

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Bantleon Opportunities XL, a sub-fund of BANTLEON OPPORTUNITIES, class IT (ISIN: LU0720423010), EUR

This fund is managed by the BANTLEON AG, which belongs to the bond specialist BANTLEON.

Objectives and investment policy

Bantleon Opportunities XL is an absolute-return fund that focuses on high-quality bonds. The investment objective is to generate high returns on a regular basis by adapting bond maturities as well as equity exposures to predicted economic trends. The use of futures should also make it possible to obtain price gains if prices fall, while largely avoiding debtor and exchange rate risks. The total return consists of the following:

- Management of average bond maturities ranging from approx. -5 to +15 years
- Management of equity exposure ranging from -20 to 40% of the fund's total assets
- Management of the yield curve
- Management of sector and bond allocation based on a good to very good credit rating

The investment manager invests in particular in government bonds, bonds issued by public authorities or similar safe bonds from the eurozone. Additionally, up to 50% of the fund assets may be invested in government bonds from the United States, the United Kingdom, Canada or Australia. Up to 40% of the fund assets may be invested in the global equity markets via equity index futures. The main focus is on adjusting weightings and not on selecting

individual equities, so that the equity investments always fully correspond to the underlying equity markets.

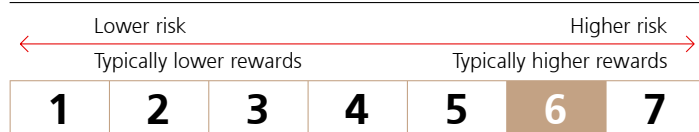

These investments may entail currency risks in USD, JPY, GBP, AUD, CAD and HKD, which are largely hedged. Unhedged foreign currency positions may make up no more than 10% of the fund assets.

Derivatives transactions may be made to hedge investments, to manage portfolio maturities, to achieve additional returns, to efficiently implement the equity allocation and to hedge against currency risks.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future returns.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 6?

The fund holds bonds issued by governments and quasi-governmental institutions, as well as mortgage bonds. The fund also invests in equities to a limited extent. As the fund invests in a variety of maturities and equities, it is subject to moderate volatility.

Further material risks:

- Credit risks: The nature of its investment universe means that the fund is exposed to a low default risk.
- Risks from the use of derivatives: The fund may use futures contracts for purposes consistent with its declared investment policy, especially to profit from both rising and falling markets. This increases the opportunities while also increasing the risk of loss.
- Operational risks: The fund is subject to risks through operational or human error. The management company is monitored by independent internal and external auditors, as well as by the regulators.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.04%
Charges taken from the fund under certain specific conditions	
Performance fee	10.00%
The portfolio manager or the investment adviser can receive, in certain conditions described in the prospectus, some performance commissions in case the fund is outperforming the 3 Month EURIBOR, at least 0%. The maximum commission is 10.00% of the outperformance. As at 31/12/2016, the performance fee represented 0.00% of the fund.	

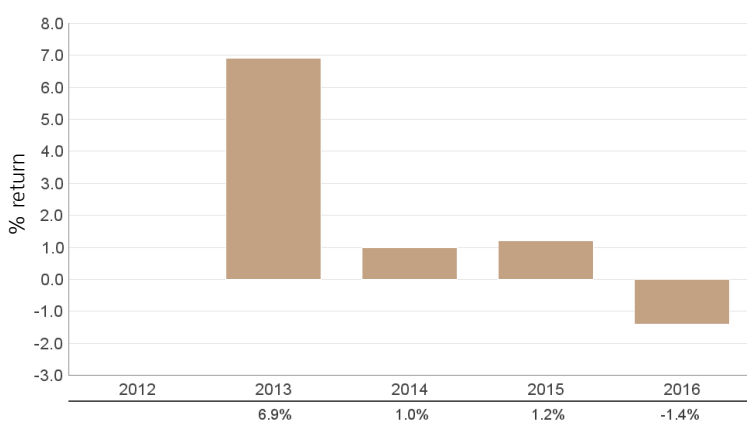

The **entry charge** and **exit charge** shown are the maximum figures. In some cases you might pay less – the actual figure can be found out from your financial adviser.

The **ongoing costs** given here were incurred in the last twelve-month period. They may vary from year to year. They do not include:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.
- Performance fees.

For more information about charges, please see charges section of the fund's prospectus, which is available at **www.bantleon.com**

Past performance

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year-end over year-end change of the class net asset value. In general any past performance takes account of all ongoing charges, but not the entry charge. If the sub-fund is managed against a benchmark, its return is also shown.

The class was launched on 02. May 2012.

The past performance is calculated in EUR.
