GlobalAccess Pacific Rim (ex-Japan) Fund
Share Class: M Dis GBP (ISIN: IE00B5VRN836), (SEDOL: B5VRN83)

a sub fund of Barclays Multi-Manager Fund plc.

Objectives & Investment Policy

The aim is to increase the value of your investment over the long-term by investing mainly in companies based in the Pacific Rim region (excluding Japan).

The Fund is actively managed and invests in shares and convertible securities (tradable debt which can be converted into shares) issued by companies, across a range of industries, based in and traded on stock exchanges in the Pacific Rim region (excluding Japan).

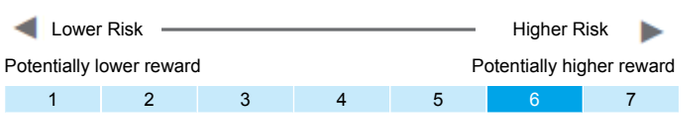

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Income is paid out quarterly.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The Fund may be exposed to stock market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.

The Fund may use financial contracts (known as derivatives) in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives causes share prices to fluctuate which may in turn result in loss to the Fund.

The fund may invest in less economically developed (known as emerging) markets which can involve greater risks than well developed economies. Amongst other issues, the level of government supervision and market regulation may be less than in more developed economies and could affect the value of your investment. Investment in emerging markets also increases the risk of settlement default.

The assets in which the Fund invests may be denominated in a currency other than the currency of the shares in the Fund and/or the currency of your investment. Currency fluctuations may strongly affect the value of your investment.

The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of your investment is likely to be adversely affected.

Future legal or regulatory change could have a substantial adverse effect on the fund and your investment.

Stock markets can be volatile, meaning that the prices of shares held by the Fund can change quickly and substantially.

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
