PERFORMANCE BENCHMARK

The Fund will measure its performance against the JP Morgan Corporate Emerging Market Bond Index Broad Diversified (CEMBI - BD) TR Index (the "Benchmark"). The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedged share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- Subordinated Debt carries a greater level of risk compared to unsubordinated debt because it receives a lower priority level in terms of its claims on a company's assets in the case of the borrower's default.
- Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

GLOSSARY

- Coupons – The interest paid on a fixed income investment by its issuer for the term of the investment.
- Yield to maturity (%) – The estimated rate of return of a bond if bought at the market price and held until the date when it matures.
- Duration – A measure of a fixed interest investment's sensitivity to changes in interest rates. The longer the "duration", the greater exposure to future changes in interest rates.
- Average Quality – A credit rating that provides investors with insight into a fund's overall credit quality, designated as AAA, BBB, or CCC.
- Average Life – The average length of time it will take to repay the outstanding amount on a loan.

RISK AND REWARD PROFILE - EUR A (ACC.)

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium low level, and poor market conditions are unlikely to impact the capacity of BNY Mellon Fund Management (Luxembourg) S.A. to pay you.

Please refer to the prospectus and the KIID before making any investment decisions. Documents are available in English and an official language of the jurisdictions in which the Fund is registered for public sale. Go to www.bnymellonim.com.
