Risk and Reward Profile

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time, the higher the number the greater the price movement both up and down. It is calculated using simulated historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated above due to the nature of its investments which include the risks listed below. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest.

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Country Funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- For tax efficient purposes, the Fund will mainly invest through a Mauritian subsidiary. You should be aware that this arrangement may be subject to renegotiation and reinterpretation in the future and any change could have a negative effect on the returns of the Fund.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
