Report on activities of the Board of Directors

The year of quantitative tightening

In 2013, the markets once again kept their eyes riveted on the main player - the Fed. The announcement by the US Federal Reserve that it intended to reduce its purchases of non-conventional assets did not keep investors away from the US market. Why was this? Because the Fed's balance sheet will ultimately continue to increase but just at a very slightly slower pace and because pursuing this expansion will continue to support equities markets. The North American strategy did not prove to be sufficiently selective to outperform the MSCI North America index, and the institutional share class of the *RAM (LUX) SYSTEMATIC FUNDS - NORTH-AMERICAN EQUITIES* fund closed the year with a 30% gain in performance, in line with the index. The clear success of the Value Cash-Flow positions in the United States and Canada was wiped out by the poor performance of the Minimum Variance approach in the region.

European markets also had a fine year in the wake of the recovery which began after 2011; the absolute performance indices having now reached record highs. From credit to equities, risk aversion was less strong on developed markets, which clearly supported the highest risk assets, particularly European equities. The Value approach to cash flows made it possible to choose strongly performing stocks in the industrial sector, which made a sizeable contribution to Long portfolios. Growth Momentum strategies benefited from the very positive trends in companies' earnings in the discretionary consumer goods sector and industry, which also contributed to the distinct outperformance of the market. The *RAM (LUX) SYSTEMATIC FUNDS - EUROPEAN EQUITIES* fund closed the year 26.4% up compared with a performance of 19.8% for the MSCI Europe TR index, while the *RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EUROPEAN EQUITIES* fund gained 12.8% in 2013. Both the funds reached new record highs.

The most surprising factor in 2013 was undoubtedly the very negative impact of the Fed's announcement of quantitative tightening on investment flows to emerging countries. Fears about scaling back quantitative easing were expressed, in a self-fulfilling prophecy, by a sudden and brutal correction when Fed chairman Ben Bernanke mentioned this possibility in May 2013. Liquidity dried up in a good number of emerging markets and the currencies of countries, which are highly dependent on capital flows (such as India Indonesia and Turkey), depreciated. The rigorous approach in terms of fundamental selection worked well on emerging markets, allowing the *RAM (LUX) SYSTEMATIC FUNDS - EMERGING MARKETS EQUITIES* fund to rise by 5.1%, whereas the MSCI Emerging Markets lost 2.6 %. The right selection and allocation of our Value, Dividend and GARP approaches contributed to the outperformance while good cash management meant that they were not hit during the more volatile and illiquid phases during the year. The *RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EMERGING EQUITIES* approach also did well, gaining over 6% in the year.

Following the correction over the past twelve months and in view of the solid performance of developed markets, we consider that emerging markets are relatively more attractive in valuation terms than their developed counterparts. Valuations on emerging markets have rarely been as good as they are now compared with the rest of the world from a sales and net profit point of view.

It is interesting to see that once again dividends paid by emerging companies are higher than those of their counterparts from developed countries. If this was explained by the fact that companies in developed countries were trying to find ways other than dividends to reward their shareholders (often by buying back shares particularly in the United States), emerging markets would not be so interesting. However valuations at their present levels provide relative support to emerging shares. It is difficult to understand why the markets, having also been optimistic about emerging markets compared with developed markets 12 months ago, can now adopt such a negative attitude.

Report of the réviseur d'entreprises agréé

To the Shareholders of

RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS)

Luxembourg

We have audited the accompanying financial statements of RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS) and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at 31st December 2013 and the statement of operations and other changes in net assets for the year then ended, and a summary of significant accounting policies and other notes to the financial statements.

Responsibility of the Board of Directors of the SICAV for the financial statements

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Responsibility of the "réviseur d'entreprises agréé"

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier". Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the judgement of the "réviseur d'entreprises agréé", including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the "réviseur d'entreprises agréé" considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors of the SICAV, as well as evaluating the overall presentation of the financial statements.

Report of the réviseur d'entreprises agréé (continued)

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

The accompanying notes are an integral part of these financial statements.

RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS)

Notes to the financial statements

as at 31st December 2013

Note 1 - Principal accounting methods

a) Presentation of the financial statements

The financial statements of the SICAV have been drawn up in accordance with the legal and regulatory requirements in force in Luxembourg concerning undertakings for collective investment.

b) Valuation of assets

The value of cash in hand or on deposit, bills and notes payable on demand and accounts receivable, including pre-paid expenses, dividends and interest announced or due but not yet collected, consists of the nominal value of these assets, unless it is unlikely that this amount can be collected, in which case the value shall be determined by deducting the amount the SICAV deems appropriate to reflect the real value of these assets.

The value of all transferable securities, money market instruments and financial derivatives that are listed on an exchange or traded on another other regulated market that operates regularly and is recognised and open to the public, is determined at the latest price available.

If company investments are listed on a stock exchange or traded on another regulated market that operates regularly and is recognised and open to the public and traded by market makers outside the stock market on which the investments are listed or the market on which they are traded, the Board of Directors may determine a principal market for the investments in question, which shall thereafter be valued at the last price available on this market.

Financial derivatives not listed on an official stock exchange or traded on any other regulated market that operates regularly and is recognised and open to the public are valued in accordance with market practice, as may be described in greater detail in the Prospectus.

Cash and money market instruments may be valued at their nominal value plus interest, or on the basis of the amortised cost method. Where practical, all other assets may be valued on the same basis.

The value of units representing any open-ended undertakings for collective investment is determined using the last official Net Asset Value per unit or the last Net Asset Value estimate if this value is more recent than official Net Asset Value, provided that the Company is guaranteed that the valuation method used for this estimate is consistent with that used for the calculation of the official Net Asset Value.

In the case of:

- transferable securities, money market instruments and/or financial derivatives in the portfolio on the valuation day not listed or traded on a stock exchange or on another regulated market that operates regularly and is recognised and open to the public, or

- transferable securities, money market instruments and/or financial derivatives listed and traded on a stock exchange or other such market whose prices determined do not, in the opinion of the Board of Directors, reflect the true value of these transferable securities, money market instruments and/or financial derivatives, or

RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS)

Notes to the financial statements (continued)

as at 31st December 2013

- financial derivatives traded over the counter and/or securities that represent undertakings for collective investment whose prices determined do not, in the opinion of the Board of Directors, reflect the true value of the financial derivatives or securities that represent undertakings for collective investment,

the Board of Directors estimate their probable market value prudently and in good faith.

c) Acquisition cost of securities in the portfolio

The acquisition cost of the securities held by each Sub-Fund that are denominated in currencies other than the reference currency of the Sub-Fund is converted into this currency at the exchange rate prevailing on the date of purchase.

d) Net realised gain/(loss) on sales of securities

The realised gains and losses on sales of securities are determined on the basis of the average acquisition cost.

e) Investment income

Dividend income is recorded at the ex-date, net of any withholding tax.

f) Valuation of forward foreign exchange contracts

Forward foreign exchange contracts are valued at forward market rates for the remaining period from valuation date to the maturity of the contracts. Unrealised gains or losses are recorded in the statement of net assets. Net variation of unrealised gains and losses and net realised gains and losses are recorded in the statement of operations and other changes in net assets.

g) Valuation of futures contracts

Futures contracts are posted off-balance sheet and valued at the last settlement or close price on the stock exchanges or regulated markets. Unrealised gains or losses are recorded in the statement of net assets. Net variation of unrealised gains and losses and net realised gains and losses are recorded in the statement of operations and other changes in net assets.

h) Valuation of swaps contracts

Swaps contracts are posted off-balance sheet and valued on the basis of the recalculated market prices by using the traditional elements of pricing considering the value, the volatility of the underlying, the interest rates and the residual value of the swap. Unrealised gains or losses are recorded in the statement of net assets. Net variation of unrealised gains and losses and net realised gains and losses are recorded in the statement of operations and other changes in net assets.

i) Formation expenses

The formation expenses were paid off over the first five years. If a sub-fund is launched after the date on which the SICAV is launched, the costs relating to the establishment of the new sub-fund shall be charged solely to that sub-fund and may be paid off over a maximum of five years from the date on which the sub-fund is launched.

RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS)

Notes to the financial statements (continued)

as at 31st December 2013

j) Conversion of foreign currencies

Cash at banks, other net assets and liabilities and the market value of the securities in portfolio expressed in currencies other than the currency of the sub-fund shall be converted into this currency at the exchange rate in force at the date of the report. Income and expenses expressed in currencies other than the currency of the sub-fund are converted into this currency at the exchange rate prevailing on the date of the transaction. Exchange gains or losses are recorded in the statement of operations and other changes in net assets.

k) Consolidation

The SICAV's consolidated financial statements are expressed in EUR and are equal to the sum of the corresponding entries in the financial statements of each sub-fund, converted in this currency at the exchange rate in force at the date of the report.

At the date of the report, the consolidation exchange rate is as follows:

| | | | | | |
|---|-----|---|-----------|-----|-----------|
| 1 | EUR | = | 1.3776000 | USD | US Dollar |
|---|-----|---|-----------|-----|-----------|

l) Revaluation difference

The caption "Revaluation difference" in the consolidated statement of operations and other changes in net assets represents the valuation difference of the net asset of the Sub-Funds at the beginning of the period with the exchange rate applicable at the date of the report.

m) Transaction fees

Transaction costs disclosed under the caption "Transaction fees" in the expenses of the statement of operations and other changes in net assets are mainly composed of transaction costs incurred by the SICAV relating to purchases or sales of securities, of fees relating to liquidation of transactions paid to the custodian bank and of transaction fees on financial and on derivatives instruments.

Note 2 - Management fee

The Board of Directors of the SICAV has appointed, since 23rd May 2013, RAM Active Investments (LUXEMBOURG) S.A. (formerly REYL ASSET MANAGEMENT (LUXEMBOURG) S.A.), as Management Company of the SICAV to make it service management, administration and commercialisation, in place of CONVENTUM ASSET MANAGEMENT.

Until 22nd May 2013, CONVENTUM ASSET MANAGEMENT, as Management Company, was delegated to RAM Active Investments S.A. (formerly REYL ASSET MANAGEMENT S.A.), the management of the all assets of the SICAV's sub-funds except those of the RAM (LUX) SYSTEMATIC FUNDS - ELITE FRANCE EUROPE sub-fund which are managed by REYL & Cie S.A..

The Management Company change does not lead to increased costs for shareholders. The Management Company charges a management company fee, a commission of sales and marketing, if any, will be offset by a decrease in management fees and expenses in connection with the marketing of the shares of the SICAV, including the costs of marketing and advertising. The marketing costs are recorded under caption "Other administrative expenses" in the statement of operation and other changes in net assets.

Risk management method for the RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EUROPEAN EQUITIES and RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EMERGING MARKETS EQUITIES sub-funds.

As required by Circular CSSF 11/512, the Board of Directors needs to determine the global risk exposure of the SICAV either by applying the commitment approach or the VaR approach. In terms of risk management, the Board of Directors of the SICAV decided to adopt the absolute VaR approach as a method of determining the global exposure for the following sub-funds :

- RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EUROPEAN EQUITIES
- RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EMERGING MARKETS EQUITIES

The absolute VaR is calculated according to the following parameters:

- Type of model: parametric
- Confidence interval: 99 %
- Period of observation: 3 years (weekly)
- Holding period: 20 days

For the observation period from 1st July 2013 to 31st December 2013, for the sub-fund:

- RAM (LUX) SYSTEMATIC FUNDS - LONG/SHORT EUROPEAN EQUITIES :

Total Expense Ratio ("TER") and Portfolio Turnover Rate ("PTR")

The TER and the PTR disclosed under "Statistical Information" of this report are calculated in accordance with the "Guidelines on the calculation and disclosure of the TER and PTR of collective investment schemes" issued on 16th May 2008 by the Swiss Funds & Asset Management Association "SFAMA" (Swiss Funds Association "SFA" until 30th June 2013).

The TER and PTR are calculated on the basis of the last 12 months prior to the date of this report.

Transaction fees are not taken into account in the calculation of the TER.

The PTR has been calculated according to the following formula $(Total\ 1 - Total\ 2)/M * 100$

with $Total\ 1 = Total\ securities\ transactions = X + Y$
X = Securities purchases
Y = Securities sales

RAM (LUX) SYSTEMATIC FUNDS (formerly REYL (LUX) GLOBAL FUNDS)

Unaudited appendix to the Notes to the financial statements (continued)

as at 31st December 2013

Total 2 = Total subscriptions and redemptions = S + T

S = subscriptions

T = redemptions

S+T: subscriptions and redemptions are netted per NAV calculation day.

M = average net assets

Where there is a performance fee and this has been calculated, the performance fee ratio is calculated as a percentage of average net assets for the last 12 months prior to the date of the report.

At the date of the report, the below sub-funds of the SICAV present the following TER:
