The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG RI European Equity Leaders Class I H USD Shares

(ISIN:IE00B29Z0H63) Man GLG RI European Equity Leaders (the 'Fund') is a sub-fund of Man Funds plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund seeks long term gains by investing at least two thirds of its net assets in listed or traded shares (or related instruments) of issuers in Europe, or which derive a predominant part of their revenue from Europe. It may also invest in other asset classes, including debt securities, currencies, deposits and other funds and in other regions.
- The Investment Manager looks to invest in companies rated favourably for ESG behaviours and policies by third party providers compared to equivalent companies operating in the same industry and companies generating a positive impact based on data collected over a medium to long term period. The Investment Manager looks to engage with the companies it invests in, i.e. working collaboratively with corporate management teams to favour ESG behaviours and implement sustainable changes within these companies.
- Debt securities may be issued by any government, company or international agency and are not subject to a minimum rating requirement.
- The Fund may use financial derivative instruments (instruments whose price are dependent on one or more underlying assets, 'FDI') extensively to achieve the investment objective, for hedging against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset. The Fund is not expected to have an increased market exposure (leverage) as a result of such investments.
- The Portfolio's investment, directly, or indirectly through the use of derivatives, in equity securities (including, without limitation, common stock, convertibles and warrants) and fixed-income securities listed or traded on Recognised Markets in Russia shall not exceed 20% of the Net Asset Value of the Portfolio.
- Benchmarks. The Fund is actively managed. The Fund does not intend to track the MSCI Europe Index and is not constrained by it. The Benchmark is being used by the Fund for risk management purposes to ensure that the Fund is managed in a manner consistent with its investment objective and risk profile. The risk management function of the Investment Manager will perform additional monitoring of positions in the fund relative to weights in the benchmark. Relative weights will be assessed with reference to a threshold which may be updated from time to time. Other risk monitoring may include tracking error and or relative Value at Risk (VaR) versus the Benchmark as well as relative sector and/or country weights versus the Benchmark. While the Fund will focus on individual issuers that may or may not belong to the Benchmark, such investment may be in different weights than those used by the Benchmark. The above factors, considered together, may influence the extent to which the Portfolio deviates from the Benchmark and such deviation may be significant. The Benchmark is also used for performance comparison purposes.
- The Fund promotes, among other characteristics, environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR). The Investment Manager also applies an exclusion list of controversial stocks or industries which may be related to arms and munitions, nuclear weapons, tobacco and coal-oriented activities.
- Not more than 30% of the Fund's assets will be listed or traded in non-OECD markets and no more than 15% of the Fund's assets or debt securities may have a rating of less than A (or equivalent).
- The Fund will use FDI to provide investors with a similar return to any share class issued in the working currency of the Fund (EUR).
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.
- Investment in the Fund is suitable for long-term investors.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the Manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on

an organised exchange.

- The Fund may invest FDI to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may significantly multiply the gains or losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is a specialist country specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The currency hedging used for this share class to minimise the effect of certain exchange rate fluctuations may not be completely successful and currency hedging transactions will involve counterparty risk.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.
