General Information

MIRABAUD (the "Company") is a société d'investissement à capital variable (SICAV - open-ended investment company) incorporated as a public limited company (société anonyme) under Luxembourg law on February 11, 2004, in accordance with the law of August 10, 1915 on commercial companies, as amended, as well as with Part I of the law of December 17, 2010, as amended (the "Law").

The Company is registered in the Luxembourg Trade and Companies Register under number B99093.

It has been established for an indefinite period. Its articles of incorporation were last amended by notarial deed on October 21, 2011, and published in the Mémorial of the Grand Duchy of Luxembourg on December 19, 2011. The consolidated articles have been filed with the Luxembourg Trade and Companies Register where copies thereof may be obtained.

The financial statements of each sub-fund are established in the base currency of the sub-fund. The consolidated financial statements are expressed in EUR.

All annual reports, including audited financial statements, as at December 31, and unaudited semi-annual reports as at June 30, together with the articles of incorporation, the full prospectus and the Key Investor Information Documents are available to Shareholders free of charge at the registered office of the Management Company, the Depositary Bank, as well as at the premises of the Representative.

A detailed schedule of changes in the securities portfolios is available to Shareholders free of charge at the Depositary Bank, at the Company's registered office as well as at the premises of the Company's Representative.

The Company's financial year begins on January 1 and ends on December 31 of each year.

Annual reports are made available within four months of the end of the financial year while semi-annual reports are available within two months of the end of the six-month period.

Information for Shareholders

a) Net Asset Value ("NAV")

The NAVs per share are available each business day in Luxembourg at the registered office of the Company. The Board of Directors may subsequently decide to publish such NAVs in newspapers in the countries where the shares of the Company are offered or sold. They may also be obtained at the registered office of the Administrative Agent.

b) Subscription and redemption prices

Subscription and redemption prices of the Company's shares are published daily at the premises of the Depositary Bank or any other entity that it has appointed.

c) Notices to Shareholders

If provided for in the articles of incorporation or the current prospectus of the Company, other information intended for Shareholders will be published in the "*Recueil électronique des sociétés et associations*" in the Grand Duchy of Luxembourg.

In addition, it may also be published in "d' Wort".

Management Report

MIRABAUD - EQUITIES ASIA ex JAPAN

Performance update

Asia ex-Japan equities, represented by the MSCI Asia ex-Japan index rallied 18.2% in 2019 after declining by -14.4% in 2018. The Mirabaud Asia ex-Japan fund rose +14.9%. The underperformance was largely caused by the strong performance of index heavyweight stocks (e.g. TSMC, Baidu and Samsung Electronics) which were not held by the sub-fund throughout the entire year. The sub-fund is very concentrated with a round 30 holdings, versus over 1,100 in the index, and therefore it has a high active share. Although the Fund's performance will inevitably be compared with the benchmark index, the composition of the Fund is very different with the aim of finding quality companies which are growing, irrespective of whether they are in the index or not.

During 2019, the three biggest positive contributors to performance were:

- Sunac China Holdings Ltd Shares in the Chinese property developer performed rose 83% in 2019 as the company benefited from the falling interest rate cycle, strong sales, NAV-accretive M&A activity, a large and growing land bank, falling gearing and valuations which were low compared with in the past.
- Silicon Motion Technology The Taiwanese hardware manufacturer of controllers for memory semiconductors saw their share price rise 47.0% after benefiting from the overall rebound in the semiconductor industry and improved outlook, partly due to the roll out of 5G.
- **Parade Technologies** The Taiwanese producer of high-speed video interfacing and processing products benefited from accelerating demand for their leading edge technology. Their share price increased 43% in 2019. Both Silicon Motion Technology and Parade Technologies are not in the MSCI Asia ex-Japan index.

The three largest detractors from relative performance during 2019 were:

- TSMC The Taiwanese manufacturer of semiconductors rallied 47% in 2019. The sub-fund held shares in TSMC up until the end of April 2019 when they were sold on the basis that the shares were fully valued (2 standard deviations above the historical average level). However, as with many growth stocks, valuations continued to become even more stretched and the sub-fund suffered from not holding this index heavyweight stock during the remainder of the year.
- **Baidu** The sub-fund suffered when Baidu, the leading Chinese internet search engine, reported a 2019 first quarter results which were in line with market expectations but gave a weaker than expected 2019 second quarter outlook. The stock dropped almost 25% in two trading days and breached the sub-fund's stop loss rule, which meant the sub-fund exited the position.
- Samsung Electronics Shares in the Korean hardware company rose by 44% in 2019. The company benefited from a rebound in the memory semiconductor business. Unfortunately, the sub-fund did not hold a position in Samsung, which is a heavyweight in the index and thus suffered relative underperformance as a result. However, the sub-fund instead benefited from holding a large position in SK Hynix, which is a competing Korean memory semiconductor company. Shares in SK Hynix rallied to a similar extent to Samsung Electronics.

YTD Market Review

Asia ex-Japan equities advanced 18.2% in 2019 driven primarily by heavyweights China (+20.9%) and the tech-heavy Taiwanese stock market (+31.5%) which largely moved in tandem with the progress on the US-China trade talks. The sub-fund was overweight China for most of the year but underweight Taiwan. The worst performing Asian markets were Malaysia (-5.2%) and Pakistan (+3.3%). The sub-fund had no exposure to either of these markets in 2019.

Besides the US-China trade war, 2019 was notable for a number of other events. For example, Hong Kong experienced months of violent pro-democracy protests which dragged the local economy into a recession. HK closed the year up 7.0%. India also suffered from political upheaval which begun with a military conflict in February in the aftermath of a terrorist attack in Kashmir. The incumbent BJP party won the general election held in April and May, but then faced political backlash after the scrapping of Article 370 in Jammu and Kashmir. The passage of the Citizenship Amendment Act and the National Register of Citizens gave investors another reason to be cautious. By the yearend, Indian equities finished just 6.1% higher.

Korean equities rose 10.4% in 2019 but were heavily skewed by the outperformance of the tech sector (including Samsung Electronics and SK Hynix). The export-driven country struggled in the midst of the global trade war and the dispute between South Korea and Japan over compensation for the forced wartime labour.

Finally, the ASEAN markets, that performed well in 2018, lagged in 2019 despite all cutting their interest rates to boost their local economies.

Portfolio positioning

By the end of December, our largest overweight markets were China (including Hong Kong), Indonesia, Philippines and South Korea. The biggest underweights in the sub-fund were Malaysia, Singapore and Taiwan. From a sector perspective, the sub-fund was overweight Financials, Information Technology and Energy, while being underweight Industrials, Communication Services and Health Care.

Summary & outlook

We believe the medium to long-term investment case for Asia ex-Japan equities is very positive. Asian equities still remain relatively under-owned and are attractively valued compared with global equity markets, whilst having a strong outlook in terms of earnings. The past year was very eventful with a heighted level of political risk and trade tensions. The political calendar in 2020 should be quieter with fewer political elections taking place in the Asian markets. With the US and China having signed phase 1 of the trade pact, concerns about trade disputes are hopefully past the worst as well. Therefore investors will hopefully be able to focus more on corporate fundamentals and less on politics.

As always, we remain focused on investing in quality companies with structural growth opportunities whilst being cognisant of managing the risks within the current environment.

MIRABAUD - DISCOVERY EUROPE

2019 was a dramatic year for equities. After the relief rally of the first quarter and consolidation over summer we saw a strong run into the fourth quarter built upon renewed confidence in the UK after the significant conservative victory and successful trade talks between the US & China.

The performance of the newly renamed Discovery Europe I fund EUR class was +25.87%, 557bps behind the benchmark and +25% since inception. The Discovery Europe Ex-UK I fund GBP class was +22.37%, 109bps ahead of the benchmark and +59.06% since inception.

The year started with significant investor caution driven by concerns about the advanced stage of the economic cycle and rising trade tensions weighing on stocks. As the year unfolded, economic activity remained robust and uncertainty further reduced with the thawing in trade tensions between the US and China and a decisive Conservative party victory in the UK rejecting socialist reforms. Looking forward to 2020, investors are weighing the likely pressure on president Trump to maintain strong economic momentum into an election year as their economic recovery enters another year. Further risks are posed by low unemployment and commodity prices, both of which have the scope to eat into historically high corporate profit margins.

We continue to focus on uncovering companies with a robust competitive advantage, aligned management, and the ability to sustain material growth while generating attractive returns on capital. While each year brings risks, we remain confident in our approach and our ability to generate alpha for you now and over the long term.

MIRABAUD - EQUITIES SWISS SMALL AND MID

The MIRABAUD - EQUITIES SWISS SMALL AND MID returned after costs 29.00% for the year 2019. The relevant benchmark SPI EXTRA had a return of 30.42%; hence, the performance of the sub-fund was 1.42% below the benchmark.

Global equity markets got off to a brilliant start in the New Year, but this was not surprising after the worst December in years. The main reason for this was statements by the FED to adjust the path of further interest rate hikes if the economic environment should cloud over. This view was confirmed at the end of January, when the central bank left the target range for key interest rates unchanged. Additional impetus was provided by hopes of an easing in the trade war. Weaker economic data, the longest shutdown in the history of the USA and further uncertainty in the Brexit did not dampen investor sentiment. At the beginning of the year, investors were particularly looking for stocks that had suffered heavily in December. The global stock markets continued their upward trend uninterrupted and by February, indices such as the SMI and SPI had already reached or even exceeded the old highs of 2018.

After the correction in May, which was triggered by the increases in US punitive tariffs on imported goods from China, the markets calmed down again in June, as central banks on both sides of the Atlantic promised a further easing of monetary policy. The cheap money helped the stock markets to regain momentum. As the price recovery took place without any tailwind from economic developments, the gap between stock performance and economic development widened further. Defensive growth stocks were the winners, while cyclical value stocks were clearly avoided.

The Swiss equity market consolidated in the third quarter. From the end of June to the end of September, the broad market gained around 2% in value. In July, the US Federal Reserve cut its key interest rate for the first time in the course of the year, as expected. In September, the FED made its second interest rate cut and cheap money continued to dominate the markets, driving the equity markets further upwards or at least not allowing for a correction.

October started with a setback of more than 3% due to disappointing economic data. However, the equity markets recovered quickly. The hope in the trade dispute between the USA and China, a bottoming out of the purchasing managers' indices, a further extension in the Brexit and the third interest rate cut by the US Federal Reserve led to a sector rotation from defensive to cyclical stocks towards the end of the month.

The upswing on the stock markets continued in November and accelerated again. The broader Swiss Market Index (SPI) gained 2.75%, while the Small and Mid Cap Index gained 4.51%. Continued hopes for a settlement in the trade dispute and the belief in an economic recovery led to a significant increase in investors' risk appetite. As a result, stocks from cyclical sectors were particularly sought after. In contrast, Nestlé shares performed negatively for the second consecutive month.

In December, the equity markets continued their upward trend. The announcements of a (partial) settlement of the trade dispute between the USA and China were particularly supportive. However, brightening economic data in the USA and Europe also provided confidence towards the end of the year.

Investors in the Swiss equity market had their best year since 2005, with the SPI rising by around 30%, driven mainly by the highest capitalized stocks such as Nestlé (+30%), Roche (+25%) and Novartis (+24%). Recently, smaller companies have also been able to catch up significantly. However, 2019 will clearly go down in the annals of the stock market as the year of the blue chips. The median performance of the almost 220 stocks included in the SPI is only around 12%, which clearly underscores the observation mentioned above. Nevertheless, it was also possible to lose money on equities in Switzerland in 2019. After all, around 60 stocks closed the year in the red. Significantly, however, these were almost exclusively shares of smaller companies.

The stock selection shows a positive contribution of +103 basis points over the year. Our large overweight in Vifor Pharma (+98bp), Panalpina (+51bp), Logitech (+47bp), Sika (+23bp) and Sunrise (+37bp) contributed positively. The underweight in Lindt & Sprüngli also had a positive impact. Negative, however, was the overweight in Ascom (-60bp), Leonteq (-46bp), Swatch (-45bp) and Meyer Burger (-42bp). On a sector level, the overweight in Technology and Health Care contributed positively. On the other side, the overweight in consumer discretionary was negative. Furthermore, the cash ratio of around 2.70% was negative in this sharp rise.

Year 2019 will go down in the history books as an excellent stock market year. In view of the trade conflict between the USA and China and the further weakening of the global economy, this is nevertheless an astonishing result. Hopes of an easing of the trading environment gave the stock markets an additional boost in the final quarter of the year, bringing a year full of surprising turns of events to a good end for investors.

Although certain valuation ratios have risen following the price increase, on a price/book value basis the Swiss stock market is still within the long-term average and does not appear particularly expensive. Talking of a strong exaggeration therefore does not seem justified to us. Moreover, the stock markets continue to perform well compared to the bond markets. The so-called risk premium, which takes into account the return on earnings less the yield on government bonds, is still above average and makes the equity markets appear comparatively attractive.

Before Christmas, the USA and China agreed on a partial agreement to settle the trade dispute. Even though much remains vague and the trade dispute is far from over, it can still be described as significant progress. Consumption remains an important pillar of the economy, and there is evidence of a certain stabilisation in the production sector in Europe. In view of the strong share price advances in the past year, we expect moderately higher share prices in 2020. We assume that the valuation increase will not continue. Higher share prices must be driven by a rise in earnings. A substantial part of the total return will also be the dividend yield.

Total assets in the sub-fund increased due to the positive market performance and minor outflows. The asset base stood at the end of the year at approximately CHF 1,080 million.

MIRABAUD - EQUITIES SPAIN

Sub-fund was +6.24% against its benchmark Ibex 35 NR that was up +15.66%.

2019 was another year of low visibility, and again geopolitical concerns were the main reason behind.

Trade war: US government decided to renegotiate some of the most important trade agreements with their main commercial partners. Chinese and European trade agreements were open as well and are both still under negotiations. Obviously, the effective crossed retaliation among US/China (tariff imposed on auto and raw materials sectors mainly), and the expectation of tougher terms than existing ones, punished some sectors like auto and raw materials, leading to real growth deceleration along the year. We took part of it with companies like CIE Automotive and Gestamp that impacted negatively on portfolio performance.

Brexit: final agreement on UK exit from the EU was reached, trade details still pending to be defined.

That increased uncertainty moved the ECB again to a more cautious stance and market perception of a delay in interest rate hikes became even stronger. Again Spanish banking names suffering on that as the NII depends a lot on Euribor rates due to the high weight of floating rate loans on their lending portfolios. Our positions in banks, that were based on good quarter results, sound balance sheets and historical low valuations, were one of the main draggers in the portfolio. On the other hand, utilities which are actually bond proxies kept going up all the year, having a very negative impact on comparable basis against our benchmark.

On the positive side, our biggest position Siemens Gamesa accounting for 8% over total portfolio perform extremely well going up by more than 45% in the year.

Looking ahead, we maintain our positive stance, because on a case by case basis, companies results, guidance and financial profiles keep improving. At the same time, we recognize that longer than expected geopolitical concerns had a very deeper economic impact than anticipated in the economy thus could affect companies' top line expectations. Our central scenario keeps being the one in which agreements, after phase I, will be the ultimate goal. If that was finally the case, we would expect huge valuation gap to be closed on a very positive market reaction, assuming no other unexpected events happen.

MIRABAUD

Management Report (continued)

MIRABAUD - UK EQUITY HIGH ALPHA

The sub-fund (I cap. GBP share class) rose by 25.44% over the year, 6.2 percentage points ahead of the 19.17% gain for the FTSE All-Share Total Return Index.

We view the year as characterised by two dominant issues, first the constant background of Brexit's seesaw and second, some meaningful stock specific developments.

Against the year-long background of negotiations and news-flow, likely Brexit outcomes oscillated between feared disastrous results and hoped for benign settlements and everything in between. The worst fears were encapsulated in a general election result that would return a neo-Marxist UK government and the brightest hopes envisage a strong conservative government able to sign a free trade agreement signed in record time. Unsurprisingly, in our opinion, this background gave rise to broad patterns and periods of stock price behaviour, where in general UK domestic companies performed poorly and international earners performed well as investors more widely declined to risk exposure to the UK domestic currency or economy, resulting in a 'flight to safety' in international earners.

Hence, given that USD earning companies are predominantly weighted in the UK index, the year started well for the UK market (+9% during the first quarter). The sub-fund also had a good first quarter (+15%), with performance helped by three dollars holdings averaging 15% of the sub-fund (Blue Prism, Micro Focus and Worldpay) that rose 80%, 50% and 40% respectively in the quarter.

At the same time, the Fund's holdings in UK domestic companies (such as house builders Taylor Wimpey and Redrow, the UK online travel agent On The Beach and the UK's largest pub business, Enterprise Inns - in aggregate another 15% of the sub-fund) all recovered strongly in the first quarter, having performed poorly in late 2018, with average price rises of +25%. Indeed, in 2019 we carried a central investment thesis that many UK domestic economy businesses were priced far too cheaply relative to their underlying quality and that investors would come to make good money from owning these under-priced companies in contrast to increasingly more expensive international (dollar) earners.

Then, in June and in the third quarter, the sub-fund suffered what we view to be a stock specific "volatility disaster" distinguishable from a real disaster where investors lose their money permanently. Three stock specific events 'cost' over 7% of the Fund. Blue Prism (robotic process software), Micro Focus (business process software) and Burford Capital (litigation finance) all fell by 50% (being some 13% of the sub-fund). At the time of writing, Blue Prism has much recovered (+50%) but has significant further recovery potential, not least because the fall was not triggered by fundamental information (recent trading has been reported as very strong) but by investors selling technology stocks widely, on valuation concerns which for Blue Prism we don't share. Micro Focus has faced long-running complications in the integration of its USD 8 billion purchase of Hewlett Packard Enterprise Software, which again caused the combined business to lower profit guidance modestly. The shares fell to 5.6x annual trailing profits which we view as anomalously low for a business with 45% EBITDA (a proxy for cash flow) margins. Finally Burford collapsed on a short-seller's attack. Of course, it behoves us to understand precisely the short seller's accusations and concerns and we do, but we don't share their concerns to anything like the same extent and are confident that Burford is an attractive business which now trades at a depressed price (5.0x trailing profits) and which therefore has very meaningful gains potential. We are confident that the three stocks will all recover their lost ground and more.

MIRABAUD

Management Report (continued)

Quarter four saw a resurgence in both absolute and relative performance (sub-fund +11.4% vs index +4.2%), effectively in equal part due to perceived improved international and domestic prospects. Globally equity markets performed well helped by resilient US economic data and belief in an agreeable US/China trade accord whilst in the UK the Conservative party won a resounding general election victory which removed significant UK political risk whilst boosting business and investment confidence. Five of the sub-fund's UK domestic holdings, being collectively over 20% of the sub-fund On the Beach, Taylor Wimpey, St. James's Place (wealth management), Redrow and Trainline (online train and bus timetables and ticketing app) rose by over 20% adding 4% to the sub-fund's 7.2% outperformance in the quarter.

Looking into 2020 there is, as ever, much to fret about globally (the longest US expansion in history, the vertiginous bull market in US equities, global slowdown, US/China trade wars, Iran, US elections, Brexit, etc.); however, the nature of the Conservative party victory is potentially profound as having won meaningful territory within Labour's traditional heartlands of the north and midlands, provided the Conservatives repay the faith shown in them (by a combination of infrastructure and regional redevelopment) then neo-Marxist/socialist threats will unlikely ever again feature in UK politics. With the worst of Brexit's political and currency risk removed, international interest in the UK's financial markets is likely to grow, not least because the equity market is home to high quality businesses that are inexpensive in the context of their own history and relative to internationally quoted peers, valuations undoubtedly depressed by lingering Brexit concerns. The sub-fund holds investments with significant latent potential and all with favourable prospects and we view 2020 with confidence.

MIRABAUD - CONVERTIBLE BONDS EUROPE

Asset under Management

 $\mathsf{MIRABAUD}$ - $\mathsf{CONVERTIBLE}$ BONDS EUROPE started the year 2019 with EUR 160 million AUM to finish with EUR 105 million.

The asset class has suffered from a massive redemption outflows. Especially as 2018 was a bad year.

Performances

MCBE I share class is up 9.37% in 2019 meanwhile the Thomson Reuter Europe Hedged Focused Benchmark moved up 6.27%.

2019 was dominated by a change in stance by central banks globally from tightening to more QE. We opportunistically increased the Fund's equity sensitivity by adding new issues and increasing average delta.

Holdings in Information Technology, Industrials and Materials were the best contributors sectors

No one sector contributed negatively but the worst performers were Financial, Real Estate and Energy.

Relative performance

Consumer Cyclical, Industrials, Information Technology and Health Care are the main contributors to the outperformance compared to the benchmark. In terms of issuer, the overweight on Korian and Encavis with the underweight position on Wirecard are responsible for a large share of the outperformance.

On the other side, Communication Services and financial sectors drag the outperformance compared to the benchmark. Indeed, the fund had an underweight position on Cellnex, which outperformed the market last year.

YEAR TO DATE 2019

Performances

MIRABAUD - CONVERTIBLE BOND EUROPE I share increased 1.21% in 2020 up to January 22. Meanwhile, the Thomson Reuters Europe Focus Hedged index added 1.09% over the same period.

Short Term view

Our expectation for 2020 is that key fundamental drivers remain supportive for now with favourable financial conditions on the short term.

We do not think that recovery of equity and credit are sustainable after the year's second half. Global equities may encounter rising volatility and several corrections in the range of 5% to 10%.

Financial conditions are still very good but some negatives are likely to surface from the second half of the year with the uncertainty about the outcome of the Presidential election combined with the inflection of the credit cycle. The Chinese economy is in trouble and the strategic confrontation with America is just one aspect of its difficulties.

Recent Activity

As we expect the bull market not to last long and a down leg to follow, as active manager, we have bought several new convertible bonds issue with strong convexity. In the same time, we reduced high delta convertible bonds, which performed strongly in 2019.

Positioning

Overall, the Mirabaud Convertible Bonds Europe fund has a 40% delta against 36% for the Index and a Duration of 2.70 against 2.52 for the Index.

Sector wise, the fund is now overweight on health care, consumer discretionary and financials sectors. The fund is also underweight on materials, utilities and consumer services.

Conclusion

Given that recession anxiety could return to America from the half of 2020 in a context of rising political uncertainty, we view the natural convexity of convertible bonds as a key advantage for cautious investors with a generally positive view of the equity markets because the asset class reduce the risk of completely missing a market recovery or, alternatively, suffering too much from a falling market.

MIRABAUD - EQUITIES FRANCE

The MIRABAUD - EQUITIES FRANCE sub-fund is an Equity sub-fund invested in French equities. The main objective of the sub-fund is to outperform the CAC 40 Net Return Index over the medium to longer term, through active stock selection, using rigorous stock analysis. The main criteria considered are a company's financial health, growth perspectives, valuation and the quality of its management. The sub-fund net performance in 2019 was +30.70% versus +29.24% for its reference Index the CAC 40 net total return.

The volatility of the sub-fund was in line with the one of the index (12.41% versus 12.26%) and the beta was low at 0.96. Our divergence in terms of allocation was significant with an active share ratio of 43% and mid cap exposure around 16% of the total positions.

During the first semester, the MIRABAUD - EQUITY FRANCE sub-fund performed well and slightly outperformed the index thanks to the recovery of cyclical names (especially in the Information Technology Sector) and its mid-caps segment allocation which benefited from their reasonable valuation, their dynamic of growth and their exposure to the European recovery.

During the second semester, the market progression continued thanks to monetary policies that have been much more accommodating all over the world, a hope for a favourable outcome to the Sino-American trade negotiations and a bullish equity investors sentiment, considering that the current economic slowdown has been only temporary. The second part of the year was characterized by a strong sector rotation from Defensive Expensive Growth towards Value cyclical stocks like Banking and Industrials names, which significantly outperformed the market; in the same time Real Estate, Consumer Staples, Communication Services and Autos names dropped heavily. The Small and Mid Cap sub segment also underperformed because of significant outflows. The Management of the Mirabaud Equities France sub-fund during 2019 has consisted in the first half of the year of decreasing the weight in Midcaps (from 22% to 19%). The Energy sector was reinforced and the Communication Services was reduced. In the second part of the year, we kept on reducing our weight in Midcaps (from 19% to 16%). We reinforced the Financial sector and decreased our strong overweight in the IT Sector by taking some profits on some companies The sectorial allocation of the sub-fund has been marked by an Overweight in the Industrial Sector (27% of the sub-fund vs 21% for the Index). The IT Sector (9% of the sub-fund) is also overweight thanks to a solid growth and low valuation. With digital revolution, it benefits from structural positive trends for the next years. The Healthcare sector is overweight in the sub-fund (12% vs 8%) in order to play a defensive sector with reasonable valuation and a solid growth acceleration to face in the coming years. The Consumer Discretionary sector has been also underweight (13% vs 21% for the Index) with an underweight in the Automobile sector. The Materials have been underweight (0% of the sub-fund) because it is an expensive sector depending more on global growth and more specifically on emerging markets. The Energy and the Utilities sectors have been globally in line with the Index.

As at December 31, 2019, the MIRABAUD - EQUITIES FRANCE sub-fund has a total Asset of EUR 71,878,265. Since its creation on September 18, 2003, the sub-fund has had a positive performance of 168.79%. On MIRABAUD - EQUITIES FRANCE, the Healthcare, the Energy and the IT Sectors were the best relative contributors, whereas Financials and Consumer Discretionary constituted the worst performers during the year. As at December 2019, the global Equity exposure stood at 96%. The main holdings of the sub-fund as at December 31, 2019 are the following: Sanofi (6.23%), Total (6.02%), Airbus (4.90%), LVMH (4.32%), Axa (4.02%), Christian Dior (3.81%), BNP (3.67%), Kering (3.66%), Teleperformance (3.02%) and GTT (2.97%). The Net Asset Value of the A Share is at EUR 268.79. The NAV of the F Share is at EUR 108.61. The NAV of the I Share is at EUR 143.25. The NAV of the N Share is at EUR 108.04.

MIRABAUD - EQUITIES GLOBAL EMERGING MARKETS

Performance update

Global Emerging Market (GEM) equities, represented by the MSCI Emerging Market index rallied 18.4% in 2019 after declining by -14.6% in 2018. The Mirabaud GEM fund performed broadly in line with the benchmark index by rising +18.2%. Even though the fund performed similarly to the index over the course of the year, the sub-fund's performance relative to the index was much more volatile on a monthly basis. The key reason is that the Fund is very concentrated with around 30 holdings versus around 1,400 stocks in the benchmark index. Although the sub-fund's performance will inevitably be compared with the benchmark index, the composition of the sub-fund is very different with the aim of finding quality companies which are growing, irrespective of whether they are in the index or not.

During 2019, the three biggest positive contributors to performance were:

- Sunac China Holdings Ltd Shares in the Chinese property developer performed rose 83% in 2019 as the company benefited from the falling interest rate cycle, strong sales, NAV-accretive M&A activity, a large and growing land bank, falling gearing and valuations which were low compared with in the past.
- MMC Norilsk Nickel PJSC The Russian miner of nickel, palladium, platinum, copper and other minerals rallied 63%. The company benefited from a shortage in many of its products and the corresponding surge in the commodity prices. Investors were also attracted to the high single-digit dividend yield.
- Yandex Shares in the leading Russian internet search engine company rallied 59%. During the year Yandex managed to grow its market share on Android smartphones at the expense of Google, it grew its online advertising business and turned a profit with its online taxi business.

The three largest detractors from relative performance during 2019 were:

- TSMC The Taiwanese manufacturer of semiconductors rallied 47% in 2019. The sub-fund held shares in TSMC up until the end of April 2019 when they were sold on the basis that the shares were fully valued (2 standard deviations above the historical average level). However, as with many growth stocks, valuations continued to become even more stretched and the sub-fund suffered from not holding this index heavyweight stock during the remainder of the year.
- Baidu The sub-fund suffered when Baidu, the leading Chinese internet search engine, reported its first quarter 2019 results which were in line with market expectations but gave a weaker than expected second quarter 2019 outlook. The stock dropped almost 25% in two trading days and breached the sub-fund's stop loss rule, which meant the sub-fund exited the position.
- Samsung Electronics Shares in the Korean hardware company rose by 44% in 2019. The company benefited from a rebound in the memory semiconductor business. Unfortunately, the sub-fund did not hold a position in Samsung, which is a heavyweight in the index and thus suffered relative underperformance as a result. However, the sub-fund instead benefited from holding a large position in SK Hynix, which is a competing Korean memory semiconductor company. Shares in SK Hynix rallied to a similar extent to Samsung Electronics.

YTD Market Review

GEM equities started the year well with a rally of +10% in the first quarter of 2019. As the US-China trade war escalated GEM equities lost -4% over the next two quarters before rallying close to +12% in the final quarter as due to positive developments on the trade front and further global monetary policy easing.

• Asia ex-Japan

Asia ex-Japan equities advanced +18.2% in 2019 driven primarily by heavyweights China (+20.9%) and the tech-heavy Taiwanese stock market (+31.5%) which largely moved in tandem with the progress on the US-China trade talks. The sub-fund was overweight China for most of the year but underweight Taiwan. The worst performing Asian markets were Malaysia (-5.2%) and Pakistan (+3.3%). The sub-fund had no exposure to either of these markets in 2019.

Besides the US-China trade war, 2019 was notable for a number of other events. For example, Hong Kong experienced months of violent pro-democracy protests, which dragged the local economy into a recession. HK closed the year up 7.0%. India also suffered from political upheaval which begun with a military conflict in February in the aftermath of a terrorist attack in Kashmir. The incumbent BJP party won the general election held in April and May, but then faced political backlash after the scrapping of Article 370 in Jammu and Kashmir. The passage of the Citizenship Amendment Act and the National Register of Citizens gave investors another reason to be cautious. By the yearend, Indian equities finished just 6.1% higher.

Korean equities rose 10.4% in 2019 but were heavily skewed by the outperformance of the tech sector (including Samsung Electronics and SK Hynix). The export-driven country struggled in the midst of the global trade war and the dispute between South Korea and Japan over the issue of forced wartime labour compensation.

Finally, the ASEAN markets, which performed well in 2018, lagged in 2019 despite all cutting their interest rates to boost their local economies.

• EMEA

Russia was the best performing market in EMEA in 2019 and rallied 41.0%. The equity market and Russian currency was supported by a strong recovery in oil prices, the gradual fading of sanctions risks and looser monetary policy as inflation weakened. The sub-fund was overweight Russia equities through its holdings in Norilsk Nickel, Yandex and Lukoil.

The other EMEA markets which performed very well were Greece (+39.8%) and Egypt (+38.9%). The sub-fund had zero exposure to Greece but was overweight Egypt through the holding in Commercial International Bank of Egypt.

South African equities rose +7.4% and thus underperformed both the EMEA region and GEM. The bailout of the struggling state owned utility, Eskom, increased the probability of a ratings downgrade. Despite the re-election of Cyril Ramaphosa there was little progress with reforms and hence foreign outflows from South African equities reached a 20 year high.

The worst performing markets in EMEA were Poland (-8.2%), Qatar (-4.5%) and the Czech Republic (-0.1%). The sub-fund had zero exposure to these three markets during the year.

Latin America

The two best performing markets in Latin America in 2019 were Colombia (+25.9%) and the index heavyweight Brazil (+22.1%). The sub-fund did not have any exposure to Colombia, which is a small market (less than a 0.5% of the index). During 2019 the sub-fund was also modestly underweight Brazil, which therefore detracted from relative performance. President Bolsonaro managed, despite the odds, to push through key fiscal policy reforms, which helped to restore investor confidence and revive modest economic growth over the year.

In Mexico, the second largest market in Latin America, equities rose just 8.0% due to a period of weak economic growth and uncertainty with regards to trade with its largest partner, the USA.

The worst performing markets in LatAm were Argentina (-22.6%) and Chile (-18.6%). The sub-fund had zero exposure to either market during the year.

From a sector perspective all GEM sectors advanced over the year. The best performing sectors were Information Technology (+37.6%) and Consumer Discretionary (+34.0%) whereas Materials (+2.3%) and Health Care (+2.7%) lagged the most.

Portfolio positioning

By the end of December our largest overweight markets were Russia, Mexico, Egypt and China. The biggest underweights in the sub-fund were South Africa, Brazil, Taiwan and Saudi Arabia. From a sector perspective the sub-fund was overweight Financials, Real Estate and Consumer Discretionary while being underweight Industrials, Health Care and Energy.

MIRABAUD

Management Report (continued)

MIRABAUD - SERENITE

Mirabaud Serenite is a diversified fund of fund with a prudent, flexible investment approach. The fund seeks to outperform the Eonia capitalised + 100 bps on an annual basis, over a 4 years minimum investment horizon. The fund management concept is based on two axes: the asset allocation between equity, fixed income and money market assets, with a maximum net equity exposure of 30%; and the funds selection, structured products and/or direct stocks/bonds.

The trade war between the USA and China continued in 2019, with episodes of tension - the breakdown of talks and renewed conflict - alternating with periods of relief. In early December, the average tariffs imposed by the USA on Chinese imports rose to more than 20%, compared with 3% two years ago. The tariffs imposed by China on US imports have risen by a similar amount. Although the direct impact on economic activity has been limited, albeit the resulting uncertainty regarding global value chains and the prospect of the trade dispute escalating further dragged down both sentiment and investment in 2019. Trade tensions also adversely affect productivity and therefore potential growth in the longer run.

Globally, economic growth continued to slow in 2019 because of a contraction in manufacturing. The downturn was particularly marked in Europe and China. However, a global recession was avoided as central banks loosened their monetary policies and the service sector remained strong, supported by advanced economies running at close to full employment. Before the Great Recession of 2007-2009, tighter conditions in the labour market following a period of expansion constituted an early warning signal of price rises and a decline in overall demand. Since then, however, inflation has remained low for structural, demographic and technological reasons, allowing financial conditions to remain loose and thus extending the economic cycle.

2019 was a very good year for investors. However, when assessing the markets' performance, we should bear in mind their steep decline in the fourth quarter of 2018 on fears of central-bank monetary tightening. Taking into account that correction, returns were closer to their historical average of around 8%. In addition, corporate earnings growth was extremely weak in 2019 and so returns were driven mainly by rising valuations, supported by expansionary central-bank policies.

In the bond markets, the volume of debt trading at negative yields hit a record USD 17,000 billion in August, reflecting the widespread decline in interest rates around the world. To put this in perspective, the figure equals more than 30% of the total volume of investment-grade bonds in issue. The capital gains resulting from falling yields meant that the bond markets delivered solid returns in 2019. Government yield curves flattened in Europe because of falling long-term yields, while the US curve shifted lower. The credit market outperformed as the cyclical economic expansion continued and the ECB resumed its asset purchases, resulting in an additional narrowing of yield spreads during the year.

In 2020, global economic growth is likely to accelerate slightly, mainly driven by emerging-market countries. In Europe, the USA and Switzerland, we are likely to see growth stabilising around its equilibrium level. In the absence of a recession or any obvious signs of financial imbalance, the risks are likely to remain principally political and geopolitical in nature: the US presidential election, problems in Iran, the democratic crisis in Hong Kong and on-going trade disputes around the world are all potential sources of tension that could affect the global economy.

The monetary easing that took place in 2019 will have its main impact in 2020. However, central banks are unlikely to provide any further support, since they have limited scope to take action and the monetary transmission mechanism - through which interest rates influence the real economy - has weakened. The only effective way in which the authorities can support sustainable growth seems to be by giving a greater role to fiscal, structural and prudential policies.

In this particularly volatile context, the fund's exposure to the equity markets has been adjusted according to the identified opportunities and risks. Thus, net equity exposure varied during the year between 7% and 24%, ending December at 22%. The fund has benefited of the strong rebound of equity assets and structured products, but suffered from disappointed performances on absolute return funds.

As of December 31, 2019 the Fund held 26 positions such as: Tikehau Taux Variable (6%), Tikehau Court Terme (5.56%), Schelcher Prince Obligation Moyen Terme (5.6%), BSF Americas Diversified Equities (5.2%), Phileas Long short Europe (5.2%), NB Euro Short Term (5.1%), Helium Performance (4.9%) etc.

As of December 31, 2018 Mirabaud Serenite Net Asset Value was EUR 125.48. Thus, the biannual return is 1.51% and the year-to-date return is +5.07% with EUR 35.4 million of total assets.

MIRABAUD - GLOBAL HIGH YIELD BONDS

Annual Management Report 2019

2019 was a very strong year for almost all asset classes after a very poor year of returns in 2018. The fourth quarter of 2018 was ugly for all fixed income asset classes. Fears of a Fed mistake by over hiking, trade wars, Italy, Brexit, all weight upon sentiment and risk. December saw a complete capitulation as Fed Powell's hawkish comments combined with seasonal illiquidity and year-end risk adjustment resulted in an ugly move down in financial markets. As a result, the Federal Reserve blinked and went from a dialogue propounding further rate rises to one of rate stability/cuts. This change of direction resulted in a very strong first quarter 2019, with January seeing 4.018% of total returns for the ICE Global High Yield index.

As 2018 was characterised by a rapid widening in Treasury spreads, with duration selling off on the back of interest rate rises in the US, so 2019 was the exact opposite - spreads rapidly tightened with the markets seeing central banks' change in direction as being the support mechanism there should things deteriorate. As a result, economic data and otherwise significant events such as the ratcheting up of trade tensions between the US and China had a much smaller effect than would otherwise be the case.

Interestingly it was better quality, longer duration fixed income that outperformed. A "reluctant rally" as investors were not convinced enough to buy cyclicals and lower quality credit. There was significant decompression between better quality developed market bonds and high yield and the same trend was evident in emerging markets. The technical strength remained strong all year, with huge inflows into investment grade throughout the year.

For the Global High Yield Fund, the total return for full year 2019 was at the lower end of expectations. Absolute performance was good, but relative performance was less so as the Fund did not benefit from the sudden change in direction of the Fed and the subsequent duration rally that occurred. The Fund took advantage of higher overall yields in the shorter maturity end of the curve, with much lower risk yet attractive total return. The expected volatility on the back of trade and economic data did not materialise and the Fund lost most of the relative performance in the first quarter due to its more conservative positioning.

In terms of positioning, the key difference was duration. We were also underweight retail, which had a very strong year. We avoided several of the big company y structures that had issues such as Frontier and Chesapeake. Overall, the Fund's credit selection was good. Good positioning in idiosyncratic credits like Staples added to performance, as did an underweight to Basic Materials. Emerging Market bonds now make up approximately 20% of the benchmark, and our positioning here was sub optimal, focusing mainly on good quality shorter maturity bonds. Chinese real estate bonds make up a significant percentage of the EM part of the benchmark, and this sector had a very strong year of performance.

The investment strategy of the fund revolves around a disciplined risk adjusted process, using bottom up fundamental credit analysis within a top down macroeconomic framework. The key factors of the process are a value driven approach to investing with an active allocation mechanism between the US and European High Yield markets.

MIRABAUD

Management Report (continued)

The primary investment themes for the fund during 2019 were as follows:

- We continued to focus our attention on the US for valuation reasons. The fundamental economic environment was better than in Europe and we felt that the USHY market offered the best opportunities for the Fund. In fact, that was the correct call as EHY underperformed USHY.
- We were underweight BB and duration. We felt that shorter maturity bonds had a much better risk/reward profile and this impacted relative performance.
- We were more active in EM, adding to Turkish banks and other credits, but did not have exposure to Chinese Real Estate, which had a very strong year of performance.

Outlook

The Coronavirus is skewing the outlook somewhat. The financial markets have been quite sanguine and are pricing in a V shaped rebound post a poor first quarter. The uncertainty is whether the shutdown in China and knock-on supply chain and demand effects has a far more damaging effect than is being priced in. The markets are still assuming that the Federal Reserve and to a lesser extent other central banks will continue to provide support should things weaken significantly. The bar to cutting rates in an election year is very high and so we would need to see significant deterioration for the Federal Reserve to cut again. Overall, the economic environment is ok, with low inflation so if we do see short-term volatility its duration should be short all things remaining equal.

MIRABAUD - CONVERTIBLE BONDS GLOBAL

Assets under management

MIRABAUD - GLOBAL CONVERTIBLE BONDS was launched on May 29, 2013. This sub-fund is a portfolio of international convertible bonds. Its objective is to offer outperformance over Thomson Reuters Global Focus Hedged \$ Index and the portfolio is thus characterised by a large convexity.

The sub-fund started the year 2019 with USD 93.31 million in assets and ended it with USD 177.69 million.

Absolute performances

MIRABAUD - GLOBAL CONVERTIBLE GLOBAL I was up 16.70% in 2019. Meanwhile, the Thomson Reuters Global Focus Hedged \$ index increased 13.10% over the same period while the equity index MSCI World total return (USD) gained 28.42%.

2019 was dominated by a change in stance by central banks globally from tightening to more QE. This fuelled a year-long rally in equities as investors felt confident of central bank support despite a more uncertain economic environment. The sub-fund took advantage of a lower correlation regime in equity markets amid higher valuation dispersion. This has allowed us to manage the portfolio actively all year long given the higher factor rotation and macro divergences, creating winners and losers. Whist, we maintained an average delta in line with the market, we opportunistically increased the sub-fund's equity sensitivity by adding new issues. Overall, our risk adjusted return was very attractive during 2019, and our positioning reflected our focus on providing convexity for all of our investors.

Relative performance

In terms of sector, information technology, materials and communication services were the main sector responsible for the outperformance compared to the benchmark. Energy was the only contributor to the underperformance compared to the benchmark.

Within the regions, on a relative basis, North America contributed the most, followed by Japan, Asia-ex Japan and Europe.

Positioning

On December 31, 2019, the MIRABAUD - CONVERTIBLE BONDS GLOBAL sub-fund's characteristics were as follows:

The sub-fund is 99.2% invested across 51 positions, with top twenty holdings accounting for ~58.2%, an active share ratio of 86% and weight outside the benchmark of 39.4%.

Region wise, North America is the largest exposure (36.6%), followed by Japan (23.2%), Europe (22.9%) and Asia Pacific (16.5%)

Sector wise, Information Technology is the largest allocation (24.8%) followed by Energy (16.8%) and Communication Services (13.2%)

A weighted average delta of 52% against 50% for the index with a 2.07 duration against 2.13 for the index.

Recent activity

On December 6, 2019, the sub-fund has merged with Altitude Convertibles Monde, a French domiciled fund launched in 2015 to offer Mirabaud's investors access to one of the very first Global Convertible fund integrating ESG principles in its investment process. As a result, the MIRABAUD CONVERTIBLES BOND GLOBAL will continue to offer investors access to an outstanding sustainable investment solution in Global Convertibles.

Short term view

Looking ahead, our view is that the market will move higher into the early part of 2020 as the investor participation has been light and the bear capitulation is likely to have legs.

Furthermore, the key fundamental drivers remain supportive for now with favourable financial conditions, a mild economic recovery on track and fewer earnings downgrades in sight while equity valuations are still not excessive compared to "safe assets" and multiples tend to overshoot into the end of cycle.

Further out, some negatives are likely to surface from the second half of the year with the uncertainty about the outcome of the Presidential election combined with the inflection of the credit cycle while corporate leverage in the US is elevated and profit margins have peaked.

Conclusion

Given that recession anxiety could return to America from the half of 2020 in a context of rising political uncertainty, we view the natural convexity of convertible bonds as a key advantage for cautious investors with a generally positive view of the equity markets because the asset class reduce the risk of completely missing a market recovery or, alternatively, suffering too much from a falling market.

MIRABAUD - GLOBAL STRATEGIC BOND FUND

Annual Management Report 2019

2019 was a very strong year for almost all asset classes after a very poor year of returns in 2018. The fourth quarter of 2018 was ugly for all fixed income asset classes. Fears of a Fed mistake by over hiking, trade wars, Italy, Brexit, all weight upon sentiment and risk. December saw a complete capitulation as Fed Powell's hawkish comments combined with seasonal illiquidity and year-end risk adjustment resulted in an ugly move down in financial markets. As a result, the Federal Reserve blinked and went from a dialogue propounding further rate rises to one of rate stability/cuts. This change of direction resulted in a very strong first quarter 2019, with January seeing 4.018% of total returns for the ICE Global High Yield index.

As 2018 was characterised by a rapid widening in Treasury spreads, with duration selling off on the back of interest rate rises in the US, so 2019 was the exact opposite - spreads rapidly tightened with the markets seeing central banks' change in direction as being the support mechanism there should things deteriorate. As a result, economic data and otherwise significant events such as the ratcheting up of trade tensions between the US and China had a much smaller effect than would otherwise be the case.

Interestingly it was better quality, longer duration fixed income that outperformed. A "reluctant rally" as investors were not convinced enough to buy cyclicals and lower quality credit. There was significant decompression between better quality developed market bonds and high yield and the same trend was evident in emerging markets. The technical strength remained strong all year, with huge inflows into investment grade throughout the year.

For the Global Strategic Bond Fund, the total return for full year 2019 was at the higher end of expectations. The Fund focuses on risk-adjusted returns, with a degree of focus on capital protection where possible. The Fund bought one-year maturity bonds in December 2018 and January 2019 when the short end was higher, given expectations of further rate rises. This added very low risk performance to the Fund. The Fund also invested in 10 year US Treasuries given the change in Fed direction.

In terms of positioning, the Fund did not have aggressive duration exposure and so did not perform as well as some funds. In addition, the Fund had good exposure to EM and HY, but again not very risky positions. We were also underweight retail, which had a very strong year. We avoided several of the big company structures that had issues such as Frontier and Chesapeake. Overall, the sub-fund's credit selection was good.

The investment strategy of the fund revolves around a disciplined, risk-adjusted approach to investing which uses a flexible top down asset allocation framework based upon global themes cycle analysis and their relationship to global fixed income returns. Duration, asset class mobility and credit management are the key drivers of Alpha generation in the process which encompasses a rigorous bottom up credit selection process that dovetails with the top down asset allocation framework. There is no geographical nor fixed income asset class bias, only the desire to invest in the best geographies and parts of Fixed Income at the appropriate time.

The sub-fund's relative performance was strong in 2019, and outperformed its Libor benchmark.

MIRABAUD

Management Report (continued)

The primary investment themes for the fund during 2019 were as follows:

- We continued to reduce exposure to Europe for valuation reasons, with a greater emphasis upon the US credit market. European duration was also very low at certain times of the year due to a Bund hedge we opportunistically put on and off several times.
- We reduced our High Yield exposure in the fourth quarter of 2018, which proved to be the right decision and shielded the Fund from further underperformance as risk sold off in December.
- Our limited exposure to Emerging Markets over the course of the year, also mitigated negative performance as EM bonds also had a difficult year with both a strong USD and idiosyncratic events.
- We continued to add to short dated US government bonds. By the end of the year we had allocated over 20% to US Treasuries, split between very short dated where the yield to maturity is now very attractive and TIIPs, as an inflation hedge.
- We actively used US ten year Treasuries to add alpha and duration when appropriate.

Outlook

The Coronavirus is skewing the outlook somewhat. The financial markets have been quite sanguine and are pricing in a V shaped rebound post a poor first quarter. The uncertainty is whether the shutdown in China and knock-on supply chain and demand effects has a far more damaging effect than is being priced in. The markets are still assuming that the Federal Reserve and to a lesser extent other central banks will continue to provide support should things weaken significantly. The bar to cutting rates in an election year is very high and so we would need to see significant deterioration for the Federal Reserve to cut again. Overall, the economic environment is ok, with low inflation so if we do see short-term volatility its duration should be short all things remaining equal.

MIRABAUD - GLOBAL EQUITY HIGH INCOME

In 2019 the MIRABAUD - GLOBAL EQUITY HIGH INCOME A shares rose +25.6%. The MSCI AC World AC Index rose +26.6%.

As per the fund's design, the majority of relative returns continues to be driven by stock selection.

The year started in very strong fashion as the Fed reversed course and moved quickly from a tightening cycle to a loosening cycle. After a very weak Q4 2018, the market roared back in January, and then continued it's upwards trajectory during the rest of the year.

The biggest stock contributors to relative performance were: Blackstone (+64%), Technopro (+74%), Taiwan Semiconductor (+64%), Cogent Communications (+52%), and Microsoft (+57%)

Conversely, the biggest drags on performance were: China Everbright (-7%), CME (+10%), Royal Dutch Shell (+5), Cisco (+8%), Infosys (+11%)

The sub-fund delivered a 3% gross yield on the A shares USD share class

Moving into 2020, we are later into the cycle, and given the strong performance of equity markets in 2019, and with valuations back at highs, we expect a more muted market performance. For the market to go significantly higher we would need to see a strong acceleration in corporate earnings, or more liquidity pumped into markets by central banks.

We continue to focus on finding long-term stock winners that can perform in any environment as a result of thematic tailwinds and that also fit our ESG criteria.

MIRABAUD - EQUITIES GLOBAL FOCUS

In 2019 the MIRABAUD - EQUITIES GLOBAL FOCUS A shares rose +27.5%, outperforming the MSCI AC World AC Index, which rose +26.6%.

As per the fund's design, the majority of relative returns continues to be driven by stock selection.

The year started in very strong fashion as the Fed reversed course and moved quickly from a tightening cycle to a loosening cycle. After a very weak Q4 2018, the market roared back in January, and then continued its upwards trajectory during the rest of the year.

The biggest stock contributors to relative performance were: Technopro (+74%), Mani (+92%), Mastercard (+59%), URI (+31%) and Edwards Lifesciences (+52%)

Conversely, the biggest drags on performance were: Church & Dwight (-6.5%), China Everbright (-10%), Ulta (-6.9%), CME (+9%) and Texas Instruments (0%)

Moving into 2020, we are later into the cycle, and given the strong performance of equity markets in 2019, and with valuations back at highs, we expect a more muted market performance. For the market to go significantly higher we would need to see a strong acceleration in corporate earnings, or more liquidity pumped into markets by central banks.

We continue to focus on finding long-term stock winners that can perform in any environment as a result of thematic tailwinds and that also fit our ESG criteria.

MIRABAUD - US SHORT TERM CREDIT FUND

Annual Management Report 2019

2019 was a very strong year for almost all asset classes after a very poor year of returns in 2018. The fourth quarter of 2018 was ugly for all fixed income asset classes. Fears of a Fed mistake by over hiking, trade wars, Italy, Brexit, all weight upon sentiment and risk. December saw a complete capitulation as Fed Powell's hawkish comments combined with seasonal illiquidity and year-end risk adjustment resulted in an ugly move down in financial markets. As a result, the Federal Reserve blinked and went from a dialogue propounding further rate rises to one of rate stability/cuts. This change of direction resulted in a very strong first quarter 2019, with January seeing 4.018% of total returns for the ICE Global High Yield index.

As 2018 was characterised by a rapid widening in Treasury spreads, with duration selling off on the back of interest rate rises in the US, so 2019 was the exact opposite - spreads rapidly tightened with the markets seeing central banks' change in direction as being the support mechanism there should things deteriorate. As a result, economic data and otherwise significant events such as the ratcheting up of trade tensions between the US and China had a much smaller effect than would otherwise be the case.

Interestingly it was better quality, longer duration fixed income that outperformed. A "reluctant rally" as investors were not convinced enough to buy cyclicals and lower quality credit. There was significant decompression between better quality developed market bonds and high yield and the same trend was evident in emerging markets. The technical strength remained strong all year, with huge inflows into investment grade throughout the year.

The Investment strategy of the Fund is to generate solid, low volatility returns, primarily in the US corporate credit market. The limits upon maturity for both the investment grade and High Yield investments, means that essentially it is a buy and hold strategy, with activity taking place at certain points during a year to sell credits that have rolled down the maturity curve and replace them with higher yielding longer maturity bonds (within the maturity restrictions of the Fund). We also actively hedge the duration risk of the investment grade portion to dampen volatility and limit the downside risk as far as we can when short maturity bonds widen at certain times during the cycle, usually when interest rates are rising.

Following the widening in US interest rates through 2018, we felt that the returns available in short dated investment grade and government bonds were very attractive compared to their risk profile. We significantly shortened the duration of the fund to close to one year, to lock in these yields and reduce volatility.

The Fund had a positive year of performance, at the top end of expectations, with strong relative performance and it outperformed its LIBOR benchmark.

US LIBOR tightened significantly alongside the cuts in interest rates by the Federal Reserve, finishing the year close to 1.9%. Short dated credit spreads rallied in the first quarter as markets bounced back from the fourth quarter of 2018 sell off, but then remained largely range bound, with the spread over LIBOR on the ICE US HY 1-3yr index -87bps and the US Investment Grade index -48bps on the year. This resulted in good positive performance in the fund from both credit and duration.

Management Report (continued)

The primary investment themes for the fund during 2019 were as follows:

- Credit Selection was good and we continued to focus on solid fundamentals across the US credit spectrum, and a high conviction that short dated bonds can be repaid without access to public debt markets.
- We reduced the duration of the bond holdings and removed the last of our interest rate hedges.
- We kept the high yield allocation in the fund below previous levels, focused mostly in BB rated credits.
- We reduced exposure to Energy and Healthcare as prior high conviction holdings rolled off, and replaced these with an increase in Government bonds and less cyclical sectors such as TMT.

Outlook

The Coronavirus is skewing the outlook somewhat. The financial markets have been quite sanguine and are pricing in a V shaped rebound post a poor first quarter. The uncertainty is whether the shutdown in China and knock-on supply chain and demand effects has a far more damaging effect than is being priced in. The markets are still assuming that the Federal Reserve and to a lesser extent other central banks will continue to provide support should things weaken significantly. The bar to cutting rates in an election year is very high and so we would need to see significant deterioration for the Federal Reserve to cut again. Overall, the economic environment is ok, with low inflation so if we do see short-term volatility its duration should be short all things remaining equal.

MIRABAUD - DISCOVERY EUROPE EX-UK

2019 was a dramatic year for equities. After the relief rally of the first quarter and consolidation over summer we saw a strong run into the fourth quarter built upon renewed confidence in the UK after the significant conservative victory and successful trade talks between the US & China.

The performance of the newly renamed Discovery Europe I fund EUR class was +25.87%, 557bps behind the benchmark and +25% since inception. The Discovery Europe Ex-UK I fund GBP class was +22.37%, 109bps ahead of the benchmark and +59.06% since inception.

The year started with significant investor caution, with concerns about the advanced stage of the economic cycle and rising trade tensions weighing on stocks. As the year unfolded, economic activity remained robust, and towards the end of the year uncertainty reduced within the geopolitical sphere, with signs of a thawing in trade tensions between the US and China, and a decisive Conservative party victory in the UK and a rejection of socialist reforms. Looking forward to 2020, investors are weighing the likely pressure on president Trump to maintain strong economic momentum ahead of a US presidential election in November against the expansion in the US economy, which is more than a decade old. Further risks are posed by low unemployment and commodity prices, both of which have the scope to eat into historically high corporate profit margins.

We continue to focus on uncovering companies with a robust competitive advantage, aligned management, and the ability to sustain material growth while generating attractive returns on capital. While each year brings risks, we remain confident in our approach and our ability to generate alpha for you now and over the long term.

MIRABAUD - GLOBAL DIVERSIFIED CREDIT FUND*

Annual Management Report 2019

2019 was a very strong year for almost all asset classes after a very poor year of returns in 2018. The fourth quarter of 2018 was ugly for all fixed income asset classes. Fears of a Fed mistake by over hiking, trade wars, Italy, Brexit, all weight upon sentiment and risk. December saw a complete capitulation as Fed Powell's hawkish comments combined with seasonal illiquidity and year-end risk adjustment resulted in an ugly move down in financial markets. As a result, the Federal Reserve blinked and went from a dialogue propounding further rate rises to one of rate stability/cuts. This change of direction resulted in a very strong first quarter 2019, with January seeing 4.018% of total returns for the ICE Global High Yield index.

As 2018 was characterised by a rapid widening in Treasury spreads, with duration selling off on the back of interest rate rises in the US, so 2019 was the exact opposite - spreads rapidly tightened with the markets seeing central banks' change in direction as being the support mechanism there should things deteriorate. As a result, economic data and otherwise significant events such as the ratcheting up of trade tensions between the US and China had a much smaller effect than would otherwise be the case.

Interestingly it was better quality, longer duration fixed income that outperformed. A "reluctant rally" as investors were not convinced enough to buy cyclicals and lower quality credit. There was significant decompression between better quality developed market bonds and high yield and the same trend was evident in emerging markets. The technical strength remained strong all year, with huge inflows into investment grade throughout the year.

For the Global Diversified Credit Bond Fund, the total return for full year 2019 was at the higher end of expectations. The Fund focuses on risk-adjusted returns, with lower volatility than its peers. The Fund bought one-year maturity bonds in December 2019 and January 2020 when the short end was higher, given expectations of further rate rises. We also reduced some of the local currency risk in the Fund given the volatility of this area in 2018.

In terms of positioning, the Fund did not have aggressive duration exposure but exposure to high yield and emerging markets offset this. We did not feel the need to "over Beta" the Fund in order to reach our return targets. The average rating at the end of 2018 was BB-, with very little exposure to cyclicality (only 2% in Basic Materials for example).

The investment strategy of the fund revolves around a disciplined, risk-adjusted approach to investing which uses a flexible top down asset allocation framework based upon global themes cycle analysis and their relationship to global fixed income returns. Duration, asset class mobility and credit management are the key drivers of Alpha generation in the process which encompasses a rigorous bottom up credit selection process that dovetails with the top down asset allocation framework. There is no geographical nor fixed income asset class bias, only the desire to invest in the best geographies and parts of Fixed Income at the appropriate time.

The Fund's relative performance was strong in 2019, and outperformed its Libor benchmark.

^{*} Refer to Note 1

Management Report (continued)

The primary investment themes for the fund during 2019 were as follows:

- We continued to reduce exposure to Europe for valuation reasons, with a greater emphasis upon the US credit market and Emerging Markets.
- We reduced our High Yield exposure in the fourth quarter of 2018, which proved to be the right decision and shielded the Fund from further underperformance as risk sold off in December.
- Our exposure to Emerging Markets over the course of the year, added generally to performance in both local and hard currency.
- We continued to add to short dated US government bonds and credit, offering very attractive total returns whilst dampening down the Fund volatility.

Outlook

The Coronavirus is skewing the outlook somewhat. The financial markets have been quite sanguine and are pricing in a V shaped rebound post a poor first quarter. The uncertainty is whether the shutdown in China and knock-on supply chain and demand effects has a far more damaging effect than is being priced in. The markets are still assuming that the Federal Reserve and to a lesser extent other central banks will continue to provide support should things weaken significantly. The bar to cutting rates in an election year is very high and so we would need to see significant deterioration for the Federal Reserve to cut again. Overall, the economic environment is ok, with low inflation so if we do see short-term volatility its duration should be short all things remaining equal.

2018 was a difficult year for investors generally after a very strong 2017. The year started well with Energy driving a strong January. High Yield and general risk drove market performance. Government bonds were under pressure as fears of inflation and more rapid interest rate rises in the US took hold. As the market began to re-price interest rate expectations, front end bonds underperformed as the curve flattened. The Fund's hedges worked but on the flip side anything with interest rate sensitivity underperformed. In periods of market stress all asset classes become correlated for short periods of time, and as we moved through the first quarter of 2018, gold, High Yield, Investment Grade, EM and government bonds all sold off.

The difficulty with 2018 was that not only did volatility rise, and liquidity become more challenged, an already fragile investor environment was exacerbated by idiosyncratic events. The Treasury sell off was immediately followed by a risk off Treasury rally as President Trump imposed tariffs on China and embarked upon a unilateral trade war with not only China but the European Union as well with autos. Sanctions on Rusal also roiled the entire aluminium supply chain. At the time time there was a tech sell off on the back of Facebook's data security issues. Whilst these issues eventually dampened down, we then saw an increase in Emerging Markets risk with Argentina seeking an IMF rescue, Obrador winning in Mexico, sanctions on Russia, instability in Brazil and Turkey. This eventually resulted in a massive EM sell off over the summer months led by Turkey. Europe also started to see some signs of pressure with ongoing problems in Italy around the election and a new anti-EU populist government.

September saw the peak of the year. Up until this point CCC rated securities had significantly outperformed given robust US economic growth and a dissipation of trade rhetoric. In addition, Turkey stabilised as a result of increasing interest rates to 24%. This led to an EM bounce back for the rest of the month.

The fourth quarter of 2018 was ugly for all fixed income asset classes. Fears of a Fed mistake by over hiking, trade wars, Italy, Brexit, all weight upon sentiment and risk. December saw a complete capitulation as Fed Powell's hawkish comments combined with seasonal illiquidity and year end risk adjustment resulted in an ugly move down in financial markets.

The Fund's relative performance was below the median in 2018 and underperformed its Libor benchmark. The timing of the launch of the Fund was unfortunate. Whilst we kept a significant weighting to cash at launch, that did not offset the pressure on both High Yield and Emerging Markets from February onwards. Our exposure to local EM bonds was the primary driver of underperformance. The underlying credits themselves performed well in local currency terms but the steep decline in The Argentine Peso, Mexican Peso, South African Rand and Turkish Lira all impacted the Fund during 2018. We benefitted from the rebound in the second half of the year especially from exposure to Turkey but this did not recoup all of the lost performance. In the fourth quarter we reduced risk somewhat and

The primary investment themes for the fund during 2018 were as follows:

- We had limited exposure to Europe for valuation reasons, with a greater emphasis upon the US credit market.
- We had significant exposure to both hard and local EM.
- We reduced our High Yield and EM exposure in the fourth quarter, which proved to be the right decision and shielded the Fund from further underperformance as risk sold off in December.
- Our exposure to local currency EM detracted from performance in 2018.

Outlook

2019 still holds many of the risks we encountered during 2018. US/China trade, the withdrawal of QE globally, Brexit, a slowing Euro economy, EM volatility to name a few. We have repositioned the Fund with this in mind and feel confident that we are well positioned to deal with less liquidity and more uncertainty as we move closer to the end of the cycle. Given the sell off at the end of 2018, many parts of Fixed Income now look very attractive and that also has to be taken into consideration. The US economy is still robust and we continue to like the US as an investment opportunity versus Europe. We are also looking more at EM given valuations and what has already been priced in. If we do see a weaker USD that will provide support for EM performance.

MIRABAUD - GLOBAL EMERGING MARKET BOND FUND

The sub-fund returned +12.92% in 2019, versus the JP Morgan Hard Currency/Local Currency 50-50 return of +13.35%.

Returns were evenly distributed across both segments denominated in US dollar and local currencies. Given the funds lower duration profile relative to the Benchmark, returns were marginally lower. Renewed investor interest pushed inflows into the asset class, particularly in hard currency.

From a country point of view, Russia delivered the highest contribution followed by Turkey, Mexico and Brazil. Russia and Brazil experienced its lowest rates of inflation in 20 years which fuelled a strong rally in domestic debt. Turkey made an impressive turnaround from depressed valuations as the government demonstrated once again a high degree of resilience to absorb economic and political shocks. The fund reduced considerably its exposure to Turkish bonds towards the end of the year.

Argentina and Lebanon detracted in performance, with investor confidence quite negative in both cases. The fund was able to digest these losses through reduced exposure and oversized gains elsewhere.

In the case of Argentina, the primary elections in August all but decided the general election in October which saw the incumbent president Mauricio Macri, lose to Alberto Fernandez from the Peronist opposition. Investors viewed this change in political direction as extremely negative and prices fell sharply. The new government took over at the beginning of December. Negotiations with the IMF and creditors were delayed into 2020.

The government in Brazil was successful in passing a meaningful pension reform package through both upper & lower houses of parliament. Low inflation and potential higher growth drove credit spreads and interest rates lower. However, the Brazilian real, did not benefit from either of these trends

Ecuador experienced a high degree of volatility in the November December period, prior to the parliament approving the tax reform package. The IMF agreed to a revised program with target fiscal consolidation of 3.9% over 3 years.

Throughout the last quarter of 2019, the Bond Connect account in Hong Kong went live, which enabled the fund to invest in Chinese local debt for the first time. We progressively built positions across both government and state-owned entities. China's domestic debt market not only is the largest across all Emerging Markets but has now surpassed Japans to become the second largest in the world behind the United States.

During Q4, we also implemented a long currency swap with Nomura's EMFX momentum Index. The Index captures momentum across the most liquid Emerging Market currencies globally, providing the fund with some degree of protection in the event of large and continued depreciations.

Overall, 2019 has been a very positive year for Emerging Market Debt, with double digit returns across segments and regions (sovereign & corporate in both hard and local currency).

MIRABAUD - EMERGING MARKET 2024 FIXED MATURITY

The sub-fund was successfully launched during the month of May. As of end 2019, the USD I Class delivered a return of +6.99%.

This is a unique offering that differentiates Mirabaud's efforts in Emerging Market Debt even further.

The timing of the launch was good, and the fund managed to accrue a higher than expected performance during its first 8 months of life.

The fund's specific selection of country exposure and individual bonds has been instrumental in achieving a highly attractive risk-return profile.

Across the 33 countries in which the fund is invested, Turkey delivered the best returns and the highest contribution. The remaining countries in the top 5 performance contributors were Brazil, Ukraine, Belarus and Nigeria.

From a country perspective, Turkey delivered the highest positive contribution, followed by Brazil, Ukraine and Angola.

Argentina and Lebanon detracted from performance with a negative contribution of -1.4% combined. Our aim is to reduce both throughout 2020 in favour of better opportunities.

One of the bonds in the fund was called by the issuer, the proceeds were re-invested in new bonds issued during the quarter at very attractive levels.

A few changes were made in the portfolio during the period under review, partly to take advantage of more attractive opportunities that emerged in the primary market.

We are optimistic about the prospects of this product range which allows for higher degrees of visibility and customization whilst reducing to a minimum the constraints of lack of liquidity in more traditional hard currency funds.

MIRABAUD - EMERGING MARKET 2025 FIXED MATURITY EURO

The sub-fund was successfully launched at the end of November of 2019.

As of end 2019, the EUR I Class delivered a return of +1.24% .

During the first few weeks and until the end of 2019, exposure was progressively built according to the model portfolio.

Throughout this period, we participated in several attractive new primary issues with ideal characteristics to meet the funds objective.

By the end of the reporting period, the fund was still not fully invested, and held a cash position of 6.7% of NAV.

Independent Auditor's Report

To the Shareholders of MIRABAUD 15, avenue J.F. Kennedy, L-1855 Luxembourg

Opinion

We have audited the financial statements of MIRABAUD (the "Company") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2019 and the statement of operations and the statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at December 31, 2019 and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (the "Law of July 23, 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" ("CSSF"). Our responsibilities under the Law of July 23, 2016 and ISAs are further described in the "responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements" section of our report. We are also independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Independent Auditor's Report (continued)

Responsibilities of the Board of Directors of the Company for the financial statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its sub-funds ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.

Independent Auditor's Report (continued)

- Conclude on the appropriateness of Board of Directors of the Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's or any of its sub-funds ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *"réviseur d'entreprises agréé"*. However, future events or conditions may cause the Company or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors of the Company regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements as at December 31, 2019

NOTE 1 GENERAL

MIRABAUD (the "Company") is a Société d'Investissement à Capital Variable ("SICAV" - open-ended investment company) incorporated in Luxembourg on February 11, 2004, in accordance with the law of August 10, 1915, on commercial companies, as amended, and Part I of the amended law of December 17, 2010 (the "Law"), on Undertakings for Collective Investment ("UCIs"). The Company's articles of incorporation have been filed with the Luxembourg Trade and Companies Register, from which copies may be obtained.

As at December 31, 2019, the Company has set up the following sub-funds:

- MIRABAUD - EQUITIES ASIA ex JAPAN

The reference currency of the sub-fund is the USD. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds), at least two-thirds of its total assets in Asian, excluding Japanese, equities and/or other equity-type transferable securities of issuers that have their registered office or carrying out the majority of their business in Asia.

- MIRABAUD - DISCOVERY EUROPE

The reference currency of the sub-fund is the EUR. The sub-fund primarily invests, directly or indirectly (for example through derivatives, structured products or investment funds) in equities and equity-type transferable securities (such as ADR and GDRs) of small and medium-sized companies that have at the time of their purchase a market cap which is below EUR 15 billion and either have their registered office in Europe, or carrying out of the majority of their activities in Europe or generating the majority of their revenue from Europe or listed on a European Regulated Market. These companies may include European emerging markets companies, including Russian companies.

As at September 2, 2019 the Board of Directors resolved to change the denomination of the sub-fund MIRABAUD - EQUITIES PAN EUROPE SMALL AND MID to MIRABAUD - DISCOVERY EUROPE.

- MIRABAUD - EQUITIES SWISS SMALL AND MID

The reference currency of the sub-fund is the CHF. The sub-fund primarily invests, directly or indirectly (for example through derivatives, structured products or investment funds), in equities and equity-type transferable securities of small and medium-sized Swiss companies being companies having their registered office in Switzerland or having the majority of their activities in Switzerland. These companies include Swiss companies whose capitalization on stock exchange is less or equal to 1.00% of the capitalization on the stock exchange of Switzerland or belonging to the SPI EXTRA index.

- MIRABAUD - EQUITIES SPAIN

The reference currency of the sub-fund is the EUR. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds), at least 75% of its assets in equities or other equity-type transferable securities of issuers that have their registered office or carrying out the majority of their business in Spain.

- MIRABAUD - UK EQUITY HIGH ALPHA

The reference currency of the sub-fund is the GBP. The sub-fund principally invests, directly or indirectly (for example through derivatives, structured products or investment funds), in equities and equity-type transferable securities of issuers domiciled in or carrying out the majority of their business in the United Kingdom, without specialising in any particular industrial sector.

- MIRABAUD - CONVERTIBLE BONDS EUROPE

The reference currency of the sub-fund is the EUR. The sub-fund invests, primarily its assets in bonds, convertible into equities of companies as well as in synthetic convertible transferable securities of issuers having their registered office or carrying out the majority of their business in Europe denominated in various currencies. The sub-fund's exposure to currencies other than the sub-fund's reference currency is limited to 10%.

- MIRABAUD - EQUITIES FRANCE

The reference currency of the sub-fund is the EUR. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds), at least 75% of its assets in equities and equity-type transferable securities of issuers domiciled in or carrying out the majority of their business in France or belonging to the CAC 40 index, without specialising in any particular industrial sector.

- MIRABAUD - EQUITIES GLOBAL EMERGING MARKETS

The reference currency of the sub-fund is the USD. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds) at least 70% of its total net assets in equities and equity related securities (such as ADRs and GDRs) of issuers that have their registered office or carrying out the majority of their business in emerging markets including countries in Latin America, South East Asia, Africa, Eastern Europe (including Russia) and the Middle East.

- MIRABAUD - SERENITE

The reference currency of the sub-fund is the EUR. The sub-fund has a diversified investment strategy, gaining exposure either directly or indirectly through investment in investment funds or in structured products to different types of asset classes: equity, bond, money market and/or pursuing absolute return strategies.

- MIRABAUD - GLOBAL HIGH YIELD BONDS

The reference currency of the sub-fund is the USD. The sub-fund invests at least two thirds of its net assets in high yield bonds denominated in any currency issued by corporate entities having their registered office across the world, but with a primary focus on corporate entities having their registered office in North America and Europe. The sub-fund's exposure to currencies other than the sub-fund's reference currency may be hedged against the USD.

- MIRABAUD - CONVERTIBLE BONDS GLOBAL

The reference currency of the sub-fund is the USD. The sub-fund invests, primarily its assets in bonds, convertible into equities of companies as well as in synthetic convertible transferable securities of issuers having their registered office or carrying out the majority of their business in the United States, Europe and Asia, including emerging markets. The sub-fund's exposure to currencies other than the sub-fund's reference currency is limited to 10%.

As at December 6, 2019, the Board of Directors of the Company has decided to merge the fund ALTITUDE CONVERTIBLES MONDE, a *French société d'investissement à capital variable* into the sub-fund MIRABAUD - CONVERTIBLE BONDS GLOBAL.

- MIRABAUD - GLOBAL STRATEGIC BOND FUND

The reference currency of the sub-fund is the USD. The sub-fund has adopted an active asset allocation approach and invests across a broad range of fixed income instruments and debt securities denominated in any currency, issued by sovereign or corporate issuers worldwide (including issuers in emerging markets), regardless of their credit rating and of the overall portfolio duration (which may be positive or negative). The sub-fund's exposure to currencies other than the sub-fund's reference currency may be hedged against the USD.

- MIRABAUD - GLOBAL EQUITY HIGH INCOME

The reference currency of the sub-fund is the USD. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds), into equities and equity-type transferable securities of issuers worldwide (including closed-ended real estate investment trusts).

- MIRABAUD - EQUITIES GLOBAL FOCUS

The reference currency of the sub-fund is the USD. The sub-fund invests, directly or indirectly (for example through derivatives, structured products or investment funds), into equities and equity-type transferable securities (such as ADRs and GDRs) of issuers worldwide including real estate investment trusts.

- MIRABAUD - US SHORT TERM CREDIT FUND

The reference currency of the sub-fund is the USD. The sub-fund primarily invests (directly or indirectly through derivatives such as futures, interest rates swaps and CDS for protection purposes) in short term fixed income instruments and debt securities of US corporate as well as sovereign issuers denominated in USD.

- MIRABAUD - DISCOVERY EUROPE EX-UK

The reference currency of the sub-fund is the EUR. The sub-fund primarily invests, directly or indirectly (for example through derivatives, structured products or investment funds) in equities and equity-type transferable securities (such as ADR and GDRs) of small and medium-sized companies that have at the time of their purchase a market capitalisation which is below EUR 15 billion and either have their registered office in Europe ex-UK, or carry out the majority of their activities in Europe ex-UK or generate the majority of their revenue from Europe ex-UK or are listed on a European ex-UK Regulated Market. These companies may include European emerging markets companies, including Russian companies.

As at September 2, 2019 the Board of Directors resolved to change the denomination of the sub-fund MIRABAUD - EQUITIES EUROPE EX-UK SMALL AND MID to MIRABAUD - DISCOVERY EUROPE EX-UK.

- MIRABAUD - GLOBAL DIVERSIFIED CREDIT FUND (until March 15, 2019)

The reference currency of the sub-fund is the USD. The sub-fund adopts an active asset allocation approach and invests across a broad range of fixed income instruments and debt securities denominated in any currency, issued by sovereign or corporate issuers worldwide (including issuers in emerging markets), regardless of their credit rating (including high yield instruments) and of the overall portfolio duration (which may be positive or negative). The subfund's exposure to currencies other than the sub-fund's reference currency may be hedged against the USD.

As at March 15, 2019, the Board of Directors resolved to dissolve the sub-fund MIRABAUD - GLOBAL DIVERSIFIED CREDIT FUND.

- MIRABAUD - GLOBAL EMERGING MARKET BOND FUND

The reference currency of the sub-fund is the USD. The sub-fund has adopted an active asset allocation approach and invests across a broad range of fixed income instruments and debt securities denominated in any currency, issued by sovereign or corporate issuers in emerging and frontier markets, regardless of their credit rating (including high yield instruments) and of the overall portfolio duration (which may be positive or negative). The sub-fund's exposure to currencies other than the sub-fund's reference currency may be hedged against the USD.

- MIRABAUD - EMERGING MARKET 2024 FIXED MATURITY (launched on April 30, 2019)

The reference currency of the sub-fund is the USD. The sub-fund invests in a diversified portfolio of emerging market fixed income debt securities such as bonds, notes or other similar fixed-income or floating-rate securities denominated in or hedged against the USD, issued by sovereign, quasi-sovereign and corporate issuers.

- MIRABAUD - EMERGING MARKET 2025 FIXED MATURITY EURO (launched on November 25, 2019)

The reference currency of the sub-fund is the EUR. The Sub-Fund seeks to achieve an attractive yield by investing mainly in EUR and USD denominated debt instruments with a final maturity of up to December 31, 2025. The sub-fund invests in a diversified portfolio of emerging market fixed income debt securities such as bonds, notes or other similar fixed-income or floating-rate securities denominated in or hedged against the EUR, issued by sovereign, quasi-sovereign and corporate issuers.

The following classes were launched during the year ended December 31, 2019:

NOTE 2 SHARES OF THE COMPANY

Within a single sub-fund, the Board of Directors of the Company may issue one or more share classes characterised either by different distribution policies or by different subscription, redemption, management or distribution fee structures, or by any other distinctive criteria.

All shares, of any sub-fund or class of Shares, are issued in registered form only. No certificate will be issued.

NOTE 3

SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

a) Presentation of financial statements

The financial statements are prepared in accordance with generally accepted accounting principles and with the legal reporting requirements applicable in Luxembourg relating to undertakings for collective investment.

b) Combined financial statements

The combined financial statements for the Company are expressed in Euro and correspond to the sum of items in the financial statements of each sub-fund, converted into Euro at the exchange rate prevailing at the reporting date.

c) Valuation of investments

The value of cash at hand and on deposit, bills and demand notes and accounts receivable, prepaid expenses, dividends and interest declared or due but not yet collected, shall be deemed to be the full value thereof. However, if it is unlikely that this value will be received in full, the value thereof will be determined deducting the amount the Board of Directors of the Company considers appropriate to reflect the true value thereof.

The value of all transferable securities listed or traded on a stock exchange are determined based on the last available price published on the market considered to be the main market for trading the transferable securities in question.

The value of all transferable securities traded on another regulated market, operating regularly, recognised and open to the public shall be assessed based on the most recent price available.

Inasmuch as transferable securities in a portfolio are not traded or listed on a stock exchange or another Regulated Market or if, for securities listed or traded on such an exchange or other market, the price determined in accordance with (b) or (c) above is not representative of the real value of these transferable securities, these are valued by the Board of Directors of the Company, based on their probable realisation value, which are estimated in a prudent manner and in good faith.

The sale price of forward contracts and options not traded on a stock exchange is determined in compliance with the rules laid down by the Board of Directors according to the standard criteria for each category of contract. The sale price of forward contracts and options traded on a stock exchange is based on the closing prices published by the stock exchange on which the Company concluded the contracts in question. If a forward contract could not be sold on the Valuation Day concerned, the criteria for determining the sale price of said forward contract shall be laid down by the Board of Directors with prudence and in good faith.

Undertakings for collective investment are valued at their last known Net Asset Value ("NAV") or offer price in the case of quoted prices.

Any other securities and assets are valued at their foreseeable sale price estimated with prudence and in good faith according to the procedures established by the Board of Directors of the Company.

d) Foreign currency translation

The accounts for each sub-fund are held in the currency in its reference currency and the financial statements of the respective sub-funds are expressed in this currency.

The acquisition cost of the securities expressed in a currency other than that of the relevant sub-fund is converted into the currency of the sub-fund at the exchange rates prevailing on the date the securities were purchased.

Income and expenses denominated in a currency other than that of the relevant sub-fund are converted into the currency of the sub-fund at the exchange rates prevailing on the date of the transaction.

On the balance sheet date, the valuations of the securities (determined in the manner described above), receivables, bank deposits and debts denominated in a currency other than the currency of the relevant sub-fund are converted into the currency of the sub-fund at the exchange rates prevailing on that date, with any exchange differences resulting from the conversion of the receivables, bank deposits and debts being included in the net foreign exchange profit or loss for the year or period.

e) Net realised gain/(loss) on sales of investments

Net realised gains or losses on sales of securities are calculated on the basis of the weighted average acquisition cost.

f) Futures contracts

The unrealised gains or losses resulting from open positions, if any, are determined on the basis of the last available price at the balance sheet date and are recorded in the statement of net assets and included in the caption "cash at banks". We refer to point c) for valuation principles.

g) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the balance sheet date for the remaining year until maturity. Unrealised gains or losses resulting from forward foreign exchange contracts are recognised in the statement of net assets.

h) Credit Default Swaps ("CDS")

A CDS is a bilateral financial agreement whereby a counterparty (the protection buyer) pays a premium for the commitment of the protection seller to pay a certain amount if one or several of the CDS underlying reference issuers experience a credit event as provided for by the agreement.

If a credit event occurs:

- When the CDS is physically settled, the protection buyer acquires the right to sell a specific bond issued by the reference issuer at its nominal value (or at another reference value or execution price)

- When the CDS is cash settled, the protection buyer is entitled to receive a cash amount equal to the difference between the notional and the current market value of the specific bonds issued by the reference issuers that were affected by the credit event.

Credit events generally includes bankruptcy, insolvency, judicial settlement/compulsory liquidation, deferral or non-payment of outstanding debts.

i) Total Return Swaps ("TRS")

Total return swaps are instruments for the purpose of generating additional revenues and the purpose of cost efficient management, reducing volatility and for investment purposes. The proportion of such sub-fund's net assets that is subject to TRS is calculated as the sum of notionals of the derivatives used and the maximum and expected proportion of assets that can be subject to those instruments.

j) Income

Dividends, net of all withholding tax, are recorded at the ex-dividend date.

The interest on bonds and investments is recorded in the statement of operations and changes in net assets, net of any withholding tax. The interest is recorded on an accrual basis.

k) Transaction fees

The transaction fees represent the costs incurred by each sub-fund in investment purchases and sales. These transaction fees may include brokerage fees, bank charges, foreign taxes, depositary fees and other equity transaction charges. They are included in the statement of operations and changes in net assets.

I) Formation expenses

Formation expenses are amortised over a maximum period of five years.

NOTE 4 MANAGEMENT FEES

Management fees are paid to the Management Company, which pays the various service providers to which functions have been delegated, except for fees charged by the Central Administration.

Management fees cannot exceed the maximum limits set out in the prospectus.

Notes to the Financial Statements as at December 31, 2019 (continued)

For the year ended December 31, 2019, the management fees rates applied were:

| Sub-fund | Class | Management fee (p.a. |
|---|------------|-------------------------|

Notes to the Financial Statements as at December 31, 2019 (continued)

The Company may invest in other UCITS or Other UCIs provided the management fees (excluding performance fee, if any) of other UCITS or Other UCIs may not exceed 4%.

NOTE 5

FLAT FEES

The Management Company is entitled to receive a Flat Fee to cover operating, administrative and servicing expenses such as but not limited to ongoing depositary fees and safekeeping charges payables to the depositary, fees for fund administration (including the Class of Shares hedging when applicable), transfer agency, register, paying and domiciliary services payable to the Administrative Agent. The Prospectus of the Company describes other fees and costs which are also covered by the Flat fee. These fees are accrued daily and payable monthly at an annual rate which may vary for each sub-fund/class of shares of the Company.

The Flat Fee also covers the costs and expenses such *Taxe d'Abonnement* and directors' fees.

The effective level of the Flat Fee applied as at December 31, 2019 is the following:

NOTE 6 "TAXE D'ABONNEMENT"

The Company is subject, in the Grand Duchy of Luxembourg, to a subscription tax ("taxe d'abonnement") corresponding to 0.05% per annum of its net assets. The rate is reduced to 0.01% for sub-funds or share classes held solely by institutional investors within the meaning of Article 174 of the Law ("Institutional Investors"). This tax is payable quarterly on the basis of the Company's net assets at the end of the quarter in question. No stamp duty or tax shall be payable in the Grand Duchy of Luxembourg when the Company's shares are issued with the exception of a fixed royalty of EUR 1,250, which was paid when the Company was incorporated. No tax is payable in the Grand Duchy of Luxembourg in respect of realised or unrealised gains on the Company's assets. The value of the net assets represented by unit/shares held in other Luxembourg undertakings for collective investment is exempt from the Subscription tax, provided such units/shares have already been subject to the tax.

NOTE 7 PERFORMANCE FEES

1) MIRABAUD - CONVERTIBLE BONDS EUROPE

The Management Company is entitled to a performance fee corresponding to 20% of the outperformance (the "Performance Fee") of the A, F, D, I and N classes of Shares over the benchmark index ("Thomson Reuters Europe Focus Convertible Bond Index Hedged" in the reference currency of the respective classes of Shares) during a reference period (the "Performance Period"), subject to a High Water Mark. The High Water Mark is the greater of the NAV per share at the end of any Performance Period where a Performance Fee has been paid or the initial offer price per share. The Performance Fee is payable in arrears at the end of the Performance Period. It shall be calculated and accrued in the NAV on a daily basis.

The Performance Fee is calculated on the basis of the NAV after deducting all fees and liabilities and the management fee (but not the Performance Fee), and adjusted to account for all subscriptions and redemptions in the reference period. If shares are redeemed at a date other than the date of the payment of the performance fee, when a performance fee has been provisioned, the portion of the performance fee attributable to redeemed shares is definitely accrued to the Management Company. It will be paid at the end of the closest performance calculation year.

For the year ended December 31, 2019, the fee accrued amounts to EUR 150,537.63.

2) MIRABAUD - SERENITE

The Management Company is entitled to a performance fee corresponding to 15% of the outperformance (the "Performance Fee") of the A, I and N classes of Shares over the benchmark index "EONIA" plus 100 basis points during a reference period ("the performance period"). The Performance Fee is payable in arrears at the end of the performance period. It shall be calculated and accrued in the NAV on a weekly basis.

The performance fee is calculated on the basis of the NAV after deducting all fees and liabilities and the management fee (but not the performance fee), and adjusted to account for all subscriptions and redemptions in the reference period. If shares are redeemed at a date other than the date of the payment of the performance fee, when a performance fee has been provisioned, the portion of the performance fee attributable to redeemed shares is definitely accrued to the Management Company. It will be paid at the end of the closest performance calculation year.

For the year ended December 31, 2019, the fee accrued amounts to EUR 359,655.76.

3) MIRABAUD - CONVERTIBLE BONDS GLOBAL

The Management Company is entitled to a performance fee corresponding to 20% of the outperformance (the "Performance Fee") of the A, D, F, I and N classes of Shares over the benchmark index "Thomson Reuters Global Focus Convertible Bond Index Hedged" in the reference currency of the respective classes of Shares during a reference period (the "Performance Period"), subject to a High Water Mark. The High Water Mark is the greater of the NAV per share at the end of any Performance Period where a Performance Fee has been paid or of the initial offer price per share. The Performance Fee is payable in arrears at the end of the Performance year. It shall be calculated and accrued in the NAV on a daily basis.

The Performance Fee is calculated on the basis of the NAV after deducting all fees and liabilities and the management fee (but not the Performance Fee), and adjusted to account for all subscriptions and redemptions in the reference period. If shares are redeemed at a date other than the date of the payment of the performance fee, when a performance fee has been provisioned, the portion of the performance fee attributable to redeemed shares is definitely accrued to the Management Company. It will be paid at the end of the closest performance calculation year.

For the year ended December 31, 2019, the fee accrued amounts to USD 665,784.69.

4) MIRABAUD - EQUITIES GLOBAL FOCUS

The Management Company is entitled to a performance fee corresponding to 10% of the outperformance (the "Performance Fee") of the IP and NP Classes of Shares over the benchmark index "MSCI AC World Net Return" in the reference currency of the respective Classes of Shares during a reference period (the "performance period"), subject to a High Water Mark. The High Water Mark is the greater of the NAV per share at the end of any performance period where a Performance Fee has been paid or the initial offer price per share. The Performance Fee is payable in arrears at the end of the performance year. It is calculated and accrued in the NAV on a daily basis.

The Performance Fee is calculated on the basis of the NAV after deducting all fees and liabilities and the Management Fee (but not the Performance Fee), and adjusted to account for all subscriptions and redemptions in the reference period. If shares are redeemed at a date other than the date of the payment of the Performance Fee, when a Performance Fee has been provisioned, the portion of the Performance Fee attributable to redeemed shares is definitely accrued to the Management Company. It will be paid at the end of the closest performance calculation year.

For the year ended December 31, 2019, there is no performance fee accrued paid.

NOTE 8 EXCHANGE RATES AS AT DECEMBER 31, 2019

The EUR exchange rates used in drawing up the Company's consolidated statements are:

1 EUR = 1.086973 CHF 1 EUR = 0.847330 GBP 1 EUR = 1.122500 USD

NOTE 9 SWING PRICING

A sub-fund may suffer from dilution of the NAV per share due to investors buying or selling shares in a sub-fund at a price that does not reflect dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

In order to counter this impact, a swing pricing mechanism has been adopted to protect the interests of Shareholders of the sub-fund. If on any valuation date, the aggregate net capital activity of a sub-fund exceeds a pre-determined threshold, as determined and reviewed for each sub-fund on a periodic basis by the Board of Directors of the Company, the net asset value per share will be adjusted upwards or downwards to reflect costs associated with net capital inflows or net capital outflows respectively.

The swing pricing mechanism may be applied across all sub-funds. The extent of the price adjustment is set by the Board of Directors of the Company to reflect dealing and other costs. The amount of the adjustment may vary from sub-fund to sub-fund and will not exceed 2% of the original NAV per share.

The following sub-funds used the swing pricing mechanism during the year ended December 31, 2019:

MIRABAUD - EQUITIES ASIA ex JAPAN MIRABAUD - DISCOVERY EUROPE MIRABAUD - EQUITIES SWISS SMALL AND MID **MIRABAUD - EQUITIES SPAIN** MIRABAUD - CONVERTIBLE BONDS EUROPE **MIRABAUD - EQUITIES FRANCE** MIRABAUD - EQUITIES GLOBAL EMERGING MARKETS MIRABAUD - GLOBAL DIVERSFIED CREDIT **MIRABAUD - SERENITE** MIRABAUD - GLOBAL HIGH YIELD BONDS MIRABAUD - CONVERIBLE BONDS GLOBAL MIRABAUD - GLOBAL STRATEGIC BOND FUND MIRABAUD - GLOBAL EQUITY HIGH INCOME **MIRABAUD - EQUITIES GLOBAL FOCUS** MIRABAUD - US SHORT TERM CREDIT FUND MIRABAUD - EMERGING MARKET 2024 FIXED MATURITY

NOTE 10 TOTAL EXPENSE RATIO ("TER")

Pursuant to the Swiss Fund & Asset Management Association ("SFAMA") Directive, the "Guidelines on the calculation and disclosure of the TER of collective investment schemes", as amended from time to time, the Company is required to publish a TER for the last twelve-month period.

The TER is defined as the ratio between the total operating expenses, excluding transaction costs on purchases and sales of securities, and the relevant sub-fund's / share class' average NAV expressed in its reference currency.

Moreover, for the new share classes launched during the period, operating fees were annualised as stated in point 8 of the SFAMA's "Guidelines on the calculation and disclosure of the TER of collective investment schemes", as amended from time to time. The amounts were annualised whereas certain fixed costs were not split equally over the year.

Notes to the Financial Statements as at December 31, 2019 (continued)

For the year ended December 31, 2019, the TER was:

| Class | Currency | Annualised TER | Annualised TER | Synthetic Tota |

The performance is calculated according to the guidelines of the SFAMA as described in the "Guidelines on the calculation and publication of performance data of collective investment schemes", as amended from time to time. Past performance is not an indicator of current or future returns. The performance data do not take account of the commissions and costs incurred on the

 ^(*) Takes into account the dividend payment.
 (**) Takes into account the dividend payment.
 (**) The performance of unit classes was calculated by comparing the net asset value per share as at the launch date of the unit class with the net asset value per share at the end of the year.

Other Information to Shareholders (unaudited)

1) Remuneration of the members of the Management Company

Details of the Remuneration Policy, including the persons in charge of determining the fixed and variable remunerations of the staff, a description of the key remuneration elements and an overview of how remuneration is determined, is available on the website www.mirabaud-am.com. A paper copy of the summarised Remuneration Policy is available free of charge to the Shareholders upon request.

The total amount of remuneration for the financial year split into fixed and variable remuneration, paid by the Management Company to its staff is as follows:

| TOTAL REMUNERATION PAID IN 2019 | | |
|---------------------------------|---------|--|
| Fixed remuneration | 802,929 | |
| Variable remuneration | 132,500 | |
| TOTAL | 935,429 | |
| Number of beneficiaries | 9 | |
| Carried interest | - | |

The aggregate amount of remuneration broken down by senior management and members of staff of the Management Company whose actions have a material impact on the risks profiles of the UCITS managed is as follows:

| REMUNERATION BREAKDOV | VN |
|---|---------|
| Senior management | 627,539 |
| Staff, whose action have a material impact on the risk profiles of the UCITS | - |
| Other staff | 307,890 |

During the financial year, there were no material changes to the adopted remuneration policy.

MIRABAUD - GLOBAL EMERGING MARKET BOND FUND

| Description | Market Value USD |
|------------------------------------|------------------|
| Counterparty of Total Return Swaps | |
| Nomura Bank International Plc | 12,902,400 |

Other Information to Shareholders (unaudited)(continued)

3) Information on risk measurement

For all sub-funds, the methodology used in order to calculate the global risk exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.

4) Eligible for the PEA or Plan d'Epargne en Actions (French Equity Savings Plan)

The following sub-funds are eligible for the PEA:

- MIRABAUD DISCOVERY EUROPE
- MIRABAUD EQUITIES SPAIN
- MIRABAUD EQUITIES FRANCE

The portfolios of these sub-funds invest at least 75% of their assets in the following eligible securities and rights:

- Equities traded or not traded on a regulated market and investment certificates of companies with their registered office in a member state of the European Union;

- Purchase warrants and/or equity warrants with respect to new or existing shares attributed free of charge by an issuing company to its Shareholders who hold their shares in a PEA;

- Warrants or rights attached to eligible securities;

- Units of SARL or société à responsabilité limitée (limited liability company) or companies benefiting from an equivalent status in other member states of the European Union or parties to the agreement on the European Economic Area and which have a tax treaty in place;

- Cooperative investment certificates and equity securities of cooperative companies with their registered office in a member state of the European Union.

Additional information for investors in the Federal Republic of Germany (unaudited)

For the following sub-funds of MIRABAUD (the "Company") no notification for distribution in the Federal Republic of Germany was submitted and Shares in these Sub-Funds may NOT be offered to investors within the scope of the German Investment Code. As a consequence, the following Sub-Funds are NOT available to investors in Germany:

- MIRABAUD UK EQUITY HIGH ALPHA
- MIRABAUD SERENITE
- MIRABAUD US SHORT TERM CREDIT FUND

BNP, Paribas Securities Services S.C.A. - Zweigniederlassung Frankfurt am Main, Europa Allee 12, 60327 Frankfurt am Main, has undertaken the function of Paying and Information Agent for the Federal Republic of Germany (the "German Paying and Information Agent").

Applications for the subscription, redemption and conversion of shares may be sent to the German Paying and Information Agent. All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the German Paying and Information Agent.

The articles of incorporation of the Company, the prospectus, the key investor information documents, the annual and semi-annual reports; each in hardcopy form; the issue, redemption and conversion prices of the shares and the notices to Shareholders are available free of charge at the office of the German Paying and Information Agent or the Management Company during usual business hours.

It is also possible to view the documentation referred to in the Prospectus section entitled "XVII. Periodical reports and publications" via the German Paying and Information Agent.

The issue, redemption and conversion prices of the shares will be published on the following website www.mirabaud-am.com.

Any notices to Shareholders will be published on the following website www.mirabaud-am.com.

In addition, communications will be made to investors in the Federal Republic of Germany by means of a durable medium (§ 167 Investment Code) in the following cases:

- a. suspension of the redemption of the shares,
- b. termination of the management of the Company or its liquidation,
- c. any amendments to the Articles of Incorporation which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- d. merger of the Company with one or more other funds and
- e. the change of the Company into a feeder fund or the modification of a master fund.
