

MFS Meridian® Funds

European Value Fund^{S1}

31 DECEMBER 2017

A fund aimed to invest in undervalued stocks

The fund's investment objective is to seek capital appreciation, measured in euros.

Key points:

- Focuses on undervalued European companies of any size
- Rigorous valuation discipline is expressed through a patient, contrarian approach and a focus on downside risk management
- Maintains an outlook to analyze rather than forecast by evaluating the long-term quality, sustainability, improvement potential, and intrinsic value of business

S1 Effective 20 April 2015 this fund is closed to new investors, with very limited exceptions.

PORTFOLIO MANAGEMENT

** Advises and communicates on the management of the portfolio, but is not responsible for day-to-day management.

Portfolio characteristics data are based on the equivalent exposure of unaudited net assets as of 31-Dec-17. Equivalent exposure measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Top ten holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

PORTFOLIO STRUCTURE

Stocks 96.85%
Cash & Cash
Equivalents 3.36%
Other -0.2%

Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Benchmark: MSCI Europe Index (net div)								Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains. Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested. The performance shown is attributable in part to unusual market conditions. These conditions may not be repeated in the future. Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different. See the fund's offering documents for more details, including information on fund risks and expenses. The offering documents (sales prospectus and Key Investor Information Documents (KIIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages: Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish and Swedish. The sales prospectus and other documents are available in English. For additional information, call 416.506.8418 in Toronto or 352.464.010.600 in Luxembourg or your local paying agent or representative. Other share classes are available for which performance and expenses will differ.

The source for all fund data is MFS. Source: Benchmark performance from SPAR, FactSet Research Systems Inc.

Fund inception date: 01 October 2002

^ Results represent the percent change in NAV.

^^ Periods less than one year are actual not annualized.

† Ongoing charges are expressed at an annual rate as a percentage of net assets. They are based on annualized expenses for the six months ended 31 July 2016. For a Class with less than the full period of data available, or where adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Please see the KIID of the relevant Class for the most recent expense information.

1 The MFS Meridian Funds offer several share classes each with different expenses.

Performance reflects the performance of a relevant older class with the same currency until the actual start of class performance record of the class detailed. Performance for periods prior to that date may have been higher or lower had the actual share class fees and expenses been reflected.

2 Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

3 The class was re-designated as a Hedged Share Class on 22 September 2015; performance shown prior to this date was unhedged and does not reflect the current currency hedging techniques applied to the class.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Class I shares are only available to certain qualifying institutional investors.

Class W shares are available to discretionary portfolio management or independent advisory accounts, clients of financial intermediaries otherwise prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

MSCI Europe Index measures stocks in European developed markets.

It is not possible to invest directly in an index.

TRAILING 3 YR RISK MEASURES VS. BENCHMARK (A1EUR)	
Beta	0.83
Standard Deviation	11.98 vs 13.07

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

Standard deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

IMPORTANT RISK CONSIDERATIONS

The fund may not achieve its objective and/or you could lose money on your investment in the fund. Stock markets and investments in individual stocks are volatile and can decline significantly in response to issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. Investments in value companies can continue to be undervalued for long periods of time, not realize their expected value, and be more volatile than the stock market in general. Because the portfolio may invest a substantial amount of its assets in issuers located in a single country or in a limited number of countries, it may be more volatile than a portfolio that is more geographically diversified. Please see the prospectus for further information on these and other risk considerations.

RISK AND REWARD PROFILE CLASS A1EUR

< Lower risk (typically lower rewards) Higher risk (typically higher rewards) >

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.
