

LIONTRUST

EUROPEAN OPPORTUNITIES FUND

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust European Opportunities Fund is a sub-fund of the Liontrust Investment Funds I and categorised as a UCITS scheme. This document is based upon the C GBP Accumulating share class (ISIN: GB00B8LF7310), which is the representative class for all other classes.

Objective

- To generate long term (5 years or more) capital growth.

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund invests at least 80% in shares of companies selected from Europe, excluding the UK. These are companies which, at the time of purchase, are incorporated, domiciled, listed or conduct significant business in Europe. The Fund may also invest up to 20% in companies outside of Europe excluding the UK, as well as in other eligible asset classes as detailed within the prospectus.
- Any income the Fund generates will be reinvested to grow the value of your investment.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The fund managers believe the key to generating long-term outperformance is through high conviction, long-term, research-led company selection. When combined with the portfolio construction, this approach can drive returns that are largely uncorrelated to the successes and failures of popular investment styles such as growth (investing in growing companies) and value (holding relatively cheap companies).
- There are three key elements to the investment process: collaborative idea generation, a culture of conviction and a three silo approach to portfolio construction.
- Collaborative idea generation: each member of the Liontrust Global Equity team has a research responsibility covering an industry sector of the global economy, a particular economic trend or a theme such as industries adopting new technology and changing consumer tastes. This clear division of responsibility ensures that the fund managers do not overlook "unfavoured" companies and allow structured peer challenge for the generation of validated, independent and sometimes atypical investment ideas that underpin the collaborative original research required.
- A culture of conviction: to enable ideas to drive investment returns rather than providing market returns, each one must be given sufficient weight in the portfolio and time to work. This results in concentrated portfolios with long holding periods.
- Three silo portfolio construction: portfolios are constructed to be "style-free" with the aim of providing more consistent returns over the economic cycle by ensuring that ideas drive returns rather than style bias.
- The investment process is implemented through four stages: idea generation, stock selection, portfolio construction, and monitoring and exiting.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily for its exposure to European companies.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- This Fund may have a concentrated portfolio, i.e. hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.
