Wells Fargo (Lux) Worldwide Fund - USD Government Money Market Fund,

a sub-fund of Wells Fargo (Lux) Worldwide Fund

Service Class Shares - distr. (LU0630453909)

Management Company: Wells Fargo Asset Management Luxembourg S.A.

Objectives and Investment Policy

The fund seeks current income, in line with money markets rates, while preserving capital and liquidity. The fund invests exclusively in high-quality, short-term U.S. dollar-denominated Money Market Instruments that consist of U.S. Government obligations, reverse repurchase agreements that are fully collateralized by U.S. Government obligations and cash deposits. High quality securities are those securities which possess minimal credit risk and for which there is a reasonable confidence that the issuer will meet its obligations in a timely manner and which have received a favourable assessment pursuant to the Internal Credit Quality Assessment Procedure. These investments may have fixed, floating or variable rates of interest.

The fund qualifies as a short-term Public Debt Constant NAV (CNAV) Money Market Fund within the meaning of the Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, as it may be amended or supplemented from time to time (the "MMFR"). The fund aims to maintain a stable Net Asset Value at \$1.00 per Share.

Security selection is based on several factors, including credit quality, yield and maturity, while taking into account the fund's overall level of liquidity and average maturity.

The fund invests only in securities with a maturity at issuance or residual term to maturity of 397 days or less. The portfolio will have a weighted average maturity that will not exceed 60 days and a weighted average life of no more than 120 days.

This share class intends to distribute net income, if any, monthly. All distributions made by Distribution Classes may include realized gains less realized losses in addition to net income.

You may sell your shares on each business day when the New York Stock Exchange is open for trading (a "Business Day"), except for U.S. Columbus Day and Veterans Day holidays.

The fund is actively managed and not managed in reference to a benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the fund's returns over the past 5 years. Please note past returns may not be a reliable indicator of the future risk and reward profile of the fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

Lower Risk

< Typically Lower Rewards

Higher Risk

Typically Higher Rewards >

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The class is in category 1 because the average amount returns varied each year over the past 5 years was less than 0.5%.

The following additional risks may impact the fund's returns:

Counter-Party Risk - The fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund.

Debt Securities Risk - The issuer of a debt security may fail to pay interest or principal when due, and changes in market interest rates may reduce the value of debt securities or reduce the fund's returns.

Money Market Fund Risk - Although the fund seeks to maintain the value of your investment at \$1.00 per share, there is no assurance that it will be able to do so, and it is possible to lose money by investing in the fund. Please also note the following:

- The fund is not a guaranteed investment.
- An investment in the fund is different from an investment in deposits, with particular reference to the risk that the principal invested in a money market fund is capable of fluctuation.
- The fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the Net Asset Value per share.
- The risk of loss of the principal is to be borne by the investors.

U.S. Government Obligations Risk - U.S. government obligations may be adversely impacted by changes in interest rates, and may not be backed by the full faith and credit of the U.S. government.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Investment Objectives and Policies" and "Risk Warnings" in the prospectus, which is available at wellsfargoassetmanagement.com.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	

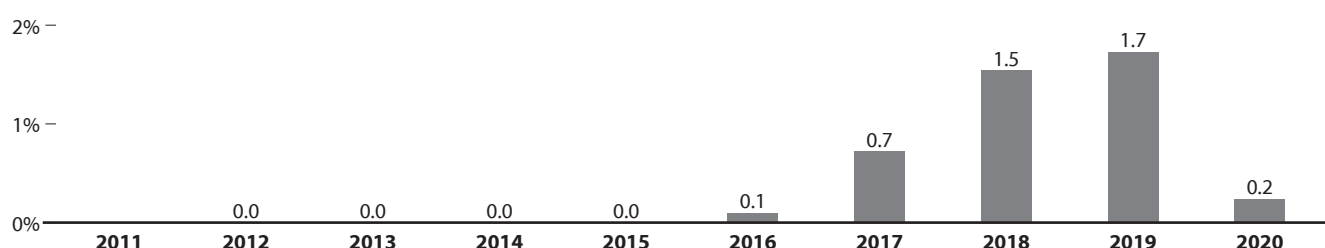

Charges taken from the fund over a year	
Ongoing Charges	0.45%
Charges taken from the fund under certain specific conditions
