The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Bankinter International Fund Sicav - Total Return - Class EUR

(ISIN: LU0612902816) Total Return (the 'Fund') is a Sub-Fund of Bankinter International Fund Sicav (the 'Company'). Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The Fund's objective is to provide long-term positive returns following an absolute return investment approach (a measure of the gain or loss on an investment portfolio expressed as a percentage of invested capital) and seeks to replicate the most appropriate alternative management strategies at any given time in relation to type of permitted assets.
- The allocation of investments by type of asset classes, by economical sectors and by regions and countries is not predetermined. The Fund can also invest in debt securities with different maturities and durations.
- The Fund is actively managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy.
- The Fund can invest in equity fixed income securities, financial instruments issued by financial institutions or governments considered to be extremely low-risk and other types of eligible assets. Up to an amount of 10% of the net assets of the Fund can be invested in other eligible assets (futures on indices, commodities, inflation, credit risk, volatility and similar asset classes). Under exceptional circumstances, it may be invested up to 100% in cash and cash equivalents.
- The investment manager is free to choose what the Fund invests in. The reference currency for the Fund is the Euro.
- Sale of shares in the Fund can be made on a daily basis.
- Any income due from the Fund's investments is reflected in the value of your shares as all dividends are reinvested rather than being paid out.
- The Fund may use Financial Derivatives Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs'). The Fund invests in FDIs in order to reduce the possibility of financial losses or to achieve higher gains. The Fund is expected to have an increased market exposure as a result of such investments.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.

- This Fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward indicator:

- Credit Risk: The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.
