

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

RBC Funds (Lux) - Global Resources Fund

Class A (acc) - USD ISIN LU0610494014

A sub-fund of RBC Funds (Lux)

Management Company: Dexia Asset Management Luxembourg S.A.

Objectives and Investment Policy

The Fund aims to grow the amount you originally invested, by investing in shares of companies around the world in the Energy and Materials sectors.

The Fund invests primarily in companies that are involved in the exploration, development, production or distribution of natural or other resources. This also includes companies that provide services or develop products and services to companies in these sectors.

The Fund focuses on mid to large size companies, but may also invest in smaller companies. The Fund may use derivatives (such as options, futures, forwards and swaps) to

achieve the investment objective and to reduce risk or manage the Fund more efficiently.

For full details of the investment objective and policy of the Fund, please refer to the prospectus.

The share class of this Fund does not pay any dividends. Any income the Fund makes will be reinvested to grow your investment.

You can buy and sell shares every day which is a business day in Luxembourg, subject to the terms in the prospectus.

Risk and Reward Profile

Lower risk			Higher risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

The Risk and Reward Indicator table shows where the Class ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The table uses a standard calculation method that is used by all companies who offer such funds within the European Union. Please note that the lowest category does not mean a risk-free investment.

The shaded area in the table above shows the Class's ranking based on the Synthetic Risk and Reward Indicator. It is based upon how much the price of the Class has moved up and down in the past.

The Class is ranked at 7, because it invests in securities linked to commodities and natural resources, whose values tend to fluctuate more widely. Please note that the calculation is based on past information and may not reliably predict how the Class

will perform in the future. Its ranking may shift over time and therefore is not guaranteed to remain unchanged.

The Risk and Reward Indicator does not take into account the following:

- There can be no guarantee that the Fund can prevent liquidity risks. In highly volatile markets, certain securities may become less liquid, which means they cannot be sold as quickly or easily. Some securities may be illiquid because of legal restrictions, the nature of the investment, certain features, like guarantees or a lack of buyers interested in the particular security or market.
- The value of the assets in the Fund may be affected by uncertainties in government policies, taxation, social and religious instability, and political or other developments in the law or regulations of the countries which the Fund may invest in.
- There can be no guarantee that the Fund can prevent currency risks. The Fund may use derivatives to reduce or manage the risk.

Charges

The charges you pay are used to pay the costs of running the Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charge figure is based on an estimate of expected expenses which may vary from year to year. For more information about charges, please see the prospectus available at www.rbcgam.lu.
