusion of unconventional fossil fuels

Since 31 December 2022, Amundi also excludes companies where exploring for and extracting unconventional oil and gas – which includes shale oil and gas and oil sands – accounts for more than 30% of their activities.

Continuous improvement plan

Given the broad spectrum of asset classes and the many regions across the world that Amundi invests in on behalf of third parties – some of whom do not yet possess an analytical framework or the data required to devise a strategy for achieving alignment with the goals set out in the Paris Agreement –, implementing alignment strategies across all managed activities is a considerable challenge.

Amundi manages assets on behalf of third parties. Its management activities are governed by agreements between Amundi and its clients. These agreements establish the investment objectives of the management portfolios entrusted to Amundi, most notably in terms of expected level of risk, yield and diversification-constraint expectations, and sustainability preferences. Applying constraints as part of a process of alignment with the Paris Agreement requires securing our agents' consent. As such, Amundi has adopted a strategy for actively engaging in dialogue with its clients so that it can provide them with the option of investing in products that incorporate in their strategy features designed to achieve alignment with the objectives of the Paris Agreement, and advise them on their investment decisions.

1. Amundi Group's climate strategy in support of the Paris Agreement's carbon neutrality goals

- In late 2020, the Board of Directors of the management company's parent company began incorporating social and environmental issues in its governance policy, and now analyses progress on a quarterly basis based on climate- and ESG-related key performance indicators;
- At a dedicated, one-day strategy seminar, the members of the Board defined the strategy to implement and concrete guidelines for implementing the new "Ambition 2025" corporate plan;
- An ESG & Climate Strategy Committee, chaired by the Managing Director, convenes monthly to define and approve the ESG and Climate policy applicable to investments, and oversee major strategic projects;
- Commitments made as part of the Net Zero Asset Managers initiative, which Amundi joined in July 2021:
 - A target of 18% of Amundi's managed assets Net Zero-aligned by 2025 (i.e., the 18% will comprise only funds and investment mandates with objectives that are compatible with Net-Zero alignment by 2050);
 - Reduce carbon intensity by 30% (tCO₂e/€m in revenue) by 2025, and by 60% by 2030, for all portfolios under NZIF (Net Zero Investment Framework, i.e. the set of actions, measures and methods through which investors can maximise their contributions to achieve the Net Zero alignment objectives);
- By 2025, Amundi will also be offering, in all major asset classes, open-ended funds compatible with the transition towards the Net Zero 2050 objective;
- Attain €20 billion in assets in so-called impact funds (including funds that contribute to achieving the objectives of the Paris Agreement);
- Tighten targeted sector exclusion rules;
- Amundi invests substantial resources to ensure that climate issues are better incorporated in the management of the portfolio:
 - Significant increase in the size of its ESG staff;
 - Launch of ALTO* Sustainability, an environmental- and societal-issues analysis and decision-support solution for investors.

2. Actions undertaken and strategic and operational changes introduced to incorporate climate issues in the strategy

- Phasing in of ESG objectives in sales representatives' and portfolio managers' performance assessments so as to include this dimension when determining variable compensation. Development of a company-wide climate and ESG training programme designed with the help of Amundi experts so that each employee receives suitable training;
- Implementation of a rating methodology based on a best-in-class approach in order to assess issuers' efforts in transitioning to a Net Zero scenario. For the portfolios concerned, the stated objective for 2025 is to have a better environmental transition profile than their benchmark investment universe;
- The transition to a low-carbon economy is one of the strategic objectives of our commitment policy and Amundi has committed to adding a further 1,000 companies to the list of companies with which we engage in continuous dialogue on climate issues, with the requirement that these companies map out credible strategies for reducing their carbon footprint and secure their adoption at general meetings, and that their senior executives commit a portion of their compensation to these strategies.

In the coming years, Amundi will continue to adjust its climate strategy in line with benchmark scientific scenarios, and in close alignment with its clients' objectives, by investing in solutions to accelerate the process of transition and progressively aligning its portfolios with the carbon neutrality 2050 objective.

2. Strategy for achieving alignment with the long-term biodiversity-related objectives

The fund's strategy makes no provision for achieving the alignment of its managed assets with the long-term biodiversity objectives set out in the Convention on Biological Diversity adopted on 5 June 1992.

Continuous improvement plan

Biodiversity, which is intrinsically linked to climate change, is an increasingly important issue in our societies, in research, and in economic considerations. Biodiversity is one of the topics addressed in Amundi's ESG analyses. In our methodology matrix, it is reflected in the "Biodiversity & Pollution" criterion and, accordingly, is one of the factors taken into consideration to determine issuers' ESG ratings. Amundi is also particularly attentive to biodiversity-related controversies. In 2022, Amundi continued to implement measures to better incorporate biodiversity in its internal analytical and investment processes. The issue of biodiversity was one of the ESG Research team's priority areas for analysis in 2022, resulting in the production of a ten-part series of research papers entitled, "Biodiversity: it's time to protect our only home". The first two parts were published in 2022 and the other eight will be published online in 2023.

The issue of biodiversity is a central theme in the dialogue with companies that Amundi engages with. Following the campaign on plastics in 2019, on the circular economy in 2020, and on biodiversity in 2021, Amundi intensified dialogue with companies in 2022 by pursuing its biodiversity-strategy engagement campaign in eight different sectors. On account of the limited data available on the topic, the primary objective of this engagement process is to take stock of the extent to which companies take biodiversity issues into account, then ask them to assess the sensitivity of their operations to biodiversity loss, and to manage the impact of their operations and products on biodiversity. In 2022, Amundi engaged with 119 companies on the topic of their biodiversity strategy. As part of this engagement process, Amundi provides companies with recommendations on they can improve the incorporation of these issues in their strategies. More generally, Amundi has intensified dialogue with its shareholders on preserving natural capital. In 2022, Amundi engaged with 344 companies – a company could have been engaged with on several themes – through various programmes covering topics such as promoting circular economies, better management of plastics, and preventing deforestation, as well as a number of other topics on pollution control and sustainable water management.

In 2022, Amundi pursued its involvement in biodiversity-related market initiatives and working groups. In 2021, Amundi joined the "Finance for Biodiversity Pledge" collective investor initiative, thereby committing to collaborating and sharing knowledge with other investors, actively engaging with companies and assessing its impact, and setting itself biodiversity objectives and disclosing them publicly by 2024. Additionally, Amundi will begin publishing an annual report breaking down its portfolios' contributions to biodiversity objectives. In 2022, following the release of the first nature and biodiversity risks and opportunities framework by the Taskforce on Nature related Financial Disclosure (TNFD), the latter set up several pilot groups to test the feasibility of various aspects of this framework. Amundi joined a pilot group led by UNEP-FI and CDC Biodiversité to test the TNFD approach, and more specifically the application of the Global Biodiversity Score (GBS) for financial institutions.

Amundi also plans to update its investment policy to include biodiversity criteria covering several major themes, such as water and plastic, with a view to intensifying its engagement with companies when necessary and excluding those that are harmful to natural capital. The updated policy statement will be published by 2024.

In terms of data, tools permitting the analysis of biodiversity indicators are now in place, and a measurement of biodiversity impact is now proposed for some funds. At this stage, Amundi does not consolidate this data at the management-company or group level.

3. Processes for taking into account environmental, social, and governance-quality criteria in the management of risks

3.1 Identifying environmental, social and governance risks

Amundi's Responsible Investment Department is the centre of expertise dedicated to identifying and assessing ESG-related risks and opportunities. The Responsible Investment Department provides the various entities within the group with listed issuers' ESG assessments and climate data, which are used by portfolio managers.

The table below presents an overview of the ESG risks identified by Amundi, the approach adopted to assess them, and the providers of the data used to evaluate and monitor the identified risks. These risk could lead to different types of consequences, including but not limited to reputational damage, loss of asset value, litigation and portfolio under-performance.

Identified risk	Description	Amundi assessment	Data provided by
Environmental risks	Arise as a result of how a company controls its environmental impact by limiting energy consumption, reducing greenhouse gas emissions, combating the depletion of resources, protecting biodiversity, etc.	Proprietary rating on a scale of A to G, based on an analysis (criteria and weighting) of "Environment" risks and opportunities specific to each sector of activity. A "G" rating represents the highest level of risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Social risks	Arise as a result of how an issuer manages its human capital and stakeholders (other than shareholders). They cover several aspects, including accident prevention, employee training, respect for employees' rights and human rights in general, and accountability to stakeholders	Proprietary rating on a scale of A to G, based on an analysis (criteria and weighting) of "Social" risks and opportunities specific to each sector of activity. A "G" rating represents the highest level of risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Governance risks	Arise as a result of how an issuer manages its development or how the company organises its operations and management bodies, which may give rise to unfair trade practices, fraud, corruption, undiversified boards of directors, excessive compensation, etc.	Proprietary rating on a scale of A to G, based on an analysis (criteria and weighting) of "Governance" risks and opportunities specific to each sector of activity. A "G" rating represents the highest level of risk.	MSCI, Moody's ESG Solutions, ISS ESG, Sustainalytics
Controversy risk	Risk that an issuer or an investment becomes involved in controversies, litigation or events that could harm its reputation or its ability to earn profits. May give rise to questionable business practices, infringement of the law, financial scandals, environmental or social problems, or other problems that could undermine the issuer's credibility.	Proprietary methodology featuring a quantity filter that can be used to specify the universe to which the quality assessment will apply. The assessment gives rise to a rating on a scale of 0 to 5 (where 5 is the lowest score). Controversies with a rating of 3 or more are considered to be serious.	RepRisk, MSCI, Sustainalytics

3.2 Assessment of risks and opportunities

The assessment of the environmental, social and governance risks and opportunities presented in the table above makes use of a proprietary ESG rating system whereby a rating is assigned to issuers by Amundi's Responsible Investment teams.

Rating of private issuers

All of our ESG analysts are specialists in a specific sector of activity. To identify ESG criteria that reflect the risks and opportunities that are specific to each sector of activity, our analysts perform the following tasks:

- Monitor emerging and established ESG issues, and trends in the sector;
- Assess sustainability risks and opportunities and negative exposure to sustainability factors;
- Select relevant Key Performance Indicators (KPIs) and assign them weightings.

Our ESG analysis methodology is based on a set of 38 reference criteria, which are used to create an ESG profile for each sector of activity. Of the 38 criteria, 17 are generic – i.e. they can be applied to any company, regardless of their sector of activity – and 21 are sector-specific.

Proper weighting of the ESG criteria is crucial to the ESG analysis. The weight-assignment model is based on an assessment of materiality – which can affect the value assigned to a company – considering 4 vectors, i.e., regulation, reputation, development model and operational efficiency.

In assigning weights to the ESG criteria, our ESG analysts consider the likelihood and scope of the impact of each vector on the following 2 materiality items (see the table at the end of the section for details):

- Materiality item 1: The company's ability to anticipate and manage the sustainable-development risks and opportunities that are specific to its sector of activity and to its specific circumstances;
- Materiality item 2: Management's ability to manage the potential negative impacts of their operations on sustainability factors.

With this analytical approach using two materiality items, analysts can prioritise risks by taking into account features and events that are specific to each sector.

The weightings incorporate the notions of risk intensity, status (emerging or established) and temporality. As such, the issues that are deemed to be the most material will be assigned the highest weights.

The ESG ratings are calculated based on the criteria ESG criteria and weightings that are determined by the analysts, who combine them with the ESG scores obtained from our external data providers. At each stage of the calculation process, the scores are normalised as z-scores. Z-scores are used to compare the results of a "normal" population (variation between the issuer's score and the mean score for the sector, expressed as a number of standard deviations). Each issuer is assessed with a score with respect to the mean score for its sector, which makes it possible to distinguish between the best and worst practices within the sector. At the end of the process, each business is assigned an ESG score (between -3 and +3), and its equivalent rating on a scale of A to G, where A is the highest rating and G the lowest. A D rating represents an average score (between -0.5 and +0.5); each letter corresponds to one standard deviation.

An issuer can be assigned only one ESG rating, regardless of the selected reference universe. As such, the ESG rating is "sector-neutral", i.e., no one sector is privileged or disadvantaged. As part of the application of the SFDR regulation, Amundi has established a map of the environmental and social factors that are deemed to be material in different sectors of activity. This map is presented in Amundi Asset Management's LEC 29 Report.

		Regulation	Reputation	Development model	Operational efficiency
Materiality item 1:	The company's ability to anticipate and manage the sustainable-development risks and opportunities that are specific to its sector of activity and to its specific circumstances	✓	✓	✓	✓
Materiality item 2:	Management's ability to manage the potential negative impacts of their operations on sustainability factors	✓		✓	

Rating of sovereign issuers

The methodology used for rating States is used to assess sovereign issuers' ESG performance. The factors E, S and G could have an impact on States' ability to reimburse their medium- and long-term debt. They can also reflect how countries tackle the major sustainability issues that affect global stability. Amundi's methodology is based on some fifty or so ESG indicators that Amundi's ESG Research teams consider relevant for assessing sustainability risks and sustainability factors. Each indicator can incorporate several data points obtained from different sources, including open international databases – such as those maintained by the World Bank Group and the United Nations – and proprietary databases. Amundi has defined weightings for each ESG indicator used to determine the final ESG scores and its different components (E, S and G). The indicators are provided by and independent provider. For the purpose of clarity, the indicators are divided into 8 categories, where each category is assigned to one of the pillars, E, S or G. Like the enterprise ESG rating scale, the ESG score assigned to issuers is expressed as an ESG rating on a scale of A to G.

3.3 Managing sustainability risks

Amundi's approach to managing sustainability risks is based on the following three pillars, namely:

- The exclusion policy, which deals with the most significant ESG risks;
- Incorporating ESG ratings in investment processes, which enables us to gain a more holistic understanding of the enterprise and identify ESG risks that are specific to it;
- Amundi's voting and engagement policy, which enables us to trigger positive changes in how enterprises manage their impact on fundamental sustainability-related factors, thereby mitigating the associated risks.

3.4 Incorporating sustainability risks in the entity's risk-management contractual framework

Sustainability risks are incorporated in Amundi's internal risk control and management processes.

Where the management of sustainability risks is concerned, risk control and management tasks are performed at two levels:

- The first level of control, performed by the management teams themselves, and
- The second level of control, performed by the risk-management teams, who can check, at any time, funds' compliance with their ESG objectives and constraints.

The Risks Department plays an active role in Amundi's "Responsible Investment" governance process. They oversee compliance with regulatory requirements, as well as the risk-management tasks in connection them.

The ESG rules are monitored by the risk-management teams, as are other management constraints. These rules are managed using the same tools and procedures and cover our exclusion policies, as well as eligibility criteria and fund-specific rules. The rules are monitored automatically using a proprietary control tool. The tool is designed to trigger:

- Pre-negotiation and blocking alerts, especially when exclusion-policy rules apply;
- Post-negotiation alerts: managers are notified automatically whenever thresholds are exceeded so they can be quickly corrected.

The table below presents an overview of the internal control process implemented by Amundi.

Internal control process

3.5 Frequency of risk-management framework reviews

Our ESG analysts review the 38 Amundi criteria and their weightings every 18 months. This is done to ensure that the criteria and their weighting are always relevant. We continuously seek to improve our analyses by assessing their materiality. Amundi's Responsible Investment Policy is updated every year.

3.6 Continuous improvement plan

Amundi makes every effort to improve the assessment of sustainability risks – including climate and environmental risks – and to include these risks in its fund-management processes. The goal is to transition from using a quality-based approach to a quantitative approach by identifying the most impactful key indicators for our portfolios in terms of climate, environmental and governance factors.

The project involves three phases:

- Draw up a list of sustainability-risk indicators, with a focus on material risks and their financial impact on issuers;
- Gradually implement an indicator-monitoring system, while at the same time assessing its results and defining its limits with regard to the indicators;
- Improve the ESG risk-management framework, while at the same time incorporating ESG indicators in our risk strategies and investment rules.

We are currently working on identifying the main sustainability risk factors and matching them with issuers' financial variables. The validation and approval of the new framework in line with Amundi's ESG governance policy will mark the completion of this work.

The first set of indicators that are envisaged comprises measurements to quantify the potential impact of sustainability risks in terms of financial materiality, and the use of "proxies" for reputational risks. The next stage, which is scheduled for the second half of this year, consists in monitoring the sustainability-risk indicators that have been identified and assessing their impact on managed portfolios. The results of the monitoring process will form the basis for discussions with portfolio management teams, and will be included in various risk-management reports. The last stage entails focusing on improving the ESG risk-management framework, and defining internal risk alerts or risk limits based on the indicators. This phase is expected to be completed in the half of 2025.

The time frames, deadlines, indicators and objectives that are anticipated may be adjusted or changed at any time during the project.
