

Fact Sheet

Emerging Markets Equity Fund

This is a marketing communication. Applications for shares in the Fund should not be made without first consulting the current Prospectus and the Key Investor Information Document ("KIID"), which are available in English and in the official language of your local jurisdiction at www.fundlogic.morganstanley.com or free of charge from the registered office of Morgan Stanley & Co. International plc ("Morgan Stanley"), 25 Cabot Square, Canary Wharf, London E14 4QA, United Kingdom. A summary of investor rights is available in English at the same website.

If the board of directors of the Company and/or Morgan Stanley decide to terminate the arrangement for marketing that Fund in any EEA country where it is registered for sale, they will do so in accordance with the relevant UCITS rules.

Investment in the Fund concerns the acquisition of shares in the Fund and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned by the Fund.

Investment Philosophy

Emerging markets have seen a growing interest from investors in recent years. The rise of capital markets in emerging economies has fostered economic development and created new investment opportunities for foreign investors.

Increasingly stable political climates, buoyant commodity prices, improved economic policies, and attractive value opportunities lend to the appeal of these regions.

Further, the potential for firms in countries like Brazil, South Korea, Taiwan, India, and China to expand over the coming decades is being increasingly acknowledged by investors of all types.

The Emerging Markets Equity Fund (the "Company") offers low cost exposure to emerging markets in a liquid, transparent and UCITS-compliant format.

Investment Process

THE INDEX: The MSCI™ Emerging Markets Index (the "Index") is a free float-adjusted market capitalization index that is designed to measure the equity market performance of emerging markets. It is currently comprised of indices from 32 countries.

Each country's weighting in the Index is proportional to its total market capitalisation. The total market capitalisation of each country is itself based on the capitalisation of the various stocks comprising that country's stock market.

THE FUND: The Emerging Markets Equity Fund uses a passive process to track the performance of the Index. In this regard, the Fund invests in a basket of transferable securities (the "Funding Assets") and uses derivatives such as total return swaps to achieve its investment objective. The use of these derivatives allows the Fund to exchange the performance of the Funding Assets for the performance of the MSCI™ Emerging Markets Index. See Fund Implementation section for more information.

1. The Tracking Error is computed as the annualised standard deviation of the difference in performance between the return of the fund and its benchmark.
2. Volatility is computed as the standard deviation of the daily return.
3. Information is included for illustration purposes only and is not intended to imply that the portfolio was similar to any index either in composition or element of risk.

Illustrative Example of the Fund Structure

1. **Unit Purchase:** Investor buys units for cash
2. **Purchase of a Selection of Funding Assets:** Fund invests the cash proceeds in a basket of Funding Assets, in a manner that is compliant with UCITS diversification and concentration rules. These are held in a segregated account with the sub-custodian.
3. **Financing Swap:** Fund enters into a performance swap in order to swap out the performance of the Funding Assets for a rate of financing.
4. **Performance Swap - Index exposure:** The Fund swaps out the rate of financing for the total return of the MSCI™ Emerging Markets Index.

Key Features and Risks

Key Features:

- Daily Liquidity.
- Exposure to the MSCI™ Emerging Markets Index (net dividends reinvested).
- The prospectus provides a regulatory limit of counterparty exposure of 5%.

Risks:

- No capital protection: investors may lose their entire investment in the Fund.
- The Fund is exposed to market risk.

- The use of derivative instruments is central to the investment policy of the Fund. The ability of the Fund to meet its objective is dependent on the ability of the counterparty to meet its obligations. In the event of counterparty default, the Fund will be exposed to the economic value and market risk associated with the Funding Assets it holds and the ability of the Fund to deliver the return of the Index may be negatively impaired.

Counterparty Risk Mitigation

- On a daily basis FundLogic SAS monitors the mark-to-market value of the performance swap to ensure that it is in line with the Funding Assets and that the counterparty ratio does not breach UCITS rules.
