The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FIXED INCOME

AXA World Funds - Universal Inflation Bonds

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Universal Inflation Bonds I (Hedged) Capitalisation EUR (ISIN: LU0800576281)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The Sub-Fund's investment objective is to seek to achieve a mix of income and capital growth by investing in inflation-linked bonds over a medium term period.

Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in various inflation-linked bonds markets. The following investment decisions are undertaken after comprehensive analysis of macroeconomic and markets developments worldwide

- positioning on the inflation-linked yield curve (the yield curve illustrates the relationship between the investment term and the inflation-linked yield)
- management of duration for inflation-linked bonds (duration measures, in number of years, the portfolio's sensitivity to interest rate variations)
- positioning according to inflation expectations
- geographical allocation

The Sub-Fund invests:

- at all times at least two thirds of its total assets in inflation-linked bonds issued by governments, corporations or public institutions worldwide seeking to benefit from the rising wealth of emerging economies through a diversified approach
- up to one third of its total assets in other debt securities rated investment grade or sub-investment grade which are not inflation-linked
- up to one third of its total assets in Money Market Instrument

The Sub-Fund will invest at least 90% of its net assets in investment grade securities.

Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager, securities will be sold within 6 months. If two different ratings of rating

agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered

The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

The Sub-Fund may invest 100% of the total assets in sovereign debt securities.

Within a limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Inflation Swaps, Currency Forwards or Credit Default Swaps. Derivatives may also be used for hedging purposes.

The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy described above.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Sub-Fund Currency

The reference currency of the Sub-Fund is USD.

Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 3 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Minimum initial investment: USD 5,000,000 or the equivalent in the relevant currency of the relevant Share class.

Minimum subsequent investment: USD 1,000,000 or the equivalent in the relevant currency of the relevant Share class.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks

Credit Risk: risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Liquidity Risk: risk of low liquidity level in certain market conditions that might lead the Sub-Fund to face difficulties valuing, purchasing or selling all/part of its assets and resulting in potential impact on its net asset value.

Operational Risk: risk that operational processes, including those related to the safekeeping of assets may fail, resulting in losses.

Counterparty Risk: risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Impact of any techniques such as derivatives: certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.

Geopolitical Risk: investments in securities issued or listed in different countries may imply the application of different standards and regulations. Investments may be affected by movements of foreign exchange rates, changes in laws or restrictions applicable to such investments, changes in exchange control regulations or price volatility.

AXA World Funds - Universal Inflation Bonds

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	0.60%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fees	none
------------------	------

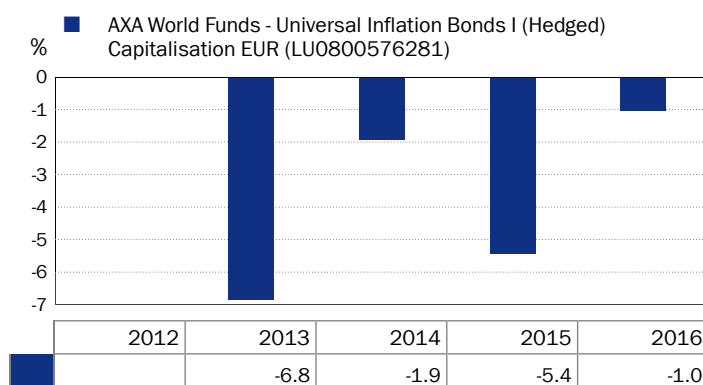

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the twelve month period ending December 2016. This figure is adjusted with implemented budget changes for 2017. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in an other collective investment undertaking

For more information about charges, please refer to the Charges section of the prospectus which is available at www.axa-im-international.com.

Past Performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Sub-Fund was launched on 17/07/2012 and the share class in 2012.

Past performance has been calculated in EUR and is expressed as a percentage change of the Sub-Fund's Net Asset Value at each year end.
