

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Barclays Money Market Euro

#### Share Class A Acc EUR (ISIN: LU0742799298), (SEDOL: B7F5ZY7)

a sub fund of Barclays Funds.

### Objectives & Investment Policy

The aim is to provide you with a return in line with the returns earned on the money markets, while preserving the value of your investment.

The Fund is actively managed and mainly invests in high quality Euro denominated short term tradable debt (known as bonds) and money market instruments (a range of short-term financial products which can be easily bought and sold on money markets) with an average outstanding repayment term of not more than 12 months and carrying one of the two highest short term ratings from the major rating agencies.

To a lesser degree the Fund may invests in cash, deposit accounts with certain holding periods (known as time deposits) or

money market instruments with short repayment terms. To ensure the return is in line with the returns on short term debt markets, the Fund primarily purchases debt with interest rates which either match those on short term debt markets or which can be reset, prior to maturity, to match interest rates on short term debt markets.

The Fund may use financial contracts (derivatives) to manage risk, reduce costs or improve results.

Income is not paid out and is rolled up (accumulated) into the value of your investment.

You may sell your investment on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 1 because of the low range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The Fund may invest in bonds, the return on which depends on the issuer's ability to make its payments. There is a risk that the

issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, these ratings are subjective and a high rating does not guarantee an issuer's ability to pay.

Fluctuations in interest rates may affect the value of your investment.

As a money market fund, investors may choose to invest in the Fund as an alternative to investing in a regular deposit account but should be aware of the risks associated with investing in funds, in particular that the value of your investment will fluctuate as the net asset value of the Fund fluctuates.

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment. Future legal or regulatory change could have a substantial adverse effect on the fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
