

Strategy Description and Objective

The Portfolio's investment objective is to replicate the performance of the Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return which seeks to outperform the Bloomberg Commodity Index Total Return, while keeping the same weight for each commodity as of the yearly rebalancing. The Portfolio seeks to achieve its objective by (i) entering into a swap agreement for participation in the Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return and (ii)(a) entering into a reverse repurchase agreement with a financial institution or (b) purchasing an asset portfolio of US Government Treasury Bills.

The Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return seeks to outperform the Bloomberg Commodity Index Total Return by making certain adjustments to the methodology for calculating that index, in particular, the procedure by which certain of the constituent futures contracts are rolled forward, in order to apply certain dynamic, timing and seasonal rolling rules. These adjustments are intended to enhance the performance of the strategy over that of the index, but there can be no assurance that these adjustments will have the desired effect and it is possible that these adjustments could actually result in the strategy underperforming the index.

The index, the Bloomberg Commodity Index Total Return, is designed to provide investors with a diversified benchmark for the commodity markets and is currently composed of futures contracts on 22 physical commodities. The index, and therefore the strategy, is not exposed to each constituent commodity contract equally.

Sharpe/Information Ratio, Sortino Ratio, Volatility and Correlation applicable only if period is greater than one year.

Monthly Commentary

The BCOM TR Index was down -0.62% in March.

The Energy sector contributed +1.41% to the benchmark return in March. WTI ended March up +5.65% (BCOMCL Index) whilst Brent rallied +7.10% (BCOMCO Index). Oil prices rallied in the latter half of the month on the back of heightened tensions between Saudi Arabia and Iran, and expectations of extension of supply cuts by OPEC-leader Saudi Arabia into 2019. The prices also rallied sharply and recorded their biggest one-day gain since November on 21st March as the U.S. crude inventories fell 2.6 million barrels for the week ending 16th March as compared to expectations for an increase of 2.6 million barrels, according to data released by EIA. Natural gas prices ended the month of March up 1.37% (BCOMNG Index). Prices rallied to a five-week high on 12th March on back of forecasts for higher heating demand than previously expected. The heating demand was expected to average 95.1 bcf for the week ending 23rd March as compared to previous forecast of 91.4 bcf for the same period. Prices fell during the latter half of the month due to unexpected record high production in the lower 48 states that averaged a record high 77.9 bcf over the past 30 days, according to Thomson Reuters data. Gasoline prices rose 4.19% (BCOMRB Index) during the month of March and followed the trend of oil prices. The prices were stable during the first half of the month but rallied sharply during the second half.

The Precious Metals sector had a neutral (0%) contribution to the benchmark return in March. Gold prices rose by +0.27% in March (BCOMGC Index) and Silver prices fell by -0.85% in the same period (BCOMSI Index). Gold prices rallied to a one-month high during the last week of the month after U.S. President signature of a memorandum that could impose tariffs on imports from China, pushing investors to safe-haven assets. Geopolitical risk also increased after nomination of the foreign policy radical John Bolton as the new U.S. national security adviser. At the end of the week, however, both metals retraced initial gains as rumors came out that China and US were negotiating to resolve issues, offsetting some of the bullishness coming from geopolitical risk.

The Industrial Metals sector had a negative contribution of -0.78% to the benchmark return in March. The complex continued to be under pressure this month as Donald Trump signed a memorandum that could impose up to \$60 billion in import tariffs from Chinese goods. Aluminium prices (-6.35%, BCOMAL Index) slumped due to Shanghai inventories at record levels (nearly 1mm tonnes) and the LME inventories up +20% higher since early February (1.29mm tonnes). Copper prices (-3.42%, BCOMHG Index) were also pressured by high LME stocks, with on-warrant stocks at their most elevated levels since September 2016. Lower Chinese refined copper imports in February (-1.8% YoY at 229,661) also contributed for the negative performance of the metal. The remaining Industrial metals were down due to higher LME stocks over the month.

The Agriculture sector had a negative contribution of -0.93% to the benchmark return in March. The grain prices were mixed in the month with the worst contribution coming from Wheat (-8.89%, BCOMWH Index). Rains in drought-hit U.S. southern plains brought relief to winter wheat crop and sent the prices down from six-month highs reached at the end of February. Corn prices (+1.51%, BCOMCN Index) rose as USDA forecasted 88 million corn acres in its weekly report at the month end, which was below expectation and -2% lower compared to previous year. In the soft complex, sugar prices (-7.70%, BCOMSB Index) fell sharply at the start of month on the back of record output forecast in the second largest grower India (29.5 million tonnes for 2017/18 production, up around +13% from previous estimate). Prices extended losses in the second half of the month as India decided to withdraw export tax, leading to concerns of oversupply.

The Livestock sector had a negative contribution of -0.46% to the benchmark return in March. Live Cattle prices (-10.57%, BCOMLC Index) declined to six-monthly low as USDA reported +7.3% more cattle in U.S. feedlots in February compared with previous year (versus +4.2% estimate), fuelling worries about supply glut in beef in the next few months. Lean Hogs prices (-0.78%, BCOMLH Index) fell marginally in the month of March. Prices were pressured during the month as the USDA projected commercial pork production for 2018 to be 26.9 billion pounds, which was +5.2% above a year ago due to larger than expected dressed weights of slaughtered hog carcasses. In addition, after Trump proposed to impose tariffs on around \$50 billion worth of Chinese imports, prices further dropped on fears of a potential trade war as China is the fifth-largest importer of U.S. pork.

The Enhanced Strategy outperformed the Benchmark by +0.27% in March. Sugar was the largest positive individual contributor to the Enhanced Strategy outperformance this month (+0.14%). The front month contract (-7.70%, May18 Futures) underperformed the deferred contract referred by the Enhanced Strategy (-2.95%, Mar19 futures), as news of increased per acre productivity in India due to beneficial rainfall patterns (with an expected increase in production of 35%) impacted more the front end of the curve. Lean Hogs was the largest negative individual contributor to the Enhanced Strategy outperformance this month (-0.13%). The pork market was pressured in March as the USDA projected Commercial pork production for 2018 upward by 5.2 percent above a year ago, due to higher pork carcass dressed weights. The sectors which contributed the most to the outperformance of the Enhanced Strategy versus the Benchmark in March were Agriculture (+0.23%) and Industrial Metals (+0.05%). Energy (+0.03%) and Precious Metals (+0.00%) contributions to the Enhanced Strategy were limited and distributed across the underlying commodities. The Livestock sector had a small negative contribution to the outperformance of the Enhanced Strategy of -0.05%, with the negative contribution of Lean Hogs being partially offset by a positive contribution of Live Cattle.

Risk Disclosures

Conflict of interests: Goldman Sachs performs several roles in connection with the Portfolio. Although Goldman Sachs will perform its obligations in good faith and a commercially reasonable manner, Goldman Sachs may face conflicts between those roles and its own interests.

Counterparty risk: The ability of the Portfolio to meet its obligations to investors will depend on the receipt by it of payments owed to the Portfolio by Goldman Sachs International under the Swap Agreement and the Reverse Repurchase Agreement. As a result, the Portfolio will be exposed to the creditworthiness of Goldman Sachs International.

Not principal protected: The Shares in the Portfolio are not principal protected and hence investors can potentially lose the full notional of investment.

No assurance of source of value: Although the Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return (the "Underlyer Strategy") is designed to capture certain fundamental commodity relationships, the relationships may or may not exist.

No active management: There will be no active management of the Underlyer Strategy so as to enhance returns beyond those embedded in the modifications to the Bloomberg Commodity Index Total Return (the "Benchmark Index").

Potentially different returns from those of the Benchmark Index: Although the Underlyer Strategy includes the same futures contracts that comprise the Benchmark Index, its value and returns will likely differ from those of the Benchmark Index.

No assurance of "absolute" returns: There can be no assurance that the Underlyer Strategy to which the Portfolio is linked will actually be successful at producing consistently positive returns, nor does Goldman Sachs make any representation or warranty, express or implied, that the Underlyer Strategy will do so in the future.

Limit prices could impact liquidity in the Underlyer Strategy: The commodity markets can be subject to temporary distortions due to regulations that limit the amount of fluctuation in futures contract prices which may occur during a single trading day. Limit prices may have the effect of precluding trading in a particular contract or forcing liquidation of contracts underlying the Underlyer Strategy at disadvantageous times or prices. These circumstances could prevent an investor from redeeming their Shares in the Portfolio in full on a given day which could in turn adversely affect the return on Shares in the Portfolio for potential or existing investors.

Unpredictable changes in commodity contracts prices: Prices of commodity futures contracts and other commodity contracts included in the Underlyer Strategy are affected by a variety of factors which are unpredictable and beyond the control of Goldman Sachs and the Investment Administrator.

Higher future prices of commodities included in the Underlyer Strategy relative to their current prices may adversely affect the value of the Shares in the Portfolio: The Underlyer Strategy replicates an actual investment in commodity contracts and therefore is affected by the need to "roll" the commodity contracts underlying the Underlyer Strategy due to commodity contracts having a predetermined expiration date on which trading in the contract ceases. "Rolling" (that is selling contracts that are nearing expiration before they expire and buying contracts that have an expiration date further in the future), while allowing an investor to maintain an investment position in the commodities underlying the Underlyer Strategy without receiving physical delivery of commodities or making or receiving a cash settlement, can potentially have a large impact on the level of the Underlyer Strategy. In particular, if the price of the contracts being sold is higher than that of the contracts being purchased (a situation known as "contango") and spot prices remain unchanged, this could result in negative performance of the Underlyer Strategy which could in turn affect the value of the Shares in the Portfolio.

No entitlement to the underlying commodity: Investing in the Portfolio will not make a holder entitled to physical delivery of any of the commodities included in the Underlyer Strategy or any contracts with respect thereto."

No disclosure may be made to third parties (including potential co-investors) regarding any information disclosed in this document without the prior permission of Goldman Sachs. By accepting this document you agree not to use the information contained in this document or in any other materials you are provided with, for any purpose other than for considering a participation in the proposed transactions.

This document has been delivered to you on the basis that you are a person to whom this document may be lawfully delivered in accordance with the laws of the jurisdiction in which you are located. You agree that by furnishing this document to you Goldman Sachs is not acting as your advisor in relation to any legal, accounting or tax matter associated or related to the transactions. In particular, Goldman Sachs is not giving any regulatory, legal, accounting or tax advice in relation to the feasibility of the proposed transactions in your jurisdiction. Therefore, you are strongly advised to consult your own independent advisors in relation to any legal, tax or accounting advice should you wish to proceed with a transaction.

No representation or warranty, expressed or implied, is made as to the quality, accuracy, timeliness, continued availability or completeness of the information contained in the document, and nothing contained herein is, or shall be relied upon as, a promise or representation. This document does not purport to contain all the information that may be required to evaluate the proposed transactions. Goldman Sachs has not independently verified any third party information included in this document and assumes no responsibility for its accuracy, timeliness, continued availability or completeness. Furthermore, you agree that Goldman Sachs will not have any liability to you relating to or resulting from the use of this document, nor for any special, indirect, incidental or consequential damages which may be incurred or experienced because of the use of the data made available herein, even if Goldman Sachs has been advised of the possibility of such damages. Past performance is not a guide to future performance and the value of investments and the income derived from them can go down as well as up. Future returns are not guaranteed and a loss of principal may occur.

Unless more restrictive rules are provided for in the investment policy, as described in the relevant Prospectus and the KIID, Goldman Sachs Structured Investments SICAV shall comply with the rules and restrictions detailed in the "Investment Restrictions" section in the Prospectus and investments of Goldman Sachs Structured Investments SICAV shall consist only of those assets included in the "Authorized Investments" subsection under the "Investment Restrictions" section in the Prospectus, which include: transferable securities and other money market instruments, units of undertakings for collective investment in transferable securities (UCITS) and/or other undertakings for collective investment (UCIs), time deposits with credit institutions and derivatives, including options and futures. In addition, up to 10% of the Portfolio's net assets may consist of assets other than those referred to hereunder.

SHARES IN GOLDMAN SACHS STRUCTURED INVESTMENTS SICAV OR ANY OF ITS PORTFOLIOS MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE BENEFIT OF, UNITED STATES PERSONS (AS DEFINED IN REGULATIONS UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED). THIS DOCUMENT MAY NOT BE DISTRIBUTED IN THE UNITED STATES.

SHARES IN GOLDMAN SACHS STRUCTURED INVESTMENTS SICAV OR ANY OF ITS PORTFOLIOS MAY NOT BE OFFERED OR SOLD IN OR FROM ANY JURISDICTION WHERE THE OFFER OR SALE IS PROHIBITED BY LAW OR TO ANY PERSON WHO IS NOT QUALIFIED TO PARTICIPATE IN THE PURCHASE OF SHARES. ACCORDINGLY, THIS MARKETING MATERIAL RELATING TO THE SHARES MAY NOT BE DISTRIBUTED IN CONNECTION WITH ANY SUCH OFFER OR DISTRIBUTION.
