# AXA World Funds - Framlington Eurozone

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Framlington Eurozone I SolEx EUR (ISIN: LU0684982449)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The Sub-Fund seeks to achieve long term capital growth measured in Euro by investing in large, medium and small capitalisation companies domiciled in the Eurozone.

### Investment Policy

The Sub-Fund is actively managed to capture opportunities in the Eurozone equity market. Investment decisions are based on a combination of macroeconomic and industry analysis and share selection. The share selection process relies mainly on a rigorous analysis of the companies' business model, the nature of the underlying assets and the quality of their balance sheet.

The Sub-Fund invests:

- at least 75% of its assets in equities, equivalent securities, investment certificates and cooperative investment certificates issued by companies having their registered office in the European Economic Area (i.e. securities or rights eligible to the French Plan d'Epargne en Actions - PEA) including at least 60% in the Eurozone market
- less than 25% of its assets in equities issued by companies located outside European Economic Area
- less than 25% of its assets in Money Market Instruments
- up to 10% of its assets in convertible and straight bonds

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may also be used for hedging purposes.

The underlying investment objective of the SolEx Share Class is, as for the other Share Classes of the Sub-Fund, to achieve long-term

capital growth by investing in large, medium and small capitalisations domiciled in Eurozone, while, only in the case of the relevant SolEx Share Class, mitigating partially the impact on the relevant SolEx Share Class of a sudden and material decrease of European equity indices. With respect to the SolEx Share Class only, portfolio exposure to European equity market will be partially mitigated through the management of an equity index derivatives overlay.
