Risk and Reward Profile

Potentially lower rewards

Potentially lower rewards

Potentially higher rewards

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- Repayment of the initial investment is not guaranteed.
- This fund is in category 7, since the share price has a very high volatility therefore the risk of loss as well as the expected reward can be very high.

The following risks may not be fully captured by the risk and reward indicator:

 The market for securities issued by small- and mid-capitalisation companies is generally less liquid than the market for securities issued by

- large-capitalisation companies. This leads to a higher risk as certain Fund investments in the market for small- and mid-capitalisation companies may be temporarily unavailable for purchase or sale at fair value.
- The investment in emerging markets exposes the Fund to risks related to political, regulatory, financial or fiscal instabilities or uncertainties that may negatively affect the value of the investments or even question the ownership title of the Fund. Settlement and delivery systems in these markets may be less well organized which may lead to additional risks (risk of late or cancelled settlement of transactions, losses for the Fund due to the default of the counterparty). Certain emerging markets in which the Fund may invest, may be of small size. This may result in the risk that the investments of the Fund in these markets are more difficult to buy or sell at an adequate price.
- Other risk factors, that an investor shall take into account with regards to his own situation and specific current and future circumstances, may exist.

Additional information concerning the risks of investment in the Fund is indicated in the corresponding section of the prospectus of the Company which is available at the Management Company and on www.lvamfunds.com .

Charges

The charges paid by an investor are used to cover the running costs of the Fund, including the costs of marketing and distribution of shares. These charges reduce the potential increase in value of an investment in this Fund.

The entry and exit charges shown correspond to a maximum percentage which might be deducted from the investor's capital invested into the Fund. In some cases, the investor might pay less. The investor may contact his financial adviser or intermediary to be informed on the actual entry and exit charges.
