This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Barclays Bond Euro Short Term Share Class C Acc EUR (ISIN: LU0494850000), (SEDOL: B6412P9)

a sub fund of Barclays Funds.

Objectives & Investment Policy

The aim is to maximise the value of and the income arising from your investment.

The Fund is actively managed and invests in Euro denominated tradable debt (known as bonds or notes) and other debt instruments with an average outstanding repayment term of between 1 to 3 years, issued by companies, governments and public bodies worldwide.

When selecting investments, the Fund will focus on the risk of default (known as credit risk) on the part of the issuer of the debt

and will select debt which is considered investment grade (rated BBB- / Baa3 or higher by industry standard rating agencies). The Fund will also consider the industry sector from which the debt is being issued, as well as the repayment term of the debt.

The Fund may use financial contracts (derivatives) to help achieve its aim, manage risk, reduce costs or improve results.

Income is not paid out and is rolled up (accumulated) into the value of your investment.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 2 because of the low range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The Fund may invest in bonds, the return on which depends on the issuer's ability to make its payments. There is a risk that the

issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, these ratings are subjective and a high rating does not guarantee an issuer's ability to pay.

Fluctuations in interest rates may affect the value of your investment.

Tradeable debt (bonds) are interest rate sensitive, meaning that the range and frequency of price movements may be significant due to various factors, including changes in interest rates, the creditworthiness of the issuer and the ease with which similar investments may be bought or sold (liquidity).

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment. Future legal or regulatory change could have a substantial adverse effect on the fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
