## Investment Objective and Policy

To provide capital growth through investment in equity securities of European companies. In order to achieve the objective of the Fund, the Investment Manager will invest in a select portfolio of securities in special situations, where the Investment Manager believes a special situation to be a company whose future prospects are not fully reflected in its valuation.

## Risk Considerations

Investments in equities are subject to market risk and, potentially, to currency exchange rate risk. This fund may use financial derivative instruments as a part of the investment process. This may increase the fund's price volatility by amplifying market events.

## Performance Analysis

Benchmark	22.9	-14.5	26.8	16.1	-20.6

### Performance over 5 years (%)

**Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.**

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the Total Expense Ratio and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.
